Football.

The game of football introduced by the Englishmen last year has spread over four counties, and faeinated the able-bodied boys of that district. The game is explained hy a journal, an anthority on ameteur aport, as follows, in response to a request from Mr. Norman Price of the TIMES:

Association football while it is toand quite different from American Intercollegiate football, yet has many points that are common to at least one of the other two games. For example, there are eleven men on a side. These eleven players are divided into forwards, halfbacks, full-backs, and a goal-keeper. The five forwards, consisting of the right and left wing, with a centre forward, fill practically the same The workingmen of this country place as our seven rushers. Back insect had fallen into the gun barwill play football with Democratic of these stand the three half-backs -the centre, and the right and left half-back. Back of these egain stand the two full-backs, and immediatly in front of the goal-post is the goal-keeper.

By refering to the accompanying bore out on the other side. disgram, the positions of the members of the teams can be easily seen, In ancient times nothing better and to any one who understands American football the method of from the positions of these men. We read of a people who re- The duty of the five forwerds are land that was pre-eminent for its dribble the half (always with the

and hills, and productive of the through or over the forwards. It would be hard to find a vast fore, to be good kickers and fast runners. The full-backs must have somewhat the same qualities, though their steadiness, coolness, aud power to send the hall long distances must be even more prominent than in the case of the halfit is to protect the goal, and who, team, may take the ball in his hands and throw it, besides kicking and bunting it, must be the surest men on the team-should be, perhaps, the longest kicker, and ought to be heavy at the same time that he is agilo.

FLAG.

The field itself should be from one hundred to two hundred vards Himsy excuses, because in length, though one hundred and is little at much corner there is a flow and had been about a

of the field. The goal-posts are set up as in intercollegiate football -on the goal-lines-except that they are twenty-four feet apart, and a line is stretched across from one to the other ten feet obove the ground. The object of the geme ' is, of conrec, to force the ball under the line and between the posts, thus scoring a touch-down.

Lead Boring Insect.

Some weeks ago a "hunting tally different from Rngby Union, member," of Marlinton, extracted a cartridge from his Winchester rifle and found that the ball had been eaten away by a soft of grub which he found in the barrel of the gun. His impression was that the insect had smelled the leed and had gone down the barrel for a savory meal, but the more reasoneble view is that the unfortunate rel, as it leaned against the wall, end being in very much the same condition that a man would be who was incarcerated in a five hundred-foot well, and had started to

The specimen was sent to Mr. Frank Johnson, 1 of Brooklyn, an entomologist, who gives the comprehensive description of the insect below.

The larva belongs to the family Dermestide end probably to the genus Dermostes. The beetles of tribes were put in possession of a ing it as their particular duty to this family feed upon skins, leather, woolen goods, and carpets, and

Among the familiar species of commend him to the respectable pleasure to visit a section of our connecting line between the two Dermestidse is the carpet beetle or buffalo moth? (authrenus scroph-H, which is too familiar to

i tign. Its larva is decarpets, rags, etc. The the Republicans say, who bought brooks of water, of fountains and The three half-backs are supposed larvæ of species of Authrenna are especially fond of dried insects, end are dreaded by all collectors. They are primarily required, there- They conceal themselves so skillfully within the bodies of the insects which they are destroying, that the infested specimens can only be distinguished by the little heaps of dust, composed of exeremetory end waste matter, which appear on the white paper below.

I give a rough sketch of dermestes lavidarius, the bacon beetle. unlike any other member of the The beetle is black with a band of grey hair on the base of the wing covers. Its larva lives on skins, leather and bacon. As you may see from the figure, its larva resembles the one under consideration, but of conrec it is just as likely to be that of another species of Dermestes. The beetles of other species of Dermestes are black with grey bairs arranged in varying patterns. Their larve infect furs, skins, and, in the case of several species, the skins of dead animals.

The only other instance I know of where insects have penetrated lead is the following: A French naturalist imprisoned some beetles in lead boxes, and, on examining the boxes at a leter time; found that the heetles had penetrated the lead.

The present instance would seem even more remarkable.

As she was the prettiest girl anywhere the other side of the Swiss Cottage, and had a manner quite irresistlble, they gave her the best stall at the Church Bazaar for obvious reasons. And there strayed in a middle-aged backelor of immeculate cut, upon whom the immediately ponneed with-of all things in the world-a pair of baby's woollen boots!

which will commend itself at once to the home milliner, from the fact that for it old trimmings may be utilized. It is a hrand new model and a pretty example of the simple and small snmmer hats. A Nile green satin how and a green feather pompon with aigrette are used for its trimming, together with a small hunch of white roses placed at the back.

With this model for the amateur hat maker to ponder o'er, it is not amiss to offer one general anggestion, viz., in attaching trimming it is a mistake to use too many stitches. The proverhial timely stitch was not taken hy a millinor, and two or three stitubes in the center of a bow are as cerviceable as nine or more. If bowe are set too primly the effect may be ontirely disappointing. When fluishing the edges of bows or of a made hat, fold the moire or valvet neetly and exactly to meet at the edge, and then with a long millinery usedle slip stitch the edges, only bringing the needle out notween the folds at inter-

POPULAR ALPACA.

For the moment there is nothing so popular as alpaca. A gray one hai a wenderful bodies trimmed with narrow white braid, and small hone buttone placed between rows of this same narrow braid on the side seams at the back and front, for it turned back like the Tyrelean peasant jacket, of which it reminded me, and showed button heles on one side and buttons on the other, having a simple white satin ribbon bow at the waist. There were eream, pipings here and there, and a turn-down collar and the waistcoat, or rather shirt, was of cream batiste with a close-set line obcok of red and blue, uest and smart, the most difficult of all nuions. A black alpace skirt and jacket, with large alecves ending at the wrist, had an lrregular-shaped revers-in excuse for the introduction of some flue coru lawn exquisitely embroidered. The glery of it, however, was the blouse; a perfect hedles made of poult de soie, of the most brilliant cerise, with a llttle beurre lace toward the neck, opening with the selvedge, ferming a oascade on either side, showing a white satin front. With this the alpaca jacket could be wern, or not, as the wearer pleased. The sleeves were of the newest form, large at the top, narrowing toward the hand, the upper portien of the wrist falling in e polut over the hand, with the result of making tapering flugere much more tapering.

WITHOUT RINOS.

These who use rings and poies for their windew ourteins sometimes tire of seeing a thin ourtain susponded in this way, and wish they could dispose with riugh, but do not care to incur extra expunse for brass rods and fixtures. They may do so and yet retain the pole.

Turn over the upper edge of the ourtain as much as will leave the desired length, and thou with needle and thread run scross It twice, in the same way that you would treat a musliu cartein which le to be gathered on a cord. In this case it is to be the pole instead of a cerd, so the space must be

A lace, musliu or soriu cartain gathered oo a pole in this way, with a fulness left above, dresses the top of the window more prettily than when rings are used, especially when there is no cornica.

ENOWE TO AMERICAN COURTS.

Amount to \$80,000. YOR a score of years the resilers of American newspapers have been in the habit of seeing, here and there, at sporadie intervals and in unlooked for connections, mysterlous allusions to the great "Jones Connty calf case," and arithmotical geninaes have over and anon blanched before its involved accounts and gone drivelling to lumatio sayinms after valuely attempting to compute its costs and ascertain its re-

Twenty Years of Legislation Over

There is no stranger chapter in the annale of American law. The plaintiff himself writes ma: "Bome of the best farmers in Jones County lost all their property leng ago in lawing this case. Then their children and friends took it up and fought it as iong as they could. It is still pending!" And it has long since passed from the coudition of a neighborhood seandal to the magnificent proportions of a national ourlosity. This is how it came about:

malta.

Robert Johnson, an Ohio boy, of Virginia stock, went to farming in 1858 in Jones County, Iowa. In 1874 Farmer Potter, of Greene County, an acquaintance of Johnson, came to Johnson and said he wanted to bny some calves. A man named Smith, a stranger thereabouts, who had since succeeded in concesting himself from observation, must have heard of this; he went to Johnson and sold him five small dark oalves, which on June 4, 1874, Johnson delivered to Petter. Just then Farmer John Fereman, of Jones County, discovered that five calves had disappeared from his farm. He had seen Johnson drive five calvee away, to deilver to Potter, but made no inquiry shout the matter until afterward. Farmer Peter Onstott saw Farmer Johnson deliver the five caives to Drover Potter. When Farmer Foreman missed his calves he followed Drover Potter to Greene County, Iowa, and found his missing property in Potter's herd. Potter said he had hought from Johnson the calves which Foreman now identified ashis own. So Foreman went back to Jones County and demanded from Johnson the value of his missing ealves, which Johnson, though an innocent man, gave to Foreman in the shape of a note for \$45.

Johnson then tried to find the mysterione villain Smith, intending, no doubt, to make Smith give him (Johnson) a note for \$45, but Smith had vanished. Determined to have satisfaction somehow, Johnson, who was then only thirty years of age, took a jount ont to Greene County, and on being shown by Potter the calves which Farmer Foreman had oisimed as his missing property, awore that he (Johnson) had never sold those calves to Potter and that he would not pay the \$45 notche had given to Foreman.

Mr. Foreman then concluded that it was time for him to take another hand in the game. He was fairly pining for the exoltement of a law auit. He sent word to Potter that if he (Potter) did not institute eriminal proceedings against Johnson, he (viz., Foreman,) would invoke the majesty of the criminal law against him (Potter). So Potter went all the way to Jones County again, joined the Anti-Horse Thief Association and succeeded in having the unfortunate Johnson indicted for the larceny of \$15 worth of calves. The mysterious villain named Smith still remained in abeyance. This was in December, 1874. Now comes fun.

The indictment was quashed in May, 1876. In December, 1876, a new indictment was found and a change of veune to Cedar County was seenred hy Johnson. In 1876 there was a triai, and the jury atoed eleven to one for sequitting Johnson. Then there was another trial and Johnson was sognitted, Farmer Peter Oustott testifying that the calves Foreman elalmed from Potter were not the calves Johnson had sold to Potter. and that Potter knew it, and even admitted it, but had advised Farmer Quatott to keep bla month shnt, which Farmer Onstott would under no circumstances agree to do.

"Helghbo," said Farmer Johnson to himself after hearing Farmer Onstott testily; "let us heve more law." So he began an action for \$10, . 000 danisges in Anamous, Linu County, against seven prominent members of the Anti-Horse Thief Association. A verliet of \$3000 was rendered in Johnson's favor, but the Julge, probably hatlog to ato a lead. ing calt case spoiled, as it were, set the vardict uside. The defaulants were anti-horse thiores, as follows E V Mill r, Davil Vall, John Foraman, Ab Miller, Harmon Keller and b. D Pott r. Phy were al glad

NO OTICIONO ACUSTOS TRE ACTOLICIO Harmon Kellar, Bo away goes the verdlet, and everybody said, "Set 'em ap again !"

\$45-Costs and Judgments Now The Jones County calf case was now moved to Blackhawk County, lowa. Judge Bagg got hold of the care, and whan the jury found a verdict of 25000 in Johnson's favor he, Bagg, promptly ovarruled a motion fr a new trial and entered judgments against the six remaining anti-burso thieves.

The Sapreme Court of lows now took a back at the Jones County nalf case and reversed this judgment on appeal. Johnson, who had been worth more than \$10,000 when the caif care hegan, was now (1888) almost a pauper. and the costs taxed in court, independent of enormous attorneys' fees and expenses, were \$3356.42. Seventy witnesses were held for eleven days in the town of Blackhawk, and the hotel had ench a boom that it declared a quarterly dividend before the case was half over. There was another trial and another verdiet for Johnson, who had become so used to getting verdicts that he was almost reconciled to not gatting anything also. The Supreme Court had become quite interested in the Jones County oalf ease by this time, however, and it promply set this verdlet aside also.

"There was a sound of revelry by night" in Waterioo soon afterward, for it was formally announced that the Jones County oalf case was to be tried all over again. Mr. Johnson got another verdict for \$1000, and the six anti-horse thieves again appealed to the Supreme Court. They didn't want to pay \$7000 worth of court costs if they could help it, but the Supreme Court wouldn't reverse the judgment.

Having been muloted in this grievons manner the aix anti-horse thieves now came into court once more and asked if they conidn't have \$1000 knocked off the hill of costs they had to pay, insamneh as Harmon Kellar, who had been let off hy the Clinton County Judge, ought to pay at least one-seventh of the costs for all the fun he had had. Judge Linehan overrnled the motion of the alx anti-horse thieves, hat they were not discoucerted by a little thing like that, and they once more appealed to the Supreme Court of Iows, where the coss is now pending on this point. The six auti-horse thleves are pretty well rnined by this time, and Johnson, who has had to leave Jones County, and lives near by in Cedar County, may eventually get back a part of the comfortable little fortune he has blown in on the \$45 oalves. Dozens of lawyers have fattened on calf case fees and 114 jurors have heard its merits. Governor Horace Boice was one of the lawyers and Connsolor C. E. Wheelor, who hegan "as office bey to an attorney's firm" when the case began, is now a moss grown limb of the law.

The plaintiff has paid ont \$4300 that he knows of. "The costs," he says, "which stand against the defendants run up to some thirty thensand dol. lars. Of the eight trial judges who have heard the case at one time or another, two are dead." Two of the dofendants, the auti-horse thieves - viz., E. V. Miller and Abs Miller-ere dead. And the east case is very much allva - New York Herald.

give Managib, areates

apprets the torigonales

Clar Clement came to reheareal one morning to a bad humor. Generally a manager gets relies from this mainly in proportion to the amount of trouble and annoyan o he can cause the mu h imposed upon pro ertyman. 's he play they were rehearing required a storm offe t, and to work this the property-man had been stational at the thomser sheet in the wings. At a certain cue he was to rattle the thunder. Over and over again the poor boy tried it, each time the rehearval coming to a cead standstill, while Mr. Clement, in rage, reiled ont:

"Not a bit like it; haven't you score enough to jork that thunder sheet right?"

A ter this had been enacted a dozed times Mr. C said: 'Get away from bere. Gostand off while the stage manager gives the eue tor the thunder and I'll pull the sheet; then see if you can work it like I do."

This was all done. Then eatd Mr. Clement: "Now, air, see if you can do that just like I old: but wait. I will go sit down in the auditorium and see if it sounds all right down thore."

He then took a seat in the auditorium. The long-suffering pro erty mad took his jost at the thunger sheet In the meantime a real storm has an idenly commenced outside, but the actors had not cle prered la The stage manager gave the cue, a hursting cal of real thunder was heard. This sho ked the projecty boy so he forgot to jerk hie thunder, but Mr Clement, not knowing but what the box has caused this thunder and determined not to be satisfied. · dashed up and down the alsie.

"Not a bit like the Not a bit like

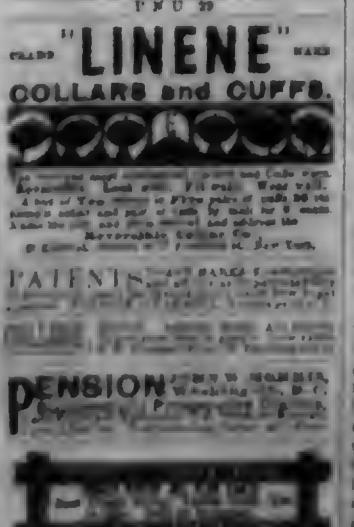

The proverty boy calmly retorted: "Even the Almighty can't make thunder to suit you!"

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live better than others and enjoy life more, with less expenditure, hy more promptly adapting the world's best products to the needs of physical being will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Flga.

Its excellence is due to its presenting lo the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constluction. It has given actisfaction to millions and met with the approval of the medical profession, became it acts on the Ridneys, Liver and Bowels without weakoning them and it is perfectly free from avery objectionable substance.

Syrup of Figs is for sale by all drugciste in 600 and \$1 bottles, but it is manafactured by the California Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

AN IMPORTANT INDUSTRY ON THE RAST COAST OF PLORIDA

The Pickers Have to Wear Mittens-Plants Mature in Two Years-Increasing Yield-Average Profits.

ITTENS la mid-sammer l The combination seems incongruous, yet the traveler up and down the Indian River at this season of the year, writes a Jensen (Fig.) correspondent of the New York Tribune, is constantly confronted in the country stores with signs like this: "Mittens! Mittens! Bingles 25 cents, doubles 35." If he le "new" in the country, and if he has any enriosity, he will learn upon inquiry that these mittens are not far keeping off the sold, but for protectlng the hands of the plneapple pickers. Sometimes thay are displayed on lines strong across the store, and they are queer things to look at-rudely shaped gauntlets of coarse white duck or canvas; long enough to reach from the fluger-tips to the albow, and provided with a "pocket" for the forefinger as well as for the thumb. A protection of some kind is absolutely necessary for the pineapple pickers, the long, narrow leaves of the plant bristling all about the apple in the centre, and their edges being as sharp and dangerons as saw teeth. These mittens are so far the best device known for the purpose. The picker has both hands mittened; with the left he reizes the plant and pushes away the leaves from the fruit, while with his right he twists off the apple from the stalk, being careful to leave the 'snekers," which grow la a clrole ail about its hase. These snekers are need for setting ont new plantations, and are in great demand all through the pineapple country after the crop ls off and marketed.

The pineapple or ap of the Florida East Coast-not including the Keysis estimated this year all the way from 40,000 to 55,000 orates. These erates are in size about that of the regulation orange box, but in weight they will average, when filled with "pines," over twice as moch .- The freight agents figure on about 160 pounds to the orate, or 150 crates to the car. Bul sometimes nearly 200 erates are stowed away in a car, if cars are scarce. The average number of pineapples to the erate is aixty-four, but the fruit varies in size, some varieties growing very large and heavy. A conservative estimate of this year's crop is about 50,000 crates, or fully 3,200,000 pineapples.

The marketing season extands over about seven weeks, beginning late in May and closing about the middle of July. There are some late varieties and some late loads, so that a few straggling shipments continue up into the month of Angust and cometimes as late as September.

So great has been the stimulans given to the pineapple indostry here during the last three years that a crop of fully 100,000 orates is expected in 1895. The plantations come into bearing la two years from the planting, and the oost of oultivation is not great. A grower of fonrieon years' experience gives the following figures:

If the land cost \$200 per scro-an average price—this would make the cost of one sore, at the end of two years, \$490, to which must be added 12 per cent for interest on the lnvestment, taxes, etc. - or a grand total of \$548.80. The yield per sore at the end of the second year ought to be 14,000 "pines"—one for every plant; but a fair estimate would be 12,500 apples, which at 5 cents apiece net, would bring \$625 as a return upon an investment of \$548.80 for two years. This is something over 87 per cent., or 48.5 per cent. per year. After the first erop there is no expense for clearing the land, and none for plants or setting them out-in fact a small ravenna can be had from the sale of

Some of our pioneer growers here have grown rich la the business. It is said that one year's crop not long ago brought \$18,000 net to Captain T. E. Biehards, of Eden, about three miles north of here. There is no ludustry in the world which pays better than pineapple growing on the Indian River, and by the year 1900 it promises to yield an aggregate annual reverse of \$5,000,000.

CARR OF STRAW MATTING.

Where a really good article was orlginally purchased, it is frequently the case that colors inde, and the straw gets a shabby look before the fibre la broken or the economical soul can bring herself to replace It with

When brought face to face with this new difficulty, remove the tacks to that no broken edges will mar the matting, and then, roll after roll, let It be thoroughly besten. Great care is again needed to prevent cracking the straw grown hrittle with age. It is advisable to plu an old dnst-cloth over the brush of the broom, after which that implement may be used with effect.

When the beating is done, lay the strips down and sprinkle eith fine cornmeal; and be not sparing of this flour, for it needs to fill every crack and erevice. New use a perfectly clean broom, and brush with great sigor, for every particle of meal must come eway. - New York Journal.

HEALTHPUL COOKERY.

When we reflect upon the dependence of the mind apon the bodily condltion, writes Fanny L. Fancher, we cannot escape the conviction that a gnod cook is a benefactor, and the caterer who feeds his follow mon wisely, is as great as he who rules a

The numerous writers upon this subject, and the cooking schools, or olubs, springing up here and there prove that it is gaining the interest which its importance domands. From this we opins that the twentieth cen tnry maiden may boast of her ability to render Beethoven's sonatas; hnt her skill in the oulinary art will he her greater pride. Then, Indeed. will dyspepsia be routed, since improper diet will not be from infancy the regimen. When the appetite is not depraved, its cravings will often be a guide to proper diot. Sugar, so often eraved by children, was formerly considered a luxnry, but now it is deemed enecessity eince it furnishes calorle for those whose weak digestion forbids much fat or oily foods.

The rigor of winter demands meat end other heat-producing material. The economic honsewife prepares her meat by roasting or boiling; indeed, the frying pan is said to be the enrse of American enterior. Haste surely makes wasto in the cooking of meats. The writer's formula for roasting beef will be found profitable.

Having sconred a good roast--the dealer soon learns where he can send poor cuts-procood as follows: Ruh over the surface a scant handful of salt to three pounds of mest; place in shallow kettle, the kind used by must honsewives for frylng fried cakes; oover with inverted ple-tin and place in a piping hot oven. After haking fast for ten minutes to preserve the inless, lower the temperature. When partially done, turn over the meat. In this process no hasting is necessary and the generated steam prevents overcooking. This is the principle of the patent beker which all cannot pro-

When ready for the oven do not add water, as is the enstom, in open pans. When baked, however, and romoved from the kettle, water and flour may be added to the meat broth for the desired gravy. Try this way, and you will nover again roast meat in an open drlpping pan. - New York Observer.

RECIPES.

Peach Oream-Put through a sleve enough coft peaches to make one quart of pulp. Put ioto a freezer one quart of oream and one colleccupful of snger. When about two-thirds frozen add the psaches, and continue to freeze until firm. The amount of sugar for this croam should be increased or diminished, according to the acidity of the peaches.

Economy Pudding-Lay thick slices of stale snushine or spouge cake in the oven until delicately browned, and line a glass dish with them. Whip half a tumbler of apple, quince or strawberry jelly with an egg beater until light; atir in the beates whitee of two eggs and pile this over the cake, decorating with fresh strawbarries or with fresh or caudied cher-

ries. Baked Hash-Pnt a plnt of nucooked chopped potatoes in a sancepan, with a half pful of boiling water, stow five minutes, aid the mest and slew ten mluutes longer, add gravy, if any is needed to moisten; take from the fire and stir lu two bealen ouge and season to taste; half a cup of stawe I mushrooms is a great addition Turn into a buttered dish and bake teenty minutes.

Grumpsla-Scald a pint of milk lo the sysping; when lukewarm, stir in three cups of flour, a tempopulal of salt, foar out es of malte ! batter an i half a cats of coupress t year! dissolval is lukeward water, heat well and let staul over aig t. Mr. O'Shea, the well-known warcorrespondent, tells the following anecdote of an adventure with a herd of elephants: "A young friend asked me once to show him some elephants, and I took him with me. having first borrowed an apron and filled it with oranges. This ha was to carry while accompanying me to the stable; but the moment we reached the door the bord set up such a trumpeting-they had scented the fruit-that he dropped the aprou and its contents and scuttled off like a scared rabbit. There were eight elephants, and when I picked up tha oranges I found I had five-andtwenty. I walked deliberately along the line, giving one to each. When I got to the extremity of the narrow stable I turned, and was about to begin distribution again, when I suddealy reflected that if elephant No. 7 in the row saw me give two oranges la auccession to No. 8 he might imsgine he was being cheated, and give me a samek with his proboscis-that is where the elephant fails short of the human being-so I went to the door and began de navo ae befare.

Bal Ball Ball!

Thrice I went along the ilna, and then I was lo a fix. I had one orange left, and I had to get beck toward the door. Every elephant in that herd had his greedy gaze fecused on that orange. It was as much as my lifa was worth to give it to any one of them. What was I to do? I hald it up conspicuously, coolly pecked it, and sucked it myself. It was most amusing to see the way those elephants nudged each other and shook their ponderous sides. They thoroughly entered into the humor of the thing."

THE Cincinatti Tribune has form. ed an estimate of the vote in West Virginia, and, very naturally, claims the result for the Republicans. It figures that Huling will he elected by 250 plurality. Il reduces the Greenbrier majority by 300 votes, and that of Pocaliontas by fifty per cent. Not a Democrat or Republican, living in Pocahontas, claims that the Republican party will gain a vote. It is the same case in Greenbrier. This is personal knowledge.

How is this for a guess as electing Democrats over Republicans: Alderson, 1800; Wilson, 600; Howard, 1000; Harvey, tic; Logan. 500; Pocahontas will cast about 1400 votes; Mooman, 300; Beard 200; Barlow, 400; Marlinton, 400.

Every vote against the candidutes of the Democratic is a vote agulast public morality, honesty and ecanonay in the administration of the affairs of the government.-Gazettk.

What is

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains not ther Oplum, Morphine nor other Narcotte substance. It is a harmless substitute for Paregorle, Drops, Soothing Syrups, and Castor Oil. It is Pleasant. Its guarantee is thirty years' use by Militions of Mothers. Castoria destroys Worms and allays fevertsliness. Castoria prevents vomiting Sour Curd. cures Diarrhoa and Wind Colic. Castoria relieves toething troubles, cures constipation and Antuiency. Castoria assimilates the food, regulates the stomach and bowets, giving healthy and natural sleep. Castoria is the Children's Panacea-the Mother's Friend.

Castoria.

"Castoria is an excellent medicine for childran. Mothers have repeatedly told me of its good effect upon their children."

> Da. G. C. Oznoop, Lowell, Mass.

"Castoria'is the best runsedy for children of which I am acqualated. I hope the day is not far distant when mothers will consider the real Interest of their children, and use Castoria instead of the various quack nostrums which are destroying their loved ones, by forcing opinio, morphine, soothing syrup and other hurtful agents down their throats, thereby sending them to premature graves,"

> Da. J. F. KINCHELOR, Cooway, Ark.

Castoria

"Cartoria is to well adopted to children that I recommend it as superior to any prescription known to me." IL A. ARCHER, M. D.,

111 So. Oxford St., Brooklyn, N. Y.

"Our physicians in the children's department have spoken highly of their experience in their outside practice with Castoria, and although we only have among our medical supplies what is known as regular products, yet we are free to confess that the merits of Castoria has won us to look with LAVOR UPID IL."

Shall the Court-House be Removed?

This is a question to be determined by the voters of this county at the election next week. There should be an doubt as to the re Marlinton is oearer geographi-

cally, as well as io point of population to the center of the county. Thereto: The new court-house and jail at this place are nearing completion: already eleven thousand dollars have been paid to the contractor, for their construction, and the residne of the \$28,982 has been provided for by proper levy, by the County Court, and when the taxes are paid this year, the new courthouse and jail will have been paid for, and whether the court-house is removed to Huntersville or not the court-house and jail at Marlinto a must now be paid for ia full: because there is a complete and hinding contract between the County Court and the Manly Mannfacturing Company, upon the validity of which the Circuit Court has already passed in the suit of J H. Doyle and others against the County Court, in dissolving the ininnotion granted the plaintills. The old conrt-house and jail have been sold, and the sale unanimonsly confirmed by the County Court What thea could be gained by reinoving the court-house to Huntersville?

The taxes are levied and must be paid, und removing the conrthouse to Huntersville will not relieve the tax-payers or slop the Sheriff from collecting the taxes. And if the court-house is removed to Huntersville, whot is the first thing to do to save paying taxesis it not to buy back the lot upon which the old court-house stands, buy the old conri-house end jail the old court-house sufficiently to nover desire to go through them ngain; and as to the jail! its security wus tested only a week or so ago, when George Gray walked out

Why thus abaudon all the moncy now invested in the now buildings at Morliuton, simply to benefit two or three individuals at Huntersville, of great inconvenience to o great majority of the people of duy,

The person who tells the voters of this county that the expense of crecting the new buildings at Murliuton has just 'commeuced and that it will require sevoral levies yet to complete them, is either a jubbering idiot or o willfuland malicious falsifier, and uses this foul

means to get votes for removal. Will the people of this county vote to obandon a \$28,932 court house and juil at Marlinton in order that they may have the privilege of buying the lot upon which the old conrt-house and joil are leented at Huntersville, at Huntersville prices for real-estate, and for the purpose of enriching certain landed proprietors in and around that town, at the costs and inconvenience of the tax-payers of this county. We think not. The people of Pocahontas county are too sensible and intelligent to vote against their own interests because n fow interested individuals have howled about high taxes in their own behalf.

Horse Killed.

Last Saturday evening about 8 o'clock, Mr. Withrow McCliutic. driving along the read just above Marlinton, on the river, met in a ruther narrow place, a two horse team, driven by a boy from Harrison county. The night was intensely dark, and in passing, rather rapidly, the shaft of Mr. McClintie's cart, struck the near horse of the team, in the breast "just where you would stick a pig." killing the crutte voters aftend the polls. horse instantly. The less of his horse was a serious blow to the young man, who was ilriving the team, as it had been bought und paid for solely by daily work, and on tituled his whilst cutire prop-

Facts For the People.

As a mirunderstanding a ems to exist in some sections of this county in regard to the expenditure of jublic money in the construction of the new Court-House at Marlin. ton, we deem it proper to make the following statement in relation

At the July term of the County Court, 1894, J. C. Arbogast, the Sheriff of this county, made a settlement in relation to county funds from which it is shown that at that time, he had in his hands, due The rounly, \$12.601.15. At the same term of said court, a lovy for an additional sum, to-wit \$15,917.26, which sum in coanection with the \$5000 to be paid by Col. J. T. Mc-Graw and others, makes \$33,518,41 the gross sum already provided for building the Court-House and Jail complete at the cautract price of \$28,932, leaving a balance fo county expehco of \$4,586,41 to be used in paying running expenses.

The entire amount to complete the buildings is now levied, and the buildings are now well advonced in construction.

Respectfully submitted, G.M. KEE. | Commissioners, C. E. BEARD,

Pr to 1 the frage funigratime to this country was countly it not to marely during and after the Irish lumins in 1847, and since then the immigration has been on a needs merce before even to history.

That one affect of the pants has been to broaden the market for American greads is shown, maintains the Chicago Harald, by the experts for elevan mouths, which have szocoded imports by \$231,612,859.

Why do not nome farmers who find no money in their present style of grope try raising sunflower seed? asks the Courier-Journal, The North Osroline Station found in apperlmenting with sunflowers as a farm crop that ther paid well. Though a new thing In this country it is not altogather new, for Russia has raised this crop for years. At the North Carolina Station, the average yield was sixty-five bushels. There is really no waste to the plants. Oil is expressed from tha seeds, and halls or shalls used for fuel. The stalks and seedcups are fed to sheep.

One of the documents submitted by Erastna Wiman's connecl in the Canadian's trial for forgery was a statemont showing the enormous profits of the mercantile agency business. According to this statement the Dun concorn sarned \$345,780 in 1885, and the profits steadily increased natil, in 1892, they reached \$525,000, making the total for eight years of \$8,818,500. "This enermous sum being the nel profit of only one concern in the husiness, "remarks the Atlanta Constitution, "we are only laft to conjecture how much money the business men of America spend to learn the financial standing of their brothers, and inferentially how enormous must be the original transactions npon which the agency business is merely a parasite."

A careful article in the New York Tribune shows the enormous strides made by the orange industry in a littla over twenty years. It was only in 1678 that Fierids oranges were first sent to the New York market, but io ten years the industry had increased so rapidly that it had seriously cut into the Mediterranean trade. In 1886 1,798,000 boxes, of Siciliae orangas were imported, while ln 1891 this number had fallen to 692,000 boxes. The Oslifornia orange erop is now an Important factor in the trada, as no less than 2,500,000 boxes wera shipped from this Stata to the East last year. It will not be long, with naw orange groves coming into bearing every year, before California will some up to the 6,000,000 boxes now produced by Fiorlds.

The removal of the Capital of Longiana from Baton Ronge to New Orleans has been again proposed in the State Legislature is the form of a resolution, to submit the question to the popular vote. It is doubtful, however, adds the Naw York Post, whather the people would record themselves in favor of a change, for in 1879-at a time when the State Capitoi was aimost fallen in ruins and the departmante were without quarters--the question in the same form was belorathem, and they decided that Baton Bouga should still be the Capital. A local paper says: "The arguments are to favor of Naw Orleans as the Capital, but we do not imagina that the people of Louisians are writing, destate these arguments, to got the expense of a change now. SEMPRONIA,

Erather pride ouresives upon being small but selectsmall, that is, as a community. "Sefect!" old Miss Marberry is reported to have observed. They eall themselves relect, do they? Where were they

selected from? That is what I want to knoa." Of course, no one satisfied her impertinent enriceity. We all knew where we came from, if she didn't, and some of as held strong opinione as to Miss Mayberry's ultimate destination, hot that is neither here nor

Still, it was "rather a startler" when old Mr. Eggleston, ol Bermondsey, eaniedown to Willowtown to live. He was fabulously rich; he swallowed peas with his knife and called them "marrerfata;" he was impatient, headstrong, choleric, apopiectic. Two important facts saved him from sectal ostracism—his aldermanie dinners and his daughter Semprousa.

It is not very easy to describe Sempronia. Her heanty had an olusive way of delying description. When also entered a room people were vaguely conscious that something pleasant had happened. If you were fortunate amongh to take her in to dinner she coofirmed that impression. Eren mock turtle lost its mockery when she sat beside you. Not that eid Eggleston often pot people off with mock turtle; he was far too fond of dipping his white beard in the gennine thing to wish to impose imitations on his guesta.

Poor Harry Nichelson's troubles, however, hegan the first time he dined at the Egglestons', owing to Mr. Eggleston's ambiguous speech. Mr. Egglest/m was gobbling away at his sonp and saly left off to observe that he "couldn't 'eat the 'ot 'ovec."

"But, my dear sir," observed Harry, "nothing but an ostrich could heat your liothousa."

"Don't you be imperent, young man," retorted Mr. Eggieston, "or you and mu'li 'ave words. I will 'est freak."

it if I like." Sempronia threw oil on the troubled waters, but not before Mr. Eggleston had remarked to the remains of his sonp that Harry was "a nordacious sparrer."

Sempronia was very foud of her father. She didn't obtrade the fact, hat skilfally contrived to throw her mantle over him at all the social fouctions of the neighborhood. It soon became an understood thing that any one who poked fun at Mr. Eggleston had no chance ol winning the good graces of his beautiful daughter. Her mother had been a lady-a very feeble one-and married Eggleston on account of his strongmindedness.

Mrs. Eggleston's relatives were so astonuded by the originality of such a reason that they ent her. It proved on Mrs. Egglesion a good deal, hut she lived very happily with her hasband until Sempronla was born. Theu, lika Mrs. Dombey, "she could't make an effort"-and dled! People who saw poor Mr. Eggleston at that awful time said that he was as one distraught. Ha sat by the dead woman, holding her hand, nntll sha was taken away to the grava. Then he fell down in a at. He was only prevented from following his wife into the silent land hy hearing the doctors say ha hadu't a change of living. In order to coutradict them he recovered. If he couldn't "'est tha 'oi 'ouse" it wasu't for want of trying his jaws on every. thing also he came across.

Still, with all his faults, old Mr. Eggleston was much beloved in Willuwtown. His speech when he first took the char at the "Penny Iteadings" was a modal of metaphorical research. "When I bok round 'ere," he said, at eking his determined thnubs well lato his white waistcoat, "I asks myso f w -t brings me 'ere, and I mays to l, says 1-Money! I've never

tall I'm not real Phones, and only cincmargarine), but I've made-Money Nobody d call me s new faid Brahma, I'm only a muteen to-the shil in'an ltake as back-if 'tgh-French-egg, but I ve made-Money, And now I ve made menay I mean to spend it on people I like, so I'll be very giad if you'll all come up to supper when the performance is over. Mr. Nicholson's agoin' to sing The 'esri Bowed Down. I don't know what it's bowed down about, but I deesay it's very pretty." And Mr. Egglaston retired amid shag like Old Ikey does. Ha enjoys thunderous applause. Harry Nicholson cang 'The Heart

Bowed Down" with great effect. "Re's always up at the 'all," Mr. Egglestou informed people. He liked Nicholson now, although he couldn't resist calling him "a confounded young puppy for sniggerin' because I got flummoxed and said 'Mr. Recitation will give a Smith' the other night. He's of a good fam'ly, Nicholson in I should liks my danghter to marry into a good fam'ly. I never was much of a fam'ly man myself, though I dessay I could bny a crest and a Latin mortar at the Erald's College. Still, it's a fina thing to have a picture gallery full of beantiful murderesses and ruffans in armor and Sir 'Ugos and Sir Lunchaiots, and Lady Ediths of the white 'and, and aitchlike."

Sempronia did net object to Nicholson's picture galiery at all. She and Niciroison were aiways together. Of conrae, Nichelson was poor. Indeed, his picture gallery was his chinf possession. He was expected to live ap to it. People supposed that he did something for a fiving, but no one knew exactly what it was One day, however, it occurred to him that he was in love.

"I'm going away," he said shraptly to Miss Eggleston.

They were sitting belore the draw. ing room fire. It was only 6.80, but just after Christman it is very dark at that time. Miss Eggleston was clad in black volvet, and what Mr. Eggloston called "the family dimons" sparkled, on her white neck. Mr. Eggleston always insisted on her wearing jewels at dinner. He was mortally afraid of his anspicious-looking butier, as that stony-hearted functionary had threatened "to resign" if Mr. Eggleston dared to eit down to dinner in a shooting jacket. "If people don't respect themselves," he had observed. "f do. When I served my Lord of Ditchwater he always dressed for dinner, and I'm not agoio' to demean myself he waiting on a parvence who don't." That had settled it. Rather than he called by such an awful word as "parvence." Mr. Eggleston

hatohet. When Nieholson said that he was going away Sempronia didn't like it nt all. Her blue eyes looked into the fire with a rather abstracted air. The firelight played npon her beantiful, if somewhat hanghty features. What right a hntterman's daughter had to resemble the De Veres of remance it was difficult to discover, but she indnhltahly did so. Her features were neither faulty faultless nor splendidiy ouli; they cortainly were very bean-

apologized, and Porkins harred the

"Going away!" she asked. "Surely, Mr. Nicholson, this is rather a sudden

Nicholson rose from his chair and stood looking down on her. He was black as a crow, but with a prepossousing hlackness. He had a very nineical volce, his gayety was infections, and people lingered to listen to his laughlug wittieisms. But he did not seem inclined to be fanny to-night. For so mereurial a youth he was decidedly serious. His hand twisted the boantiful stud in his lumacolate shirt front. Altogether he was very preceenpied. The rng wasn't hig euough. He trod on the St. Bernard and was strickon with remorse.

"Such an owi is well out of the way," he said. "Miss Eggleston, I'll go."

"You forget that you dine with us." "Oh, no; I don't forget. Perhaps you will lat me off. I'm not fit for the giddy throng to-night."

"It isn't a giddy throng. There will be papa and Mr. Gahblus. True, Mr. Gubblus is rolatile--away from Mrs. Guhhins- hat you cannot call papa giddy."

"No. I'm off te-morrow. In faut, I've made a discovery." "In the pietnre gallery? Or horied

treasure to the paddock?" "Don't sooff at my poverty," he said with repressed feeling. "Don't sooff at that. God knows I never felt it until to-ulght "

"Aud why to-night?" "To-night?" with assumed indifferonce. "Well, oven the lightest-hearted fellow flods Black Care perching on his shoolder sometimes. I-1 was

actually thinking this afternoon." "Nu wonder you are tired. " But she didn't look at him.

"Yes; fonur, ween't il? Actually thinking. What do you think I thought about?" "I doo't know. Something inter-

estiog?

"I cau't say that. It seemed inter-

Da. 4 Dicagg to lifera ab ; can thaib ic "So you lit up?" "Yes, I lis up. Then I sat down again; then I got up then I sat down Nearly were out the chair before fil finished." "That was serious "

"It was I wanted something Didn't know what I wanted, so called myself names and pitched my eigar away, Which was rash. It was a good eigar," regretfully; "and I haven't many left. Must take to smoking

"Don't be horrid."

"I got tired of walking up and down, so I stopped short in the middle of the floor, and fixed my ayas upon the carpet pattern. It's an awfully good plan that. The carpet spoke bank to me. It said-"

'Yes? "Oh, it said, you hone-idle beggar, you've wasted your manhood, you have tottered in the vineyard (metaphorically, of course - you can't totter in vinayards where there aren't anystands to resson) while others toiled, and all that sort of thing, don't you know. Yet all the time, some impossible dream—a dream ol great happinem-han hannted you. You have drifted, drifted, like a hoat bottom up, with this happiness quite close to you. You had but to go forth into the world, and-and win your spars-and you didn't go. That's what the carpet said. Extraordinary bit of Brussels, wasn't lt?"

"Yes. Didn't it say anything else?" "Lots of things. It said I must lose this roman I loved because I was rnined."

"Rnined!"

"Yes, rained; and all that sort ol thing. I have been living on capital instead of interest. The only redeeming feature about the affair is that the gallery will have to go. You see, it'e hard lines on a fel ow to have nothing it." hut a gailery lelt to him; he can't live up to it; and yet he has to de so. None of those rufflanly old ancestors of mine ever did a day's work in their lives. I'm afraid I haven't done much. But why should I hore you with this?"

"You don't hore me, and you -suf-

"It is a trifle nuplessant."

"You didn't think it would be par-

tleniarly pleasant?" "I was herridly hered by that gallery. Lady Edith of the White Hand will fetch a good price from a coap man. I couldn't have stood that depressing female much longer. She had a way of sticking her hand out at one,

as if a fellow couldn't live up to It. I'm sare I didu't want live ap to it. I'm thinking of joining the mounted police in the Northwest Territory. They're a spiendid lot; and there's always the pleasureable excitement of heing scalped by The-Man-Who-Rides-A-Mule With-His-Face-To-The-Tail, or tome other equally long-named

"The experience wouldn't be of much use to you because it could only happen once."

"Yes, I suppose so. There are worse

things than being sculped." "Possibly."

"And so goodhy to the old timesand to—to Lady Edith. When a man is on the hrink of rain it is best for him to forget—everything."

"Yes," she said almost inaudibly. "It is hest for him to forget, hat not -everything. I-I am very sorry for

He pressed her hand lightly to his

lips. She know that this was his characteristic farewell to the hopea he had cherished. Womanlike, she was engry at his silence. And then his wretched pride. She had enough money for both. What did his poverty matter? Hadn't he that delightful gallery of ancestors, some of whom, if report spoke truly, were little hotter than the wleked. You couldn't hay family portraite like that. There were plenty of dahlous old masters in the market, but few and on htedly "old mississes," as Mr. Eggleston called

And here was this irrational youth, who loved her, going off to he scalped hy Pawnees, or Comanches, or Slonx, or Apaches, or any other outlandish tribe of Indiana with whom fate might confront him. Why not stay at home and have his hair pulled only in the family circle? And it was such heautiful hair |

Ha disappeared in the darkness, feeling that desperate sorrow which only comes to a man once in a lifeblme, for the simple reason that he couldn't possibly live through it twice. "By Jove," he mottered between his set teeth, "it would go hard with any one who crossed me touight."

"Har-Harry!" gurgled u choking voice from the ahrobs. "Elp-

The next moment Harry had jumped into the bushes. A bullet whizzed by his car as he did so, and a cowardly inflian who had half strangice Mr.

Eggieton fled into the noknown. "My wife's portrait," cried Mr. Eggleston. 'They knocked ma dowo as I was comiog up the walk -

Mildelington designed and particular and an ther shot a red to course, tearing dart to his about tor a the (el) forward on his lane, whilet the erackemen made off access the told, enraing their own stupidity in testaning operations so premetorely

Purking disappeared with them. Harry was carried late the by se and fail on a couch. Doctors wire telographed for right and felt For hours he ramalned with pailed features and closed ayes. The doctors shok their hands and looked wise. The wonnil was a serious one; the limitet hard to find; il certain thinge didn't happen the patient would recover; if they did happen, he wouldn't; that was all that could be artracted from them as they nodded with sphinx-lika gravity, and returned to their patient.

Sempronia sat beside Harry through the long night. It was necless to dissimulate any more. the was quite tearious and as white as wax. Every now and then she moistered his lips or smoothed the pillow, but did not give way to her grief. It was only toward morning on the second day after the doctors had extracted the buffet that she betrayed any excitement. In the cold, gray dawn a robin, deinded into momentary cheerfulness hy the thought that spring would surely come some day, began to twitter his cheery melody to the casement's glimmering square.

The song of the bird smote Sempronia. She shivered, and, hending over the wounded man, kissed him passionately. "Ah," she mouned, as sky flung berseif on her knees by the outch, "I was cold and hard and cruel to you, hnt I never meant to let you leave me. I would have followed you to the world's end for one word ol love, hat von were so proud-so proud-that I could never humble myself to tell you so. And now-now you will not know

She pushed back her hair and stared with wild, wan eyes into the gray dawn. Then a wenderful thing happened. The sleeping man opened his eyes and smiled. From that moment he grew hetter. "I seemed to hear your voice faintly and afar off," he explained, when he was able to "sit np and take a tittle nonrishment," as Mr. Eggleston put it. "I was crossing a gray river, accompanied by an old man who was half clad in akins. As wa drew near to the opposite shore, dimly discernible through the gloom, pala phantoms came down to meet na, and then-then I heard your voice, and all was well."

"Yes," she made answer, coftly, "alf was well. God has been very good to us, and all is well."

"And if anybody's got to be sealped," said old Mr. Eggieston, fondly surveying the young conpie, "let's 'ope, as it'll he those ruffians as garotted me when that sanctimonions Porkina (the butler) helped 'em to get my watch. Auyhow, they'll have their hair ont short at Her Majesty's expense for some time, hiers her. It's refreshing after these years of paying taxes to get something for it."-Detroit Free Press.

"What is this smoke? she whispered boarnely in my eas, Before I could evode activaness a sew stad reveas as if the very heaven had fatten upon the ship, and we were both dashed of our feet. I fell with my head apon some majal work which the carpet did not cover. It was so hot it element blittared me. I quickly serambled up, and, lifting the almost falating girl in both my orms, staggered with her to a quebloased nonk close by. As I did so there came a rush of weter into the saloon, sweeping over the floor in waves as the oscillation of the vessel flung it from one side to the other; and as the flood receded to mam Itself in another quarter, a cloud of steam arosa, adding to the densences of the prevailing

The last shock had evoked a wail of alarm from the anrrounding eahlas, and the saloon became erewded with people raching out of their doors. But when they found the floor surging with water and that white vapor floatof dismay, "The hoilers have burst !

Supposing the water to be scalding, With the greatest difficult we got I instinctively placed Millicent Bradley at full length upon the couch. There was no time to save myself, and I let out an unmanly yell as the waves lapped me right up to the knee. It seemed to hito the flesh from my bones. I can stand pain—I need to play foothall in England—hat you just put your stookinged feet into bolling water, and try that! In a jiffy I was perched upon the top of a small table, and clapped my hand to my injured oxtromitles; hnt, strange to say, I was not scalded at all. The water was cold. Others found this out simultaneously. And yet the steam was rising.

The meaning of it finehed upon Millicent first of all-or, perhaps, this phenomenon only confirmed a fear-"God help us!" cho oried; "the vessel is on fire."

The word flew like lightning. All rushed pell-mell out of the saloon and

up the stairs to the deok. "Save me, Horacei" gasped Milli-

cent-in that moment she called me by that name-"Seve me, Horsee, for the love of heaven!" I caught her to my breast like a ohlld-ahe was a very full grown woman, and muet have weighed spiration, for I could not get reilef by eleven stone-I kissed her cheek, her taking off my clothes. ahorter hy waste of time. Watch the dollars in their flighl if

yon want to stop their flying. Oupid may he blind as a bat, but he

has ears that can hear a dollar jlugle. .The wag of a dog's tail is more to be trusted than the shake of a man's hand.

Feminine heanty is not the subject for a man to select for conversational purposes with a homely woman.

Love makes more people miserable than it makes happy; unless misery in love is one form of happiness.

Our own children are about the only things we have which we would rather have than have the things other people

A Raiu ot Sall,

Friday was a helmy day at Pocatollo, Idaho. Lale in the afternoon e. drizzling rain blew up, carried on a wind directly from the south. It was of populiar whiteness, and, after it had passed, everyone who had happened to have been out in it, and who wore a dark suit of olothes, or a dark hat, noticed that clothes and hat were covered with thousands of tiny white epecks. Luter it was noticed that overy window in town looking lo the eonth was also covered with whits

"It has been raining mad," said every one who noticed the phenomenon at first, but later some of the ourlous tried tasting the spots. They had a distinctly salty flavor and an analysis made laler by druggists proved that they were salt.

The question new is Where did the salt come from? There can only he one answer-from the Great Salt lake, nearly 300 miles south in Utah, It must have been a warm day over the Great Dead Sea whou a strong could wind awept over it, catching no the salty vapor and eweeping it worth to Idabo and flually been attoring the elother and windows of the good peaple of Pocatello with the anlty spray. -Chicago Times.

The Bank finally fell, but such was the influence obtained in the bril period of its oxistence, that it was able to contract the circulating mediani of the nation, and thus injure the best intercets of the peord at large

In reviewing the history of the ph a m nul hard times from 1837 to 1800, it will be som that besides the contraction of the currency in circulation, as a cause of hard tinnes, there was another event that troubles. In 1834, the ratio between gold and silver was changed from 164 to 1 to 16 to 1, by reducing the amount of gold in golden coins. Thus eilrer was under-valned, and even our legal tender silver was experted to France, where the owner could get a profit of half an ounce in sixteen. This deprived the people of their small change. But in 1848, the gold made, and by 1850, the immense supplies there obtained by the gold-diggers had largely added to the amount of money, and prices for all commodities rose in response to the much needed expaneron of the circulating, legal tender medium.

West Virginia is in a good condition to meet and endure the wear, and tour, and strain of of financial depression. While it may be true that we have no vast visible accumulations of wealth in our horders, yet it is equally as true that there are no serious aggregations of poverty.

The experiences that West Vir- of a Supreme Being. ginians are likely to have of hard times, may enable them to resist some of the evils that attend large prosperity.

ONE of the most forcible writers upon current questions is Kate Field, of Washington.

When she was asked if she wished to have a vote, her reply was, "I do most emphatically." She believes there should be an educational and property franchise, and that he th sexes should stand a uniform test before being registered cans do. as voters. She thinks it ridiculous to assume that the right to must the ballot would injure woman's purity or antit her for the dut of home life, anymore than por to the post office or to the Some of the shrewdest palisted managers she has ever

-The moral of the bistory of the troubles and hardships shape themselves to His inevitable purposes in the end."

This is good sense and better politics.

It is a remerkable fact that the leading minds of the past few centuries attribute most of their intellectual power to the inspiration of the Holy Writings. Their verdict is that no one who expects to lead had its effect in causing financial a professional life can afford to remain ignorant of the Bible. McCosh, in America, Gladstone, in Eugland, the foremost men in the world, would never consent to be deprived of the privilege of searching the Scriptures. A student of the Bible recommends careful consecutive reading as very beneficial exercise in forming correct general impressions, and thus better qualified to interpret the particulars of the sacred books,

The Prophet Daniel was read in discoveries in California were forty minutes. Two others reading at the some time, finished in forty and forty-five minutes. Upon making a calculation on this basis, it was found the Old Testament could be read in about thirty seven hours, the New Testament in ten hours, or the whole Bible in less than fifty hours. The Psalms would require three honrs and twenty minutes, and Genesis, the next longest, would take two hours and twenty minutes. Lawyers, statesmen, physicians, and tradesnien will find many things relating to themselves and their respective spheres of dnty npon an intelligent perusal of the Bible

> It has been regarded an important question whether there are any pagan people totally ignorant escope as a magic lantern.

The Rev. John Lingginr, a specialist in this line of investigation, believes there are none such though tourists in Africa, Anstralia, and Japan speak of tribes of people having no idea of God, whatever. It seems that some African tribes have produced this shadow of the planet, in the form impression because of their profound reverence for God. Dr Livingstone found this to be true of two tribes when they had overcome their reluctance to speak on sacred subjects. They call God "The Giver," and really pray to Him oftener than most other Afri-

Dr. Ellis says, in reference to tribes in Madagascar, reported as having no idea of God, have always had an idea of God and call above the snn's center. The diemhim "The Prince of Heaven."

Dr. Wilson, one of the most reliable authorities, says the idea of one Supreme Being, the Crestor and Upholder of all things, is universal along the coust of Western

The Pall Mall Rudget has this description of the Okl Corporal as constant darkness. portrayed by Mr Irving:

"Old Corporal Brewater falls to 14 t pas ice lies in this. No habbling of a bull-pup which bematter less hard the times are, longed to "Jarge" some seventy pro to will get along a mehow. In yours ago, and suspects it is dead their large treults, events continue His mind sinks into forgetfulness. to be all aprod, as in the days of the and thashes into memory from mopropheta, by a hand that is might-|ment to moment. He is astonish. is than any human force, by a cd-a hero of Waterloo at the rul rul at is wiser than presidents bravery of his neice in traveling and congresses; in some way or by train. He is helped to the winother, and in good time, that dow, but-the man who had mighty hand will lead our people fought the French cannot fight out of the aroubles and difficulties ag'in the flies.' He talks with the so burdensome now. When all is parson, who reads the hible to said and done, we come at last to him; but he prefers Joshua to the the truth that lies at the source of New Testament, and-here is not the apring of bitter waters: Man natura-looks forward, not to s proposes but God disposes; and all Heaven of peace, but to the great final fight of Armageddon, at which he doubte not the 3d Guards will be present, and the 'Duke will have something to say.' Then he drops his pipe, breaks it and cries helplessly, till the Sergeant gives him a new one and he is comfort-

> "The entrance of the Colonel of his old regiment wakes up the old man, and with a spasm of energy he draws a plan of the great battle with his bottle of paregoric, his pill-box, and his new pipe. And then, sinking back to lethargy, he only remembers that he lent a comrade three half-crowns before the battle, and that the comrade didn't pay them back before he was killed. Miss Annie Hughes had just consented to walk ont with the Sergeant, when the veteran, who seemed asleep, rose suddealy erect, and with a short of triumph fell dead in his chair.

"There is, probably, no other actor but Mr. Irving who could portray so well and so painfully the psychology of decrepitude."

The Transit of Mercury.

An interesting astronomical event will take place on the 10th of November next. We allnde to the transit of the planet Mercury across the sun. The phenomenon will be visible in North America, South America, Europe, and other quarters. It may be seen to advantage with the telescope.

A simple method whereby number of persons may simultaneously observe the transit is to throw an enlarged image of the sun upon a sheet of white paper. This may be effected easily by using the tel

A stick is tied to the end of the telescope; at the lower end of the stick is secured a block of wood in which a saw cut is made to receive the paper—stiff cardboard is the best. The paper sheet receives upon its surface the enlarged image of the sun, acrosi which the of a aound black dot, will be seen to travel, at the rate of about one hundred thousand miles per hour. We advise our readers, esbecially the young people, to get out their telescopes and observe this most interesting phenomenon.

The coming transit will be visible from about 10 a.m. to 3 p.m. it will take the planet about 63 hours to muve across the sun's disk.

The path of the transit is a little eter of the sun's disk is estimated at 860,000 miles. Of the family of planets visible

Whether Merenry carries on atmosphere is as yet not certainly determined. Some observers have. se they believe, seen evidences of an atmosphere. It is quite probably the question will be definitely settled by observations made with great telescopes during the transit,

The ecichrated astronomer Leverrior made calculations in 1859 which accounted for certain anomalles in the movements of Mercury on the basis of the existence of another planet of about the same size as Mercury, and from it not fur distant. Many searches have been made since Leverner's aunouncement for this as yet unseen body, but so far without actual success, although some observers buve claimed positively to have seen it, - Scientific American.

The Fakir of the Monkey-Tempie.

A cerrespondent of the Kolnische Zeitung tells the following strange story, which if true, may help us to believe that Rudyard Kipling's strange tales of India are not altogether creations of the imagination. The writer says: "Every visitor to Simla (India)

knows the Jakko Hill-about 1,500 feet high—in the immediate neighborhood, and the monkeytemple on the top of it. There lives an ascetic, fanatical fakir who supports himself and the monkeys on the offerings of the faithful, and who is treated by those creatures with the most profound respect. There are two troops or regiments of monkeys, each with its king; who is appointed to that position by the fakir. The king, alone, has the right to eat in the temple; the other monkeys remain outside, and the fakir bimself bringe a dish of tit-bits for their Kolwal or general. When they have done, they file respectfully before the fakir, who dismisses them with 'Go, my children.' This fakir, who is bronzed by wind and weather, clothed only in a leopardskin, and whose hair has not been cut or combed in twenty years, is a European. He is able to converse in perfect English, and his name is Charles William de Rousette. His father was a shopkeeper in Simla, and scut him as a boy to the best school there, But an ex-servant of the father had been very intimate with the fakir of Jakko, and on the latter's death had succeeded to his position. The young Rousette used to visit him frequently, and the man showed great regard for the son of his old employer. Threatened with some punishment at school, the boy took refuge with his friend the fakir at the temple, but was found there sume days later and brought back. He seemed to have lost all interest in life, was always wanting to return to the temple, and one day he suddenly disappeared. The next twelve years he spent in his novitiate, wandering about India, and 'clothed' only with his hair. After the twelve years, he reappeared in Simla as the disci. ple of the fakir, and on the latter's death succeeded him. The elder Rousette had meanwhile died leaving a good fortune, but the son made no effort to secure it. He says he is perfectly happy, and has no desire to re-enter the 'false to the naked eye, Mercury is the

portrayed by Mr. Irving: final fight of Armageddon, at which he doubte not the 3d Goards will be present, and the 'Duke will This is good sense and better have something to say.' Then be The Fakir of the Monkeydrops his pipe, breaks it and cries helpleesly, till the Sergeant gives him a new one and he is comfort-

"The entrance of the Colonel of his old regiment wakes up the old man, and with a spasm of energy he draws a plan of the great battle with his bottle of paregoric, his pill-box, and his new pipe. And then, sinking back to lethargy, he only remembers that he lent comrade three half-crowns before the battle, and that the comrade didn't pay them back before he was killed. Miss Annie Hnghes had just consented to walk out with the Sergeant, when the veteran, who seemed asleep, rose sud denly erect, and with a shout of trinmph fell dead in his chair. .

There is, probably, no other actor but Mr. Irving who could portray so well end so painfully the psychology of decropitade."

The Transit of Mercury.

An interesting astronomical event will take place on the 10th of November next. We allude to the transit of the planet Meroury across the sun. The phenomenon will be visible in North America, South America, Europe, and other quarters. It may be seen to advantage with the telescope.

A simple method whereby a number of persons may simultaneously observe the transit is to throw an enlarged image of the sun npon a sheet of white paper. This may be effected easily by using the tel-

A stick is tied to the end of the telescope; at the lower end of the stick is secured a block of wood in which a saw cut is made to receive the paper-stiff cardboard is the best. The paper sheet receives upon its surface the enlarged image of the snn, acrosi which the shadow of the planot, in the form to travel, at the rate of about ono hundred thousand miles per hour, Wo advise our readers, esbecislly the young people, to got ont their The coming transit will be visi-

ble from about 10 a. m. to 3 p. m. Dr. Ellis says, in reference to it will take the planet about 63 The peth of the transit is a little

Some observers have, matter how hard the times are, longed to "darge" some seventy as they believe, men evidences of their large results, events continue His mind sinks into forgetfulness, bly the question will be definitely an atmosphere. It is quite probasettled by observations made with great telescopes during the transh.

The celebrated astronomer Lever. rier made calculations in 1859 which accounted for certain auonialies in the movements of Mercury on the basis of the existence of another planet of about the same alze as Mercury, and from It not far distant. Many searches bave been made since Leverner's unnounce. ment for this as yet unseen body, but so tar without actual access, although some observers have claimed positively to have seen it. -Scientific American.

Temple.

A cerrespondent of the Kolnische Zeilung tells the following strauge story, which if true, may help as to believe that Rudyard Kipling's atrange tales of India are not altogether creations of the imagination. The writer says:

"Every visitor to Simla (India) knows the Jakko Hill-about 1,500 feet high—in the immediate neighborhood, and the monkeytemple on the top of it. There lives an ascetic, fanatical fakir who supports himself and the monkoys on the offerings of the faithful, and who is treated by those creathree with the most profound respeci. There are two troops or rogiments of monkeys, each with its king; who is appointed to that position by the fakir. The king, slone, has the right to eat in the temple; the other monkeys remain ontside, and the fakir himself bringe e dish of tit-bits for their Kolwal or general. When they have done, they file respectfully before the fakir, who dismisses them with 'Go, my children.' This fakir, who is bronzed by wind and weather, clothed only in a leopardskin, and whose hair has not been cut or combed in twenty years, is a European. Ho is able to converse in perfect English, and his name is Charles William de Rousette. His father was a shopkeepcr in Simla, and sent him as a boy to the best school there, But an ox-servant of the father had been vory intimate with the fakir of Jakko, and on the latter's death had succeeded to his position. The young Rongette used to visit him frequently, and the man showed great regard for the son of his old employer. Threatened with some punishment at school, the boy took refuge with his friend the fakir at the temple, but was found there some days later and brought back, He seemed to have lost all interest in life, was always wanting to return to the temple, and one day he auddenly disappeared. The next twelve years he spent in his novitiate, wandering about India, and 'clothed' only with his heir. After the twolve years, he reappeared in Simla as the disciple of the fakir, and on the latter's death succeeded him. The elder Roasette had meanwhile died leaving e good fortune, but the son made no effort to secure it. He says he is perfectly happy, and has no desire to re-enter the 'false and corrupt European society.' He has a particular antiphathy to the Anglo-Indian clergy, and possesses an extraordinary influence over all classes of Hindus, who revere him as a saint. He is the only in-

niscoried confections, ment claim, and the pre-emption

From the following anthentic extract from an early history of Virginia, it would seem that the first settlement of Greenbrier connty was made at the place where Marlinton is situated, this part of Poeshontas being formerly in Greenbrier.

Since then Greenbrier as it now until the people of that county consider this place the wild-woods of this part.

Frederick, and subject to parox- inth, Georgia. ymns lunacy, when influenced by men from New England, of the federate veterans: name of Jacob Marlin and Stephen Sewell, took up a residence npon Greenbrier River; but soon disagreeing in sentiment, a quarrul occasioned their seperation, and Sewell, for the sake of peace, quit their cabin, and made his abode in a large hollow tree, In this situation they were found by the late Gen-1751. Mr. Lewis was appointed him. agent for a company of grantees, who ebtained from the governor and council of Virginia, an order for one hundred theusands acres of land lying on the waters of Greenbrier River; and did, this year, proceed to make surveys to complete the quantity of said granted lands; and finding Marlin and Sewell living in the neighborhood of each other, inquired what would induce them to live seperate in a wilderness so distant from the habitations of any other human beings. They informed him that difference of opinion had occasioned their separation, and that they had since enjoyed more tranquillity and a better understanding; for Sewell said, that each morning when they arose and Marlin came out of the great house and he from his hollow tree, they saluted each other, says ing, Good-morning, Mr. Marlin, and Good-merning Mr. Sewell, so that a good understanding then existed between them; but it did not last leng, for Sewell removed about forty miles further west, to a creek that still bears his name. There the Indians found him and killed

Previous to the year 1755, Mr. ROOFING Lewis had completed for the grantees, under the order of council, upwards of fifty thousands acres; -and the war then commencing between England and France, noth- PAINT ing further was done in the business until the year 1761, when his majesfy issued his proolamation LADDERS commanding all his subjects within the bouds of the colouy of Virginia, who were living, or who had PAPER made settlements on the western waters, to remove from them, as PRICES the lands were claimed by the Indians, and good policy required that a peaceable understanding should be preserved with them, to prevent hostilities on their part. The order of council was unver afterwards carried into effect, or his majesty's consent obtained to confirm it.

At the commencement of the Revolution, when the state of Virgiuis began to assume independ- Wholesale and Retail Store at of Main Street and Dunty Avesome efforts were made to have the order of council established nucler where be is selling flour at cost the new order of things then begruning to take place. But it was not confirmed, and commissioners were applied, in 1777, to grant certificatesto esch individual who had made settlements on the western

of one thousand more, if so much were found clear of prior claims, and the holder chose to accept it. The following year 1778, Greenbrier was seperated from Botetourt county, and the county took i's name from the river, which was en named by old Colonel John Lewis, father to the late General, and one of the grantees under the order of council, who, in company with his son Andrew, exploring the country in 1751, entangled himself in a is has advanced by improvements, banch of green briers on the river, and declared he would ever after call the river Greenbrier River.

Among the 10,000 snccessful graduates of the Profs. Smith. are 100 in banks, 100 efficials from this and other states. Prof. E. W. Smith, Principal of the College referred to, was awarded the medal at World's Columbian Exposition, for Book-keeping, etc.

If you wish a Business Education, or a knowledge of Phonography, Typewriting, or Telegraphy, at the least total cost, with diploma from Kentucky University on graduation, we advise you to cut this out and write for circulars to Prof. W. R. Smith, Lexington Ky.

HOw a Poem Saved a Ship.

The recent death of Dr. Oliver Wendell Holnies recalls an interesting incident connected with his literary work. In the year 1829 a great many men and women in this country were disturbed by news that came from Washington. some years editor of The Morning The Secretary of the Navy, it was said, after hearing that some of the timbers in the frigate Constitution were unsound, had ordered this old ship to be broken up and destroyed. How to prevent this desecration now became a question of the day. Some people suggested one thing, some another, and the newspapers were filled with protests against the destruction of the most famous ship in the navy. In the midst of it all'a poem appeared in a Boston newspaper. Though it was a short poeur, of only three eight-line stanzas, few poems have fire at the court-house, waiting to heartening and incomprehensible, ever accomplished so much. It was copied into every newspaper iu the land, it was printed on handbills and eirculated in the streets of Washington. body read the poem, and every-He was cold, and all he wanted to an imposing creature in flowing body felt so indignant at the Secretary of the Navy for having even thought of destroying the Constitution, that, rather than incur further ill will, he issued orders that the famous firigate should be thormen if he does not carry out your oughly overhauled, repaired, and

> The author of "Old Ironsides," the little poem that had accouplished so much, was Oliver Wendell Holmes, then a young man of twenty, a graduate of Harvard in the class of 1829. He wrote the poem, as he afterwards said, very hurriedly while sitting at a window of the old gambrel-roofed coolies who work the presses get house which was his birthplace and early home. Although in afand at that figure you must admit ter-years Dr. Holmes wrote many poems that in some ways are electricity, or any other motive greater than this, it is safe to may that not one of them was ever as widely read or as widely quoted.

> > This is the last stanza of that poem;

"O better that her shattered hulk Should gink beneath the waves:-Her thunders shook the mighty deep, And there should be her grave, -Nail to her must her holy flug,

Set every threadbare sall, And give her to the god of starms, The lightning and the gate !

Among the breakers. "I suppose you speal your summer down whore the wild waves break Mr.

just in time. Are you hurt?" "Not in the least," said Julia.

Her none-the noso which partock of the qualities of her lather's Aunt Feltein's - went up a longhty three inches, Bingo got ou his feet and looked crestfallen.

"Well, your habit is torn a little," the young man observed, eying the tear with a twinkling expression.

Julia could have boxed his cers. "I presume I should have discovered it," she rutorted, stroking

Hingo's nose. "No doaht. And your posy came off," said the stranger, picking up the fallen rozebad. "A Jack, ian't it?"

Julia fixed him with a savere look; hal that look revealed to her some interesting facts—interesting and amusing.

He was a tall fellow, bloude-haired and blug-eved and darkly supburned; his eyes were really line, and he wore a faded coat and cherepulable looking old soft hat. He looked a good deal like a tramp, but there were the gun and dog.

"An American Branty, mince you are particular about knowing," said dulin, frigidly,

"I am particular about everything; it's my auture," said the young man, in a tone of mild applogy. "And yon'll excuse me, but it disturbs me to see your hat on one side-fearfully

Julia's frowning eyes met his. She could not hold out against his mischievons, goy impertmence. She lunghed.

"I did look abourd, I suppose, and Bingo, too. We never made such a break before, did we, Bingo? Is my bat straight now, please?"

"Perfectly, geometrically. Seriously, I was frightened when I saw you go over. Are you certain your'e not

"Not a lut,"

She blushed a little under his look of concern.

"But you are shaken up a little bit. Let me tell you!" he said, almost shyly, his strong, brown hand on Bingo's shoulder. "There is a farmbonse only a quarter of a mile up the road, and I know the people well. you will ride up there with me, I will get you some milk, or buttermilk, And then she went out and mounted | whichever you like best. I happen to a meal there."

"Is luttermilk the best thing to "I don't know what to make of tuke when you've fallen off your horse?" said Julia.

"Always. You know those little books about first and to the injured? Buttermilk is always recommended in a case like thi "

"You are reliculous, Julia said,

FIRH THAT CLIMB, LIVEIN WOODS, AND UTTER SOUNDS.

The Climbing Fish of the Dutch East Indies-Flany Inhabitants of Foresta-Musical Fish.

MAGINATION had a boundless

range in devising legends and

murvels about fish antil Knowledge ellpped her wings, remarks the London Standard. When Lientenant Daldorf, of the Datch East Indin Service, reported to Sir Joseph Hanks that he had enight a fish on the stem of a palar true fire feet above the ground, and still mounting upwards, even Sir Joseph's acceptance of his tale ilid not preserve that officer from as onthurst of universal mockery. It was asked with reason what on earth the fish expected to find meeful for its purposes at the top of a palm tree? The earliest reporter of this fact, Ationzeyil, who wrote in the ninth century, had a sufficient explanation. Ho was not bothered with science. "Save a dauce for Jack Harcourt, The creature went up to feed apos the fruit, and when satisfied it returned to the water. But this would not do for the savanta even a hundred years ago. They pointed out that Percha scandean live on water insects, that it could not and would not eat fruit, and that if its fins and gill-covers be so framed that it might possibly climb a tree, they are so framed also that it could not make even un effort to deseend. Their objections are not yet answered, nor, so far as we are aware, has any fish since heen caught nine feet above the ground. But the habit of climbing is admitted whatever the metive. In fact, the Cingulese cover their field traps with a netting because, as they explained to Mr. Layard, some species would areep up the poles and escape over the other side. A few hours' sojourn in almost any tropic realm will convince the stranger that fish can climb, if he spend them on the banks of a tidal river. The funny little mad thebsenrry and paddle there allday lung, menating to the top of the rocks, however smooth; running up and down the mangrove roots as active almost as lizards. Not least ing in a dress suit, with a white flower | ourious of their peculiarities is the trick of running over the surface of the water for a distance which seems bounded only by their inclination.

> As for the fish that live in the woods-barring exaggeration-they also abound. The moraching, of Bootan, is most famous. It is never enught in rivers, or evon in alunding ponds, though, as some accounts say, its abiding places always communicate with water, so that it can return to its However that may be, they are caught not by hook or net, but by the spade; and they are worth some digging—two feet long, porhaps, disproportionately thick and always in pairs. Plenty of other species are taken in the same way daring the hot mouths, and plenty | more divert themselves with a stroll on dry land accasionally. Sir R. Schomburgh saw colored men going out to fish in the jungles Guiana with nothing but a basket, and they brought back as many as they could carry. Sir John Bowring constantly observed the fish go ashore and "lose themselves amongst the trees" upon the Siamese River Meinam. Mr. Morrin was inspecting a leoking tank by Trincomoleo whou beavy ruin came on. Hie mun suddenly raised a shout and golloped up a "knoll," the for side of which—that distant from the tankproved to be alive with tlah climbing upward at prodigious speed; we ere to nuppose that they left the pool when tho water escaped, but hastened to re-Inrn, knowing that the rain would renumberless. We have o grave report of one species found nineteen feet below the surface of a field. It is not necessary to believe this. But in Abyesinia they are dng up six feet or more below the river bed when it is dry.

It is not commonly believed that flahes bove any power of ntterance, but, although the fact is not propad yet, so far es we have read, there la such a mass of testimony from divers regions, contributed by observors of snoh credit, that the fact is no lunger doublful.

At Calders, in Chili, near the landing place, a very pleasant serouade ia heard sometimes. The music resemtaut ball, the dying cal uce of an adjoin it. Ædian bary, the note of a pitch pipe or pitch-fork, or any ther lung drawn-out musical note. ' It he am with bern u torn, and in to their much more somerous when a list per | who leaten to the enter and pewelry put his bend to the planks of the ve sel Nat day the button property Dr Buist with a minuter of lish which I there and an iling the state by

The Turvible Experience at a Well Kapwa some alle Witten & Stary That Apanalo la Rvery Mother to tha

From the Mattenaga True, Press. N min will state in East Transposes in tweeter anown and more highly estended than M1 J. C. Wilson, Circuit Court Clerk of Mara Church, at Durine, the bome of Mr. Wilson. He eajoys the confidence and respect of all classes, and to the business community his word to as good as his bond. Just wee Mr W tops is resolving heartlest congratulations from his aumerous friends beon se of the restoration in robust beatth of ide swimable wife, who has for years been a holpiese tavalid. Mrs. Wilson's high standtag to society, and her many lovable ivalisof character have weo her a best of Irlanda, and her wonderful recovery bas sitracted widespread attention.

As the fires was the medium of bringing to the invalid lady's attention the remedy that has effected her remarkable cure, a reperter was sent to Dayton to Interview Mrs. Witson, in order that the general public might have the teneds of the sufferer's extenminert edi lo erawa ebam ed bas esertes that wrought such a marrelous change in her condition. The reporter was welcomed at the Wilson bems, and the enthusiastic buly with becoming reluctance gave the bistory of her affiction and the manner in which abe was relieved;

"I'm," said Mrs. Wilson, "I was for 8 years an invalid with one of the most distreeing affictions women can suffer. For 8 years I moped around, dragging mysell with difficulty and pale out of bed. My little cam west untrained and were greatly neglected, while I looked listlessly and helplessly at the cheerless prospect before me and them. I suffered the most intense pales in the small of my back, and these seemed even greater in the region of the stomach, er anding down to the groins, I suffered agony sleeping or awate. Despuir is no word for the feeling caused by that dreadful espection of weakness and helpleasness I constantly experienced.

"I was treated for my frouble by soveral local physicians, but they were able to give me only temporary relief by the use of an initves and narcotles. I had almost given up all hope of ever securing permanent relief when I saw an account in the I'ress of a cure which Dr. Williams Plat 17lls had effected. I decided to try them, as I knew the larly who had been cure! and buil great couffdeace la ber statement. I began to inke the pills in October, 1900, and in two months I was doing light housework and niteoding to the children without any bad offects or weakness, au has I had formerly experienced litherto, I had been quality to retate any lood, but now my appellie grew stronger, and with it came back that old, healthy and hearty tone of the stomach. Dr. Williams' Pick Pills cured me, and I assure you the care has brought a great change in our boms. I can now rejoice in my husband a success, for I feel that I have something to live for. Who has a better right to feel this than a mother? One thing coore. I have recommended these pills to others, and many of the women of Dayton have taken them with good results, and it is my greatest pleasure to recommend to every saffering woman a remedy that has done so mu b for me." An analysis proves that Dr. Williams'

I at Pile for Pale People contain in a condensed form all the elements necessary to give new life and richness to the blood and restore shattered nerves. They are an onfailing specific for such diseases as locomotor ataxa, partial paralysis, 81 Vitus ilance, amatt, penralgia, rhoumatiem, porvous headache, the atter effects of la grippe, palpliatton of Jun beart, puls and sallow complexions, that thred feeling resulting from perv groundly all diseases resulting from vittated business in the blood, so it us acrofus, broad erysipeles, etc. Ther are -iso a apositi for troubles peculiar to females, such as suppressions, tragularities, and all for a of weathers. In men they effect a radt of cure to all cases arising from m lai worry, orarwirk, or expressed of a sever nature.

Bum Silp Thro' Their Fingers. All Eagland is deeply interested la a new mystery—what became of King Theebaw's erown lewels and other wealth when the British occupied the palace is Mandalny, Burmah, after the campaign of 1885.

This question has come up through the death-bed confession of a private la the West Surroy Reciment, who declares that he and a companion, Private William White, secured ull or a portion of these treasures and bid them in a most in the vicinity. This statement has been ande public, and Private White has been sent to Burmah to help recover the tronsure.

At the time of the British occupation orders were given by the Gov. arnmont that the annexation of Barmah should be earried out peacefully and without bloodshed, and overy endeaver was made to obtain Klag Theehaw's submission. But bo refused to comply with the British demande, and the troops were marched from the flotilin to the palace wails, As assault was then made, and the palace was occupied. Shortly after Thechaw abdicated, and he and his two wives were sent off by steamer

As soon as the King had given his submission guards were burriedly placed la the royal rooms to protect the jewels of couatless worth which were knowe to be there. And great was the British disappointment when It was discovered that the treasures had disappeared. Among these missing treasures was a gold call weighing several hundred-weight, as well as a portion of the rega is and quantitles of preclous stones. The crown is studded with rubles and dlagoonds and is surmounted by a peacock.

At the time suspicion rested on the Burmah Ministers and the maids uf honor, and every effort was made to trace the treasure, but without avall. Now, after nino years, the whole subject comes up on this confession of a private soldier who was present at the attack on the palace, and who declared that he and a compaulon buried the stolen plunder beneath a seatry-box.

Thecbaw's klogly wealth was indisputable. Ho had accuraulated from bls ruby mlaes a most valuable collection of stones, and his insignia were set with diamonds of the rarest What was known as his betel-box was of pute gold, and tho cuver was ornamented with rows of rubles nod dlamonds, the center ruby alone weighing thirty-nine and onehalf carats. There was also in this collection a golden ower, made as a receptuelo for sacred water to be used at the caronation. It was done in the shape of a crayfish, of pure gold and studded with ewels.

The erown is also of gold and covored with pearls and diamonds.

These articles, together with the royal peneock and the Henza, were present ut all rayal audiences nod were therefore familiar to the many agents and officers of the British Govcrunient who had been admitted to Thechaw's presence. They were, In fact, carried about with him.

Through all this picturesqueness one can percoive an earnest place that Great Britain somenow falled to gobble that thirty-nine carat ruly.

The same of the same

What is

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains neither Opium, Morphine nor other Narcotlo substance. It is a harmless substituto for Paregoric, Drops, Soothing Syrups, and Castor Oil. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays feverishness. Castoria prevents vomiting Sour Curd, cures Diarrheea and Wind Colle. Castoria relieves teething troubles, cures constipation and flatuleney. Castoria assimilates the food, regulates the stomach and bowels, giving healthy and natural sleep. Castoria is the Children's Panacen-the Mother's Friend.

Castoria

"Castoria is an excellent medicine for children. Mothers have repeatedly told me of its good effect upon their children."

DR. G. C. OFGOOD, Lowell, Mass.

"Castoria is the best remedy for children of which I am acquainted. I hope the day is not far distant when mothers will consider the real interest of their children, and use Camoria instead of the various quack nostrums which are destroying their loved ones, by farcing optum, morphine, soothing syrup and other hurtful agents down their throats, thereby sending them to premature graves."

DR. J. F. KINGERLOZ, Conway, Ark.

Castoria.

"Castoria is so well adapted to children that I recommend it assuperior to any prescription known to me."

П. А. Апонип. М. D., 111 So. Oxford St., Brooklyn, N. Y.

"Our physicians in the children's department have spoken highly of their experience in their outside practice with Castoria, and although we only have among our medical supplies what is known as regular products, yet we are free to confess that the merits of Castoria has won us to look with

"How perfectly charming!" she it sat up. Dick's fears vanished. It said, enthusiastically. "Why, it soundelike a fniry tale! But what are atmost quite dark now, and he could you going to do with her, Mr. Mer-

"That is exactly what I don't know, "What on earth are you doing and just what I came to ask you about.

Non Deliney hestated for a moment. "I will tell you," she said, at length, "I'll ask Mrs. Blake, my landlady. She is forever helping comebody or other, and will know just what to do and how to do it. Will you excuse me for a moment while I see her?"

In a few minutes she came back with Mrs. Blake, who was at once interested.

"Bring har right here," said the good lady. 'I have a little attic-room can't Miss Dobney and I go around to your studio oow and get her? No, prny do not make any excuse! I know jnst how delightfully disorderly artists' rooms niwnys pro."

Dick hit his lip, as he thought of Nan Debnoy coming into his little third story room; hat there was no way out of it, and so be acquiesced. Miss Dehney loft them to change her dress, and Diok had to tell his story all over again to Mrs. Blake.

"What a noble act it was, Mr. Merridith I" said Mrs. Blake, feelingly. "A fellow could not do much less,"

said Dick, doprecatingly. They soon started out togother, full of the project.

"You will find her hopelessly vulgar," said Dick, 'and so must be proparod to be shocked.12

"Why, what can you expect of a tenoment obild," said Mrs. Blake. "Just think of the infinences that have surrounded her poor little life. Did gether, and Dick looked with pity at you say 'criminal mother,' Mr. Mer-

> "No; 'criminal father' and 'dranken mother,' " corrected Dick.

"Dear me, it's much the same thing ! asked her if she was hungry, and she How interestingly shocking. What, is this the house? You lond the way,

Diok lot them in with his latch-key, and lod the way nustairs. Mrs. Blake stopped to brentho on the second many more?"

"Only one," said Dick, encouragingly, and running up shoad, pushed open the door of his room.

His student lump was harning low. and oast a subdued light over the room. Maggie was sented in a rocking chair by the radiator, under Dick's artistically-draped mantol, fast aslcop. Her golden curls lay straggling over her shoulders, her head had fallen to one side, and her lips were parted.

"What a lovely picture !" said Mrs. Blake, in a whisper.

"How very pretty sho is!" said Miss Dehney.

They had come up hehind him, and were peering over his shoulder. Dick entered the room and took the sleoping child's hand in his. She woke immediately with a start, and recoiled as though expecting a blow.

"I thought sure yer was never comin," she said to Dlak.

Miss Debney knelt beside the child, and putting her arms around her, enid: "Would you like to come with me, Maggio, and let mo tako cure of yon-Mrs. Blake and me 2"

"An' leave him?" asked the child,

pointing to Dick.

"Why, you would see him very often; every day, if you liked." Theu, turning to Dick, she said hughingly, "See what a conquest you have already maile!" As she spoke, her eyes tell upon the painting over the mantel. She gave a startled gusp of surprise, and turned to Dick in a halffrightened way. Diok answered her look quietly, although he felt tha blood mount to his temples. That glance meant volumes.

Then all three began questiooing the child, and discussing the situation, and Smally Miss Debnsy saked to L. Jack. see some of Dick's oketches.

"flere are a few wash drawing," he and, picking up the rejected pictures, "hat there is not much merit in

"Why, how perfectly exquisite!" exclaimed Mus Datiney. Excuse me for asking, Mr. Marridith, but have Daub, the art siter of the Conglommerate Magazine, would be delighted to get them; won't you let me chow

of the Conglommerate Magazine, ask-

ing him to call for instructions re-

garding the illustration of a series of

The "enclosure" nearly took Dick's breath away. It was a check for one handred dollars.

"God bless that girl!" muttered Dick, fervently. He got the check cashed at a hotel where he was known, and at ooce purchased a fifty-dollar soit of clothes, pair of patent-leather boots, a ball-shaped silk hat, and s pair of gloves.

In the evening he called on Miss Dehney and Mnggie, and was greeted with an overwholming surprise. Maggia was Mnggie no longer, but Margaret, and as prottily-dressed and attractive-looking n child as muy oce would care to see.

Miss Dohney was radient. "Is sha not really beantiful?" she asked. "Did you ever see such a complete transformation?"

Dick was quite overwholmed, and then when he told Miss Debney about Mr. Danh's letter, and tried to express his appreciation, he was wofully awkward, to say the least.

There was even something constrained about Miss Dehnoy's manner that he couldn't understand at all.

Yos, Diok's clouds had nassed away, and success followed success. A few months had hardly passed before no magazino was quite up to dato without some examples of Dick's superh illustrations. Margaret was sent to school, and improved so rapidly that hefore the year was out there was no trace of the slum-ohild in her.

And then-hut surely the reader known the rest. It is almost trite to add that ere another sammer had passed, golden wodding-bells had chimmed their sweetest for Dick Morridith and Nan Dohney, and that Margarot shered their home.

One thing only deserves mention. At the last exhibition of the Academy of Dosign, the gold medal was awarded to one of Merridith's paintings. It represented a ragged child, with uare feet, fast asleep in an arm chair. But overy one insisted that the title had nothing In common with the painting. It was 'Diok's Fairy."-Home nud Country.

betide her!

HE winter had beec a hard one for Dick. Nowspring had come, and it promised to be harder than the winter. Dick was an ar-

tist: an illnstrator for magazines, and a good one at that; but he had not made a namo for himself, and there were many

others in the field, and what work he did he was so very poorly paid for, when it was paid for at All; and then he had lost much time being ill, very ill, and-well, altogether he had had the same condition.

The day this story opens found Dick very blue. He had beeu oncouraged by quite a large order for illustrations from one of the lending missed. magazinea, and had utilized every speck of daylight during the past two weeks to gat them finished. The art- the ragged shoes-three or four sizes editor of the magazine had oven-advanced him ten dellars on necount. On the strength of this he had been and remarkably pretty face. He to the theatro n half dozen times, and had oven invited a friend to dine with 'guessed yes," so they stopped at a him at the little French table-d' hote. They both had had fifteen-cent cigars, | had 'sinkers and," which is the colloand Dick had thoroughly enjoyed it. He had also sent a large accumulation | child enjoyed the repast hugely, and of shirts, collars, and ends to the managed to eat two of Dick's hutter- landing and asked hopelessly, "How laundry, and bad counted up that it cakes besides her own three. would cost him nearly two whole dol-

lars to got them out. "And now "the whole thing had fizzled," as he ruefully expressed it. For some unacconutable reason the dirty, threadbare dress and hugo pictures had not been according to shoes, which she had to scuff along the anthor's conception of the charac- | the ground to keep on at all. Dick ters in the story, and they had been looked taller and breader thau ever thrown thack on him. Not only would | beside the little girl, who kept up an he not get any more work for goodness knows how long, but he was that ten dollars "In the soup"; and thoten | At last Diok's side-street was reached, dollars, by the way, was all gone. It was late in the afternoon, and somehew Dick felt as though he could not ersy in his room. He got up, palled | cheerfully, as he lit the gas. "What his list over his eyes, and went out. On lis way he took out his collapsedlooking purse and investigated his Anancisi condition. One dime, two nickels, and five pennies-just twentyfive couts all told. Dinner to-night, tifteen cents-hreakfast to-morrow,

ten dente. It was between hours for Broadway, just after the daily parade, and before the theatre-gours were abroad. But for all that. When le Broadway not wide-awake? All the restaurants and dinnera. On Dick went, however, crossing nader the "L" at Thirtythird street; on past the great theatree where he had enjoyed so many hours; on past the hotels, across Forty-second street, and theu following the coble core out Seventh avenue until the park was reached.

It was a delightful evening. Still dim twilight. A cool breeze was swaying the budding branches of the trees, to Mai be crossed the road, walked

A PANTILE SORTIE FOLLOWS A MARSACRE OF AMERICANS.

C. C. TR. TI ATTENDED IN UTP

landing Party From the Old Meancacy Does Prodigtes of Valor The Hermit hingdem flumbled.

order to trace the history of America's relations with Korea and the general opening up of the country to the infinences of Restern civilisation, observes the New York Herald, it is necessary to go back to the year 1866. At that time koren was the "Hermil Kingdom' in m re than name. The pres-Kin had ascended the throne a coople of years before, but being a mere boy the Government was wholly in the bands of his regent father, who was a bitter hater both of foreigners and of change. Some French miasionaries, who had braved the law of the conotry sod boldly advanced into 1b native citles, were horribly masmered in 1868, and a Franch expedithe sent to charters the Koreans asaded the Scoul River and attacked ner ral forts, but lost so beavily that the expedition sailed away without havin accomplished the end aimed at, and having left the Korean soldiers with the impression that the foreigner could not fight, and that the Korean was revincible.

In the came year an American nchroner, the General Sherman, chartered by a British trader, sailed ocacy," as il was ohristened-was fer China on an experimental voyage of trade and discovery. The vessel entered the Ta-tong River and never returned. It was burned by natives, aul those on board were slaughtered to the last man. On the news of the marenere being received, Cotomander -new Real Admiral-R. W. Schufeldl, visited the peningula with the war steamer Wachusett oo a mission of inquiry. No untisfaction, however, was obtained, and a similar musico, under | below the fort.

been given a few seconds late; the counteract this hold of her invoterate American vessels were already out of enemy, encouraged, if not actually the line of fire, and as the guns of the Instigated, foreign Powers to follow natives were fastened on logs, they in the footsteps of Japan in concludcould not be manipulated and were of ling treatics with this "Hormit Kingno further use. The suswering fire | dom," and it was with her help that from the gunboats and lannehes soon | Admiral Shufeldt led the way and succleared the fort of its defenders, and | eccefully carried through a treaty hea week later a punitive expedition was | tween the United States and Kores in landed in order to teach the Koreans 1882. Later on commercial treaties a necessary leason. The force, com-

posed of six hundred and forty men, was led by Commander L. A. Kimberly, the Adjatant-General being Lieutenant Commander W. Scott Schley, who was afterward to win fame as the rescuer of Lieutenant Greely.

The first battery, which was attacked unexpectedly in the rear, was taken willout difficulty; the works were completely demolished and tho cannon rolled into the river. On the next day the next fort-"Fort Moncleared by shells from the Monocacy's guns, and was then dismantled by the landed troops. An advance was made upon the citadel or principal fort, which was perched on the crest of a rocky hill. The Koreans were hovering heyond the reach of our guns in vastly enperior numbers, and were evidently waiting for an opportunity to crush the little American army as soon as it had entered the ravine lying

To defeat these taotics five howitzers and two companies of infaniry were posted as a rear guard on rising ground, while the main hody moved forward to alorm the oitsdel. The Koreans attacked the howitzers in large numbers, but the excellent practice made by the American gunners under Master A. V. Wadhams scattered them effectually and prevented any large body of them from getting into close quarters with our men.

Presently, at a signal previously agreed apou, the firing from the Monocroy ceased, and amid a bail of bullets from the enemy our men sprang up the steep incline to attack the citadel. They awarmed over the ramparts or through the breaches, and in a lwinkling they were at close quarters with the defending garrison. The Koreans tought stubbornly to the last without asking for quarter, and were all of them slain. After that the ramaining anbudiary forla were soon captured, and fifty flags and 481 proces of artillery fell into the hands of the conquerors. The citadel was named Forl McKee, in honor of the yoong officer who was first over the

paraput. The defeat of 1871 probably randered the Kureans mura ready to treat secondly with foreigners than they were before, le any case the bour for opening up the country was at hand The process began in 1870, w - a treety was made with Japon A prity Japanese sailors, while fir wat ros Kang-wa Island, wire total u for Americane or It was and were fired up a by a firt Jupa naw her ty ber t demanded o a la ly that cortain privile te granted ber The the fact that to part the special try to the second the real plants and the K week of the Links the state of the same of the same

Germany, France, Russia and Italy. An Interesting account of the oircomstances attending the conclusion of the American treaty has been given by Rear Admiral Shufeldt, an account, moreover, which throws an important light upon the General Sherman effair. The Rear Admiral's narrative is as follown: "I had been in Korea some years before to settle the trouble in regard to the massacre of the troops of our ahip General Sherman, and had writ-

were also negotiated by Great Britain,

ten a letter to the King, asking an explanation of the matter. I was told that I must wait twenty days for my answer. It was then late in the antnmn, and I feared to be frozen np, with few provisions, in this ont of the way and untravoled land. I had to act sail without bearing word from the King. Upon my arrival in America I received orders for a three years' ernise, and immediately left the United States for the voyage. In the meantime the King of Kerea had answered my letter, and finding that I had gone he sent the message overland to our Minister at Pekin. From here it was forwarded to the United States without heing opened, and it was several years before I recoived it. It was full of friendship from the King toward the Americans, and it explained the killing of the erew of the General Shorman in such a way as to show that the King was not to hlame.

"In that letter lay the seeds which grew into the Korean treaty, and the country would have been opened sooner had the letter been addressed to the diplomatic agents of the United States and not to me in my private capacity. It would have thus been opened by our Minister at Pekin and Korea might have been ten years further advanced in its acquaintance with the world of to-day. As it was, the letter caused my appointment as the diplomatic agent for the bringing about of the treaty. I was sent by the Secretary of State to Pekin, with the rank of Naval Attache of the Legation there, and with full powers to negotiate with Korea. I hore at this time in my pocket, though no one knew it, a commission from the Presidont of the United States appointing me Minister to Korea, and I found npon my landing in the country that the people and the King had not forgotten my letter of nearly ten years hefore. The treaty was signed near Chemnlpo, and our ships fired a sulnte at the time, in response to a signal which I waved from the shore. An American cottage now stands on the spot where the treaty was signed, and it is the residence of Mrs. Schoenioke, the German who acts as the Chinese Commissioner of Cuatoma.

"The Americans also opened Japan," Admiral Shufoldt said, "and had our people pushed their claims to that trade, as have the other nations who came in later, we would now he the greatest foreign nation in connection with the Japanese Empire. It is the same with Korea. Americans are now In the lead in that country, and they can, if they will, be the prodominating power. It is true that Korea is alill wrapped in the darkness of its thousands of years of seclusion. Its people are, however, no further hack than were the Japanese at the time Commodore Perry lay at anchor in Mississippi Bay. I have lived some months in Kores, and I know something of the King and the people. consider them a very bright race, and I expect to see a growth of olvilization among them which will develop their country and put them noon a high plane among the nations of Asia "

AND QUEER IDEAS.

Hor-ibte Beggars Who Line the Way

derful Golden Donie.

URMAH is a country of queer sights and strange sounds. was talking a tew days since to Professor S. S. Baldwin, the famed traveler, so well known throughout the East hy the title of "The White Mahatma." Said he: "Burmah is what an American girl would eall 'a funny country."

Rangoon is an attractive city of beautiful buildings, stately pagodas and long avenues, overhung with magnificent shalle trees, yet right through the centre of one of these beantiful boulevards rous a sluggish open stream of the nature of a sewer, in which dead dogs, cats and rate make the air redolent with a perfume that is out at all suggestive of "Araby the Blest."

At Rangeon is the great golden

pagoda, situated at the top of a hill in the ontskirts of the city. The roadway from the valley to the top of the hill consists of a series of irregular steps, some ten or twelve feet wide, and from three to ten inches high. These steps are entirely inclosed on the left side (as you proceed toward the top), and are covered with an arched and vanited roof. On the right side the roof is supported by and arches opening pillura out on a terrace of gardens and walled inclosures. This slairway is about one-eighth of a mile shaped. long, and at the hottom on each side are two enormous dragons, some thirty or forty feet high, earved out of brick and plaster work. These dragons have immense mouths wide open, showing horrible fangs and a protrading tongue, while the tail of the beast is enried and forked, like that of the traditional devil. The architecture is extremely quant and interesting, as well as heantiful. The pagoda itself is built in the center of, and surrounded by, an immense garden of palm trees, in one of the most beautiful spots that one can conceive of, were kept clean it would be a lovely finently in aix languages. spot. But at the very entrance of the stairway, each aide is simply lined with the most disgusting beggnramen, women and children, hut mostly men and women-thin and attenuated, and mostly with some portion of their body half eaten away with leprosy. These people simply swarm around the travelor, elamoring for alms, thrusting their mutllated arms and limbs, that have been partially enton off hy the ravages of the disease, fairly into one's face; sometimes an eye will he gone or a portion of the jaw. If charity is given to one, it is almost a necessity to give it to all his 'comrades, for they crowd around you like flies, and fairly har your passage.

Most tourists before visiting this pagoda, which at one time was deemed so wonderful and heautiful that it was included in one of the lists of the seven wonders of the world, are cautioned to take with them a stoni stick, also a light rattan switch. The stick is indogs, with which the place is overrun. the heggars at a distance, for ornel as it may seem, often the only way to keep them from absolute aunoyance is by a vigorous slashing at their bare will often stand at a little distance and apit at the traveler and overwhelm him with ourses and impreostions. As the hoggars are all raligious mondicants, they are looked upon hy most of the natives with perhaps the egg. somowhat of a spirit of modified veneration, and unless the English traveler is secompanied by a parly sufficiently large to be perfectly able to take care of themselves it is just possible he might be roughly handled by the natives in case of any hart to one of the beggara. Should the tourist be accompanied by a native policeman, which is often the case, the policeman has no hegitation at all in pushing the beggurs right and left as if 'Ly warn nine pins, so that they generally keep at a respectful distance.

It is mid that it cost some eighty or ninoty thousand dollars to gild the dome of the large payeds, but this is doue every two years or thorusbonts. This is usually the gift of religious Burmans as an offering to Buildha.

Professor Baldwin, who has had very that our of the most peculiar things pagoda at a burmees village many miles up the leawardly This pageda sixty or neventy feet high. of THE EFFLEY INSTITUTE COMPANY, of West Virginia controlling

by their own endeavors. This is the In 1778, an attack was mode by about 200 Indians upon Donnaily's i'ort. This fort stood on Rader's Run In Greenbrier county, ten miles from Lowisburg. Il was a donble log honse, with a chimney in the center, and surreunded by a stockade of spilt logs. The house was

ITIDIOI IOUI OUTIONS

Dick Pointer the eld negro who acted

so gallantly in its defense, died in the

thirties. The state had purchased his

freedom in reward for his services, and

he was huried with the bonors of wnr.

The account of the the attack on Don-

nally's Fort is here given from Smart's

Intelligeace having been conveyed to

Col. Donnally of the approach of the

Indians, he lost no time in collecting all

bis nearest neighbors that night,

and sent a servant to my heuse to in-

ferm me. Before day about twenty

men, including Hammond and Prior,

were collected at Donnnlly's, and they

had advantage of astockade fort around

and adjoining the house. On the next

day they kept a good look-out, In mo-

Coionei Samuel Lewis was nt my

house when Donnally a servant came

with the intelligence; and we lost no

time in alarming the people, and to col-

lect as many men for defense as we

could get at Camp Union all the next

day. But all were husy; some flying

with their families to the inward settle-

ments, and others securing their prop-

erty, so that in the course of the day, wo had not collected near one hundred

men. On the following day we sent

out two scouts to Donnally's, very early in the morning, who soon returned with

intelligence that the fort was attacked. The scouts had got within one mile, and heard the guns firing briskly. We de-

termined to give all the aid we could to the besieged, and every man whe was willing to go was paraded. They

amounted to sixty-eight in all, including Colonel Lewis, Captain Arhuckle, and myself. We drew near Donnally's

house about two o'clock, P. M., but

heard ne firing. For the sake of expe-

dition we had left the road for a noarer

way, which led to the back side of the

house, and thus escaped falling into an

ambuscade, piaced on the rond some

distance from the house, which might

have been fatal to us, being greatly in-

ferior to the enemy in numbers. We

soon discovered Indians, behind trees In a rye-field, looking earnestly at the house. Charles Gntliff and I fired up-

on them, when we saw others running in

ran directly to the fort. The people,

on hearing the guns on the back side of

the house, supposed that it was another

party of Indians, and all were of the

port-holes ready to fire upon us; but

some discovering that we were their friends, opened the gate and we all got

in safe. One man only was shot

that there were only four men killed.

and were killed. A servant of Donaaliy's was killed early in the morning on

the first ntrack; and one man was

killed in a bastion in the fort. The In-

dians had commenced their attack

about daylight in the morning, when

the people wore all in bed, except Phil-

ip Hammond and an old negro. The

bouse formed one part of the fort, and

was double, the kitchen making one

and of the boune, and there Hammond and the unity were. A bogshood of

water was planed egainst the door.

awakened the people in the other end timber. The doors have been preserved of the house, and up stairs, where the chief of the men were lying. They soon fired out of the windows en the Indians so hriskly, that when we got to the fort, seventeen of them loy dead la the yard, one of whom was a boy about fifteen or sixteen years old. His body was so torn by the bullets that a man might have run his arm through him, yet he lived almost all day, and made a most lamentable cry. The Indians called to him to go into the house.

After dark, a fellew drew near to the fort and called out in Egulish that he wanted to make peace. We invited him in to consult on the terms, but he declined our civility. They departed that night, after dragging eight of their slnin oat of the yard; but we never afterwards found where they buried them. They visited Greenhrier but twice afterwards, and then in very small parties, one of which killed a man and bls wife, of the name of Munday, and wonnded Captain Samuel McClung. The last person killed was Thomas Griffith; his son was taken, but going down the Knnawha, they were pursued, one of the Indians was killed, and the boy was relieved, which ended our wars in Greenbrier with the Indians, in the year 1780.

When Baby was sick, we gave her Castoria, When she was a Child, she cried for Castoria. When she became Miss, she clung to Castoria, When she had Children, she gave them Osstoria,

negro to whom our Assembly, at Ita last session, refosed to grant a small pension to support the short remainder of his wretched days, which must soon end, although his humble petition was supported by certificates of the most respectable men in the county, of bis meritorious service on this occasion, which saved the lives of many citizens then in the house.

The firing of Hammond and Dick

HOME PROPRIETORSHIP.

The subject of farmer home proprictorship, for the first time in the history of any country has been considered by the United States government, and the results have been made public lately from the Cousns office. Of the twelve mil: lion six hundred and ninety thousand one hundred and fifty-two families living in the states and territories, nearly one half own their farms and homes, and the others rent. Of the families owning their homes and farms, about twenty-eight per cent. have ineumhrances, and something more than seventy-two per cent. have no incumbrances. This shows up well on a firm financial basis. The stadepends on those who have homes and are out of debt. This was the state of affairs in 1890. Matters but not very materially so.

No Gerrymander.

Those Republicans who are fondly dreaming of a gerrymunder of squatted, at supper, a new waiter, the Semitorial and Delegate districts of the State for exclusively who was a Tonghald in disguise, partism purposes will be interested suddenly entered bearing a large in the fact that the thing is impossible. No general rearrangement of the State for mounters of the Legislature may submit a projected change in the Senatorial districts in other than a census year to a vote of the people, who must ussent to it by a majority vote at a general election before the Legislature can act.

This will come as a shock to a number of Republicans, who have been prematurely rearranging the map of the State so as to make it possible relegate Democrats to a permanent minority position in the Legislature, but they must endeavor to live down their disappointment, and meanwhile we shall select our Senators and delegates upon the old basis.

The Republicans can and doubtless will gerrymunder the State for Congressional purposes, but there their power for mischief ends.-Wheeling Register.

Roaring Creek Railroad.

The Italians employed on the Roaring Creek and Charleston railroad, about four hundred in number, who have not been paid anything for nearly three months, struck Monday. President Diller and General Manager Womelsdorff are in Pennsylvania, estensibly for the purpose of procuring money with which to pay off, and, unless they return the first of the week, the men, who are on the verge of starvation, may become desperate. Our Japaness Letter.

(Special Correspondence.) Scoul, Corea, November 10th.

Not having seen anything in your valuable paper from this part, I will this evening drop you a few lines concerning the "gardaramic," "or going ou," of the Japanese army in this country of Corea. By great good luck, I was able to find the company of which my friend. Suchero, is captain. Whea he and I were together at school in the United States, re had often talked of the likelihood of a war between Japan and China, and he had promised me then to write to me to come in such on event, if there was any chance of my participating in the war. He wrote me in August to come, and I arrived in Yokohama November for the farming interest as being 3d, and found my friend Suchéro's regiment had been ordered to this bility of the government mainly part of the empire to look after the insurrection, which had risen and assinated the Honourable Mr. Kimpski. Vice-President of the Council of State. These fiends in may be something different now. Chinese form, constitute an organized gang under the hame Long-

> Oa the evening of October 30th, as Mr. Kimpski or rather whom he had recently hired, and hogshead used to store ace in, which had been soaking in the back yard, and ere Kimpski could move, it was placed over him and the hird was caged. The signal being given, about a dozen Tonglinks filed into the room, and began firing the hogshead full of holes. After the Vice-President had been thus most foull murdered, the gang ransacked the house. and dispersed as silently as they

Word being sent at once to the Japanese capital, a regiment was ordered to the scene, which happened to be one to which Suchero belongs. He told me to come along and act as a lieutenant, and see how I liked it, and that I could enlist regularly when we came linck, if I so desired. But we had only a half-hour to the time of assembling to march on board of the ship waiting for us at the wharf.

On going out and walking quickly, we canie to a sort of armory, which looked like a flat cattle barn in a barn-yard, and I had my first sight of Inpanese soldiers. At a distance they looked like a cudet school of half-grown boys, who had been cheated into buying poor uniforms which had shrunk out of slinge. However, a close look at the average soldier impresses you with the idea that he would about us leave out your heart out as look nt you. They are well armed with a sort of musket, and bayonet, but what impresses the observer most was that they were continually whetting, whefting, and whetting at murderous looking knives, with a blude about a foot long, and continually trying the edge by cutting coat The linir of an average Jupance 19 so brittle that if it fulls on the lear it will break. Another notice ble, though unmentiona-1), thing about a Jap soldier is I I Property of the property of the last own paralianty to the most be imitated. tie at the armory, though the Inspector could not have known this. There may be an opportunity to know in the future how true the Inspector's suspicions are.

We were sailing west before night, and last evening we lunded at this place and went into camp. There is not a riding horse in our regiment, and there is comparatively little to transport. work will lie within a twenty-mile radius of this place, and the country is very mountainous and broken, in a few miles from the sea, and we have bad country before us to break up a bad gang of dollars, including Tuition and toughs in.

The regiment is camped in a narrow bottom, on a beautifully clear creek. The soldiers are in messes of about twenty each, and they put everything they can get to eat in one big iron pot holding about a bushel, and make tea in another. When they eat, they take the dinner out of the pot with anything they can get until it eools sufficiently to allow the hand to be thrust, They are still whetting their knives.

We will have a lot of work to do in a day or two, and you may expect a letter next week, if anything

An Ostrich Fight.

The San Diego (Cal.) correspondeut of the Chieago Tribune Prof. W. R. Smith, Lexington Ky. wrote this about a prize fight between ostriches on his farm:

There is novelty about an ostrich

less into the dust.

They wanted blood.

Nothing but pure gore would until the foreaun says: satisfy their sense of houor.

buttle ceased. With a deep hiss biting at their hind legs, as if to and outstretched wings ostrich Jim hurry them up. He closely folbore down on Colonel like a forty- lows the engine, and when the footer in a gule, sheered to the scene of the fire is reached is the right, and caught Colonel on the first to dash until the smoke and left thigh, ripping the thick hide llames. On one occasion, during a off the bare leg and causing it to fire on Forty-second street, his bleed freely. Colonel retaliated. paws were bally lurned because he and beaks, picking and kicking tried to follow the men up a ladder; literally lift him from the ground. Fork Advertiser. OCTAVIA'S CHOICE.

BY HELEN WHITNEY CLARE.

"Tain't right, se acordin' to my idees of what's right on what's wrong, Octavy ! said Grandma Mockbee, sevorely. "An' I shan't

givo my conient!" added the old lady, winding briskly away on a hig ball of clouded ced and white yarn.

Miss Octavia Mockhoe, black-eyed and searlet-lipped, turned sharply iround with an impatient frown ou

'I haven't asked your consent yet!' she retorted, imperiously. "When I do, it will be time enough to refuse!'

"Then you min't a-goin' to marry him after all, Octavy?" cheerfully commented Aunt Adaline, looking up from the spenge pudding she was making for dinner. "I'm so glad! Mr. Fothergill may be respectable, for all we know, an' then ag'in he mayn't. But we know all about Jerome Meadowgay, an' his folks afore him. Not a shiftless one smong 'em."

"Aa' like as not the t'other one is a wolf in sheep's clothin'," sagoly commented Miss Marlha Phipps, who was spending the day. "It win't best to lako no reaks, Octavy."

"But you hadn't ought to onconrago Mr. Fothergill so much, Ookie," admonished Mra Mockbee, with a mellified glance at her tall grandlaughter. "It sin't right to accept the attentious of any man without you think-"

"Now, look here, grandma, and Auut Adallue-and yen, too, Miss Phipps I"

The black-eyed beauty whoelod around and leveled a whole hattery of angry glances at ber startled hearers.

"You may all keep your good advice till it's called for I I don't want it! I'm going to marry Ferdinand Fothergill and live lu the city. I shan't tio myself down to a common farmer like Jerome Meadowguy, and you needn't think it "

And the offended Xantippe flounced ont of the room, leaving her auditora breathless with astenshment.

Our hour later, sixteeu-year-old Margie, coming in from the barn-loft with a flat applit-banket of fresh-luid eggs, mot derome Mesdowgay leaving

because it would bring bad luck, and maybe he would never come back,' abe commented, gravely, to herself, as also stowed the eggs away in a stone jar on the pantry shelf. "Ugh! how I would hate to go to Greenland I" sho reflected, with a shudder at the pictare her fancy conjured up.

into the house.

How Jerome Meadowgay had come to fall so desperately in love with Octayia Mockbee was a mystery, seeing there were plenty of other girls -quite as pretty, and with more amiable dispositions around the village of Hillsdale.

However, love is proverhially blind to all defects, and though Octavia was as heartless as one of the marble Bacchantes at Forest Park, she was really very attractive-tooking, with her red lips and Spanish black eyes.

And as Jerome Meadowgay was considered quite an clighle match among the belies of Hillsdale, the conrec of his love seemed to drift placidly along, and bid fair to run in a smooth channel for a time-nutil Ferdinand Fothergill appeared upon the scene. Then everything was changed.

Mr. Fothergill was an insurance agent, and made plenly of money; at least he spent it plentifully, which amounts to the same thing as far as uppearances are concerned.

He was a dashing young man, with sharp gray eyes, and whiskers cut a la Vandyke.

He wore a seal-ring, a dangling gold watch chain and the finest of broadcloth attire. And as Octavia Mockhoe was one of those persons who are caught by superficial attractions and outside glitter, she straightway gave Jerome Meadowgay the cold shoulder.

The forty-acre farm, well stocked and timbered, with its snug cottage, Gothio-roofed and covered in spring with clambering hop vines and Virginia creepers, whereof Jeromo had boped to make her the mistress of compared to the prospects offered by the dashing city dnde, soon dwindled into insignificance.

And in spite of all opposition, Octavia determinedly took her fate into her own bands and made no secret of the fact that she was "off with the old love, and on with the new."

Seeing that she was determined to follow her own conrse, Grandma Mockbea and Aunt Adulino decided to give her a respectable wedding, at

"It's the best wo can do fur her." sighed the grandmother. "A willful girl must have her own way; but if sho lives to repent; it won't be laid to our charge."

And so the wedding drow near, and there was whisking of eggs and baking of cakes, to say nothing of dressmaking and clear starehing, within the old Mockbee homestead.

The prospective bridgroom had goue on a collecting tour which would detain him till the eve of the wedding day, and the morning before the anspiclons event arrived.

Octavia was trying the effect of a pale pink neektio agalust her creamy complexion; Anut Adaliuo was basting the hox pleats in a silver gray poplin that was to do duty as a "second-day" dress; Grundma Mockhee was threading the laces in a French cornet, over which the wedding gown was to be tried on.

Margin alone was idle, having refused to lend may assistance whatever toward the coming festivitles.

"I shall not help to injure poor Jeremel" she declared, with a curl-

"Poor derome, indeed?" mimicked Octavia, anceringly.

She was about to add some stinging remork, when a scream from the dressusker, Miss Martha Phipps, drew every eye in her directlou.

"Dh, Miss Meckbee-Octsvia-look borol I don't undersland it. Maybe it don't mean him, though."

"Dear me, what a fuse you are making Miss Phipps!" cried Octavia, impatiently. "Can't you tell what the matter la, or have you lost the use of your tengne?"

Miss Phippin rescuted the canatic ey b with a top of her head

"No, I haven't lest the use of my touxue," she r pouled, seit fully "us mr even sith r, or I wouldn't lav spill this miller in the Popular Il fit a sette ! It's the marria.]. 2 at 1 rdissud l'oth rgill, Itil dale and Min A y Cott vill, of Pope

the Mockbee farm and turned his atens toward the old stile at the foot of the lane.

And releasing the mile of a hand, A tall figure stood in the dusky be strode away, while Margie hurried twilight, saintly outlined against the elowly-fading crimson of the west. "I mustn't watch him out of night,

"Welcome home!" called a soft

Jerome aprang eagerly forward.

"Margie!" he cried.

"No, not Margle!" in pettish tones. 'It's Octavia. Don't you know me, Jerome?" she asked; then added, in dnicet accente, "-I did not know my own heart when I sent you away. Forgive me. Jerome, and-and let us bury the past!

A soft hand was laid on his arm, and Octavia's liquid eyes looked apparently

Jeromo put the hand coldly aside. "The past is buried, so far as I am concerned," he assured her. "You said all was over belween as that day, Octavia, and I accepted your decision."

"Ent-but it is not too late yet, Jerome. I-"

"It is too late!" was the stern re-

Pretty, plnk-cheeked. Margie made a charming bride, a few weeks later, and the Gotbie-roofed cottage, with its hop-vines and Virginia ercepers, is no longer in want of a mistress. -Saturday Night.

New Bullding Material.

A new building material called compoheard is thus described by the Northwestern Lumberman: It is made of one-eighth-inch strips of wood from three-quarters to one and a quarter inches wide, placed hetween two slicets of heavy strawboard and united under heavy pressure with a strong cement. The process of manufacture, is peculiar. Into the machine that molds the board are rnu two sheets of the strawhoard from rolls, one from above and one from helow a table onto which are fed from a feeding device the strips of wood. A roller running in a tank of the liquid cemonl rolls upon the inner surface of the sheets of strawboard, and the three layers of material run together between rolls and into a hydraulio press capable of exerting a pressure 120 tons to the square iach. Ten feet of the board is stopped antomatically for a few seconds in tho press, then run out upon a table litted with cnt-off saws, whore it is sawed to the desired length. It is then run upon trucks, placed in the dry-kiln, and when taken out is trimmed to ferty-eight inches in width.

The etrength of the board as compared with its weight is marvelons. The ends of an eighteeu foot can be brought together without breaking or warping it. No conditions can warp It.

Wall paper is put upon the board and the finish is as fine as upon any plastored wall. The strong points claimed for the board: It is not more expensive than first-class plastering. It forms an absolutely air-tight wall, It stiffens a bullding much more than any cost of mortar can. It is quickly put ou and produces no dampness, thus causing no swelling and shrinking of floors and casings. It is light, thus avoiding the dragging down of the house frame, the consequent eracking of walls and the warping of the door frames. It forms a solider, cleaner, drier wall at no more expense than is involved in the old way.

Fear as'a Cause of Disease.

An eminent medical anthority makes the stalement that a great deal of contagion is due largely to nervous apprehension and fear. canses radical changes in the secre tions and nerve cells, and while the possibility is not the direct cause of disease, it ecrtainly is sufficient to put the person in the proper condition to be attacked by the prevailing malady. It is a well-understood Incl that eacessive anger infuses a toxic element into the secretions, and the bite of a man in a state of frequently rage is almost as deadly as that of a mad dog. Fear destroys the resistive capability and, as it were, lets down the drawbridge and makes eny for the cuwary. In weather of epidemic, this fore, it is necessary to cultivate tran quillity and cheerfuluem, to learn not to fear and to surround on If with an atmosphers of personal, mental and physical deliance of distance life in addition to this, do growith attema as to dress, that and red are taken, our war walk in the milet of the property and dwell in 1-1 - 1 r in a luc deally three shell har had To k Lydno .

Stairs in Samoa.

In Samos, where he makes his home, Robert Louis Stevenson has done much in the way of instructing the natives in Enropean methods of work. He tells an amnsing atory in this requestion. A new honse-boy had been engaged, and on his arrival was lost in awe and admiration of the magnificence of the mansion.

He was given a large bucket of water and told to take it to the bedroom up above. He looked up, aud, pointing, asked if it was there? On being answered in the affirmative, Le seized the bucket in his teeth, and before any our could remonstrate he had rushed up one of the posts of the veranda. The whole family ran up the staircase, and when they showed him that that was the usual mode of getting to those rooms, he was overpowered with delight, and for two or three days could do absolutely nothing but race up and down stairs, chuckling and crowing in an ecstasy of joy. And when detachments of his friends come to visit him they were always taken to see the stairs the first thing! - San Francisco Examiner.

The Nile by Night,

"I suppose no professional globetrotter' is ever satisfied," said James T. Hard, of New York, "without a sojourn in Alexandria and a voyage of four or five weeks up the Nile. The river itself, I must say, did at first sadly disappoint me. We Americans are apt to be rather exacting in tho matter of rivers-naturally onough, considering the beanty and grandour of our own. When I saw the strong stream in the hot sunshine, looking like floating mud rather than water, I hated to believe it the Nile of my dreams. Beauty, majesty and power, not utility, was what I wanted to see in the historic river. But when tho sun went down and the moon gilded, not silvered, the stream, then it became, indeed, the river of my imagination. The unsightly banks, which by day were steep walls of black mud, like huge unbaked brick, became picturesque and even heautiful, with waving groves of palm and fields of grain."-St. Lonis Globe-Democrat.

oy k. mirecach Elitotell, nr. D., in Harper's Magazine: Many of the glacial traces about New York are buried up by the soil which has been slowly forming over them since the end of the great ice age. If, however, one lingers in his wanderings hereabonts where the ground is being eleared for building, he will observe. almost everywhere, where much soil and earth and gravel are being dug ont and earted off to clear the rock surfaces in preparation for blasting, that larger and smaller rounded rocks are found imbedded in the gravel. They are usually too round and awkward in shape to be useful in the masonry even of the foundations of buildings. Many of them are too large to be shoveled into the carts and carried away with the dirt and gravel. and so one usually sees them rolled off on one side, out of the way, on the bared rock surfaces, until these are treed from soil, when they, too, are hoisted up and dragged off to some convenient dumping-ground where land, as they say, is being "made."

If one looks a little closely at these despised bowlders he will find that many of them are of entirely different character from any of our 'nativo Sometimes they are rock rocks. called trap, like that which makes the Palisades; sometimes rock like that which is at home in regions many miles to the north and west of New York. And they are rounded and smoothed in a way which indicates an enormous amount of wear and ruh-

bing sometime somewhere. It is eurious turning back in the books to the record of a time only a few decades ago, to read the speculations of the loarned as to the origin and nature of these erratic bowlders, which, from their noteworthy shape and their structure, often so different from that of the rooks over which they lie seattered, early attracted attention. Some thought that they mnet have been cast up out of a distant volcano in an earlier time and fell scattered here. For some they were rounded by the wash of Noah's flood, and swept by its flerce torrents into alien regions. Others sank—in theory—the earth's ornst thereabonts for many feet, and—in theory still let enormous icebergs from some distant arotic region drift over here, and melting, drop their ice-horne freight of rocks. Some would have it that the earth was once snrrounded by a separate rock shell which somehow came to grief and left its shattered remnants down broadcast. Others, still more dramatio, worked up their facts and fancies to the point of assuming collision with a comet. The record, graven on the rocks told the true story at last, however, when the people get reedy to read it. These rounded rooks or bowlders-

these erratics, waits and slions -- are, as well-known to-dey, the torn-off and transported fragments of rock masses which the great ice mantle brought down here during the cold weather so loug ago and incontinently dropped when the climate changed and the sun swept its borders back toward Greenland and the pole. Many of these erratics still bear bruises and scratches testifying to their flerce oucounters with the old bed rock along which the releatless ice mass ground them in their journey toward the coast. Here they have lain, these stear aliens, through all the long ages, buried up with other glacial wreckage, covered in by soil later formed, sharing their secrets with the cootlets of vanished generations of plants and trees, uptil at last another alien, Italian or Celt mayhap, breaks in upou their seclusion with plok and shovel and rolls them ignominiously away. Then, at the scarred rock surfaces, the steam-drift pecks victoristy, puny successors to the gigantic sculpfor of the old ice age, whose records it and its explosive alli soou erase.

Trees as litstorians.

It has been found that the riugs of growth visible in the trunks of tree have a far more interesting story t tell than has usually been supposed Everybody knows that they indicat the number of years that the tree he lived, but J. Kenehler, of Texas, he recently made experiments and obser vations which seem to show that tres oarry in their trunks a record of th weather conditious that have prevaile during the auecessive years of their growth. .

Several trees, each more than 13 years old, were felled, and the orde and relative width of the rings o growth in their trunks were found to

agree exactly.

This fact showed that all the tree had experienced the same stimulatio in certain years and the same retards tion in other years. Assuming the the most rapid growth had occurred i wot years, and the least rapid in dr years, it was concluded that ont o the 184 years covered by the life e the trees sixty had been very wet, si extremely wet, eighteen wet, seven teen average as to the supply of mois ture, niueteen dry, eight very dry an six extremely dry.

But when the records of raiufall running hack as far as 1840, were con sulted, it was found that they did no all agree with the record of the trees Still it could not be denied that the riugs in the tranks told a true story of the weather influences which had offected the trees in successive years

The couclusion was therefore reached that the record of the rings contained more than a mere index of the annual rainfall; that it showed what the character of the seasons had been as to snushiue, temperature, evaporation, regularity or irregularity of the supply of moisture, and the like; in short, that the trees contained, indolibly imprinted in their trunks, more than 100 years of nature's history, a history which we might completely decipher if we could but look upon the face of nature from a tree's point of view. - Atlanta Constitution.

The Great Salt Lake's Weight.

"Durlug a trip through Utah a few mouths ago," sald A. C. Levering, of Kausas City, at the Laclede last night, "I witnessed a most convincing proof of the weight of the salt-laden waters of the Great Salt Lake. A strong gale of wind was blowing over the lake and driving its anriace into low, whiteeapped ridges, while slong the shore the foam lay like that banks of new fallen snow. If we strong a wind had passed across a leke of fresh water of equal extent it would unquestionably have produced such an agitation of its surface that navigation in small boats would have been difficult, if not highly parilous. The waves there showed a curious resistance to the wind and rose only to a slight cloration. let there was an immense mementum stirred up in the liw, heavy, alowmoving wave. I vintur I rate the water at a just whire the depth of it not examit the clock, and for I that il was tupo all to staut and the as their weight await may rati falu. I wastill to it was the till to die this are an orwas also the sage of to y to the reason to America

FORTY V VI A THE RESERVE TO BE A STREET OF A STREET AS A STREET A STREET, THE RANGE THROWS

What is

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains neither Oplum, Morphine nor other Narcotle substance. It is a harmless substitute for Paregorie, Drops, Soothing Syrups, and Castor Oll. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays feverishness. Castoria prevents vomiting Sour Curil, cures Diarrhoca and Wind Colle. Castoria rolleves teething troubles, cures constipution and flatulency. Castorla assimilates the food, regulates the stemach and bowols, giving healthy and natural sleep. Castorla is the Children's Panacea-the Mother's Friend.

Castoria.

"Castoria is an excellent medicine for children. Mothers have repeatedly told me of its good effect upon their children." Da. O. C. Osanop,

Lowell, Mass.

"Castoria is the best remedy for children of which I am acquainted. I hope the day is not for distant wheo mothers will consider the real interest of their children, and use Casteria instead of the various quack postrums which are destroying their loved ones, by forcing opinal, morphine, soothing syrup and other hartful agents down their thronts, thereby sending them to promature graves."

Dr. J. F. Knemmor, Conway, Ark.

Castoria.

"Costoria is so well adapted to children that I recommend it an superior to any prescription knows to me."

II. A. Ancher, M. D., 111 So. Oxford St., Brooklyn, N. Y.

"Our physicians in the children's department have spoken highly of their experience in their outside practice with Castoria, and although we only have among our medical supplies what is known as regular products, yet we are free to confess that the merits of Castoria has won us to look with favor upon it."

> UNITED HOSPITAL AND DIFFERENTY, Biston, Mass.

The New Survey.

Mr. B. M. Yeager returned last week from surveying on Cheat Mountain, where he accompanied the engineering corps of the West Virginia Central Railway Company. Hon. W. G. Davis, president of the road, is seeking an extension south from Elkins, and has his eye on the White Sulphur as a probable junction with the C. & O. R. R. The surveyed route follows Craven Run for four miles from Elkins, and then on Shuffer's Fork tas getting this road.

It is not known what course the road will take through Pocahontos but there is little doubt but what the Pocahontas Development Company will have safficient "pull" to bring it by Murlinton,

The Greenbrier River isnstream along the banks of which the building of a railroad would be comparatively easy, and o road following the river would tap nlike the natural resources on either side of the river.

"The dence!" thought racio. "Father Laurent will be hard to convince. But I must make him yield. Besides, if I return there, I shall see Roactta, wham, I must confess, I have treated basely. I hope she has not started a scandal to meet meat Ligny. But Father Laurent would have apoken of it if she had. I shall stay

Paulo's fears were groundless. Ro- resist her. setta had resigned herself to the inevitable. She dared not aspire now to be Paolo's wife. Would it not be a very astonishing thing if the little Rosetta Dounet should become the bride of Doctor Lagrent? There would be laughter for ten leagues about at such a wedding. So she resigned herself without anger, without bitterness, contented, when slone, to lament silently her vanished dream, her castle of eards fallen to the earth.

She became pale and languid. Her relations conght in vain to discover the cause of the strange malady that luv so heavily npon her. To all their questions abe said:

"It is nothing—only a little indis-

position. The Donnets, however, consulted

year the most celebrated physicians of the among the vines, region. None of them could discover the cause of the trouble.

But some good country friend had anonion. He went | been behind Paolo and Rosetta at the time when they made their pledge of love. Father Donnel was at last informed of their betrothal. It was to that he might him like a llash of light. He knew now what ailed Rosetta. He knew, and he could bring the remedy.

> At dawn he harnessed his mare, attached her to his old carriage, and departed in the direction of Ligny.

"If you are not in Ligny in three days, beware of my anger. LAURENT." Such was the telegram that Paolo received one morning. He knew his stern father well enough to under-

stand that he must obey him. Evi-She langhed, hesides, for that best dently the old gaptleman was in a rage, and it would be imprindent to "On my faith, there is nothing but

will be your cure. Thank (lod I have arrived in time!"

Six months afterward, Paolo Lanrent and Rosetta Dounet were united in marriage at Revigny. The operatives of Ligny gave a great ovation to the foremaster's son and his bride, so fair under her long veil. Then Father Lanrent said to the old Donnets, pointing to the happy young couple: "You recollect, Donnet, the day

you came to the office to speak of the rick girl, of your Rosetta; You remember I promised you I would accomplish all !"

"Yes," responded the old vincdresser, 'I recollect, also, the old proverh. The word of a blacksmith is worth the oath of a king."

"Exactly so, "said Lanrant, straightening himself.

Extending toward the young couple the large hand of an honest man, he repeated:

"Exactly so. 'The word of a blacksmith is worth the oath of a king." ---From the Italian.

A Tail Building's Foundations.

As new buildings in this city have heen growing taller, their foundations have become proportionately deeper, and now the care taken in the construction of feandations is almost as great as in the crection of the huilding itself. A striking instance of this is seen at Broadway and Pine street, where on a plot eighly-live feel square, there is to be creeted a twenty-story building of the American Snrety Company. When completed it will he 306 feet from earh to roof, twenty feet higher than the steeple of Trinity Church and a little shove the Manhattan Life Building, exclusive of the latter's steel tower.

Work on the foundations was begun on May I, and will probably be completed early in October. The first thing done was to sink rectangular steel caissons to fill the area required. Under these the men worked, digging away the earth, little by little, the caissons all the while sinking by their own weight and that of several tons of pig iron on the top of them. Air was continually pumped to the men through a chimney-shaped cylinder. These caissons are snnk from a level eighty feet below the street curh till a bed of solid rock is struck.

When all the caissons are down they will be filled with cement, and on the top of this coment-lilled steel frame will be erected octagonal pillars of brick, for a distance of about forty to ilfty feel, as a support for the cellar

of the building.

The depth and strength of the foundatious of such a huilding are, of course, calculated according to the strain they are to be subjected to. The foundations of this building are constructed to stand the pressure of a a building ten stories higher than the one to be erected on them, and, according to the builder, we the deepest and strongest ever made. - New York

The Yessel is a Rock,

Three ship masters lately have come into San Francisco with reports of an nuknown hark stranded on a reef ilfteen inlies west of the straits of Lie Maire, near Cape Horn. Curiously enough, the vessel was reported as having all her satts set. A few days ago the British thip Cedrie the Saxon reached San Francisco, and reported that she had examined the supposed lark at close quarters, eatling within half a mile of it, and the eaptin says that the reported bark in nothing but a rock, although its resemblance to a v I is no striking that when he first mw it he must an entry in his log to the effect that a bark was elimidal with all its en ing into it. FRANCE'S PICTUREPOUE MOUN TAINEER BOLDICRY.

There is Searcely a Body of Troops in Any Army Whose Exploits So Fire the Imagination.

THERE is scarcely a hody of troops in any army whose duties are more striking to the imagination than the French chaseurs, who guard the long line of the Alps. His cap hanging lightly over his ear, his ritle strapped across his knapsack, his open tunic showing his snahurat neck, his waist encircled by his wide hine sash, and his musenlar estoes swathed in the woolen hands, the Alpine chassenr, careless of the weight of his heavy marching equipments; picks his way easily along the rocky cliff, treading solidly over the rock from which the iron of his alpenstock strikes out sparks, and gazes far down into the ravines with the deep eyo of a mountaineer. Perhaps he dreams while he keeps guard, for the life is one favorable to contemplation as well as hardlhood, and very likely this touch of sentiment attracts the recruils who come to the famons corps from the great cities, though these men are in a minority, for most of the men are recruited among the mighty monntains which they guard. The Alpine chasseur undergoes a

training all his own. The first thing taught to the young recruit or to the ronng officer fresh from the scademy is that his new life demands of him special obligations. The youth's morale must be carefully cultivated, for he is in constant danger of vertigo, slips and false steps; all trace of timidity must be eradicated. As for falls, there are numerous mortal accidents avery year. A stone turns beneath the foot, a crevice opens in the snow, a peg rolls across the precipiee, against meh catastrophics there is no guarding. It is so with the landslides, which happen in every season of the year from the rains. Three years ago in the valley of the Tinee three chassours of the rear gnard of the Twentythird Battalion were thus swept away, their companions escaping by but a few seconds. And the avalanches | and the deadly verligo, which will suddenly seize on the hardiest men! and the foolhardy foate nadertaken from bravadol Truly it is a life of constant

There are no book rales for the special tactics of marchee and comliets, but a hody of tradition hased on the experience of past wars and the annual manenvres is the guide. These are early taught to the chassonrs and he is made free of a valuable lesson, that the sun, the stars and a pockotful of compasses are of no carthly use to him; what he needs to know is the lay of the land and the trend of the mountains and valleys and ranges.

The chassours leave winter quarters at the beginning of summer for three mouths' campaingning in the mountains. That is the time to see them at their hest-gay, alort, and enduring, marching night and day over terrible roads, dreuched with rain or with perapiration, heavily laden, but always keeping the nualterable gaiety of the French soldier, and what lessons they learn during the maneuvers of the tricks that the mountains have in store for them. You hear an infernal fusil-Inde, a fearful thunder, a roll of musketry close heside you; surely the attack is being made just there, around that point of rocks. The point of rocks is turned, when suddenly the noise dies down and is heard far heblud you. It was an oche, and the hattle is ruging in the rear. And now again, what is that goutle marmar that whispers among the branches, a distant rolling sound, whose muffled hum does not hugh the ripple of the brook? There is lighting in the valley scross the range. The column advances undisturbed, and scarcely has it gone a hundred pages by her than the dia breaks out with intolerable force and the project ng rocks harl it pitileasly In your care. The advanced guard in ougaged and you already smell nowder.

The mountain has deceived you again-And what difficult lighting it is! The hattalion comes on in Indian lile and spreads out in open order among | milk the rocks, thritte as it advances the THE RESERVE TO SECURE A PROPERTY AND PERSONS ASSESSED TO SECURE AND PERSONS ASSESSED TO SECURE AND PERSONS ASSESSED TO SECURE ADDRESS ASSESSED. of the Person was discussed their party and become printing on the profess security.

line during maneuvers, and it has frequently happened that they have sat down to a meal together at a table whose legs are carefully planted two in Franco and two in Italy, with the simple soldierly dishes and the country wine in the middle.-Philadelphia

SELECT SIFTINGS.

China is the oldest of all nations. White huckleberries grow in Con-

The Compian Sea yielded a 1440pound stargeon. The coabal tree continues to grow

in lougth after it has been felled.

Among the Hindoos gambling is regarded on a certain day of the year as a religious duty.

During the Revolutionary War there were rarely more than 30,000 men in the field at one time.

Fifty years ago Bedford Springs, up

in the Pennsylvania Mountains, was the most fumous American inland summer resort. The power of steam was discovered hy a Florentine officer, who was idly

a few drops of water. Greenland's interior is estimated to he covered by a shield-shaped cap of snow and ice not less than five thon-

experimenting with a glass bottle and

sand feet, or one mile, in thickness. Sheffleld, England, ranks among the foremost towns in the world for the production of steel, the yearly production there amounting to shout fifty thousand tous.

A man who was assaulted in New York made a bee-line for a photographer's after the affray and had his damaged face recorded for fature reference in court.

There is at Oxford, England, a portrait of Charles I. composed of minute letters. The head and ruff contain the book of Psalms, the apostles' ereed and the Lord's Prayer.

A hoy's marble placed in a kettle

prevents the encrusting of the vessel, becames the marble attracts the particles of lime and so prevents their adhering to the sides of the kettle. Herat, in Afghanistan, is the city

which has been most often destroyed. Fifty-six times have its walls been laid in ruins, and the same unmber of times have they been erected again. A Carabon (Me.) hey catches salmon

by rowing his boat close to the dam and disturbing the fish so that thay make blind jumps and often land in the heat. In this way he captured three hig salmon in a week.

Garnets are brought from Bohemia, Ceylon, Pern and Brazil. The most common color is a shade of red, but hrown, yellow, green, and even black varieties are known. Pure stones are never larger than a hazel unt.

The coronach, or mourning for the dead, is still heard in many parts of Scotland as well as Ireland. It is a weird chant, cries of lamentations heing mingled with remonstrances, addressed to the departed for leaving his friends and relatives.

The grave of Eve is visited by over forty thousand pilgrims each year. If is to be seen at Jeddah, in a cometery outside the city walls. The tomb is lifty onhits long and twelve wide. The Arabs ontertain a bellaf that Eva was the tallest woman that aver lived.

Can a flah's slomach digest fish hooka? The vorselty of the pike is well known, but a cod, caught off Flamborough, England, the other day, breaks the record. On opening its atomach the flahermen found no fewer than fifty-nius fish hooks, all haited.

In digging the foundations for w house near the church of St. Stephen, Jerusalem, lately, a beautiful Masonio parement was discovered which measured twenty-one feet by thirteen and contained an Armeulan luscription. Underneath was a dayorn to which were found bones, lamps and glass

many granding Wigners should always

could creep along with the best of way out below save by one way be-

had been directed, as the nest of Chinamen commanded a long view of the greater part of it, and ascentled a long, rough mountain side, covered with pine.

We were to have eight or nine miles of a tramp through the woods in a certain direction that would bring us to the side of a ridge, facing north. We were to know this ridge solely through a native guide whom we thought could be trusted. We were then hundred dollars. to go directly over this ridge and attack the villians, who were camped on the other side.

After about two hours of this walking, we began to descend on the top of the mountain, and us we came to a certain low place, the guide diverged to the south side. A tidl Japanese, who occupied the position similar to a sergeant's, gave a slight uod, and the guide followed our guide. was caught and bound. The directions given us had been so exthe wrong turn through treachery, which would have landed usunder the cliff on top of which the Tonghaks had their retreat, it was detected, and his life was spared only until a little further investigation proved his treachery. As ufterwards seen, had we taken to the south side of the ridge, my career as a soldier of Jupan would have had an untimely ending.

Leaving the truitor tied to to a tree, gugged, and guarded by north, and coming to a certain hollow, the squad turned to the left abruptly, ascended to the top, crossed over, and descended to the first bench. We were to go along in the direction we had been traveling until we found a certain twig broken the the upper side of the trail. All knew this but myself, and all were looking for this sign, except thyself. I was looking down the mountain side, knowing

our game lay that way. We were about fifty strong, but those Japanese soldiers unde uo noise. No lile of Indians ever made such a quiet advance. After we had pursued this course for about half a mile, I, who was about the last man of the column, saw the ugliest mortal ever unde lying usleep, evidently on picket duty. below our path, not ten yards from our line. The heathen must have been drunk, and he looked to me to be dead and bleated, only I could hear his heavy breathing. His gun was lying on him, and his greasy blouse was shining in the sun that came through the leaves of the forest. I never opened my lips until we were some quarter of n mile past him, and then and that they had unissed their sign. and that we had passed within lifty yards of the den, and that this in close, stody. sleeping sentinel would be directly on top of a chill at the bottom of which lay the retreat of the cut-

A KOREAN REBEUS FATE

BY CYBUS C. ADAMS.

KOREAN of noble birth, long promineut in public life at home, stepped from the Yokoliama steamer in Murch last to the wharf at Shaughai und a few minntes niter lay dead in the street, the vietim of an assassin. A fellow country. man who bud induced him to go to

Shanghai, hastencil ostensibly to greet him, and they had hurdly exchanged a word before the fulse-friend stabled the newcomer to the heart. The crime was a political purrder, planned in the court of Korea, counived at by the Chinese anthorities, and the story throws a enrious light upon the methuds and practices still in vogne in oriental society. The viotim was Kim Ok Kinn, who, ten years ago, beaded au nusucceasful revolutionary attompt at Seoul, the capital of Kures. From the day be failed he had been followed by enissaries of the Korean court, bent first upon his extradition to the home from which he had fled, and thally, equipped with instructions to kill him, and to carry out this meritorious service to their country in such a way us to save the court from any appearance of complicity.

When the deed was done last March. city of wind that Chine and Koren had h pierteer maderalanding In the motter. The mardener was not dragged off to the Shanghui lock-up, like a common malefactor. On the contrary, he was tr ated with respect-In nonsideration, as soon as his name and that of his victim were mude known. He not only went free, but he was permitted to buy tickets for one passenger and one coffin to Korea, and he departed for home with the hody of his viatim and the distinction due to a man who had rendered a public service. In the capital of Karea the assassin was honored as no ordinary putriet. The body of the rdered man was divided lulo wight and one part was sent to each provinces of the kingdom to be to riew on the public high-

The principal actor in this furious outhreak, and the instigator of all the assassinations, was Kim ok Kinn, who had held the highest office in Kores, and was jealons of the preponderance in the King's conneils of the members of the Min family. The Queen, a woman of strong character, betongs to this family, and through her intluence, it has been the predominating power and has controlled all the principal offices. It is the opposition to this family, led by the King's own father, that has stirred up the recent next day Kim, armed with these dooninsurrection. In t884, the leader of this opposition was Kim Ok Kiun, and he hoped, after murdering his leading rivals, to seize power for himself and his adherents. Failing in his plans he fled with some of his fellow conspirators to Tokio. Japan. Then hegau the efforts of Koren, abouted by China, to induce Japan to give the arch reach up, and failing in this, to assassinate him among his protectors.

A Koreau mission was despatched to Japan in a Chinese man-of-war to demand the extradition of Kim and his followers. They were assisted in their ettorts by the Chinese representatives at Tokio and, it is said, by Li Hung Chang, the great vicercy of Chi-Li. Many weeks were spent in the negotiations, but Japan was firm in her refusal. Sho took the ground that she bad no extradition treaty with Korea; furthermore, she alleged, that the wanted to answer in Korea were of a pulitical nature, and it was against the law of nations to surrender political offenders. So the mission went home defeated. Kim and four of his associates lived for a while in peace at Tukio. Three of his comrades, doubtthe pressure, fled to San Francisco.

Had kim respected his asylum it is burely possible that he might have lived there securely for the rest of his days.' But in the following year, 1885, there was another plot to overturn the Kurenn Government, and there was evidence that Kim, the daring, restless and designing politician, his extrdition were at once renewed. | turn him loose upon the world. "We hereby commission you to cross the sea and apprehend the rebel, to accomplish which object you shall have full power to act according to circumstances, using dun cantion not to make frifitless attempts."

On the same day, the supposed conspirator/also secured in writing from the unsuspecting Chi a promise to pay hlm \$3000 for his service, and no the ments, which he laid before the Japanese Government, demanded protection. A demand for an explanation was at once telegraphed to Seonl, and, of course, all knowledge of the plot was at once repudiated by the Korean Government. These proceedings may seem almost incredible to us, but wo cannot apply our rules of morality to Korea. Kim was a leading statesman of the country, and if not un assassin himself, he had inspired assassination. According to Korean ethics it was not improper for his enemies to remove hlm by the knife or bullet, political methods that have been employed more than once in the East in this genera-Jupan now decided that Kim was a

beavy load to carry, and he was ordered to leave the country by June 27. Kim, however, had other viowa When the police went to see him at crimes for which the ingitives were the expiration of the time, he fled to the French embassy and appealed for protection. Ho was, however, turned over to the authorities, and his forelble removal from the country was ordered on the ground that his presence tended "to endauger the peace, tranquility and external safety of the cming the ability of Japan to withstand pire." What to do with him, though, was a knotty problem. Jupan wished to immre his safety. If he was sent to China ho would ho killed. Russia would not harhor him. San Francisco was proposed, but Kim was without means, and it was feared that be would starve there in a land of plenty, nuless the Americans took very kindly to him. It was finally decided that it was at the bottom of it. Demands for was not desirable, for his own sake, to China and Knrca both asserted that as I has a little group of islets in the Pasuuny islands to be supported by the Japaness Government. to a grant fifth A 111 . Hith filling fifther. to weah the furniture with scap and water. Such a method may be entirety and when practiced by careful persons. As the average maid is likely to treat a valued Vernis Marlin cattuet with the same consideration socorded a common floor, it is well that the use of seap and water by her in connection with inruiture should be forbulden.

When soan is used for furniture it should be of the best quality, having but a small amount of alkali in its composition, and the water need should be lukewarm, applied with a soft cloth and quickly wiped off, parneularly from all corners and crevices.

Dark mahogany, which is now so fashionable, is particularly sensitive to soap and water, arising from the fact that the coloring matter which operates to darken the wood through the action of light is an acid, so that when the alkali of the water is permitted to remain upon it it will, in reaching the acid, for which it has affinity, destroy the polished surface.

Raw linseed oil and spirits of turpentine, in the proportious of twothirds oil nod oos of turpentine, is the model furniture reviver. It is what professionals rely on; as a rule they use no other. The woodwork should be first carefully wiped off with a dry, soft cloth, and the dust thoroughly removed from corners and carvinga. The best article to accomplish this is a large paint brash, usually called a painter's duster. The oil may then be applied with a smaller brush, wiping off with a soft oloth and rubbing thoroughly dry. It will be found that dente and ceratches lose their prominence under this treatment; should this method be pursued regularly there will be no difficulty experienced in having furniture rotain a fresh appearance.

When a piece of furniture is very badly defaced and ilented it should be intrusted to some good repairer, who may sometimes find it necessary to scrape off the old finish entirely, in order to make a satisfactory piece of work. When the wood is slightly deuted one may sometimes overcome the trouble by steaming the indentation with a hot iron and a wet cloth. afterward making a small pad of mus- frighten them nor destroy their eggs. lin and rabbing over the surface some thin shellae, just adding a touch of oil to make the work easier. Scratches may be treated in the same way .-Ladies' Home Journal.

RECIPES.

Brown Sauce-To make brown sauce put one tablespoonful and a half of butter in the frying-pan and on the fire. When the batter gets hot and begins to turn brown add a generous tablespoonfol of flour and stir until the floor turus brown. Nuw draw the pan to the back part of the store and stir until the mixture cools slightly; then add half a pint of stock, ponring it in gradually and stirring all the while. Place the pan on the hot part of the stove and stir the sauce until it begins to holl. Add a level teaspoonful of salt and about oue-tifth of a tempoonful of pepper. Simmer for about five minutes.

Apple Charlotte-Rnb the bottom and sides of a baking dish with butter, and line it with slices of light bread. Peel and out apples into thin, small procee, and nearly fill the dush with them, scattering between the apples pleuty of sugar, small bits of butter and grated untueg. Do not forget that you must use sugar according to the aculity of the apples. Have sugar and butter on the top layer of apples. to reace are which cover with slines of light bread softened in water. a dry place, says the American Cultivator. This will help to keep out the muth, and as it will shake out when they are taken down for use itwill do no horin, and, in fact, the bees will like a little sait. Although it has often been asserted that the honey bee gets no honey or nectar to convert into honer from the blossoms of the red clover, we do not consider this proved. It may be that some of the stems of the bloom are not us long as others, or that in some the nectar rises higher, and certainly this is apt to be the case with the seeond crop clover, but it is very eertain that honey bees may always be found in n red clover field when in teach them to avoid it.

form adopted use none but the best stock, and have them well made by a ers each of 0,846. The English stagood workman.

An Antomatic Fishing Net.

A not which nutnmatically rises to the surface and thus incloses the school of fish to be eaught has been invented by M. Trouve, a French electrizion. The net is weighted along the lower edge and has a pneumatie tube along the upper, which can be inflated by an air pump on the shore or fishing boat. A lure in the shape of electric lamps submerged in the water, or halt, is employed to draw the dsh within the compass of the net, and the air loat is then filled, causing the net to rise to the surface and new in the lish. The net is considered more humano than the ordinary ones, as it does not We may add here that at a recent meeting of the Physicingical Society, of Berlin Dr. Rembe of St. Petersburg, read a paper is which he advocated cutting the large blood vessols of the neek as the most humane mode of slaughtering unimals. When this is done unconsciousness supervenes in a few seconds, and the movements observed are due to curchral anumla. Moreover as is well known, the flesh of anhuals which have bled to death is most casily kept.—Cassell's Magazinc

Qualified to Speak.

"Now, then, who is the pinintin in this case:" asked his Fionor, as a case was called. No r. ply. "I ask who is the plaintill in this ease?" continued tho court.

"I don't know anything about plaintine " roplied a man in the corner, as he slowly rose. "but if you are asking for the chap who was chased a mile and a half, and thon mopped all over his own barnyard by two desperadoes, I'm your ասս. "

Authors.

advantage of public ownership of

The methods and tastes of professional authors in this matter are quite as varied as is the character of their several contributions to literature. For example: The novelists, Charles Reade and Victor Hugo, preferred lumense sheets of paper and the coarsest of pens; while, on the other hand, both William Bluck and R. D. Blackmore cover dainty sheets of note paper with their almost mlcroscophic chirography. Charlotte Bronte wrote in the minutest of characters in a diminutive notebook, and Douglas Jerrold lotted down his witty inspirations on narrow, ribbon-like strips of blue paper.

CHILLON: The anger of a woman is the greatest evil with which one can threaten his enemies.

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains neither Opium, Morphine nor other Narcotic substance. It is a harmiess substitute for Paregorie, Dreps, Sootling Syrups, and Castor Oil. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays feverishness. Castoria prevents vomiting Sour Curd, cures Diarrheea and Wind Colic. Castoria relieves teething troubles, cures constipation and flatulency. Castoria assimilates the food, regulates the stomach and bowels, giving healthy and natural sleep. Castoria is the Children's Panacea-the Mother's Friend.

Castoria.

"Castoria la ao excellent medicina for children. Mothers have repeatedly told me of its good effect upon their children."

Dit. G. C. Oscoob, Lowell, Mass.

"Castoria is the best recedy for children of which I am acquainted. I hope the day is not far distant when mothers will consider tho real interest of their children, and use Castoria instead of the various quack postrims which are destroying their loved ones, by forcing opinin, morphine, soothing syrup and other hurtful agents down their throats, thoroby sonding them to premature graves."

Da. J. F. KINCHELOR,

Castoria.

"Cartoria is so well adapted to children that I recommend it as superior to any prescription known to me.16 H. A. ARCHER, M. D.,

111 So. Oxford St., Brooklyn, N. Y.

"Our physicians in the children's department have spoten highly of their experience in their outside practice with Castoria, and although we only have among our medical supplies what is known as regular products, yet we are free to confess that the merits of Castoria has won us to look with favor upon It."

Cheat Mountain.

Chest Mountain takes you up above the clouds. When on top you are on the backbone of this whole country. It is a promiscuous lot of mountains piled promisenously on top at a highly clevated base. Chent River runs among those mountains, about six miles from the Greenbrier, lint thousands of feet higher. It has been considered a vory practicable thing to turn the Cheat into the Greenbrier and thus make the latter more may igable, from Roncovert up. In the days of the old stage coaches, the turnpiko over the mountain was quite a thoroughfare. After the war it was neglected, and the road became covered with turf. A few by at which the horse took fright years back, and the Dewing & Son's company commenced lumbering on a large scale, and a small settle-

There i club of sportsmen, West Virginians and Pennsylvanians, obtained a cliarter for a game preserve, and fitted up a comfortable club-house.

Therefore there is now a gooddeal of life on Cheat Mountain, but the climnte remains the same. Already they have experienced a heavy drifting snow, and the roads are frozen and covered with ice.

At this elevation of course that flora and fauna is alfocted. They have one plant that is peculiar to

THE COUNTESS ROSAMUND.

IT MART WYLE DALLAS.

HE residence of the Von Lestjeivisches stood in the envirous of an Austriau town, surrounded by a beautiful garden, in which roses bloomed and

The branches of fountains played. magnificent trees finng their shadows over the entrance to the piotnresque hall, and great paimetton, placted in marble vases, decorated the courtyard.

But within all was yet more sumpthour, and no room was lovelier than the bondoir of the Countess Rosamunda, the walls and cailings of which were freecoed with designs of Capids cochained with roses, scattering rosebuds over the world, chasing butterflies or leading doves in flowery chains. The floor was covered with a splendid rng from Turkey; the draperies were of tinted satiu and the richest luce; the farniture of the sort that connoise senre hasten to hid for when the effeets of princes are sold at anction. Ou two sides of the room bands of silver Capals seemed to hold great mirrors that reached from floor to ceil-

One of these mirrors reflected a heau. tiful female figure seated beside an ormoly table, her cluows apon it, the palms of her hands pressed together and turned back npen the right wrist, the brautiful cheek repeaing on the dimpled fingers of the left. The "annul clausing" of a lage robn fell hank awept gracefully over the floor. One might have said that the lady was posing for effect, only there was no one there to pose for, and the other glass reflected the face of one absurbed in

In fact, the soul of the Countess Rosanmuda, widow of Coupt Othon von Lestjeivtscher, was acarcely in her beautiful boudoir; it had gone hack into the past. She was once more a girl of mxteen, living with her widowed mother, who boasted of her high descent and did gold embroidery for her bread and butter.

They were always shabby, sometimes hungry, when on the scone and. dealy appeared the handsome figure of an old gentlemen, well set up, well attired, courle or, and with red becks, white hair and snowy whis-Lers, up old friend of the family, who instantly be an to be very kind to

the ravings of mad poets and the abanrd extravagance of romance writers and laughed at, was merely a transcript of actual fact. That there might be some one in the world whose presence was joy, whose absence was despair, a glance from whose eyes seemed to penetrate the soul; who any other living being; whom one would be willing to live for or dio for; a touch of whose hand could make one tremble; who divided the earth into two places-where he was and where he was not. In fact, the Countess Rosamanda was in love.

It was a romantic affair. Her horses had rnn away; her carriage had been dragged wildly along the road; the coachman, thrown from his seat, lay senseless. Death stared her in the face, when she was saved by one of the hravest deeds possible to man. She had recovered to find herself in his arme, and in them was horne to her own home.

Her gratitude was intense, and, as was natural, an acquaintance followed. The man who had saved her was the private secretary of the Baron Truren. berg. He was, in her eyes, the handsomest of living men. To any one he was attractive. He was a gentleman of enlture, comparatively poor, of conrse. But at this moment she was eaying to herself. "What does it matter? I am rioh; and never did I know the value of wealth until the thought that I can hestow it npou him came

into my mind." Now she sat there, dreaming of a fnture woich must come. "Oh, tho hliss of being the wife of a man one trnly loves!" she whispered, "And that he loves me I know well. The thought of my rank and fortune forhids Veldimir to speak; but I will make him comprehend that he need not consider them obstacles. Surely I ean do that without sacrificing my pride. And, after all," she oried, rising and speaking aloud, "of what value is that cold, hard armor that burts and bruises the woman who wears it? I will fling it off and wrap myself in the soft, warm cloak of love. I will be happy, and so shall he."

Then sho seated herself at her escritoire, wrote to young Valdimur, asking hlm to sup with her, and, having dispatched the note, summoned her maid and devole! herself to her toilet.

with them; but good Madame Mura! always fell into a profound slung after a heavy supper, and mig pole Somehow, the Countess Rosshands intended that Valdlmir should now that he might tell her that he had her, before they parted.

The ovening came. Mamma, attired in black velvel, smiled seronely above three sets of chins and occupied berself with her tatling Rossmunda was beantiful as a dream. As Valdlmir was announced, and she arose to welcome him, he might have read the story of her love in her eyes. Perhaps he did. Whou supper was served. and they took their sents as table, i was only Madame Murske who a anything; the other willed with the food, put little morals between ther lips for form's sak, looked at each other, sighed --- the moment was Approaching.

When, at last, the lid lady slipped her unpkin luto its ring, and, at a sign from Rossmunda, the servants removed the table, Roginanda stopped into a deep window ad and to Valdi-

easis to herself. A mingled wrath and grief possessed her. She felt for the first time the pangs of jealousy. But now the pride, which she had described as armor which hurt the wearer, came to her ald. Her face was marble-white, but she forced herself was handsomer, hetter, nohler than to any courteously: "Permit me to leave yoo alone," whispered to Madame Murska, and then left the room

together.

Once ontaide, however, her feelings overeame her. She turned from her mother, and walking swiftly, passed ont through an arched doorway into the courtyard. It was flooded with moonbeams; the whole place was as light as day. The marble, white as newly-fallen snow, the leaves of tropical plants in the great vases, glistened as though out from jude.

"Valdimir loves another woman. He is lost to me," she said to herself. "What shall I do with my carthly life? How can I enilnre the days that part me from him?" And now a fariour hate for this love of his lesped into her heart. '1 could kill her!' sho muttered with olenehed teeth. "I could kill her!"

As she uttered the words a carriage drove rapidly to the door and stopped. Two men alighted. They were in military dress and wore the colors of the Sultan of Turkoy, and displayed upon their nniforms the distinguished mark of the star and erescent. Each doffed his hat as he approached. They evidently understood the Austrian Lay the Countess Resamunda was customs and intended to appear coarf united to Valdinir, and that the Snlteous; but words could not deser the veiled insolence, the cold emity, in the eyes of the elder man were conntess saw at ouce that the were not Turks, but helonged to maclves in trians who had enrolled trians who had enrolled faot, when the sultan's army, and faot, when the younger addressed for, it was in good Austrian good Austrian.

"Pardon, made he said, "we seek the Counter," replied the lady.
"You address", "asid the younger Pardon the here on rather nu-

mau. We hess. We have come to pleasant hing female who has left arrest a who is known to have esher horo Austria and is said to have caped shelter under your roof. Is Boya person here?"

As the words all nuon Rosamuuda's cera she under-Her mother would, of course, anystood that the girl whom she had seen. elinging to the arm of the man she loved, the girl he had embraced in her presence and in whom his very soul seemed centered, was sho whom they sought. For a moment a savago joy pessed her.

the saw plainly that these men had sohe cruel purpose in their minds; that they intended the girl some hem. But why should sho think of tht, she asked herself, when she right part her rival from Valdimir hy one motion of her hand? Complete lovenge was at hand. Why should she not seize upon it?

For a moment the countess contomplated doing this. Then over her heart swept a flood of angelic pity, not for the girl, but for Valdimir. She realized the fact that, though be loved mother, she loved him too well to make him suffer.

"He shall be happy, though I may never be," she sighed.

"Madam does not reply," said the elder man, steruly. The countess lurged toward him with her hanghty

"A creature of the sort you describe certainly did rush into my presence a while ago," she said. "Naturally, I had nothing to do with her. If you you take that roul," oud she indiwas beating wildly. I seemed to her cate loud by a motion of her hand, Then he you can searchly foil to overtake the carriage, which has just passed out of

> That was true. A vehicle of some sort had doubted along the road. She had e rtainly load nothing to do with the gul who had cast herself into in Valdimir a army, and she called her "that creature" with hearty good will, for the hat I h r.

tell me," the Countess Rosamunica "Do not pain yourself by the recital. The countess will comprehendr Enough that our uncles have, fo mercenary reasons, vowed allegiance to the Sultan. My sister, placed under their care by our dying mother; was seen and admired by their master; and she, comprehending that they were shout to sell her, fled from their home to seek my protection. She has traveled many weary days and suffered much, but she has escaped the fearful fate to which they had doomed

her." "Your sister!" cried the countess. "This young lady is your sister?"

"My only one!" said the young man. "My little sister Marita. Fgr. give me that in the excitement of he moment I have not formally presented

"Hie sister!"

At the words, the world semed to become paradise to the Countes Rosamunda, and she opened herarms and took the girl to her bosos. At the same moment she gav. Valdlmir a look such as she had ever given him before—a look he ecaprehended. As their eyes met, so did their hearts. There was no onht, no fear, in oither, only perfect love and confidence. This feeting of hearts is one of the occul mysteries. Many people are married without knowing anything about it, and sometimes hearts meet den hands may not.

Be in this case it was not so, and reader will understand that one tan never again saw, the beautiful Merita, who remained with her brother and his wife in Austria. -The Ledger.

Everybody familiar with country life has heard the long, quavering scream of the screech owl. For a bird so small and insignificant its voice is tremendans. It has the 'nupleasant habit of dning the wrong things at the right time. Take your best girl for a walk in the woods in the gloaming and note the result. Just when silunce is busily engaged in speaking londer than words from right overhead there will arise a scream like that nf a lost anul. If you have never heard the sound before it is likely that you will do a boudred yards in even time. It is only the love note of the screech owl, and is the only way he has of expressing tender emotion. If by chance you catch the little fellow in your hand you will find that it ean express anmething else hesides emption. It elatters its beak like small castanets and bisses and bites with great vigor. Its plumage is soft and downy, and mottled brown. Its eyes are large and keen, and its facial disks a yellowish while.

Every dng has its day, and every well regulated barn has its owl. At least this pertains to barns in the Eastern States. The barn owl is the bully of its tribe. It has an especial weakness for chickens of the spring variety, and it shows its wisdom in taking up its abode near ita prospective larder. It also pays strict attentinn to mice, squirrels and other small animals. It is never found far in the woods. This owl, when wing broken, beenmes a great bully and blowbard. Ou upproach it bisses like a goese. swells ont its plumage and blinks its great eyes imposingly, although it is donbtful if it can see to any extent in the daylight. Its plumage is gravish brown on the upper parts, interspersed with yellowish red, produced by minato mottling.

The owl that we are most theronghly acquainted with, whose cries wn bave heard most frequently in tho wnods at night, is the barred owl. If its language is translated correctly it is a very inquisitive bird. Walk out Newark, N. J., is the inventor. into the wonds on a moonlight night, and you are sure to be greated with, Who-who, who-who, who-ar-r-re you?" If you refuse to answer it fills the wonds with a sort of horrible laughter. "Whah-ha, whah-ha, baa-a-a!" it will ery in derision.

The barred owl is a great destroyer of ponitry and is thoroughly hated by the Snothern farmers. Ils sight 18 so defective in daylight that it has been known to light upon the backs of nows and horses, probably mistaking them for something feasible. Down in Louisiana the "Cajuns" (Acadians) sometimes make gumbe some nf it. They pronounce its flesh palalable. Its plumage is a light reddish brown un the upper parts, its face brawnish white and its tail barred with brownish red strenks. Its abdomen is a yellowish white.

Last and greatest of all is the great horned owl, the bird of Minerva, the feathered emblem of wisdom. The vision of the horned owl is as keen as that of a falcon. It is one of the Nimrods of the feathered tribe and thes like a trailing shadow. It is never at rest. Watch it as it sits on a tree, and you will see its hill snapping as though in anticipation of coming gnod times. Now and then it atters a shrick, new it bays like a blondlingud ou trail of a murderer, or calls for help for some starving person. At such times it keeps its keen eyes in motion, and nothing escapes its vision. Such is the great horned owl.

Boulauger's Lost Opportunity.

Paul de Cassaguae says that Bonlanger, when he was in command of the Thirteenth army corps at Clermont-Ferrou, entere l'into negotiations atter unduight. vice which is represented in the ent A NEW YORKER WHO POUGHTTHE resembles a life-preserving dress; the

upper part is a kind of buoy or float ing chamber, in which the occupant has some freedom of motion for his head and arms.

The object is to provide the shipwrecked person with not only a means of flotation but with complete shelter.

Inside the calarged upper chamber it is proposed to place provisious and a water supply, so that the wearer can stay affoat for a menth, if need be, with safety and comfort.

The upper pertion is made of strong mileloth, waterproofed and distended on a jointed cylindrical frame. Across the lowest ring a disphragm is placed, in which are two apertures for the legs, which are meased in waterproof pants and boots, covered with metallic rings, in order to afford pretection against fishes and the sharp rocks.

These rings are made to fit one within the other when the dress is folded, so as to enable the device to be stowed in small space.

The top of the upper chamber is inclosed by a bond, in which a window is made. An air pipe is provided, leading to a respirator fustened over the month of the occupant. An aunular air chamber is provided, which keeps the apper part of the apparatus well ont of the water. A man of

A Chinese Beauty.

If China were only as beautiful in its personnel as in its scenery! There are not over many beautiful women in Obius, says a travoler, and fewer handsome men; but the Chinese we

men at high rank are, to the best of my belief, always intelligent and charming, and usually highly caluexted, often intellectual; and in Hong Kong I knew at least one Chinese was mian, whose picture I seenred, who would may where take rank use beauty,

Their Own Side Will Kill Them if They Are Defeated. EFORE this, an doubt, mare than nue Japanese soldier has hent bis neck to the

They Fight to the Death Because

deadly cap-cap knives of

the Chinese." The speaker was Lientenant Cloth, of the French Navy, now in New York, but who was in active asvalservice during the Tongnin war.

"Every Chinese soldier," he ex-

plained, "earries a enp cup knife-a harbarnus weapon-concealed in bis trousers or his blouse. These knives are made of irnn-not steel-are more than a foot long, and fitted with very erudely made wooden handles. They are used for entting bambeo saplings into fireword and for a variety of purposes, and are always extremely dull. It is with the enp-cups that the Chinese behead their prisoners, an eperation that is rendered doubly slow and painful by the blunt edges of the knives. I have heen told that it semetimes takes half un hour of sawing and hacking to accomplish it, though, of course, I bave no personal knowledge on that point.

"They always expect to be beheaded, if captured, and the first move made by a Chinese soldier who chas been made prisoner is to bow his head and bend his neck for the knife. It is not surprising that more than one Frenchman during the Tonquin war killed bimeelf rather than he captured by the blondthirsty yellow fiends, for the ernelty of the beheading process is beyond the power of words to portray.

"I never knew a Chinaman to kill himself for fear of eapture or to beg for his life after capture. They expeet to be killed, and see no use in asking quarter. But I have known them to beg piteonsly for their pigtails. A Chinamau loses the respect of his countrymen if he loses his pigtail, and we used to cut them off instead of their heads.

"The cruelty of the Japanese may be great—but the cruelty of the Chinese is past belief. One favorite form of torture applied to some of our brave fellows who were captured was impalement. They lay the prisoner nn his back, stretch his arms and legs and drive sbarpened bamboos through his bands, feet and chest. Then they pour quicklime on parts of his body and leave him to a slow and awful double. The agony of a person treated in this way is excruelating. You may be sure that the Chinese have no knowledge of or respect for the Coneva-Red Cross conventiou."

Lieutenant Cloth says the Chinese are far better lighters on land than on water. Their seamanship is vile.

"Why," said the Lieutenaut, "they do not even know how to tack when unvigating a sailing vessel. They can only go before the wind; never against it. I have known Chinese vessels to remain at anchor for days because the wind was not blowing in exactly the direction the ship was to sail. Their lack of knowledge of navigation will be very disadvantageous in their naval enmhats, in spite of the fact that their ships are commanded by Europeans. On the land it will be different.

"The imperial army is composed mostly of mon from the northern part of China, Tartars, tall, strong fellows, not at all like the undersized Chinamen who are to be seen in America. They are thoroughly stoical in their bravery, and they tight with the desperation of demons. Most of them are armed with first class European rifles, though every army corps is tollowed by a body of irregular troops, who carry laucea made only of tumboo stidke, lipped with iron, and bows and arrows. The o man are of no use as lighters, excepting at close quarters; but I a ure you that it is very disagreently indeed, to meet them in a hand to hand fight. The regular troops ara as det rmine | soldiere as I have ever men In l'ouquin, which is dotted with bills and cut up with ravines, they would take position on an eminence and remain there loading and tiring with the regularity of clockwork as long as a single man was left. of Munscy's Magazine, is from the of Miss Margaret Kenna, daughter of the late Senator John E. Krana, and a graduate of MI. de Chantal. Miss Keuna has an inherited fondness for the State ber father loved so woll and from one of his favorite haunts in Greenbrier county she has selected the curly headed little boy who is the central figure in her story and who gives to it its name. He is a manly little fellow, and bears up bruvely under trials that would erush many an older one. His heroism, his devotion to his mother and his minuly character appeal strongly to the reader, who readily grants him the place of prominence in the story allotted by the writer, ulthough his part is really a minor one, and there was one great herd of not less he is but the means of showing how than 75,000 head, which had found a num's true character is often- a temporary refuge in the triangle Times made known, the best that is formed by the Musselshell Missouri in him brought out by some deep and Yellowstone rivers in Montana, sorrow. The story of Boliby is benutifully told, and is the work of one who evidently possesses much literary talent, although she has never before been known as a wrifer for the magazines— Wheeling Register.

tle story in the November number

Haunted Woods.

Strange goings on have been reported concerning a certain neck of woods, where a road from Frost, inius.the Huntersville, and Green Bank road, near where Levi Sharp lives. This is the spot where R. R. Mason, Esq., foreman of the lumber firm of Smith, Whiting & Co., was held up two winters ago. For a long time a certain stump was placed in the middle of the Frost road, of nights, until a man hauled it miles away. Since then a certain log, requiring two men to lift it, has been put in instead.

A certain gentleman who is necustomed to pass here late in the of a revolver six times) - "Die you night, sees or hears something mys- miserable villain!" Second Actorterious, every night, and his horse takes a regular fit of plunging. One night he saw something in remorse for my many crimes, and shape of a man, by a large tree, but will die acording to your wish." could not tell whither it was hu- Then he rolled on the stage in agman or not. He refrained from only while curtain slowly descended firing on it. White pieces of cloth amil the cheers and langliterof the are found tied to bushes nore, and nudience. - Ex. not very far away is the place where Renick Korr's hogs were People killed. nvissed a lot of stock that rauged in these woods.

A thorough investigation is talked of being made.

Valuable Woods. Many of the finest woods in existence are yet unknown, or only slightly known, to the manufacturers of wood in the civilizer world. The woods of Central and South America are, perhaps, the most remarkable as well as the least known. In the yet untonched forests of this continent are mainy woods for finer than any of those naw in use. These woods range from pure white to jet black in color, and many of them are most beautifully unrked and veined. Sumo of them are so hard that they turn the edges of axes, chisels, and other tools, while the band saw cuts them only showly. Ha the Columbian Exposim there were miny displays of little known woods, and the finest of their were those from Argentine Republic. Brozs, and other South America countres. Someof these sorthern words solded to the teeth of the band aw, not the ordinary a sedust, lord Brig powder, due no the thest B. The School Teacher.

Just now the schools all over the country are in full blast. In driv-J C, Arbogant, ingr by the next school-houses, the passer sees a pair of bright eyes peering through the glass, risking the chance of "catching it" to vary the amantony by seeing who is going by. The teacher has beard the sound of wheels, too, and is dying to know who it is, and perhapa gets up had looks, and the little one then draws a sigh of rehef, knowing the danger of "catching it" is past.

> If the school is alive to what is ps sing on the outside of the little frame building, it is equally on the alert to take in anything of ordinary interest on the inside. A boy who can do things and make faces when "the teacher's" back is turned, is an indispensable member of the fraternity, and even the good little girl who stares at the offender out of her big eyes, forgots that she is tired, in contemplating the earmity of his crimes.

The school teacher's life goes on in this monotonous way from day to day, each alike, and in after on his wasted past, the days are all a confused jumble, with nothing to distinguish one day from another.

The serious question now-u-days is that the school teacher considers himself ill-paid, and the tuxpayers that the money is thrown down there, these awny. There is no manaer of doubt that it takes as much finesse to run a district school as it does to govern a state. The teacher anongh to bury a t content with ignorance you my you

Street Section Contracts State Sections, Spinster, market many many many three to have may Mary of Advances Arrive Strong Street by William Str. (All).

With two-thirds of ahandoned. the children ont of school, it seems unfair that this enormons outlay of moncy should go to benefit onethird of the people. The tax-payer has a right to demand that his money be better applied, and that more people be reached in its expenditure. Free the teacher from the mercy of the whims of his patrons. Help him to the extent that he will only have to work in the school-room, and that alone will cause fewer of them to drop the profession. Improve the free schools or abandon them!

Let us see what the 'new brooms' in the Legislature will do.

- An Experience.

The following is the experience as given by an old Confederate veterau, of this county, in an expericuce meeting. It must be remembered that this took place in church, and while it was irresistaably funny to the hearers, the old man himself was devoutly doing his duty as a christian:

"Pears like we have hard times now, 'pears like, these days people don't know what hard times isyears if he allows himself to think durin' the war, 'pears like, we had hard times to serve the Lawdpears like when we was camped way down yander, we had a lot of devilish fellows in camp, pears 3000 years B. C. like they didn't care what they done-hard time to -- pears like we dig great holes a canteens of powd time to serve the L go off and blow on me the Lawd there.

> Some little laughter was heard-"I tell you it may be funny to you now, but it wagn't funny to us

The Letter "A."

The most wonderful of all inventions is that of speech, the next most wonderful is the discovery of the alphabet, that gives the average child so much trouble. The history of the a be brings to our consideration a discovery of the most complicated character and one of the most fruitful in beneficial results of all the past attainments of the human intellect.

The alphabet learned by the Poeahontas boy or girl is what was learned by the Roman youth when they were preparing to be the foremost orators, poets, and generals of the world. The Roman alphabet was from the Greek, and the Greeks received theirs from the Phoenicians by way of adaptation. Thus far the history seems very plain. But when it goes back of that and the question comes up where did the Phænicians get their alphabet. The Hittites and the wundering Arabians seem to some writers to have some claims to the distinction of being theoriginal discoverers, and teachers of the Phoenicians. Recent researches, however, satisfy most of the scholars that the Egyptians were the inventors of letters, more than

the Lawd rial in their origin, and hence Kenos Douglass, instead of being Phoenicion is not an exception to the rule. The word alphabet is composed of alpha and beta, the the comforts of his home, the soames of the two first letters of the lefety of his friends and the free air alphabet, and these again of the mountains. Meph and beth of the which are still the unmes of the first two letters in the Hebrew alphabet. Alephaneans "an ox," and beth means "house."

The Phœuicians perceived some likeness between the letters and the pictures of an ox head and a house, and the memory of the Phomician child unty have been aided by the comparison, but in our early school days it was supposed we could learn our letters more easily if we were told. "A is the bunter who shot at a bird. is the house where you once lived. The old Phomicions must have considered the alphabet as somany pictures of things. The Egyptians had a pictorial system of writing. The Phonicians had much commercial dealings with them, and for the purposes of commerce, they acquainted thomselves with the method of writing and devised the Phomician method as a kind of short hand method for business purpos , and the art of alphabetic writing was by them introduced into Asia from African Egypt

Douglass Sentenced.

Last Friday morning, in the Cireuit Court, Judge Campbell overruled the motion for a new trial, submitted by the counsel for Douglass, and then and there sentenced the prisoner to confinment in the State penitentiary for the term of his natural life, in accordance with the verdict of the jury. The Judge, however, granted a suspension of the sentence for forty days to allow eounsel for Donglas an opportunity to make ont the record and apply for an appeal. Few, if any, who heard the evidence, entertain a donbt that the prisoner fired the shot which put an end to the life of poor Tom Reed. But without commenting particularly upon the verdiet, which we think is fully sustained by the evidence, we again take occasion to impress upon the young men of the county the lesson this case so forcibly teaches, showing the folly and danger of carrying deadly weapons concealed about the person. Douglas started out last Christmas morning with a number of his young friends for a day of fun and frolie. According to the proof, at least three of these young men, of whom Douglass was one, had pistols in their pock. ets, which, during the day, they amnsed themselves in shooting-off, much to the annoyance of the law abiding people of the vicinage, Had they all left their pistols at homelthat morning Tom Reed-a quiet, inoffensive man-would not All systems of writing are picto. have been brutally murdered and in jail under sentence of confinment for life in a State prison, would now be at liberty enjoying

Young men of Greenbrier, we beg you to cousider that in carying pistols or other deadly weapons conceiled about your persons you ire violating the laws of your State, laying yourselves, liable to indictment and prosecuting and running the risks of getting yourselves into just such troubles as that in which young Douglass now finds himself. I If you will persist inthis nnlawful practice, for which there can be no justification or excuse in a civilized country like this, then we invoke the juries and the conrts to visit upon you the full penalties of the law you violate.—"Oreenbrier

BON TO RECUE FIRE,

Though every cook will proclaim that to two la proce of fish is on excondungly easy matter, it is more often dune ladly then well. If not cocked enough the fish is extremely disagreeable to the taste, and if cooked two much it is hard and dry. It is alwave best to have an exact rule as to the time if shall be cooked. When the that is put on the fire look at the crock and take it off as soon as it is

A split fish, such as white shad, while fish, mackerel, serod or binehab, should be timed seconding to the thickness. If the fire be bright and hot, a fish an inch thick can be cooked in twelve minutes. If two mehes thick it will take twenty minutes. Of conrec. whom the fire to dull it will take longer.

Always season fish with salt and papper before cooking. A fish with the skip oo should be broiled with the skin alle from the fire notil the last tivo minutes of cooking, when that ude can be turoed to the fire, but it must be watched closely or it will harn. It is only dry halibut that requires the batter and floor before brotling. Many people profer to dip the whom of theh in olive oil rather than butter. If the oil be used it ment not be heated, and it is wall to apply it to the flah an hour before cooking. - New York World.

TO REMOVE PHUIT STAINS,

As the fruit season waxes it becomes hardenso be to keep delicate drapery spottem. Who has not hehold with dumay one's favorite damask hopeleastly -it would seem-discolored with peach, cherry and herry stains? Somo anggestions called from that best of teachers-Experience-and that are not generally known may be of assistance in remodying the mishap.

In the first place, do not wash the hoen before applying other remodies; to do so sets the stam almost indelibly. and it then has to pass through all stages until time and lanedry leave but a pale vellow remander, which coosummation does not follow usually un-Isl the fabric is threadbare. For herry stains have some one hold the cloth so that it mage a little and pour absolutely boiling water through the spot; rob well. If this fails, light a bit of sulphur and hold under the wet apot-a lighted match will scawer; the sulphorous gas usually does the work, "the state gradually disappearing.

But there are some that, like Lady Manbeth's "damaed spot," will not "out"-peach stamp, for example. Then you must have recourse to salte of lemon, which is good, but apt to leave a hole in lieu of the ctain. By extreme carefulosis in the nas, hosever, it will not do such dire damage. Take a sunny day for the task; first monatan the apol and then rub ou a very little of the salts of lemon; lay the line is to the sun for two or three minutes and then wash thoroughly with a ar and warm water. Success Dearly always follows.

Ittler states, like tron rust, are more easily r m ov 1 All r washing the art le, sque le pop juice un the aports and the a worth ally with mait. Lay the alder, was, and if the real and entry removed topas the an soulout fit or pually TT IN A PAIN

And who, to win a friend. Would to the secrets of his heart invite A fellowship that should begin and end Between a alghi and night?

-Coates Kinney, la Cincinnati Tribune.

A HAMMERPOND ROBBERY

Tis a moot point | whether hnr glary is to ha considered as a sport, a trade, or an art. For n trade the technique is secrooly

rigid enough and its claims to be considered an art are vitieted by the mercenary element that kins, virgin canvan, easel and a very qualifies the trinmples. On the whole considerable case of other appliances it saems to be most justly ranked as sport, a sport for which no rules are at present formulated, and of which merpond Park, and pitched his apparthe prizes are distributed in an extremely informal manner. It was this ling the house. Here he was observed informality of burglary that led to the hy Mr. Raphael Sant, who was reregrettable extinction of two promising beginners at Hammerpond Park.

The stakes offered in this affair consisted chiefly of dinmends and other personal bric-a-brac helonging to the the idea of discussing necturnal art. newly-married Lady Aveling. Lady Aveling, as the reader will remember, was the only daughter of Mrs. Montague Pange, the well-known hostess. Her marriage to Lord Aveling was exquantity and quality of her wedding presents and the fact that the honeymoon was to be spent at Hammerpond. The announcement of these leader, and it was decided that, accompanied by a daly qualified assistant, he should visit the village of Hammerpond in his professional capacity.

and modest disposition, Mr. Watkins kins turned round. Ho looked andetermined to make this visit ineog., and, after due consideration of the conditions of his enterprise, he selected the role of a landscape artist and the unassuming surname of Smith. Ho preceded his assistant, who, it was decided, should join him only on the last afternoon of his stay at Hammerpond. Now, the village of Hammerpond is perhaps one of the prettiest little corners in Snesex; many thatchod bonses still survive, the flinthnilt church with its tall apire nestling under the down is one of the finest and least restored in the country, and the beech-woods and bracken jungles through which the road runs to the great house are singularly rich in what the vulgar artist and photographer call "bits."

with two virgin canvases, a brand-new easel, n pnint hox, portmauteau, an ingenious little ladder made in sections (after the pattern of that lamented master, Charles Peace), crowbar and wire coils, found himself welcomed with effusion and somo curiosity by half a dozon other brethren of the much green paint. brush. It rendered the disgnise he had chosen unexpectedly plausible, but it infleted upon him a considerable amonus of mathetic conversation for which he was very imperfectly pro-

"Have you exhibited very much?" sald young Porson in the bar-parlor of the "Coach and Horses," where explained he was not going to tell Mr. Waskius was skilfully accumulathie arrival.

"Very little," said Mr. Wathins; "just a suack hore and there." "Academy?"

"In course. And at the Crystal Palace.

came down here to paint Hammerpond House by moonlight." "Beally !" said Porson. "That's

rether a novel idea. "Yes," mid Mr. Watkins, "I thought it rather a good notion wheo it commed to me. I expect to begin

to-morrow night. "What I you don't mean to paint in the open, by night?"

"I do, though."

to Porson.

"But how will you see your canvas?" "Rave a bloomin' con's-" began Mr. Wetkins, rising too quickly to the question, and then realizing this, bawled to Miss Durgan for another glass of beer. "I'm gois' to have a thing called a dark lantern," he soid

"But it's about new moon, now," 'There won't be objected Porson. any moon."

"There'll be the house," said Watkins, ''at any rate. I'm goin', yon ce, to paint the house first and the moon efterward.

"Oh!" said Porson, too staggered to continue the conversation.

"They do say," haid old Durgan, the landlord, who had maintained a respectful siloneo during the technical conversation. 'as there's no less than three p'licemen from 'Azelworth on dewty every night in the honso-'count of this Lady Aveling 'n her jewelry."

Toward sunset each day Mr. Watin hand, strolled up the pleasant pathway through the woods to Hamatus in a strategio position command. turning across the park from a study of the chalk pita. His enriosity having been fired by Porson's account of the new arrival, he turned aside with Bill," cried the stranger, as the third

Mr. Watkins was apparently aware of hie approach. A friendly conversation with Lady Hummerpond's butler had just torminated, and that individnal, surrounded by the three pet dogs tensively advertised in the papers, the which it was his duty take for an airing after dinner had been served, was receding in the distance. Mr. Watkins was mixing colors with an air of grent industry. Sant, approaching valuable prizes orented a considerable more nearly, was surprised to see the sible to imagine. Having enlivated | to the name of Bill to the ground by his earliest years, he drew the air in sharply between his teeth at the very Being a mao of naturally retiring first glimpse of this brew. Mr. Watnoved.

"What on earth are you going to do it. with that beastly green?" said Sant.

Mr. Watkins realized that his zeal to appear hasy in the eyes of the butler had evidently hetrayed him iuto soms technical error. He looked at Sant and besitated.

too amazing. It came as a shock. What do you moun to do with it?"

Mr. Watkins was collecting his resources. Nothing could save the aituntion but decision. "If you come hore interrupting my work," he said, "I'm a-goin' to paint your face with

Sant retired, for he was a humorist and a peaceful man. Going down tho So that Mr. Watkins, on his nrrival hill he met Porson and Wainwright. "Either that man is n genine or he is a dangerous luuatio," said bo. "Just he continued his way, his countons uoo hrightened by a pleasant anticipation of a cheerful affrny round an ensel in the gloaming, and the shedding of

> But to Porson and Wainwright Mr. Watkins was less nggressive, sud expleined that the green was intended to be the first coating of his picture. It was, be admitted in response to a invented by himself. But subscquently he became more reticent; he of people "hanging about" to pick up such tricks of the masters as they could, which immediately relieved him

of their company. Twilight deepened; first oce, then "Did they hang you well?" said another star appeared. The rooks very greatly indebted to you. It was amid the tall trees to the left of the "Don't rot," said Mr. Watkins; "I house had long since lapsed into elumberone eilence, the house itself the house." "I mean did they put you in a good lost all the detalls of its architectura and became a dark gray outline, and inequaintance," sand Teddy Watkins. "Whadrer mesu?" sold Mr. Wat | then the windows of the solon shous room window burnt yollow. Had our I rem was a grut' anly young one approached the east in the para a n that he at n od nothing of the Mr Watklus was hung in the shrub prt As the quitou of he grug bery with his amistant, who had die

aratulatory upon the sugensone is y which he had carried all his "Yee, I ought to have thought of all ou, rabt up to the scene of or leannot think of everything "aison. "I hat a the dreaming room. the second to the state of the state of the second the second state of the second seco

with all its windows and lights! Swopme, Jim, I almost wish I was a painter chap. Have you fixed that there wire across the path from the

lenndry?"

He cantionaly approached the house antil he stood below the dressing room window, and began to put together his folding ladder. He was much too experienced a practitioner to feel any nguanal excitement. Jim was recannoitring the emoking room. Suddenly, close beside Mr. Watkins in the bushes there was a violect crash and a stiffed caree. Some one had tumbled over arranged. He heard feet running on the gravel pathwey beyond. Mr. Watkina, like ali trao artists, was a singularly shy man, and he incontinently dropped his tolding lodder and began muning circumspectly through the sbrubberv.

He was indistinctly awere of two people hot upon his heels, and he fancied that he distinguished the outline of his assistant in front of him. In another moment he had vanited the low stone wall bounding the shrnbhery, and was in the open park. Two thuds on the turl followed his own

It was a close chase in the darkness through the trees. Mr. Watkins was a loosely huilt man and is good training, and he gained hand-over-hand upon the hoursely panting figure in front.

Noither spoke, but, as Mr. Watkins pulled up alongede, a qualm of awful donht came over him. The other man turned his head at the same moment and gave an exclamation of surprise. "It's not Jim," thought Mr. Watkins, and simultaneously the stranger flung himself, as it were, at Watkins's knee, and they were forthwith grappling on the ground together. 'Lend a hand, man eamo np. And Bill did-two hands, in fact, and some accentnated feet. The fourth mnn, presumably Jim, had apparently turned saide and made off in a different direction. At mny rate, he did not join the trie.

Mr. Watkins's memory of the ineidents of the next two minntes is oxtremely vague. Ho has a dim recollection of having his thumb in the corner of the month of the first man, and feeling anxions shout its safety, sensation in the small circle in which color in question was as harsh and and for some seconds at least be held Mr. Teddy Watkins was the undisputed | hrilliant an emerald green as it is pos- the head of the gentleman unswering an extreme sensibility to color from the hair. He was also kicked in a great number of different places, apparently by a vast multitude of people. Ther the gentleman who was not Bill got his knee below Mr. Watkins's diaphragm and tried to ourl him up upon

> When his sensations hecame loss entangled he was sitting upon the turf, end eight or ten men-tho night was dark, and he was rather too confused to conut-standing round him to recover. He mourufully assumed that "Pardon my rudonesa," said Sant; he was captured, and would prohably 'hnt, really, that green is altogether | have made some philosophical reflections on the flekleness of fortune, had uot his internal sensations disinclined him to speech.

Ho noticed very quickly that his 000. wrists were not handouffed, and then n tlask of hrandy was put in his hands. This tooched him a little--it was such unexpected kindness.

"He's a-comlo' round," said a voice which he fancied he recognized as belonging to the Hammerpooil second footman.

"Wo've got 'em," said the Hammergo up and look at his greeu." And pond butler, the man who had handed him the flask. "Thanks to you."

No one answered this remark. Yet he failed to see how it applied to him. "Ho's fair dazed," said a strange voice; "the villains half murdered

Mr. Teddy Watkius decided to remain fair dazed until be had a better grasp of the cituation. He perceived that two of the black figures round remark, an absolutely new method, him stood side by side with a dejected air, and there was something in the carriage of their shoulders that suggasted to his experienced eye hands every passer-by the secret of his ewn | that were bound together. In a llash ing local information on the night of perticular atyle, and added some he rose to his position. He emptied scathing remarks upon the meanness | the little thank and ataggered, obsequious hands easisting him to his feet. There was a sympothetic murmur.

> "Shake hands, sir; shake hands, sald one of the figures near him. "Permit me to introduce myself. I am the jewela of my wite, Lady Avsling, which attracted these scoundrols to

"Vary glad to make your lordship's "I presume you saw the rancals

making for the shrubbery and dropped

"That's exactly how it happened." "You should have waited till they man, even for an ortiot, and he did it would have been found ileserted, got in at the window," and hord Avthe west being put away. One brist, uncivil word in brilliant cling. "They would get it hotter if that a tag the best to 1. grown sullied the purity of the cauves, they had actually committed the hurglary. Aud it was lucky for you, two of the policeman were out by the and a result with Mr Wat restly joined him from the carriage gates and followed up the three of you I doubt it you could have on. Inspired, in the its a real to Mr. Woth us was inchnal to be self- | cured the two of them - though it was plu ky of you, all the came "

And instead of entering Hammerpond House by the dresing route window, Mr. Watkins entered at. elightly intoxicated, and inclined now to obserfulness again-on the erm at a real, live peer, and by the front door. "Thie," thought Mr. Watkins, "is burgling in style!"

The "sconnilrels," seen by guslight, proved to be mere local amateurs nuknown to Mr. Watkins, and they were taken down into the pantry and there watched over by three policemen, two gamekeepers with boaded guns, the lintier, an 'ostler, and o carman, until the wire which his assistant had just the dawn allowed of their removal to Hazlehnret police station. Mr. Watkins was made much of in the calea. They devoted a sofa to him, and would not hear of a reture to the village that

> Lady Aveling was sure he was brilliautly original, and said her idea of Turner was just another rough, half inchrinted, deep-eyed, brave and clever man. Some one brought up a remark. able little folding ladder that had been picked up in the shrubbery, and showed him how it was put together. They also described how wires bed been found in the shrubbery, evidently put there to trip up unwary phrauers. It was lucky he had escaped these snores. And they showed him the jowels.

> Mr. Watkins had the sense net to talk too much, and in any conversational difficulty tell back on his internal pains. At last he was seized with stiffness in the back, and yawning. Every one suddenly awoke to the fact that it was a shame to keep him talking after his affray, so he retired to his room, the little red room uext to Lord Aveling's suite.

> The dawn found a deserted casel hearing a canvas with a green inscription in the Hammerpond Park, and it fonnil Hammerpond House in commotion. But if the dawn found Mr. Teddy Watkins and the Avellng diamouds it did not communicate the information to the police. -Pall Mall Budget.

eertainly the most effective, soon fol-

"It is impossible to imagine anything more whimsical and comio than the evolutions of the Chinese soldiers. Thoy advance, draw back, leap, pironette and ent capers, cronch behind their shields as if to watch the enomy, then jump up again, distribute blows right and left and then run away with all their might, crying, 'Victory I vic-

The Chinese muskets had no stocks and the soldiers held them against their hips. The men who seted a gun-carriages had their ears stuffed

with cotton wool.

The war-junks composing the Im perial Navy were invariably built to represent some alarming animal. The Centipede was the name of one witl three rows of oars, representing the feet of that insect. The Hawk's Beal was made at each end like a hawk's heak. There were also wheeled ves sels, which have been used in China for many centuries.

The men were usually supplied with rattan shields painted with tigere The heavy troops work heads. ouirasses of quilted cloth covered with iron plates, and helmets of polished steel

Their matchlock was of wronght iron worked like a fowling-piece. The match was a cord of hemp or coir, and the pan had to be uncovered with the hand, which prevented its use in wet weather. The giugal is a ewivel gun from six to fourteen feet long, resting on a tripod. The artillery consists principally of weapons like

A French historian writes of the Chinese army In 1644: "Their arm: are arquebuses, pikes, staves with iron and hatchets. The horsemen use other arms. When they go to fight they earry four swords at their saddle pommel. They held two in their handa when they charge, and make nse of them with great dexterity. They likewise use darts and lances. They are accustomed to be caviroued with a truop of groums, which are about them when they enter and which are numble and well-armed. Their valur consists in polley and stratagoms of war, where they employ their minds more than their courage to charge the enomy openly."

Chineso mutbods of warfare were probably at that time superior to European. To use two swords at once was an admirable feat of warlike akill. Another writer mays of the mary:

"The greatest ships they have are called juocos, which are very great and are made for the ware with castles very high on the poop and prow, like to the ships of the Lovant. There are so many of these that it is easy for any general of the sesson to gather io a little time a navy of from five hunred to a thousand of them of the same making and greatures."

fested in the recovery of an old-stene resi sent of this town, Mr Jon. Bunker, who has for several fears been considered by all bis friends a hopefeet consumptive. In restigntion above that for over thirsy-two years he ened three and a half ponade of tobacco e week. A short time ago he was indured to try a tobacco-handt cure called "No-To-Bac," Talking about his attractions recovery today he said "Yes, I used No-To-Ba", and two boxes completely cured me. I thought, and so did all my friends, that I had consumption. Now they say, as you say, how healthy and strong you look, Joe, and whenever they ask me what corol my consumption | Jeli them No-To-Bac. The last week I need tobacco I jost four pounds. The morning I began the use of No-To-Ban I weighed 127 % pounds; to-day I weigh 169, a gain of 4214 pounds. I can heartily and sleep well. Refore I used No-To-Bac I was so astroug that when I went to drink I and to hold the glass in both hands. To-day my cerves are perfectly steady. Where did I get No-To-Bac? At the drug store. It is made by the Sterling Remedy Company, general western office, 45 Randolph street, Chicago, New York office, 10 Spruce street, but I see by the priated matter that it is sold by all drugglets - I know all the drugglets to this town keep it. I have recommended it to over one hundred people and do not know of a single failure to cure."

Buddhlam in Paris.

A fresh propaganda of Buddhiam is being undertaken in Paris. It is assorted that 30,000 Parislans now profess the ancient religion. Many well-known women describe themselves as eclectic Buddhists. A lita tle volume gives a summary of the doctrines of the new creed. It has just been printed, and large numbers have been bought hy wealthy neophytes and will he distributed soon among all classes. The copies of the book have been bound in black morocco, glided to resemble prayer

KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live better than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleausing the system, dispelling colds, headaches and fevers and permanently eurlag constipatios. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kidneys, Liver and Bowels without weakening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all druggists in 50c and \$1 bottles, but it is manufactured by the Callfornia Fig Syrup Co. only, whose name is printed on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

What is

Castoria.

"Castoria is an excellent medicine for children. Mothers have repeatedly told me of its good effect upon their children."

Dr. O. O. Oscoon, Lowell, Mass.

" Castoria is the best remedy for children of which I am acquainted. I hope the day is not far distant when mothers will consider the real interest of their children, and use Castoria instead of the various quack postrums which are destroying their loved ones, by foreing opium, morphine, soothing syrup and other hurtful agents down their throats, thereby sending them to premature graves,"

DR. J. F. KINCHELOR,

Castoria

" Castoria is so well adapted to children that I meniumend it as superior to any prescription. known to me."

H. A. ARCHER, M. D., 111 So. Oxford St., Brooklyn, N. Y.

"Our physicians in the children's depursment have spoken highly of their expentence in their outside practice with Castoria. and although we only have among our medical supplies what is known as regular products, yet we are free to confees that the merits of Castoria has won us to look with

THE LEWISBURG FEMALE INSTITUTE.

GALLS ATTENTION

To the fine advantages offered in its Classical Department, its Music and Art Department, and its department of Languages, Ancient and Modern.

All the room re carpated and furnished in heavy suites of oak.

Read the following extracts from testimonials from some of its patrons.

HON, OHN W. MCCREERY, RALEIGH C. H.,

(of the State Senate of West Virginia) writes: "Having had wo daughters at the Lewisburg Female Institute for Now everyone must admire this the last two sessions, under the management of Rev. R. L. Telford, it affords me pleusure to say that I regard the school as one of the best in the country. I heartily approve of the dicipline, teaching, and care given to the students, and I recommend it to those who have daughters to educate, and think they cannot do better than to send them to this school."

> REV. D. S. SYDENSTRICKER, D. D., ACADEMY, W. VA., Writes: "Having been a patron of the Lewisburg Female Institute for two

years, I can sineerely recommend it to the attention and patronage of all who desire to have their daughters thoroughly trained in mind and heart. The course of instruction is thorough and honest. No half-way work is done. The refining and elevating Christian influences thrown around the pupils are most excellent."

REV. J. M. SLOAN writes:

"I do most heartily recommend this Institution to all young ladies who are seeking the best educational advantages on the most reasonable terms, and to all parents desiring to send their daughters where they will receive the kindest attention, the best of instruction, and enjoy the opportunity of securing a sound Christian education under the best influences. I do not know any other institution so well adapted in all respects for the proper education of girls, or which offers equal advantages at so small a cost."

> JUDGE A. C. SNYDER writes: (Ex-Judge Supreme Court of Appeals.)

"It affords me pleasure to testify to the superior advantages of the Lewisburg Female Institute, as an instution of learning, amply equipped for its work both in its appliances and teachers. As a patron of woman goes among the wealthy the school I wish to express my satisfaction with, the intellectual, soclass and says, my bright eyed cial, and moral training it confers, and heartily commend it to all who

> CAPT. R. L. DENNIS writes: A .Fx-State Senator, West-Virginia.) ---

"No better school for girls ean he found in this or any other State. style in which you dress is netual. The expenses are low-made to suit the times, and both Principal and Assistants are unremitting in their efforts to advance the intellectual and moral training of those committed to their care."

MAJ. JOHN W. HARRIS writes:

"I can cordially commend the Lewisburg Female Institute to all who have daughters to educate. The care bestowed upon the manners and morals of the pupils, as well as their intellectual training, and the success which has attended the efforts of those in charge, to make of the school a home as well as an educational institution, leave but little, if anything to be desired."

REV. J. M. RAWLINGS, D. D., WILMINGTON, N. C. (Formerly Chaplain University of Virginia, and Chauceller Southwestern University, Clarksville, Tennessee.)

tem of government are mable to lies who are seeking a good school for their daughters. The teaching is excellent, the management is firm and very kindly, and the girls on civilization. One man lives as seem industrions and happy. For the last year, I have lived at the In-

> JUDGE H. A. HOLT, CHARLESTON, WEST VIRGINIA. (of the Supreme Court of Appeals.)

Promising Youth.

One half of the world does not know bow the other half lives, nelther does both halves know how the older brother in some of our families obtains the copy of tho paper he wants from his younger brother, when that younger brother has got a right to the paper by getting through his supper first and taking possession.

Say the family's name is Vance, and Ad., the big brother, feels as though he cannot wait for George to finish the county paper, so he' takes up the Wheeling Register and reads it awhile. The following conversation may occur:

"Say, George, is that the Poca-HONTAS TIMES you're readin'?"

"Yep," mutters George who is absorbed in the perusal of a thrilling bit of local news.

'Say, let's trade!" insinuatingly. "See here," says George, "I'm readin' these here TIMES, an' you wait till I get done."

"You'd better trade, George, there's au account in this paper about a boy named George Vance, who killed a fellow becos' he stole his wad of chewin' gum he taken it outen his mouth to eaten a apple; he stnek him with a Barlow knife right in the weskit pocket, and then went and an' drownded hisself."

"Let me see it," says George. "Not unless you trade," says Ad.

firmly.

"You go orf, it aint nothin' about it in there," replies George. Ad is repulsed for a moment, but pulls himself together for an-

other attack. "There's a hig account of the new kind of flying machine in this here Register, George. A man over in France spent forty thousand dollars making it, and busted hisself and hissold aunt; they they put her up the other day, and the inventor and the ole auntand three other men goes up in her, afore about seventeen hundred people, and the old aunt's dog barkin' fit to bust. She sailed up ez pretty ez enthing yon ever see, an' riz about a thousand feet, when she gin to sail off. They heard suthin erack an' down come a bolt. The ole machine 'peared to be going west and it didn't come down, and it went out of sight right plum toward Ameriky. They tollygraphed to the sea-port town and the oppyrator was on the watchout nn' saw her go over him sailin' like a bird. Bimeby a letter come sailin' down, and that bloomin flyin' machine man hed writ a letter tellin' them concerned, or the hull concern, either, that he was a hlam fool, that he couldn't stop the machinery, an' that all he could do was to keep her from goin' higher. Said he intended to steer for Norfolk, an' expected the Blue Ridge would ketch him, enyway, the Alleghany Mountin'; he says "plenty to eat an' Aunty's comfortable an'

A PERILOUS TRIP.

LTHOUGH I'm only five and twenty, I hav learned tha there's one kind of a craft von can't tell anything about from the ent of her jih, and that's a girl. used to think they were a mighty poor lot, good

pretty, or to talk to when the weather was bad and there was not anything this summer to change my mind entirely, and now when I hear them toasting "The Ladies!" nobody's hat comes off quicker than mine and nobody vella "Hear, hear!" any londer than yours truly. May be you'd like to hear how this came about. Hold ou a juffy till I fill my pipe and I'll spin

Bob Terrisa was a classmate of mine at Harvard. We both left before we took our degrees on account of a lifthe difference of opinion with the Faculty, but that's neither here nor there. He went into business with his psternal ancestor, who is a banker, and I with mine, a boat-builder, and consequently for a year or so we saw little of each other, when all at once the Terrissen took if info their heads to hire a place on the South Shore for the anumer, and Bob appeared on the scene again, the same sixpence, hig and jolly and ready for any kind of a

Thu Terrisses put on no end of atyle and lived right up to the handle. I felt like a fish out of water whenever I went there, for my folks were old-fashioued; so I steered olear of the family, and, as Bob was at home only in the evening, for a good while we didn't do more than smoke a pipe together strolling on the beach and talking boat. I had a daudy little entter, but there was so much work on hand in the shop that ale wasn't ready to go into the water until July, and in the moan time I had got all my sailing out of a scrap of a boat, narrow keeled and riggged up with a skitsail -the "Skeeter," father called her one day in fun, and the name stuck. was a good deal like driving a donkey after a racehorse, I managed to get more than one lively experieuce out of her; and if it hadu't been for the Skeeter I should not have had the story to tell you to-day.

"Orrlal" mid 1. "Pooh! I hate the whole lot of them. Let them stay ashere, where they belong!" So I went on grambling until Bob softened me with more phosphate and a couple of the twenty-five cont eigers, and I gave in. He stepped off hame pretty lively to get the consin out of her curl papers, I suppose, and into her yealstlng gown, while I, with many misgivings, scrubbed up the Skeeter, bailed her out, dried off the thwarts, and as luck would have it, put in an extra pair of oars. By the time I had not up the mast and taken a tack out info the cove I could see two figures harry. ing down to the Terrisa landing, and

I ran up alongaide. "Jerry, I want to introduce you fo my consin, Miss Bangs, "sung out Bob before I had actually got within hailing distance. The girl smiled and bowed—but both rather coolly. She was rigged out to kill in a regular yachting costume, white linen trimmed with dark blue, anchors worked in the eorners of the collars and a sailur hat, whife shoes, and if you'll believe me, white kid gloves and a white ailk supshade with a china handle! There's no denying that she did look stunning, for she was one of those tall, hig girls that are right in the fashion now, with black heir and over and a good color, but her waist was like an hour glass, and she seemed altogether too stiff and proud and dressy to be of earthly good in the world; I took off my hat;

would vote to alay at home. don't expect them to do. So she said right off:

then I glanced at her, then at the Skee-

"Don't lef as lose any fime, Boh. I'm afraid we shall rather be a fight Lt for the boat; but, then, there were three wise men of Gofham who went caps against the rocks flercely. The self, and with two or three vigorous to sea in a bowl."

She gof ahoard, and not so awkwardly as I had expected, and she and Bob nat down in the middle of the boat. Bob changed his seat in a minute, and went up forward as we put off. A neat little breeze was blowing off shore, and the Skeeter akimmed along over the waves like a bird. The white sunshade was in the way when we wanted to go about, and I didn't like to speak of if, but the moment the cousin canght on she ahnt it down without a word and nover opened it again the wholo day. She didn't talk muchonly asked me in a distant way what with salt water, his jaunty cap over stylo was gone, and sho looked anythis place and that along the shore might he, but when she caught sight of the Miuot ledge light her eyes aparkled and sho said eagerly;

"Oh, Mr. Jerry, don't you think wo might sail ont there? I never have seen the inside of a lighthouse, and if. would be a delightful experiouse."

I abook my head. Prudence was against taking the Skeeter out so far. Buf sho begged and feased. Bob heard the sound of her voice, coaxing and he put in his oar, so they went ou until against all common sense I gave in after taking a look at the sky and the sea, which both seemed as propitions as could be for such a vouture. As father said afterwards, all my horse seuse deserted me, and I lef those two landlubhers talk me into doing as foolish a thing'as over a yaohteman under-

But so were we ized how impossible it would be to all, wetter than drowned rate, and as land there again, and I shaped my we stood there shivering the absordity course for the shore. Boh sat in the of it struck us each and overy one,

> "Three cheers for the Skeeter!" rather! You romember me mentioning that waisf of hers? My arm will just go round it. - Boston Herald.

Rent for Made Land,

The St. Louis courts have recently decided a case of no little interest to the dwellers on the bunks of rivers where new land is likely to be made. Mrs. Anda R. Allen owns 145 acres of land at the point where the river Des Pores ontors the Mississippi, and the leased it to the St. Louis, Iron Monnthu poor Skeeter was now borne to the tain and Southern. Later seventy-five nores was added to this tract by acoretions from the Mississippi. The the trough of thu sea. How I over company has a transfer at this point and was compelled to cross the new land in transferring cars. It, howover, refused to pay rent for the land embraced in the new formation, on the ground that it was not contraced iu the lease. Judge Dillon habl that the accretions had become a part of the original tract, and, innamuch sv the company had used the land, it was liable for rent. Tho land was valued a little mortified at the scrutiny, for by experts at \$100 per sere, and judgthe gras up, and I wasn't surprised docks and her brass work abining in the purspiration ran down my face in mont was given against the railrost streams and the alcere of my alabhy upon the basis of aix per cent. on this valuation. - New Orleans Picayane.

Into the nostrils came a concerned. When they get time off subtle strong odor of powder smoke,

Our gnide atrode ahruptly into the gloom. His lamp flared shades of yellow and orange npon the walls of a tunnel that led away from the foot of the shaft. Before us there was always the ourtain of impenetrable night. We walked on with no sound save the crunch of our feet upon the coal dust on the floor. The sense of an shiding danger in the roof was always upon our foreheads. It expressed to us all the nameasured deadly tons above as.

All at once, far shead, shone a little flame, hlurred and difficult of location. It was a tiny, indefinite thing, like a wisp light. We sesmed to he looking at it through a great fog. Presently there were two of them. They hegan to move to and fro and danced before us.

After a time we came upon two men crouching where the roof of the passage came near to meeting the floor. The garmouts of the men were no more eable than their faces, and when they turned heads to regard our tramping parly, their eyehalls and teeth shone white as bleached hones. It was like the grinning of two skulls there in the shadows.

But they said "Hello, Jim," to our conductor. Their months expanded in smilee-wide and startling emiles.

In a moment they turned again to their work. When the lights of our uarty reinforced their two lamps we could see that one was huny drilling into the coal with a long thin har. The low roof ominously pressed his shoulders as he bent at his toil. The other knelt behind him on the loose lumps of doal.

We came upon other little lowroofed chambers, each containing two mon, a "miner," who makes the blasts, and his "laborer," who loads the coal npon the cars and assists the minor generally.

where nature has the atrength of a million giants. Sometimes their enemy becomes exasterated and sonfie out ten, twenty, thirty lives. Canally she rameins calm, and takes one at a time with method and pregistion. She need not linery. She possesses elernity. After a blast, the emoke, faintly fumianus, silvery, floats silently through the adjacent toppole.

MINE MUR.ES.

Over in a wide and lightless room we found the male stables. There we allowed to stand and cool before discovered a number of these animals using. - New York Poet. standing with an air of calminess and wodemon sew tast noisensecon-list amazing to find in a mine. A little dark prelin came and helabored his male Chine natil ha stood broadside being cooked, and will be improved to no, that we might admire his innumerable fine qualities. The stable in a little moisture even for ten was like a dangeon. The mules were minues after they are cooked, they arranged in selemn rows. They are spoiled. The potate is composed turned their heads toward our lamps. The glare made their eyes ahine wondrously, like leases. They resembled like a sponge. A good potato will be enormons rats.

It is a common affair for mules to be imprisoned for years in the limitless night of the mines. Our acquaintance, China, had been four years huriad. Upon the surface there had been the march of sessons, the white splender of snows had changed again and again to the glories of green springs. Four times had the earth heep ahiaze with the decorations of brilliant autumns. But China and his friends bad remained in these dungeons, from which daylight, if one could got a view up a shaft, would appear a tiny circle, a nilver star aglow in a sable aky.

Usually when brought to the surface these animals tromble at the earth, radiant in the sunshine. Later they go almost mad with fautastle foy. The full splendors of the heavens, the grass, the trees, the breezes break upon them anddenly. They caper and carear with oxtravagent unlish glec.

After heing long in the mines the mulea are apt to duck and dedge at the close glare of lamps, hat some of them have been known to have piteons feara of being left in the dead dark. ness. They seem then, somehow, like little children. We mat a hoy once who said that aemetimes the only way he could get his resolute team to move was to run shead of them with the light. Afraid of the darkness, they would trot harriedly after him and so take the train of heavy cars to a desired place.

Great and mystically dreadful lathe earth from a mine's depth. Man is in the implacable grasp of nature. It has only to tighten alightly and he is ornshed like a hug. His londest shrick of agony would be as impotent as his final mosu to bring help from that fair land that lies, like heaven, over his head. There is an Insidious, silent enomy in the gas. If the huge fanwheel on the top of the earth should stop for a brief period there is certain death and a panic more terrible than any occurring where the ann has shone ensues down under the tous of 100ks. If a man escape the gas, the floods, the "squsszes" of falling rock, the ears shooting down through the little tnnuels, the precarlous elevators, the handred perils, there asnally comes to him an attack of miner's asthma and slowly racks and shakes bim into the grave. Meanwhile he gets \$3 per day and his lahorer \$1.25.

In the chamber, at the foot of the shaft; as we were departing, a group of the men were resting. They lay about in carciess poses. When we climbed shoard the olevator, we had a moment in which to turn and regard them. Then suddenly the study in black faces and crimson and orange lights vanished. We were on our swift way to the surface. Far above us, in the engine room, the engineer aat with his band ou a lover and his eye on the little model of the shaft wherein a miniature elevator was making the ascent oven as our elevator was making it. In fact, the same mighty engines gave power to hoth, and their positions are relatively the same always.

Of a sudden the flacting walls become fleeked with light. It increased to a downpour of ennhance. Tho From this tunnel of our first mine high sun was affost in a splendor of we went with our guide to the foot of spoticss hlue. The distant hills were the main shaft. Here we were in arrayed in purple and stood like the most important passage of a mine, monarchs. A glory of gold was upon

HOUSEHOLD APPAIRS,

PARATAPLE NIED TEA. Mrs. Borer says: Iced tea may be pulatable, hat it is certainly not wholesome. The latter way to make it is to fill the glasses partly full of erneked ige; then make the ten double strength and pour it boiling hat over the ice. Then, if you like, add your lemon and engar. You get less tannie acid in this way than when the tes is

TO IMPROVE POTATORS.

Pointoes may be sesked in cold water for twelve or more hours before rather than injured, but If they stand largely of starch. The uncouked starch does not unite with moisture light and mealy as soou as it is baked or boiled, but If the cooking in continned it will become dark, heavy and strong flavored .- St. Louis Star-Say-

FOR PICKLING DAY,

In cotting vinegar for pickles, aiways try to get apple vinegar, as the other kinds frequently est up the pickles entirely or cause them to turn soft. Too strong vinegar should be partly diluted with water.

All pickles should be tightly scaled, to prevent air reaching the vinegar, as this kills it. It should always be ponred on het, as it comes to the first scald-never allow it to hoil.

Never put up pickles in anything that has held any kind of grease, and novor let them freeze.

If pickles are put into hrine, lt should olways be strong enough to hear an ogg. Une coarse salt, in proportion of a heaping pint of nalt to a gallon of water.

The nicest way to put up pickles is to put them in hottles and seal while hot -New York Journal.

DELICIOUS SANDWICHES.

The hread for sandwiches should always be one day old at least, and must he sliced very thin. The huttor abould he soft enough to spread withont ernmhling the loaf, and the elice should be spread before it is out from the loaf. Slices of ryo hread huttered, spread thinly with mustard and then with cottage oheese are ,very palatable. For egg sandwiobes heat your eggs to a paste after they have been hard hoiled. There should be a little eream added to them to make the mixture smooth, and it must be seasoned to taste.

Fish sandwiches may he made from any kind of fish. Whatever it isafter removing hones and skin-pound it to a smooth paste, mix with it a very little ohopped pickle and season. If it be a dry fish, mix with it also a little melted hutter or salad dressing. The thinly-sliced bread spread with salad dressing, on which are laid water-eresses or a crisp leaf of lettuce, is a most welcome addition to a snmmor lanch. Then for sweets there are saudwiches made with jellies and jams. These may be spread on slices of cake, wheat, graham or even brown bread .- Detroit Free Press.

RECIPES

How to Make Jelly-Making quines and pear jolly he caroful to abstract all the seeds and cores of both fruits before cooking, as there is a muellage in them that will make the jolly milky looking and impair the flavor.

Kidney Toast-Chop fine four voal kidneys with half a pound of calf's liver; season with pepper and salt. Make a little butter hot in a frying pan and toss them about until cooked, hnt not overdone. Romove from the fire and stir in the heaten yolk of one ogg and half a teaspoouful of lemon inice. Spread on toast and serve at once. Stewed or hoiled potatoes and hot Indian meal muffine go nicely with this excollent dish.

Cocoanut Sponge-Thicken one pint of milk in which is dissolved threequarters of a oup of angar, with four tablespoonfuls of cornstarch. Cook thoroughly in a donale holler. When cooked and boiling hot, heat this into the whites of three eggs beaten stiff. After standing a few moments, add one onp of grated eccount. Flavor with vanilla, and turn into mold, with grated occount on top.

Steamed Cablinge-Oabbage, as nanally cooked, is too heavy for an ordinary atomach to digest. Try steaming it until soft, and then serve by ponring around it a white sance. Make the cauce by melting a spoonful of hutter, stirring smoothly into this the same measure of flour. Pour Into the mixture one plut of milk and boil until thick. Season with salt. This is almost as dainty a dich as cauliflower.

Lemon Damplings -- One piut tlour, one heaping bespoonful baking powder and salt sifted together. Mix with a cupful of milk or water. Make a syrup of one-half enpful molasses, one and one-half cuptule augur, two cupfuls water and two lomous aliced fine Bring to a boil and drop la dumplings and cook fifteen minutes. Turn them once while cooking. When the dumplings are taken out add a over them.

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains neither Opium, Morphine nor other Narcatto substanco. It is a harmless substituto for Paregoric, Drops, Soothing Syraps, and Castor Otl. It is Pieasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays feverishness. Castoria prevents vomiting Sour Curd, cures Diarrhoea and Wind Colic. Castoria relieves teething troubles, enres canstipation and flatulency. Castoria assimilates the food, regulates the stomach and bowets, giving healthy and natural sleep. Castoria is the Children's Panacou-the Mother's Friend.

Castoria.

"Ouztoria is an excellent medicine for children. Hothers have repeatedly told me of its good effect upon their children."

DE O. C. OSCOOD, Lownll, Mass.

" Castoria is the best remedy for children of which I am acquainted. I hope the day is not far distant when mothers will consider the real Interest of their children, and use Castoria instead of the various quark nostrums which em destroying their loved ones, by forcing oplum, morphine, soothing syrup and other hurrful agents down their throats, thereby sending them to premature graves," ...

Da. J. F. KINCHELOE,

Castoria.

" Cartoria is so well adapted to children that I recommend it assuperior to any prescription known to me."

H. A. ARCSER, M. D., 111 So. Oxford SL, Brooklyn, N. Y.

"Our physicians in the children's department have spoken highly of their experience in their outside practice with Castoria. and sithough we only have among our medical supplies what is known as regular products, net we are free to course that the merits of Castoria has wen us to look with favor upot it."

AND FOUND!

DS VANALTINE enuniaring leisarely down one of the boulevards in farin. It was a apring morning; the oir was crisp and vendure fresh and iuviting-just the kind of a day for a stroll, and so the American woman

but distanced her fashionable equippage. She had walked all the way from her next and artistic temporary abiding place in the American colony to the shopping district, had purclassed raudey trides and looked at thousands of articles she had not bought; had fascinated a number of clerks by her dash and brilliancy until they were ready to display for ber especial benefit the wealth of the world in feminine odds and ends, and now she was making her way homeward, care free, and happily conacious that many covert glances were | child?" cast at her stylish figure.

At sixteen she was a charming girl; at twenty-six a beautiful wife and hostess; at, well, say thirty-su irresistible widow, perfectly estisfied to saunter all by herself elong what remained of life's floral pathway. With a more than comfortable competence, ahe regarded the future with complacency and the past with resignation. Not that anything very tragic was interwoven among the yesterdays. Exinterco had flowed emoothly enougha broken engagement, a heart wrung for a time, a trip abroad, a wealthy suitor, a fashionable wedding, a pleasing honeymoon, a series of social triumps, the demise of her botter haif, a brief period for monruing, and the comfortable present.

She was childless, hat she had many friends. It is trae that sometimes comething like a pang came to her polite." when her mind reverted to children, and sho told herself that possibly a little one would not be at all in the way, but, on the contrary, might give sweet soluce to the few lonely incments which came to her, who, generally speaking, did not know what lonlineas was. As she walked along with superb movement, she observed two pretty girls in charge of a nurse. The children were playing on the grass boneath the shade trees with which the bonlevard was lined, while the unrac, who had the expressionless features of a peasant girl, was seated on a bench knitting. Mrs. Van Altine stopped Impulsively.

"Oh, you darling," she said, and thereupon in her own peculiarly graceful way hegan to question the children and coo over them just as if abe knew all about the language of childhood. Nearby on another bench | was a little boy dressed in sailor's uttire, with the word "captain" on his cap. Ha looked forlorn and distarned, for his month quivered and

there were teers in his big, blue eyes. "What's the matter, my little man?" continued Mrs. Van Altine, in the lan-

gouge of the country. He comby stared at her and rubbed one of his eyes with his dirty fiel. She placed ber hand on his golden onris in a carnesing manuer.

"Why don't you play with the other children?" abe continued.

For answer his rubbed his other eyo me.'

every golden look must be precious to him. Do you know what Td do, Bohhy, if I had a little hoy like you?' "No, ma'am."

"I'd-I'd love him to deeth."

At the next hotel Mrs. Van Altine was informed that Richard Stoole was stopping there; that he had a hoy; that the aforesaid boy was lost; that Mr. Steele was nearly frentie and that he had just gone to the prefect of poliee.

"And where is thet?"

"Just across the way, madam." "Come, Bohby, we will surprise "Well," she remarked with a little him. He must be nearly crazy." sigh, "I approse we had better call a

A handsome American, thirty-five years of age, solid and prosperous looking, was convorsing with the official in the magistrate's office.

The lad will be taken in, and our system of communication is such that the fact will be known at headquarters. I will then at ogoo inform you of tho oirenmstances.

"Your reward shall be e handsome

At this moment the clerk looked in. "A lady to see you, mousienr."

"Sny I am engaged," responded the

"I did toll her that." "Well?"

"She asked if an American gentleman was hero. I told her 'yos,' and she said she must come in at ones."

"Very well. Show her in." Mrs. Van Altine, a visiou of glorious womanhood, stood in the doorway with Bohby hy the hand.

"Is this your son, sir?" she said. Richard Steele sprang to his feet. Bobby dropped his elephant and the next moment was folded to his father's hreast. Mrs. Van Altine seemed strangoly moved as she regarded tho scene. Her face was overspread with

unnaual pallor. "I was not mistaken," she told herself. "There are, truly, many Steeles in the world, but it must have been some psychio sense that cansed my heart to beat when I heard this name. Let me see, now; it is sixteen yours since-nnd there he standa and does not know me. Time, time, how you level romance! He was slender. Now he is stunt. He had such a daiuty mustache. Nuw he has n beard. Really, he is much better looking."

These and other thoughts flashed through Mrs. Van Altine's mind at that moment. 'The American turued. "Madam, how can I thank you?

Words failed him.

He gazed in growing amnzement. "Fanuiel"

"Diok!"

They clasped linnds. The years that had presed were bridged by that pressure of hands. Plighted faith, resentment, hroken vowa, pique, misunderstanding, separatiou-all, all vanished, and in the sunlight of the present "To the Hotel St. Petersburg," com- they gazed gladly into each other's manded Min Van Altina She raquely eyes

Dead Paupers Made Useful,

Nothing is useless newadays-not even a defunct pauper. Hood's plain.

Rattle his bones over the stones; He's only s pauper when nebody ownsis now out of dato. The guardians know hotter than to act so recklessly, for often the party concerned is the possessor of a set of artificial teeth which contains a good deal of goldlast rolic of more presperous timesand in the interest of the rate-payer: the precions metal must be secured and turned into ponnds sterling. Often, too, they are the owners of rings or tiny trinkets, not pawnshle, but still containing as much anriforous value as not a few modern gold mines. These have to be collected and also converted into each by means of the melting-pot. In the Holborn Unioe the molting process takes place once s year, and has just been necomplished for the present season. The jewelry dealt with is what is found on panpers who die friendless and unclaimed in its various astablishments.

and trinkets have hesn melted down, and produced a har of go'd, estimated at eleven carats, and worth about £40. A good portion of it was from the plates of artifloial teeth. Mr. Walton said that on one set of artificial teeth there was at least £4 worth of gold. "I will do what I can, monsionr. The proceeds are paid into the common exchequer of the nnion. -London Telegraph.

Bleaching Yellow Dlamonds.

The discovery of diamonds in South Africa lod indirectly to some olever deceit by the dealers. Many of the Sonth African diamonds have a straw tint, which has an unfavorable effect on their price, especially as experts helieve it will become more decided the longer the stones are exposed to the air. Some of the more knowing deal. ers discovered that hy subjecting the strew-tinted diamonds to a bath of certain aclds the objectionable solor was remuved and the gems become pure white. A number of dismonds so treated were sold in Paris and Berlin, aud brought higher prices than they would if they had retained their orig-

inal oolor. After exposure to the action of the air for neertain time the original color roturns, but hy that they have passed ont of the dealers' hands. The frand was soon found out by the trade, and they now guard against impositions ul such a character by means of various tests. Of these the most generally used are the hot water hath or frietion. If a dyod stone be left in hot water a few minutes it resumes its original une; or if the gem he rabbod charply on a towel, or even ou the cont sleeve, its uermal color cen ha detectod. These tests are simple and efficaclous and are in daily use .- Pall Mall Gazette.

A Remarkable Timepiece,

Japan possesses a remarkable timepiece which is described as follows: It is contained in a frame three fool wide and five foot long, representing a noouday landscape of great beauty. In the foreground, plum and charry trees and rich plants appear in ful bloom; in the rear is seeu a hill, gradual in ascent, from which apparoutly flows a ossoade, admirably imitated in crystal. From this point s threadlike stream meanders, enoireling rooks and islands lu its windings. aud finally loning itself in a far-of stretch of woodland. In a miniature aky a golden sun turns ou a silver wire, striking the hours on silver gongs as it passes. Each hour is marked on the frame hy a creeping tortoise, which enryes the place of a hand. A bird of exquisite plumage warhise at the close Dick, who knew all about Mrs. Van of each hour, and, as the noug ceases, a mouse sallins forth from a neighboring grotto, and scampering over the hill to the garden is soon lost to vinw. New York Snu.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that winners has been able to cure in all its stages, and that is cutarrh. Hall's Catarrh Care is the only positive cure now known to the medical fraternity. Catarrh being a conthe medical fratarulty. Catarrh being a consistentional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, anting directly upon the blood and macrois surfaces of the aratem, thereby destructing the foundation of the disease, and giving the patient strength by building up the constitution and assisting matters in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Boltary for any case that It rails to curation for list of testimentals. Address F. J. Churchy & Co., Toledo, C. TOWARD THE MINT.

THE UNSEEN GOLD SUPPLY

LD Gelil and Silver Bought Here," was a sign hanging in front of an Lighth avenne slinp that attracted the attention of two passers-by a few days ago. One of the passers was a Snn reporter, the other was Mr. J. Robley Dunglisou, Ragintrar of Deposits in the Philadelphia Mint, who probably knows more about the unseen supply of gold than any other the world. No danger of visitors folmau in this country. The "nascen lowing the chip to the assaying room, gold supply" is a term the mint people use to describe the tone of gold that will weigh the thirteen-hundredth and silver that He in the half-forgotten boxes in hureau drawers -old gold pencils, old watch cases, neglected pocket preces, broken chains, spectsele rims, and a thousand other hits of metal that have intrinsic value. Most of these things are sure to find their hone ashes meistened and pressed, way to the mint sconer or later, and but it does some wonderful work. It when they do it is Mr. Dauglison who makes ac entry of their weight in the in it, except gold and silver. That mint's big books.

"There is one of our feeders," Mr. Dunglison said, as he read the sign. "You would be surprised to know how much of the gold and silver that we turn out in coin comes to as through meli places. There are thousands of tinyers of old builtion in this city, and teus of thousands of them throughout the country. In the aggregate they send us a great many tons of bullion every year, and so put a great deal of money into eironlation that would otherwise lie idle.

!'There is no piece of gold or silver so large or so small," he continued, "that the dealers will not hav it. Do you know that gold filling out of ex. that we call a cornel. This is put in tracted teeth make a considerable item in the mint's gold? They do. When a dentist extracts a tooth he is sure to extract also any gold that may be in silver, which ruus ont through the it, and these tiny bits after a while slit, but it cannot dissolve the gold. make a little boxful, which is sold to a dealer. The idea seems unpleasant, gold."-New York Sun. but it is not, when you know how thoroughly all bullion is refined and eleansed in the mint before it is

"You will find that all these dealers | year. would a little rather bny old silver than old gold, hecanse there is more profit in it. The price of silver fluctn. ates so much that they can always buy il for considerably less than its real value: hnt the price of gold never varies. An ounce of gold is worth \$20.67 always, in all civilized countries; and this is so well understood that the dealer must pay pretty nearly that much for it. He generally increases his profit a little by paying in goods instead of in cash. The dealer mnat be able to do a little ornile assaying himself, or he is likely to make mistakes. Gold jewelry, for instance, in rarely made of pure gold. Our mint standard for pure bullion is 1000, and we rarely get a watch ease or a ring or a chain that assays more than 500, showing that it is half gold or silver and half allay. You think you are carrying a gold watch, but the obances are ninety-nine in a hundred that the eases are half copper. The cases will reach the mint some day, almost to a certainty, and then the copper will come ont.

"The flow of old jewelry to the miut is almost as certain and steady as the flow of water down an incline. The old trinket is broken and nucless, and you lay it away. Perhaps it is an heirloom, or for some other reason you are attached to it, and you would not think of selling it. But a rainy day may come, and you are glad to sell lt. In any case, you are sure to die some time, and your beirs will uet care for the chain; then we get it and turn it into dollars or ungles.

"Wa do not buy bullion in small quantities at the mint-nothing leas then \$100 worth of gold or silver at a time, and then we do not pay for it nutil it has been assayed. If you bring us \$100 worth of metal that you emprose to be gold, we waigh it and give you a receipt for it, and three days later you can call and receive the mouny fur whatever gold wa flud in it. No matter if the lot only coutaine a dollar's worth of gold, we will receipt for the weight and extract the gold for you and pay you for it. Mut y o fose all the base metal, lecause iu reduced everything but the gold an - r is doots you. That u, it is practs ly destroyed, because our work to with gold and miver only, and w not make any en ri t mave the tase talk it id cas ly be d pa, til w me spay ir to time and We coll separate aut out he gad as v r, to the grant al and I look and what ree also

- hear takes us tity of old the pt yr lal in miled with any market had been the principle of the land of the land The part of the sale of

it is monided into a bar. That bar contains all the metal in your lot, whether it he gold or brass, and it is the assayer's business to find out how much gold it contains. While it is in the crucible it as surred constantly and thoroughly, so that all its metals may be distributed equally throughont the har.

When the bar is returned to the weighing room the assayer chips from it a tiny piece that most weigh just half a gramme, or 7.7 grains troy. The har and the sample are unmbered to correspond, and the har is locked np in the iron box again. But the chip is taken to the assaying room, where it is put through one of the most delicate mechanical processes in for a man who is working with scales of a grain cannot be talking to visitors.

"You are not familiar with the honeash enp, I suppose, that we call the ounel? To the uninformed that is one of the wanders of the mint. It is aimply a little, shallow cup made of will absorb any metals that are melted sounds a little doubtful, but it is a fact that can readily be accounted for on scientific principles. You melt a lump of mingled gold and copper in this little enpel, and every particle of the copper disappears, leaving the gold alone in the bottom of the cap. That is the first step in assaying gold, taking no account of e dezen miner operations that merely lead up to it.

"This melting in the enpel dees not give pure gold, however, for gold is often alloyed with silver. After the tiny button that remains in the enp has cooled anfliciently, it is flattened with a hammer and run between rollors till it comes ont a little spiral a little vessel like a thimble with a slit in the bottom, and is boiled in pitrie acid. The acid dissolves the The tiny chip that remains in is pure

Hound-Killer Shot.

(Greenbrier Independent.)

We clip the following from the Stannton (Va.) News of the 5th, sent to that paper from Monterey on the 4th inst.:

Last week a man by the name of Robert Moore was shot by some Va. The circumstances are as follows: It seems that Moore, a few Weeks previous to the shooting na CODAKS AND KODETS from \$12.00 to \$50.00 for above mentioned, had killed a hound belonging to some hunters borhood of Frost. They having found out where the bound was shot, set another day for a chuse, and also placed some "aminishers" in a ravine near the spot where the on the track of s buck, knowing that their course would be over the same ground. When the hounds, close in the wake of the deer, reached the ravine two shots were heard from a Winchester, and simnltaneously two other Winchester; shots awakened the echoes of the mountains, and Moore, the houndkillor, fell shot through the neck and shoulder. The wounds, while serions, were not necessarly fatal. Your correspondent is informde that he may recover. The names of the parties who did the shooting are, of course, kept quiet. The hunters of some sections of W. Va. put a "pretium affectionis" on dogs (i. e. hounds) and think capital punishment not too good for any man who dares to shoot a deer hound.

Monroe Wins.

With nnfeigned pleasure we ennounce to our readers that Monroe has won the county line contest between this and Summers county. The case came up in Greenbrier circuit court Monday, Nov. 10th, The court (Judge Guthrie, of Charleston, presiding), dismissed the petition of Summers county and decreed that Monroe should recover the cost from her adversary. By this decision real estate and other property aggregating not less thau \$400,000 in velue is preserved to Monroe county. This result is due to the skill and ability with which the case was managed by our attorney, Maj. John W. Harris. From the moment that he was reteined our people felt that their interests were in the keeping of competent hands. The thanks of our citizens are olso due to our County Court who, not undervaluing the importance of this quostion, grappled with it in a sousible, practical mauner, insuring to the county the best possible protection of her interest .- Watchman.

Dreadful Waste.

RONCEVERTE, W. A., Dec. 3rd.-Some one fired two londs of buckwheat into Herbert Spurlock, uear Nine Mile Creek. Wesley Ketcham was arrested. Spurlock will recover.-Post.

We have been unxiously awaiting the new crop of buckwheat this fall, and didn't know that some fool had cornered the market and was disposing of the surplus by firing in into his neighbors. Who is he, and whereabouts around hero is Nino Mile Creek? If Herbert Spurlock recovers with two loads of buckwheet in him, he has the digestion of an ostrich. Can't somebody lire a small package into us? Brother David F. Renser, stand up and tell us what became of that fine crop you harvested early this full. Ronceverte Messen-

"I don't believelt," said the dealer, "Have you communicated with the | decidedly, "The principal gems missing were all mentioned-in fact, a "No; I have expressly refrained list of them was printed and errorlated by the police among all the sent here, I recellect, and I am quite the whole lot-was not included."

On leaving Pinkerton's emperium, onr friend hailed a cab, drove to hin affair be closed?" private hanse, where he kept the vehicle waiting while he packed a Gladstone hag, and then ordered the "Yes; clangerous in a sense—that driver to take him with all speed to Paddington. He was in time far the tern that I possessed the ring I might afternoon down mail, by which he proceeded to B-, reaching that quaint iual ewners. You remember the big country town about 5 c'olack. Having ascertained at his hotel, the X-Arms, that the Dake was in residence at the eastle, he betook himself thith-"Well, a ring alosely resembling er with as little delay as possible.

His Greec, for whom Mr. Hydenseke had more than once acted in confidential matters, readily saw the detective, This one-I mean the one I have just and gave him permission to inspect lost-I picked up at a seedy second- his collection of rings, being himself present during the process. The repaid a good price for it, and I asked sult of this inspection and of a lang conversation with the Duke, was that "I think sa, Sir Jacob," answered an nrgeut telegram was disputched to Pinkerton asking him to come down to B—— as early as possible next morning.

> It was two days later, and Mr. Hydenseke was standing before the fire in his office, with his honds, in true British fashion, behind his coattails. A rather odd smile, suggesting trinmph and self-satisfaction, flickored shout the corners of his mouth. He had sont a messenger about an hour previously to request Sir Jacob Truelove's attendance at the office as soon as convenient, and he was now awaiting that gontlemen's arrival.

By and by the street bell reng, and a minute or two later the Baronet was ushered in.

George disappeared, and soon re- "Very well, Sir Jacoh, I'm your he hegan, with an eager, auxions look should have had to be square with on his ounning face-"you have got him. But I'm glad he wasn't !"-Mr. Hydensuke now produced his the ring! Yan told me in your note Londou Truth. yon have got the ring!"

> "Yes," rejoined Mr. Hydenseke, persing up his lips and speaking inolsively, "I have got the ring."

"Then, for the love of God, give it mo it once," criod Sir Jacob, with "Here-here strauge oxeitement. (pulling out his cheek hook from his breest-pocket) I'll pay you your thousand pounds at once. The riug, Mr. fail to recover that signet it will almost Hydenseke-give me the ring.'

"Wait o minnte, Sir Jacob," said the detective, coldly, waving back the other's outstretched hand. "I have a word or two to say first. I always deal square with those who are square with As soon as the Barouet was lairly off me. I um not squeamlsh, not I. the premises Mr. Hydouseko seut Ior tako np almost any cases for those who pay me well, and I carry out my British Museum. Upon entering that client's wishes to the hest of my somber edifice he hetook himself to power, without raising any inconvethe room where the old Roman gems | nient questions of right and wrong, or anything of that cort. But I make one stipulation. My olients must be square with me; and they must tell me the truth !"

"What do you mean, Mr. Hydenseke?" muttered Sir Jacob, beginning

"It is nothing to me," the detective went ou, without heeding the interruption, "that you have tried to steal that ring from the Unko of X-, or that, fluding yourself forestalled, you laid a plot to steal it Iron the man who had anthoipated you. But it las great deal to me that, instead of telling mo the truth, you tried to delude me into your service with a pack of stlly falsehoods and a trumped-up story atout a third Vespasinu signet, stolen from the Vatican, which had never had any existence, either there or elsowherv.

"I-1-don't understand you. Do -do-you realize whom you're talk. ling to?" stammered the Baronet, trembling, however, lo every limb. "You must be mal, Mr. Bydsuseke."

"I have track I out the whole affair from first to last," continued the other. "You had better listen, and duny any of my statements if you can You intended (taking advantage of

"So I thought. But I have been me, and to gain my help by false pretenses, you must accept the consequenous. The ring has been restared to the Duka of X --- , and is now back

"It's a lie-the whole thing's a lie," persisted Sir Jacob. Bat his looks declared the guilt which his words denied in vain.

"I have loreed a full confession chief deelers in Eurape. I had one from Janshikoff," Mr. Hydenseke said; "in the lace of which, and of ather certain that a Vespasian signet-which convincing evidence, your denial or wanld have been the most precions of admission is perfectly immaterial. Now, Sir Jacob, you had better pay me my thousand pounds and let the

"What?" the Baronet almost shricked, pay you a thousand pounds for-for-p'tying me false and makin a fool of me."

"Chose are my terms," said Mr. Hydenseke, quietly; "you may accept them, or you may decline them and accent—the consequences."

"It is scandalous," protested Sir Jacob, Inrionsly. "I'll not submit to ho blackmailed in this infernal maunet."

"Look here, Sir Jacoh," said the detective, with his aternest and most determined air, "you have tried to lool me, and you must pay for it. Whether in money ar exposure, decide

yourself." The Baronet raved, swore, protested, pleaded, was abject, insolent, pathetic, hectoring, but to no parpose. Mr. Hydenseke remained upmoved by all these demonstrations, and they onded (as our wily friend foresaw they would) in Sir Jacob drawing the required check.

Whon the latter had taken his departnre-in a perlect storm of impotent oaths and curses-Mr. Hydenseke sat down at his writing table, and, with a very comfortable smile, worked out a short addition sum apon his blotting pad.

Janablkoff. 1,000 " Sir J. Trubiove 1,000

"And all corned in three doys," chuckled Mr. Hydenseke. "If Sir "Good morning, Mr. Hydenseke," Jacob had been square with me I

A Marvelons Little Linguist.

Not until January will little Fanule Erdofy reach the mature age of four years, and yet she is perhaps the most accomplished young lady of her age in New York. Fannie illustrates in

her charming little personality the irresistible law of heredity. She apeaks fluently four languages, and when it is but slightly soiled, but not stained, explained that her mother speaks and writes six languages and that her father | than to wind a bit of oiled silk around has a glib acquaintance with ten, besides numerons allied dialects, this extraordinary infant is accounted for.

Arthur Erdofy, who is a registry clerk and interpreter at Ellis Island, was born, thirty-two years ago, in Buda-Pesth, Hungary. His wife is also a nativo uf the same ancient city on the Danube. He has the characteristic Magyar features well as that special linguistic aptitude which distinguishes bis race. He speaks English with great purity, and has the further polyglot accomplishment of speaking Hungarian, German, French, Italian, Spanish, Greek (Romanie), Turkish, Finnish and that most turgid and difficult of all tongues, Basque. Mrs. Erdofy speaks fluently English, Hungarina, German, French and Slavonlan, and so little Fannie has lived all her life in a philological atmosphere, where the air was thick with prepositions, adverbs and conjunotions. She speaks German like a Berlinese, French like a Parisienne, Hungorian as would the daughter of a Boyar, and English with a Harlem accent. Sho is very fond of Central Park, and as she lives within two blocks she is a frequent visitur to its nttractions. Her mother has observed that after evon a short visit to the park Fannle cannot be induced to talk any language but Euglish for some hours, but when her father returns from his duties at Ellis Island his little daughter always greets him in

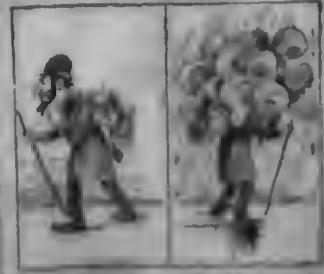

Mr. Erdofy intends that Fannieshall acquire Italian and Spanish by the timo she is five years old. 'The difficulty is not in teaching her a new langange, but in preventing this marvelous child from ucquiring ouc.

The Popularity of Custord,

Very few of those who habitually eat at the cheap restaurants in the vicinity of the City Hall can have failed to notice the large amounts of custard pies and oustard puddings which are consumed by men, and mostly middle-aged men, at that, Custard in one of its various forms and a glass of milk constitute a very large part of the luncheous that are enton. When the manager of one of those eating houses was asked for an explanation of the phonomous recontly, he said :

"We undoubtedly sell a big lol of custard, especially in pres. Most men seem to like it, and there is a husvy demand for it in summer. But there is another reason for its popularity. It is quick lunch. A man can oat custard about us fast as he can drink a glass of water, and with many of our customers that appears to be the thing desired. They want comothing that will not keep them long, and contard being pleasant enough to itself, is bit upon We have our regular estard customers, and I tell you they can est their favorite duch in recerl time. It a would rink eventous, and is a good

Bleastroue Rain.

STRONGEST AT THE SOTTOM.

When you are pouring tea that is made properly-by pouring boiling water on the leaves in the heated tespot-remember that the strongest liqald is at the bottom of the pot and govern yourself accordingly. It is best, If you have half a dozen cups to fill, so pour jost a little in each one, filling the last one quite full, then returning all the next one and so on; you will then serve all alike. If you pour each one full as you go the first one served will get slop and the last one lye. Neither is palatable. The Japanese undersland this better than we do, and both they and the Chinese serve tea by putting a few grams in each cup and pouring the boiling water on that. Then each guest gets a cup of good ten .- New York Johrnal.

WASHING AND CLEANING GLOVES.

The so-called washing gloves are an excellent choice for utility purposes all summer, as they can be cleaned once and again by washing them in weter that is more than warm, but not sealding hot, using a plees of pure white soap in the process. It is best to wash them upon the hands, as the chamois is less likely to abrink in drying. Wash and then rinse in clear cater and dry by rubbing with a Inrkish or other soft, rough towel. For kid gloves of light color that are there is no better mode of freshening the finger, rubbing vigorously to remore all traces of the mark. Any woman who tests this easy way of elenning kid gloves will be sura to reep thereafter a strip of slik in her possession. A quarter or even an eighth of a yard is enough to purchase it ouce, as in fancy drygoods houses, where it is sold, it is kept meast in a targe roll and is thus very pliable. Moiston the silk, however, when using. -Brooklyn Citizen.

QUICK DUTING POD SILES.

Quick drying is the best method for ilk garments. Au authority on this inbject says: "Keep on hand a dozen hits of atool an inch and a quarter square and oighteen inches long. Exactly midway serew in a good-sized hook. In use, hang a shirt or pair of drawers over a strip, and botton the neck or waisthand, then catch the book over year line. Pull the garment in shape, and leave it to dry. The books need not be more than aix inohes apart on the line, thusenabling you to dry half a dozen gar neuts in less space than is otherwise required for one. Also, by the use of these strips and hooks, it is possible to dry each garment in shape and to avoid the wrinkles that it is next to impossible to iron out of wool or ailk withont injury to the fabric. White alk onderwear needs just the same treatment, with the addition of blomg and a little liquid gum arabic to the last rinaing water."-New York World.

PROTECTION ANADIST NOTES.

The fumes of burning campber gum or sulphur will suffice to moth millers. It is a very disagreeable oparation, but is so effective that any reom where they are known to he should be fumigated at ours. To do this with entire success remove the contents of trunks and wardrobes and hang on the backs of chairs; close doors and windows; set a pailful of water in the middle of the room at a safe distance from all the hangings and furniture; in this place a small iron pot half filled with ashes and exaphor; for a room fifteen by eightcon uso a piece as large as a walnut; saturate with alcohol and set the campher on fire. It will burn fleroely at first, but if proper precautious are observed there is no danger; leave the room as soon as you are estrated that your foruiture to in no danger of taking fire; allow the mass to have star f out, which it will de in half an bonr. open the windows and doors for an bour. A STATE OF THE PERSON NAMED IN COLUMN TWO IS NOT THE PERSON NAMED IN COLUMN TWO IS NAMED IN COLUMN TWO IS NOT THE PERSON NAMED IN COLUMN TWO IS NAMED IN COLUMN ly at ci ma, but her but health to I have a free last a the real What dollars do with 46 the late the star with y ' make line ! .? Why did the go ont v - talk t la rall r c'il ren to leave their own - rerelity we roule? Why did she not sleep at through he mind continually, but he hoped that by ignoring the change it would disappear.

Alas | Things got worse and worse, 'I re whealar permit me to and one day, after ten miserable months, he was sent for from the works in liste. Laura was raving and alireding in the wildest paroxyam of brain-fever!

"Wher are the children? Save them from that man! Henry, please take him five pounds-no, he wante ten pounds now, and I can't get it!

In such piteous, mosning ejaculations she revealed the secret terror

that was killing her.

But purlect love casts out fear and jealousy, and Laura's husband did her no minute. Tenderly he narsed the poor, shattered wife and mother back to life again, though it was an almost hopeless task with that nameless harrar ever beside her. One night, when she was a little stronger, he led her on to talk of the past, and he was so loving and an pitlful that in a flood of life-giving tears she poured out to him the whole miserable story. Then the hurden fell from her life, and she dropped happily into the first sweet, healthy sleep she had had for nearly a year. She never asked again for her tormentor; she only knew that he had disappeared from South Staffordshire, and joy and peace came linels to her heart and home.

But one day, after the lapse of fonz years, she received a dirty, anonymous letter full of threats and insolent demands for money. This time she went at once to her husband with luo

"Don't be frightened, Lanra," he answered. "I know the fellow. He is one of a gang of four who have just come to Saukett Village. He will be in jail before to-morrow night. This time he shall nel escape my vengeanco."

He had scarcely linished speaking when a couple of mon ran up to the honse, crying: ?

"Measter! Moaster! Here he Dimmitt's height alcwered away and there's 'a crowning iu!"

The iron-muster leaped to his feet and was soou following the eril messengers to the village. He knew that Sackett was all undermined with pits and workings, and it was possible the whole village was in danger. The disaster was righl in the center of it, and he was not long in reaching the great yawaing chasm, where the carth had given way and down which two cortages, with their inhabitants, had

As soon as the master appeared, the pitmen and ironmen gathered round him, though all knew that succor or help was pertectly hopeless.

"Where is Bumby?" "Here i be, menster."

"What mine was under this?"

"Dimmit's, nucaster, worked oul." "la it deep?"

"Six hundred feet,"

"Dry or wet?"

"Deep water." The master looked blankly at the black abyes.

"It's the third 'orowning in," i' my time. T'lest were in to Cavill's mine. to to a re n he at that felt as if soot and scars and bruises, she knew Six decent families whent down ut midnight; they were deshed to hits on t' rocks at the bottom."

"Do you know who lived in these cottages?"

"One were empty, thank God. Four strange lads that worked i' Sackett's mine had t' other; they nobbut worked there a week, they wor glad to got shut on them at end of it.

"I know, measter," said Michael Raine, the publican, "for they owe me for a week's beer and 'bacca-the score is set ag'u' John Todd, Tim

'On the dead,' now; don't give me away and I'll tell you some of the secrets of the pawnbrokers' trade."

The remark was made in a little dark room in the rear of one of the big loan offices of Chicago to a reporter for the Tribune of that city. The proprietor went on to say the reports show that ten to fifteen per cent. of all articles placed in "bock" is nover called for. Then often gold and silver is purchased outright by the pennyweight or onuce, and in one way ur another a large amonut of the precions metals is accumulated. lurn old-style goods into ready cash is the problem that confronts the loan broker. Bankrupt stocks of now designs and fresh goods till the cases in the counters and show windows, and the old malerial goes into new golden engles with Uucle Sam's slamps upon thom.

On the floor of the back room, reached after setting half a dozen electric alarms going and the pressing of numerous buttons, was a peculiar contrivance looking like a six-iuch tllo stood on end with a brass barrel covered with pipes by its side. A copper pan, some iron tools and some howls that looked like common flower pots lay on the floor.

"This copper barrel," said the proprictor, "is illed with naphtha; those pipes lead to this tile or furnace; this handle here is for the forcing of air behind the nautha so it will make a strong blast; these pots are crucibles. Into the furunce we place the orucible, into the crncible goes the gold. Hot, isu't it? So hol that we are compelled to wear colored ginases to see what's going on. But that's nothing to the way the thing is done in Uncle Sam's furnaces. Now here goes to lill the erucible."

Into the atone jur went gold watch cases and chains with family histories, orests, and initials, souvenir spoous and breastpins of forgotten dates, rings that could have spoken of wedding bells and birthdays in the long ago, golden charms, scarf pins with the jewels romoved, and odds and ends collected in a week's trade. The estimated value of the hatful of stock was \$1000 in pure gold. Into the melting collection wont a handful of borax. That was to make the gold flow when sufficiently moltcd. There was no smoke, nothing but a sickly smell of nephtlin, the noise of the blast, and the glittering whiteness of the oruci-

To get a closer look at the melting gold a pair of groon glasses was furnished. As the broker stirred the contents of the crnoible with an iron poker, black hubbles would come to the top, pieces of coarsor metal would he seen struggle to the surface, only to sink hack into the yellow gold, now turned to fluid. The broker lifted the crucible ont of the furnace and poured its white het contents into an iron mold. The mold rested in a pau of water. All the gold settled into the mold and the borax, turning black as it hit tho water, stayed on top. In a few miuutes the bornx was knocked off end ont lell a har of gold weighting several pounds, eight inches long and probably three-fourths of an inch square. After cleaning, the her was laid aside

for shipmout to the Treasury. "We do this once a week," said the proprietor, as he shut off the valve to the naphtha barrel. "From here the bars go to Washington by express. pay out nearly 84 on \$1000. At Unule Sam's works the bar will be remelted by a floreer heat. Then the melted mass will be poured into water, where it will form into shots or pellols of can't fool the Government for a minmape. After this process the Treasury ships gold engles for the gold and silver coin for the ellver metal old battered watch oase, the broken obain, or out of date ornament comes hack to now coin of the realm. Over \$200,000 worth of gold harm is nunually sout from Chicago brokers in just this way, and not one person in 10,000 over sees how the molting is done. Of course many gold coins are made into jowolry, and in conra of thus are sent back through our erueiSELECT SIFFINGS.

Some of the Arah tribes have queer notions about a falure state. They tien camel to a man's tomb and leavo it without food. If the camel gots away, the man is lost forever; but if not, he would find it there at the day of judgment and would mount ou it to Paradise.

The Oldest Mathematical Book,

The oldest mathematical book in the world, which dates some 4000 years hack, and was written in Egypt, contaius a rule for squaring the oirole, says the Engineers' Gazette. The rule given is to shorten the diameter by a uinth, and on the line so obtained to construct a square; and this, though far from being exact, is near enough for most practical purposes. Siuco then the amoteur squarer of the circle has been o thorn in the side of the professional mathematician. Learned Before its value is returned we will societies at last, in pure self-defense, made a rule that all sulntious of the problem sont to them abould, without examination, be consigued to the flames. In the last coutury a Frenchman named Mathulus was so sure he gold and silver and copper. These had succeeded in squaring the circle pellets are then plosed in soid and the that he offered a reward of \$1000 to different metals separated. No, you any one who proved his solution erroneous. It was shown to be crroueute. Soleuce does the work in good one if not to his own satisfaction, at least to that of the court's, and he had to pay the money. Mathematleinns have long been couvinced that contained in the har. So you see the the solution was impossible; but it is only a few years since they were able to demonstrate this. A Gorman professor unined Landmann published in 1882 a demonstration, which was accepted by the scientific world as satis. factory; so that would be mountain of the circle nay now rest from their labora seeing that it has been mathenutically proved that the thing evenot be done.

DIATION JING JIW SW

How the Lives of Many Rables Bare Reen Saved in New York flospilals A Perer Device.

proad mother of some wall may of her son. the baby menbator is a success and has come to stay. The doctors declare that incubators have all indy been the means of saving the li wof 100 infants in New York, says correspondent of the St. Louis Post-Despatch. In fact, the new born beby, who, under the old-fashioned methods, has no chance of living, now, if put in an incubator, stands about an even chance of beerming a healthy, crowing youngster. Bahy incubators are now in use in two hospitals in the city, the Post Graduato Hospital and tha Maternity Hospital of the Women's Medleal College.

'A bright young woman, will a sweet face and modest ways, is in charge of the babies at the Maternity Hospital. There is a room in the third story there, a room with a great window which lets in pleaty of light and overlooks the tops of the trees in Stuyvesant Park. Around the walls are four oribs of from ten to twolve feet in length. In two of these there were three little lumps.

You discover that these lumps are alive and breathing. They are very amall and delicate, and dainty and pink. They are habies sure enoughany man could tell that, but nobody would ever think they are incubator

The incubator is used only for the premntarely born babies and for bahies which are so weak that the wise young women dootors are pretty sure that they will die if left in the open air. Strangely enough, the incubator is shaped something like a coffin, while Its particular aim is to keep babies ont of coffins. There are two kinds of bally incubators and they differ comewhat in construction.

The moment a baby for the inenbator arrives at the Maternity Hospital the white capped nurses and | who are ernnky, and If they lose a the doclors gather about the little chance to kick are in had human for wooden box, which rests upon a stand some three or four feet high. Baby is swatbod very excefully in warm clothes, and is then weighed, elethes and all, before he is laid inside, and the glass cover is placed over bim.

Underneath the board upon which the little mite rests are three bottles that are kept constantly full of hot water. The air passing in from below flowe over these and through an opening in the board into the chamber where the infant is. A thermometer keeps the attendent continually informed as to the temperature, and a little aluminum anemometer in the small chimney through which the nir escapes and which furnishes the dranght that keeps the haby supplied with fresh air, nlways indientes whother or not the circulation of air is good.

The weight is a very important matter. Our baby in the inonbator is weighed every day. A healthy buby should show a slight dinrnal incresso in weight, and if the doctors find that the diminutive patient is not growing heavier, they eask remedies for his indisposition.

The inembator which will be in the babies' ward of the new building of the Post Graduate Hospital is a great improvement on that at the Maternity Hospital, although it lacks the sentimental enrroundings of the one in charge of the young women doctors. In this improved affair the patient will not have to be once lifted from his snog oest from the time he is placed Inside until he becomes strong

enough to be removed with safely. The menbator is set upon bicycle wheele, so it may be moved about whenever desired. The fresh air is heated by passing batween two stratag of hot water, rises up both at the head and the feet of the mattress, and is kept in muntion by an aluminum fau run by olockwork, thus preventing the possibility of the little patient's suffering for want of air. There is also a tube for the supply of oxygen, liberal quantities of which pro good for babies who are bauging ou to life by the merest thread, and il is bolleved this improvement will save a great many lives that would have been loel in the old lucubator.

By menon of a clever mechanical device, the weight of the body is always registered, so that the physician may discover the alightest variation at any time. Of course the incubator must be opened to feed the baby its artillcial food, but by means of a deft sliding of the covers the outrauce of ony cold air from the outside is prevent d. The temperature of the juside of the lneubator is kept as near niouty-eight degrees as possible.

In the navies of the world are culisted 191,000 meo; the commercial

The state of the s teager conductor knows just, how whimsical and cranky the traveling public really in easys the liftGlung Port. A traveler may have some pocultar fod or nution when he is on E was laculated," the the mad, but he never dreams that there are thousands of others just like great man of the future him, or perhaps werse. In years of experience the conductor rule ellows with all forts of people, and in apice of himself becomes a mind and face reader, who takes a back seat from no one except the professional.

"Yes, travelers are superstitious and cranky," said a veteran knight of the punch resterday la response to a query. "I think the average pastenger conductor deals with mure oddilles daily than the curlo collector of a freak show. As to superati-1100, I think there is more of it crops not on trains than anywhere else. Last week, just as life train was ready to pull out for Chleago, a welldressed man came out of the conch on the platform and in an agitated minuner asked me what day it was.

"I told him it was Friday, and without profiler word he re-entered the coach, and In a municut returned with his luggage, and by way of explanation stated that he never began a journey Friday and would wait untll the next morning. That is only a sample. The much-mooted unlucky thirleen is perhaps the causo af more worry and inconveniere to tourists than any other sign which they deem of Ill onien. I have known passengers to begin at the head of the trnin to see if they could lind No. 13 anywhere.

"If the engine happened to be th rteen they would resignedly wait for the next train, and if they succeeded in finding number thirteen on any of the conches they would hold op their hands in holy horror. I have seen pa-songers refuse to ride In a couch that held thirteen passengers, and If you will ask any ticket man he will tell you that of all sections in a sleeper thirteen is the most difficult to dispose of.

"Then aside from the superstition which prevails among the traveling public there are countless passengers a week ofterword. They kick for n seat in the center of the conch; kick hecause the train goes ton slow or too fast; kick because they are in a draught or because it is too hot. And the worst of it all is that when they kick I am the individual who is called uo to hear them, as if I were responsible for the whole business.

"About the only time whee some fellows don't klek is when they are or their boneymoon. Everything goes on as smoothly as if it had been ordered so, but let the same men rille on the same train five years later and the chances are they'll kick themselves into exhaustion."

(Canninalism of To-Day.

The Belgian explorer, M. de Meuse, who has recently returned from a toor of three and a hulf years in the Interior of Africa, says that all through the upper Congo region the must terrible connibalism is still common and customary. In every village homun beings, both men and women, were exposed fur sale in the purpose of being killed and eaten. The individuals, who were slaves, appeared indifferent as to their futo. This practice prevailed in every village, and "tooi-toms" were should to tell people of an upproaching slaughter.

KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly need. The many, who live better than others and enjoy life more, with less expenditure, by more promptly minpting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figa.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative; effectually cleansing the system, dispelling colds, headaches and fovers and permanently curiog constipation. It has given satisfaction to millions and met with the approval of the medical profession, because It acts on the Kidners, Liver and Bawels without weakenlug them and It is particuly free from avery object lunable autores

A Marvellous Showing.

The U.S. Government, through the Agricultural Department, has been investigating the baking powders for the purpose of informing the public which was the pur st, most economical and wholesome,

The published report shows the Royal Baking Powder to be a pure, healthful preparation, absolutely free from alum or any adulterant, and that it is greatly stronger in leavening power than any other brand.

Consumers should not let this valuable information, official and unprejudiced, go unheeded.

The longevity of the negro as a slave is shown by the following copy from the death register of respondent of the Richmond Dispatch. The legister extended only from 1853: "I find that in The joy of our lives and the pain, 1853, John Pwini, the slave of And the legion that never was list- Lewis Payne, died aged eighty and I are two souls with but a sinyears; in 1856, Tony Frog. the gle thought." The old man strokslave of Mrs. Ann Mustoe, died ed her nut-brown hair. "Mychild" aged 105; in the same year, Molly the slave of James W. Warwick died aged ninety years, and George, the slave of James R. Erwin, aged were married." Then he gave her swears falsely twice on the same eighty years. In 1858, Nancy, the his blessing.-Pnck. slave of Mrs. Ann McClintic, died at the age of ninety years, and in 1859, Isaac the slave of A. H. Mc-Clintic, died at the ago of sighty-

This is Poetry.

THE JOY OF THE RURAL PRESS. 'I like to read in papers that are pub-

lished out of town Siina Brown;

Of how the Squire Maguify, with his wonted enterprise. Has put new shin, les on his barn, and added to lts size.

I leve to read of straw rides of the Punklaville ell e; Of how the sarsaparilla at Pilimakers

Of how Miss Susan Willow is to spend the holidays

With Haltie Jorkins Underwood-"at least so rumor says."

"I leve to read the netloe the country About the marked ability of Junius

Brutus & mint, The "Eminent Tragedian, who shortly will appear

At Music Hall in his great roles of pers all contain-

Of how the sleeve is wider and he hustle on the wane; Of how "Miss Wicks, of Main Street,

makes the finest clothes on earth. Which cannot even be surpassed by Felix or hy Worth.

'It pleases me to note therein that "Farmer Jones has raised A pumpkin seven feet around that av-

ery one has praised." Tis pleasing too to read the good advice these journals give To people who're uncertain what is

proper where they live. But best of all the things they print, ln al! the rural press,

Are Christmas hints that tell us how to turn an old slik dress

gift for ma, And how to make a beaver hat into a

Which telis the hushand how lo take a shingle and a knife, And sculp a handsome bracket for the

Andrew Beek of Augusta county and Cary Nickell of Monroe county, have shipped since August this

Jodielary Evils.

Mn. Entron: Some of the verdicts returned at our last term of Circuit Court fo: this County, are causing considere! le comment, and very propely. With the same propriety some of the verdicts retremed in Justices' courte, under the the Jastice's instruction, may be crilicised. Few jurous realize the spucify of the oath they take, and another class of jurors are too ignorant to appreciate the position they fill, while another class get on juries for the purpose of favoring particular friends, or of trying to procuee certain results for money or other consideration. These three classes of men should never be sworn on a jury. A pure Judiciary, and a strict adherence to the law, are the only safe-guards of our liberty. Just before an election, each political party begins 🐞 diseass candidates for Justice of the Peace. The propriety of run, ning this or that man is never determined because he is a man of intelligence, honesty, and loves justice too well to be swayed by money or other consideration, bat because he can be elected. No matter what the character of the individual; no matter what the character of the voters who vote for him, just so he can defeat the other side he is agreed upon, and every effort made to elect him. Into a mantel cover for a Christmas This is why we have so many Justices who are worse than "vahoos."

There are frequently cases tried by courts and juries where the conclusion reached (the verdict) is not from the law and evidence, but from favoritiam, or political feel-Which show how cast-off boxes may ing, or church membership, or because money has been paid or promised. This state of affairs I love this column most of all because, must shortly bring anarchy. The poor are not able to buy irries and must object to the ensiom. The poor are greatly in the majority and objecty by concerted action can and will make times very ws.m for the briber and the brib-

I have actually known juro.s who have taken the oath to render "a true verdict," go to sleep, of get indifferent when lawyers were s-gaing the case. Such individuals cannot have any sense of honor, or they would certainly stay awake to listen well that they might consider not only what was said, but the manner in which it was said; they cannot have much sense of honor, or they would not think they could not be instructed by listening to argament. Such When the lnk was in our nostrils and jnrois sie usually corrupt.

Law acises from a given state of facts, and when a court instructs a july as to the law on a certain point, you may rest assured the the facts warrant it or the instruction would not be given; and yet, I have seen juries instructed, who were swo n to "render a true verdiet," and go out and bring in a verdict conicary to the law and the evidence. Now how is this state of affairs brought about?

Is it a reckless discegard of the osth "a true verdict render"? It so, such men should never have Wo'll delude senie sauguine haif-wit the right to fritter away recklessly the liberty or property of otheis. Is it ignorance of the effect And when the whole osboodle over on of facts upon law, or vice versa, or the weight of both? If so, such Bath county, farnished by the cor- We will go and run e daily in the City imbeciles should not be placed upon juries. The law provides that With her sweet, pensive face, idiois are exempt from all such re-

ls it prejudice, or feeling against one of the litigants? It cannot be, for the man who becomes a juro swears he is not biased or prejudiced, and also swears to rencouraged. That's one more than del a true verdict, and if it is feelyour mother and I had when we ing that has caused his verdict, he verdict. Is it money used? Who can tell? The Colon | "I wish you would gtay, but it is not becomen to urge. I know how I should feel if-puh-pubahl You will be out at sea to morrow, and that will brace you up "

Lapham - "Ye-es (Looks at his watch.) I can just catch the next train." (Picks np bis hat.)

The Colonel-"But the note? What are you going to do with it "

Lapham-'I have thought that out. I will bribe a servant to pul it on Bradleigh's table. We can keep the secret, and neither of them will be disturbed. Explain to Eunice that I was anddenly called away. I'll get ber the best present in London, I can af-Jord."

(Lapham slarts toward the door and meets Enulce coming lu.)

Eunice-"The key wasn't in my purse. It must have dropped upon the floor -- Mr. Lapham! Are you ill?" Lapham (trying to smile)-"Nojust getting cooled off."

The Colonel-"Excuse me, Miss Hardy, but I will go down and bring up that lemon and seltzer myself."

(Exit the Colonel.)

Ennico-"Carrying that haby made you ill! It was Mrs. Miller's baby. I mel her on the walk and she told me all ahunt it. She keeps the little stand down at the beach. I buy candies from her for my youngsters there, and we gossip between bargainings. The train was suffocatingly hot; she was tired and the bahy eried. You took it on your lap and winked at itthat wonderful wink of yours-and it went to sleep-twenty pounds of it in your lap twenty miles."

Lapham (uneasily)-"Please-ah l

-don't talk about it.

Eunice (assuming defianace)-"Bul I will Mrs. Miller Is going to send you up some of her wonderful lemon drops. (Langha.) You see one never gets into these things that one doesn't got in deeply."

Lapham-"I didn't intend to give you this note, but now-that-that yon are here-I will." (He passes her the note, which she reads.)

Eunice (blushing)-"It's Mr. Brad-

aleigh's!"

Lapham (choking a little)-"Yes-I found it under the chair. I could not help opening it. I wish you joy!

Eunice-"Joy? Joy? Mr. Brad. Enuice. It's his Eunice, who is out in California. He made me his confessor sill.) Ah-Miss Hardy, have yon--uh and told me how she had put him on prohation. Ho says I keep him from Eunice-"Yes; she will be here doing reckless things which he prom-

Lapham-"Enuice-Eunice-I wanl to say, Eunice-to ask you, Euniceplease do not let onr relations in uny way influence you in your enswer. It may seem great presumption- "

Equico-"What do you muan?"

Lapham-"I mean-I menn-" (He takes the note from her hand, and, sitting down at the little rable on the piazza, crosses out Bradsleigh's name and writes his own in ils place.

Then he passes it to her.) Eunice-"I understand!"

(The Colonel and Mrs. Mordanul enter and pass to the other end of the piuzza. Ennice sits down at the tablo and writes on the back of the letter.)

Mrs. Mordanat-"You are an old campaigner, Colonel; und uavul of ficers tell mu that one must lake whal army officers say with a grain of salt.'

The Colonel-"1 protest, my dear Mrs. Mordaunt, thut it is the most serious innment of my life. Your an-

Mrs. Mordaunt - "Mayhe,

The Colouel-"Alice !"

Mrs. Mordauut- 'Maybe not. will think about il."

The Colouel--"But that is not Nol or 'Yes!'"

Mrs. Mordaunt-"Thou, Colonel,

(The Colouel kisses Mrs. Mordaunt just us the waiter having the lemnu and sellter clhows him.)

The Colonel (to the wuiter) - "What lu thunder are you doing here, mau?' (Enuise, having fluished writing,

passes the note to Lapham.) Lapham (reading)-" 'I hereby appoint Morley Lapham my guardian for life, because he is the best man in the world und because I love him.

BURKER HARDY." hauses (placing her arms around his ueck)-"I could have told you that long ugo- if you had asked me." -Now York Press.

An Aluminum Violin.

Il fore the members of the American Science Association, in Brooklyn, Dr. Aifred Springer, of Cincinnati, produoed an aluminum violin, which was played by M. Scheele, It produced an enermous relume of ton, fully five times that of an ordinary wooden instrument There were a variety of I we were to the Colonel opinions as to the quality of the tin .

Idaho has a woman horse dealer.

Black henguline silks are the latest New York hays more lace than any other city in the world.

There is \$7,000,000 invested in cor-

set factories in this fair land. The size of a woman's shoe should

be just half that of her glove.

Anatomists say that the tongue of woman is amuller than that of man.

Bristling hows of thin material, accordiou plaited, are seen in all colors.

A photographer claims he has "taken" Sarah Beruhardt in 1007 different stitudes. The Dowager Empress Froslerick, of

Germany, has a chain of thirty-two pearls valued at \$175,000.

To Mrs. Strauss, a Wushington lady, belongs the hunor of having the largest rose farm in the world.

Holen Blackharn is one of the most popular advocates of woman entlrage in Great Britain. She is an Irish waman. Extremely pretty costumes for girls

are made with kilt-plated skirts. The plails are about four juches wide and pressed flat. White woolen "sweaters," they say, with soft black silk sashes, will be the

thing to wear for bieyele riding on cool mornings. Russian newspapers are not permitted to make muy relerence to the dresses worn by the Empress on state

or public occasions. Dr. Margarel Ahigail Cleaves, at New York, is the second woman in the world to occupy the position of physi-

cian in a public iusaue asylum. Mrs. W. K. Vanderbilt sometimes wears what irreverent young men call a "hawser of solitaries," which, . lastened ou one shealdes, is bound round and round the bediec of her gown.

The woman who gels a tobaccubrown chevint dress lor fall will be in good style. And it she trims the hodice with black soutache braid and olives the will be right up to the top notch.

A court in Toledo, Ohio, has uppointed three women to act as apprnisers of a decedent's estate, probably the first time women have been thus officially recognized. The estate is that of n woman.

William Cullen Bryant's mother, it is said, kopt a diary for lifty-three years without missing a day. This is the entry for November 3, 1794: "Storming, wind N. E.; ohnrned; soven in the evening son born."

Some of the brotherhood insurance societies are giving women the henefit of the insurance privileges. The Knights of the Golden Eagle has amended its rules to admit the women

members to the insurance branch. At present there are 155 women studying mediciuu in Paris, of whom only sixteen are untives of France, the largest number heing Russians. On the other hund, of 161 women attending the faculty of belles lettres Ill are

French women. These lace-covered bodices, by the way, are very inshiouable ather in black or white lace, and are exceedingly becoming to a pretly shape, as they are made very close-fltting, without folds, giving a very umart, triul

look to the ligure. "Glyoinu" is the name of the new blue, for which there has been "quite a ragu" iu Paris, and which will probably he one of the leatures of the coming seasun. It is a tone between bright blue and mauve, oud is rather startling at first sight.

Different observers have commented npou the increase of women rulers in England, who ride on the off side of their horses. The Englishwomun has been taken as a model in horsawoman. ship, and her departure in this respect will certainly have its influence.

Mme. Pherore Langrana, an Litt Indinu lady, is attracting much attention in London as a suger. She is a pupil of Sims Reaves, and her specially is the performance of l'ersinu melodies. So far us known sho is the first Indian woman to attain ditiuction as a public sluger.

"People lift their eyebrows," 156 William Morris, the Euglith port, "over women mastering the lamber malhomatica; why, it is milbut ly more difficult to learn the details of good houseke ping. Anyboly can learn methematics, but it take a lot of skill to maunge a hou will."

Mrs. Humphrey Ward, in refu g an invitation to Jinn'r from a clab of "woman writers, and the condemned a distinction in literatur She did not wish to and one conphasised to ill rat re, but rath r d aired t age "the neutrality of t pen-the al u of intellig u

thapper will be in death | ished io Korea. The truth about I want ut, de moroing during my such matters is kept, as far as pos-

Strangling is much the more respec- man wishes to move about he must table way of dying. Sometimes this hold up this plank with his hands, and is brought shout by hanging. The when ha sits down its heavy weight thief's nuck and heads are tred to a post, so that his feet are some dis- the jails of many of the magistrates tance above the ground. About his which I visited in the country disankles a stont rope is then fastened, and to the end of this a stone, saveral times as heavy as his hody, is hing. Of course the man dies.

Another method of excontion is by sufficiation, and this, strange to say, is done with paper. The man is laid flat upon his back, and a sheet of Rorean paner is spread over his face. This has been soaked in water and fits over the man's face, being pressed down so that it makes a veritable of torture. In passing the front gate death mask, shutting ont every bit of air, and the man dies. Any one who has seen the paper of Kores will appreciate how easily this form of death could be carried out. It is made by liand. It is as thick as a sheet of blotting paper and almost as strong as

leather. When moistnre is applied to it it becomes exceedingly soft, but does not loose its strength, and it woold make an excellent molding ma-

I was told of a curious onatom as to policemen who make false arrests. They are terribly punished, and if something similar was adopted as to our American Sheriffs there would be lewer mistakes mado. The Korean policeman who arrests it man as a thief when he knows him to be innocent is liable to be caught by the man's family, and his eyes may be burned out by them with red hot pokers or iron ohop stloks which have been heated in the coals. His cyes have not seen truly in arresting the wrong man, and it is thought to be just that they be put ont. Another way of performing this punishment is by laying the policeman on the ground with his face upward. A tube of hamboo, just about one inch in thickness and as long as a pencil, is fitted over the eye, and the other end of it is pounded with a mallet until the oyes are squeezed up into the hamboo tubes. Snob cases are not common, but a pollecman who intentionally arrests an innocent man ie liable to this treatment.

Among the most terrible of Korean crimes are those against your parents or aucestors. There is e prison in Soonl that is devoted ontirely to prisonera who commit orimes against their parents. If a rich son refuses to annport his father he can be sout to jail, and the boy who strikes his father can he whipped to death. The parrieide is burned to death, and It is in Korea much the same as in China, where the killing of one's parcets subjects the

them confess is common in Kores, and it is wonderful what tuventions of torpowder. Think of ell sorts of flog-

A TO SHARE OF THE PARTY OF THE PARTY AND THE PARTY OF THE rests upon his neck. I found it in tricts, and it is my no means a mild instrument of torture. Pad.lling and flogging are the most

common punishment. This prevalls everywhere, and the official is very low indeed who cannot order the common man down to be paddled. Every magistrate has his professional paddlers, and many officials, when they go shoat, have officers who go with them, carrying these instruments of the palace one afternoon I saw a number of these kesos, as they are called, with their paddles beside them. Their master had probably gone in to see the King, and they were waiting ontside. These paddles are about six feet long, five luches wlde, and perhaps an inch thick in the centre, tapering down to a thickness of perhaps three-eighths of as inch at the end. They have small handles, and they are made of a white, hard wood, which is very llexible and olastic. These paddling kesos have a regular guild of their own, and the business often descends from father to son. They are wonderfully expert in the use of the paddle, and the offieers carry from two to a hundred of them with them, according to their rank. I had one or two with me during a large part of my tours, but I, of course, did not use them.

Often a holf dozen men are paddled at the same time. If there are no planks handy, thuy are laid flat on the ground on their faces, and their feet are sometimes fastened in this position in wooden stocks, so that they cannot move. They are laid out in rows, and each man has his paddler beside him. Each paddler's arms are bare to the shoulder, and they work in nnison. They have their paddles raised back over their heads as far as their arms can reach, when they are ready for action, and they bring them down at the cry of the under officials, who, with swords at their sides, stand at the head of the line of half naked men and yell out a sort of a chant, which sounds something like this: La-hoo-au-hoo-oo. Tho paddies are raised at the first la, and as the final on-oo is uttored they are brought down with a orack like a pistol on the hare skin of the men, and the executioners grant with the exertion. They have a way of pressing the paddle down on the quivering flesh, and of pulling it off with a rub before they raise it.

THE CANOUE.

The first strike usually makes a blister, and at the close of the second the paddle it wat with water or blood. shild to be alloed into thirty odd pieces As these executioners drag it off, they rub it into the sand, pressing it there The torturing of prisoners to make until the keson again cry La-hoe-nahoo.oo. Then the paddles are raised again, and as they are brought down ture are sometimes in use. Think of this time, they are covered with tying a mun's hare foet to a stake in sand. They pound the particles into the ground and hurning his toes with the flesh, unit as the men drag them off they take away the skin as though ging and pinching and outting, and it were sandpapered. I can give you you can got sumo ides of the powers of uo conception of the punishment, and a Korean magistrate. In the prisons when you remember that any official the man, but moderate the stroke as fine the partie tograph, an entire reorganization of the whole -as wear | | K | ou | . What is

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains héither Opinm, Morphine nor other Narcotle substance. It is a harniless substitute for Paregoric, Drops, Soothing Syrups, and Castor Oll. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays feverishness. Castoria prevents vomiting Sour Curd, cures Diarrheea and Wind Colic. Castoria relieves tecthing troubles, cures constipation and flatniency. Castoria assimilates the food, regulates the stomach and bowels, giving healthy and natural sloop. Castoria is the Children's Panacen-the Mother's Friend.

Castoria.

"Castoria is an excellent medicine for chil. dren. Mothers have repeatedly told me of ma good effect upon their children."

Dz. G. C. Ordonn, Lowell, Harat

"Canteria is the best recordy for children of which I am acquainted. I hope the day is not? for distant when mothers will consider the real interest of their children, and use Castoria lustend of the various quack nostrums which are destroying their loved ones, by forcing opinia, morphine, soothing ayrup and other lurriful agents down their throats, thereby sending them to premature graves."

Dn. J. F. KINCHELOE, Cooway, Ark.

Castoria.

" Costoria is so well adopted to children that I recommend it as superior to any prescription

> II.A. ARCHER, M. D., III So. Oxford St., Brooklyn, N. Y.

"Our physicians in the children's department have spoken highly of their experience in their outside practice with Castoria, and although we only have among our medical supplies what is known as regular products, yet we are free to confessithat the merits of Castorin has won us to look with

The Splach Dam.

Last sommer the St. Lawrence Company built a spinsh dam in the Greenbrier River mear Palling! Springs. The men who were ly. ing idle at Rovemerte contributed Un work free in order that the dam might be built and that the mill at Ronceverte be storted up congr than it direwise would be. Flowever, the cost of feeding and clothing these men, the work of teams, cost of material, otc., made the work a coatly one to the company which built it. The dam is eleven feet high and built to stand Vit, to take Christmas among his any flood. The chule to empty the dam is thirty-four feet wide med back about three miles.

The first rafting tide in eighteen months came in this month, and four rafts from this county were started from Ronceverte. The waler was harlly sufficient, but the dam was what provenled them from going through. The raftsmen all agree that a raft will nevor by run on the river until very material changes are made in the

The first raft belonged to Lawver Gilmor, of Lewisburg. They drifted down the sluggish eddy towards the chute. Just as the suck of the water caught the raft, the E. L. Day, formerly a druggiel crew-launched a row-boat, and the up nutil it drove one end into the hottom of the river. In a monient debris. The faint polor vanished from his che ka, his lips turned pale. The ack man had be n painted.

She looked at him more closely. The strange light blue eyes that maintained their berrible unwinking stare, the deadly color of the face and the ter coldness of its contact struck a chill to her. She felt at his heart. Not a beat! Mr. Walker was ilead-

Had his marderers-they must be his murderers-painted the dead face with the hues of life, deceived her eyes with ronge and powder as they had desired her cars with a ventriloquial trick? Had they not made good their escape, leaving their helpless dupe alone—alone with their

And at last the express slackened speed, jolted, stopped. They were at Ely. She might seriam now, and she

"What's here? Coutlemen ill, miss? What ilo you say?"

Thus the guard.

"There has been marder here," she asid, looking out upon the throng of faces that surrounded the carriage door. "Telegrah to the last stopping place. I can describe the gnilty wretches who have done this swful deed. Ah, there they are!"

Here they were indeed, the guilty wretches. Dared they brazen it out? Did they mean to deny all knowledge of the dead man?

"This is a seriousoharge, you know, gentlemen. I must trouble you to come along with me."

"With pleasure, Mr. Polizeman," said the signor, with horrible lightuess. "Bul we look at this corpo morto hero first, with your kind obligement. Why will pretty young ladies shrick at everything? My good Rosenbanm, you have better the English language. Please explain."

Rosenbanm drow a large poster from the bulging pocket of his fur coat. Ho gravely hauded it to the station-master. It bore this inscription:

TO-NIGHT.

At the Temple of Varieties, Ely. Herr Rosenbaum and Sig. Denzo. The Marvelous Conjurors and Ventriloquists, is Their Unparatteled Eutertainment, In which the ANIMATED DUMMY will also take part. COME EARLY.

"This here jointed wooden figure with the wax face and hands," went ou Roseubaum, "is the dummy. He usually travels in the guard's van, but the gnard couldn't guarantee his reaching Ely in conditiou to appear before the public, having a fox-terrier pup in charge as was given to worrying. So we took him in the carriage with us. At the last station we stopped at, rue and the signor, gets out for a drink, and the train buying started sooner than we barguined for we wiripped into a second-class compartment. Sorry the young lady has been frightened. Ain'l you, signor?"

"Estremanoute!" said Sig. Denzo. -Gentlewoman.

Englishmen Grow Taller.

Francis Galton has collected some interesting facts in regard to the effeet of athleties and improved physical condition during the last forty years on the physique of the middle clauses.

Mr. Galton gives instructive evidence of the amelioration of the upper middle class. When he was no nudergraduate at Cambridge, from 1840 to 18H, although but five feet nine and three-fourths inches in beight, he was taller than the majority of his fellows. In addressing them he habituelly lowered his eyes, and if in a crowd he would readily see over the heads of the people.

Writing in 1893 he states that he no longer possessus these advantages. Altered social conditions, in his opinion, have helped to improve the bodily powers and address of his class; sob conditions, for instance, as more wh leson wand abundant food, better Ling, warmer clothing, mo leration as the use of al hol, better ventilited alcoria ro mu, more change through vecat os, sud, lastly, more he lthy lives led by women to their nightood. -- 41 L (1) 11 - 12 - pt

Dr. Biggs, of the New York Board of Bealth, who has been in Europe investigating Dr. Koch's new treatment for dphtheria, says that it is an absointo enre if applied in time.

The phylloxern, or the vine pest, is making snoh ravages in the sherry wine districts of Spain that the Goverument has appropriated \$100,000 for the extermination of the disease.

The ntility of the mosquito is beyoud question. It is torn in the swamps, and feeds upon auimal and vegetable matter, which, if allowed to decompose, would fill the air with poisonons gases.

The vital principle is preserved in seeds and oggs, fruits and vegetable during cold weather, because they have a heat of their own. The temperature of an egg or apple, down to the freezing point, is always several degrees above that of the surrounding

The Jupanese are really a very progressive people. The School of Scionce at Yokohama is remarkably thorough. One of the naval officials, Yamana, has sneeceded in producing a new steel, at the Tanuka Government factory, which is proven to be a most remarkable metal. The Clovernment has adopted it.

A living specimen of the largest and most doadly suake known has been added to the Zoological Gardens of Londou. It grows twelve to fonrteen feet in length, and is hooded like the cobra. It cennrs in India, Burma and in the East Judian archipelago, living in forests and jungles and readily climbing trees.

aseu, is at present engaged in a very interesting series of goological observations on his native island, for which he has received generous Government support. The special object of his study is the sands and glaciers in the district of Austur-Skaptafell and the grent glacier Vatnajokull, iu the southeastern part of leeland.

A French electrical journal, in reply to an offer of up award of \$10,000 by the Freuch Government to the inventor of a simple and sare method of determining fraud in the production of alcoholio liquors, suggests that a knowledge of the electrical conductivity with that of the density might be a sufficient means, if the liquora bo brought to the temperature of meltiug ioc.

A Peacock's Little Game.

Sol. Stephan has made a discovery up at the Zoo. The big peacock has for several weeks made a practice of going every afternoon to the culrance gate and parading back and forth neross the path for half an hour. This action occasioned no remark for a time, but after awhile it was noticed that the fowl came regularly at 4 o'clock and at no other hour, and always remained about half au hour, ufter which it would walk away and go about the lawns as usual till the following afternoon. For the past week a watch has been kept on it, and at last the secret is discovered. Near the gate is a glass door, leading to a collar in the hillside, and about 4 o'clook the tight falls on the door so that the peacock can see himself as in a mirror when he walks past. He ovidently takes great delight in looking at himself. The strange part of the affair is that he should know just when to come, as the reflection is clear and distinct only about half an hour after 4 o'clock. - Crucinnati Times Star.

A Street Car Hearse,

One of the Sau Francisco railway companies has constructed an electric funeral oar for the Sau Mateo Cemalery. The car is named Cypress Lown. Les and Thought fly was Cloter to

A . / blo je "have reme! through as remarkable a phain of events at I have and from hed alive in tall the story,

It was along in 1994 when I was working is the a ver mt as o New Musico, that my trout so began at first I suffered with Indigres a and so again did the point become that I want to Childornta for my bealth, but the trip did me tittle good, and fully impresent with the time that mry last day had and y dawned upon me. I hurried back bere lo my and boune to die.

"It m simple tadiger fon y maindy developed into a chipair toability to take any substantial find, I was barely able to creep a I, and at times t was pro-trained by spates of beart palpiration. This condition continend until one year ago.

"On the lith of April, 1830, I saldenly enlayed, and for days I was onconsilous, in feet I was not fully mysell until July. My condition on September tat was simply horribin, I weighed but sevenir pounds, whereas my normal weight is 165 pounds. All over ms bo ly there ware lumps from the eine of a grape to the star of a walout, my fingers were crampe I so that I could not more than half etraighten them, I had entirely lost bonn ven bear simil rewol ven to lorisce irrential to inat I could not ilrink without optiling the liquit. Nothing would remain on my stomach, and it seemed that I must dry up before many more days had passed.

"I made another round of the physicians, calling to con after the other, and by the ald of morphine and other medicines they gove me, I managed to live though barrely through the tall."

Here Mr. Thomas displayed his arms, and just above the elbow of each there was a large tregular statu as large as the palm of the band and or a purple color; the space covered by the mark was aunken nearly to the hone, "That," said Mr. Thomas, "Is what the doctors did by patting morphine

On the tith of Becomber, 1893, just eigh mosths after I look permanently to bed-It shall mover lorger the dute-my consin, Joe Poster, of Cartern' Crook, called ou me and gave me a box of Dr. Williams' Pink Pills for Pale People, saying they limit cured blo of partial paralysis, with which I know he had all but died. I followed his directions and began taking the medicine; as a result I stand before you to-day the most surprised man on earth. Look at my hand, it is no steady as sours; my face has a benithy look about it; I have been attending to my dutles tora mouth. Blucel began taking the pills I have gathed thirty poneds, and I am still galaing. All the knots have disappeared from my body except this little kernel here to my palm. I have a good appetite and I am almost as strong as I ever was.

"Yesterday I rode thirty-serve miles on homebank; I leal thred to-day but not stek. I used in have from two to four apells of heart palphotion every night; since I beann the use of the pills I have had but four spells

"I know positively that I was cared by Dr. Williams' Pink Pills, and I believe firmis that it is the most wonderful remedy in excetence to-day, and every fact I have presented to you is known to my neighbore as wall as to myself, and they will certly to the truth of my remarkable cure,"

be Williams Piuk Pills for Pale People are not a pitcal medicine in the reuse that unma implies. They were first compounded as a prescription and used as such in general practice by an emiliant physician. So great was their offensy that it was deemed wise to place them within the reach of all. They are now nonulactured by the Dr. Milliams' Mediates Company, Schenecia ly, N. Y., and are sold in boxes (never in lunes form by the doren or handred, and the public are enulime lagatust numerous tintlattons sold in this shape as fly water box, or six boxes for \$2.50, and may be had of misdroggists or die Thy mail from De Williams Medicine Comping.

The Soft Spot.

In every human heart there is a place known as the 'bott apot" Sometimes It is in the human head, lut no matter.) The good and uncent tellef is that when this soft apol a tour hed the foundating of coin-I is fon ar uponed, and the wallis of generosity bealit to flow.

But one great difficulty is to touch the little place, and so turn on the tan na twere It can only le e d at the uch it sight or hearing, and, of core there are notes so deaf as the that won't but, not any as blic as w n't - .

is to pretting good, from water into a clean kattle, already quite warm, and setting the water to boil quickly, and the taking it off to use in lea, coffee and other drinks, before it is boiled. To let it steam, summer and evaporate until the good water is all in the almomphere and the lime and mon and drogs are left in the kettle-bah! that is what makes a good many people sick, and is worse than no water at all. Let them at least have the beverages as fresh as passible from pojsonous conditions. Much benefit may be dorived from drinking lint water, but the water must be freshly drawn, quickly boiled in a clean and perfect resact, and immediately use I .- New Orleans Piesrune.

CHETCH HINTS.

Mix soft soap with powdered starch, half as much salt, and the juice of one lemon; lay it on the part, on the both sides, with a brush; let it lay on the grass day and night till the stain comme out.

Nover store fruit jars in a silver closet. It has been discovered that one rubber ring around the neck of a fruit jar will disorder a whole closetful of silverware. To keep silver from turnishing place it near a lump of gum eamphor.

To sweeten earthouware vessels, jelly glasses and fruit jars, wash them well and dry them. Place them in a large pan, set in a cool oven and then heat it. Bake the vessels several hours, and then gradually remove the pan from the oven. The jars, olc., should be almost cold when taken out. Otherwise there is danger of their cracking.

Oil cloth properly treated is a very nice floor covering, but if it is abused in washing it up It is a torment to the neat housekeeper. It should be rubbed up with cloth dipped in kerosene oil or washed with skimmed milk. It will last three times as long as when washed with soap and water, and ammonin or sal soda will rot it in a little while by enting out the oil in the paint. - Home and Farm.

AN APRION WOLLE BAG.

This useful hag is made of a breadth of material one and a half yards in length, which is turned up to the dopth of half a yard to make a deep pocket. Sew the two sides of the pocket together, and gather the top into a narrow band like an ordinary apron. The band should not go around the waist, however, but should stop nt the guthered part, two large books at each and serving to fasten it to the waist or skirt band when worn. Any material proferred may be used for the purpose, silk or muslin or linen, and the top corners of the pocket may be ornamented with ribbon. This apron is large and purely for use, and is particularly valuable for large pieces of work like sofe rugs or ball binnkets, as it is sufficiently ample to hold all the wools, and may be hung in a cloust out of the way when not roquired.

The same idea may be used for un apron of smaller dimensions, which is more januty looking, and for one of these the gay bandanun hankorchiefs pro very snituble.

Let one handkerchief form the apron, and from another ent a strip about twelve or fifteen inches deep for the pucket, which may be sewed on and turned up ou the right side. Finish the lop of the pocket with a shirrod heading.

Yellow satin ribbons make a protty trimming for these gay plaids.

Strings may be substituted for books if preferred, in which case they should mustch the ribbons of which the bows are made. -- Home and Parm.

What He Wanted.

At the hospital the other morning (says Life) one of the patients was just recovering from an attack of de-Ilrium tremens, and, as is usual in such cases, desired to dress and go home more than anything class. limphened that one of the young ladies connected with the flower mission saw him, and, approaching, said: "I have some beautiful roses here. Wouldn't you like some?" Slowly his head turned, and slightly opening his bleary eyes, he said, much to the embarrassment of the young woman: "I'd n d-d sight rather bave my paots."

Arizona Raisins.

From Arlzona for three years past has come the earliest car load of American raisins shipped East. The season there is ahead of that of Southern California and the atmosphere is peculiarly suited to the curing of raising.

TAKE STEPS in time, if you are a sufferer from that scourge of humanity known as consumption, and you can be cared. There is the evidence of hundreds of living wilnesses to the fact that, in all its carly stages, consumption is a curable disease. Not every case, but a large percentage of cases, and we believe, fully 98 per cent, are eured by Dr. Pierce's Golden Medical Discovery, even after the disease has pro-

gressed so far as to Induce repeated bleedings from the lungs, severe lingering cough with copious expectoration (including tubercular matter), great loss of fiesh and extreme emaciation and weakness. Do you doubt that hundreds of such cases

reported to us as cured by "Golden Medleal Discovery " were genulue cases of that dread and fatal disease? You need not take onr word for it. They have, in nearly every Instance, been so pronounced by the best and most experienced home physicians, who have no interest whatever in misrepresenting them, and who were often strongly prejudleed and advised against a trial of "Golden Medical Discovery," but who have been forced to confess that It surpasses, in curative power over this fatal maindy, all other medicines with which they are acquainted. Nasty codliver oil and its filthy "entulsions" and mixtures, had been tried in nearly all these cases and had either atterly failed to honeat, or had only seemed to benefit I little for a short time. Extract of malt, whiskey, and various preparations of the hypo-phosphites had also been faithfully tried

The photographs of a large number of those cured of consumption, branchitis. lingering coughs, asthma, chronic nasal caturrh and kindred maladies, have been skillfully reproduced in a book of 160 pages which will be mailed to you, on receipt of address and six cents in stamps. You can then write to those who have been cured and profit by their ex-

THE TERRITORS REPRESENTE THAT BUFFLE JOHN W. THOMAS, OF THETA, TENNESSEE.

Rat and Thought He was Galog to Dry Up. His Regarary the Marvel at hencesaes, (From the Northmile Tena, Banner,) Mr. John W Thomas, Jr., of Thesa, Tenn.,

Ampered With a Peretter Disease-file

Rady Cavered With Lumpy-Cauld Not

is a man with a most interesting bistory-At present be is interested to blooded horses, for which Maury Connty is famous.

"Fir people, I take II," sald Mr. Thomas lo a reporter who had asked him for the story of his life, "have passed through as remarkable a chala of events as t have and remained alive to tell the story.

"It was slong to 1894, when I was working in the aliver mines of New Mexico, that my troubten began ant first I suffered with inillgreifns, and so acute did the pains become that I want to California for my health, but the trip did me little good, and fully impressed with the idea that my last day had nearly dawned upon me, I hurried back here to my nid home to die.

"From simple ladiguation my malady dereloped late a chronic lambility in take any authtantial food, I was barely able to creep about, and at times I was prostrated by spelts of heart palpitation. This condition continued until one year ogo.

"On the 11th of April, 1999, I so literly collapsed, and for days I was naconsolons, in fact I was not fully mysell notiliJuly. My condition on September 1st was aimply horrible; I weighed but sevenly pounds, whereas my normal weight is 165 poonds. All over my body there were lumps from the size of a grape to the size of a walant, my fingers were cramped so that I could not more than half straighten them. I had entirely lost control of my lower limbs and my anad trembled to that I could not drink without apilliag the liquid. Nothing would remain on my stomneh, and it seemed that I must dry up before many more than had passed.

"I made another round of the physicians, calling in one after the other, and by the ald of morphiae and other medicines they gave me, I managed to live though barely through

Here Mr. Thomas displayed his arms, and

ast above the elbow of each there was a large fregular stain as large as the palm of the hand and of a purple color; the space covered by the mark was sunken nearly to the bone, "That," said Mr. Thomas, "Is what the doctors did by putting morphise

"On the 11th of Becember, 1893, Just eighmonths after I took permanently to bed-It shall never forget the date-my cousin, Joe Poster, of Cartera' Creek, called on me and gave me a box of Dr. Williams' Plak Pills for Pale People, saying they had cured him of partial paralysis, with which I knew ho had all but ilted. I followed his directions. and hegan taking the medicine; as a result I stand before you to-day the most surprised man on earth. Look at my hand, it is as stendy as yours; my face has a healthy look about it; I have been attending to my duties for a month. Since I began taking the pills I have gained thirty ponnds, and I am still gaining. All the knots have disappeared from my body except this little kernel here in my palm. I have a good appetito and I am almost as strong as I ever was,

"Yesterday I rode thirty-seven miles an horseback; I feel tired to-day but not sick. Lused to have from two to lour apells of heart palpitation every night; since I began the man of the pills I buve had but four spells

"I know positively that I was cared by Dr. Williams' Pluk Pills, and I believe firmly that it is the most wonderful remody in existence to-day, and every fact I have pre-sented to you is kunwn to my neighbors as wall us to myself, and they will corrlly to the truth of my remarkable cure."

Dr. Williams' Plak Pills for Pala People are not a patent medicine in the nease that anaic implies. They were first compounited as a prescription and used as such in general practice by an emilneot physician. So great was their efficient that it was deemed wise to place them within the reach of all. They are now manufactured by the Dr. Williams' Medleiue Company, Schengelady, N. Y., and are sold in boxes (never lu loose form by the dozen or huodred, and the public are gautioned against unmerous fuilintions sold in this shape) at filty tente o box, or six boxes. tor \$2.50, and may be had of all druggists or direct by mail from Dr. Williams Medicine Сошилиу,

The Soft Spot.

In every human heart thare is a place known as the 'Sult spot." (Sometimes It is in the homan head, hut no matter.) The good and ancient belief is that when this soft spot is touched, the fountains of compassion are uponed, and the waters of generosity begin to flow.

But one grant difficulty is to touch this little place, and so thru on the tap, as it were. It can only be col at through the sight or hearing, and, of course, there are none so deaf as Those that won't bear, nor may so blind as won't see.

And if a man won't read our oppeals for the tloy balroes that are erylag out for food and fresh alr, and won't listen to what bls kind-hearted friend has got to say about this allimportant matter; well, of course, the tap remulus just as It was, and does not get shifted, the result is that in course of time it gets rusty, and the source of the fenetaln gots arted up with schucioess and vices of Hat sort

It is a very dreadful thiog to be mono. It is almost as bad to he thoughtless when the happluersreschauce the lives-of uthors are ut I will not ear aur more though, but I slaverely hope what I bave said will touch your soft spot, and set the fountain of your pity

She Could Be Familiar Tou.

THE SECTION OF DARFIT COMERNY. A woman physician has been saving

In print that few persons know how to cook water. The secret she maintains la in putting good, fresh water into a clean kettle, already quite warm, and ectting the water to boll quickly, un! then laking it off to use in tea, coffee and other drinks, before it le hoiled. To let it steam, simmer and evaporate until the good water la all ln the almosphere, and the lime and izon and drags are left in the kettle -- bah! that a what makes a good many people sick, and is worse than no water stall. Let them at least have the beverages as fresh as possible from pajsonous conditions. Much benefit may be derived from drinking hot water, but the water must be freshly drawn, quickly bolled in a clean and perfect ressel, and immediately use l.-Now Orleads Picayune.

USEFUL HINTS.

Mix soft soap with powdered starch, half as unich salt, and the juice of one lemon; lay it on the park, on the both sides, with a brash; let it lay on the grass day and night till the stain

Never store fruit jars in a silver closet. It has been discovered that one rubber ring around the neek of n fruit iar will disorder a whole closetful of silverware. To keep silver from tarnishing place it near a lump of gum camphor.

To sweeten earthonware vessels, jelly glasses and fruit jars, wash thom well and dry them. Place them in a large pan, set in a cool oven and then heat it. Bake the vessels several hours, and theu gradually remove the pan from the oven. The jars, etc., should be almost cold when taken out. Otherwise there is danger of their oracking.

Oil cloth properly treated is a very oice floor covering, but if it is shused in washing it up it is a torment to the neat housekeeper. It should be rubbed up with cloth dipped in keroseun oil or washed with skimmed milk. It will last three times as long as when washed with soap and water, and ammonia or sal soda will rot it in a little while by enting out the oil io the paiot. - Home and Farm.

AN APRON WORK HAG,

This useful bog is made of a breadth of material one and a half yards in length, which is turned up to the depth of half a yard to make a deep pocket. Sew the two sides of thu pocket together, unil gather the top into u narrow band like an ordinary apron. The band should not go around the waist, however, but should stop at the gathered part, two large books at each end serving to fasten it to the waist or skirt band when worn. Any material preferred may he used for the purpose, silk or muslin or linen, and the top cereers of the pocket may he ornamented with ribbon. This aprou is large and porely for use, and is particularly valuable for large pieces of work like sofa rugs or huth blackets, as it is sufficiently ample to hold all the wools, and may be hung in n closet out of the way when not

required. The same iden may be used for nu apron of smaller dimensions, which is more januty looking, and for one of these the gay bandnoun hankershiefs

are very suitable. Let one handkerchief form the apron, and from another out a strip about twelve or lifteun inches deep for the poultul, which may he sewed on and turned up on the right side. Finish the top of the pocket with a shirred

Yellow gatin ribbons make a pretty trimming for these gay plaids.

Strings may be substituted for hooks if preferred, in which case they should match the ribboos of which the howa are made. -- llome and Farm.

DISEES FOR INVALIDS.

Toast Water-Toast a slice of brea l very hrown, break it into pieces and pour over them one cupful of builing water. When cool this will be found a nourishing drink.

Jelly Water-Put in a tumbler : temponeful of currant jelly with one tablespoonful of grape juice. Min them well logether and till the glass with ico-water.

Flazonel Lemounde - Steep Iwo tablespoonfuls of llasseed in our quart of hot water for ten minutes. Alld the juice of three lemons, a lurge cupful of augar and a wineglassful of grape julce, stiring together. This will be found an excellent drink for persons suffering with colds or lung troubles, j and may be drunk either hut or cold.

Beef Tea -Two numbels of lean beef chopped into small bit and put Into s glass fruit jur. Scraw on the cover and put the jur in a ketile of cold water. After boiling for two or three hours the jules should be poured off and seasoned to tante.

Rico for involids - Take a table spoodal of rice, a piul of milk; put them ln an open dish and hake in the oven for two hours. Keep the dish covered for the first hour, after which the cover should be removed and the rice attreed occasionally, Swestee if preferred.

So far as I know the first inneration apon this style of operating was made by Burns Bros. (our Barns: not the other who came later) They probably found it distusteful to ouerate with oxen at the bend of the Little Knnawba, after four years of nctivity in Confederate caraly and artillery service. They put in mules and horse teams of their own, large ly four-horse, and worked with the log cart so common to this section. Next followed Bortin on the headwuters of the Mouougaheln; but bla timber holdings being flanked on oither side by broad ngricultural valleys, be let most of his jobbing to farmers, rather than to more trip people, who went in with mix. ed slock of great abort horn oxen, and large, well ruised and well led witgon horses. A little behind him camo the St. Lawrence Company, operating io white plue at the head of the Greenbrier river, and with it Smith & Driscol came down from Pennsylvania, with their regular shanty men, largely blue poses and Morning Advertiser. "ainte of Mniners," with , na fine horses as ever Pennsylvania ever sent to the woods, and I know what that langouge wears. This style of logging spread to the waters of the Chest In spruce operations, and Sunday Advertiser. was first loangerated in burdwoods, so far as 1-know, anywhere in monutain lumbering, by the Aloxunder Lumber Company, nuder the management of John Alexander bimself and the direct supervision of that old Nova Scotlan, Alexander MoLean. While these changes were being maile, the St. Lawrence Company went through the transl. tion stages from skidding to sildes, and slides to railroads, thus being the plopeers in modern lawbering In all its aspects, savelone, in the state. Trum oading and that apon a large scale was introduced by M. A. Cheenoy, then of Knonwhn Palls now of Chicago, and he soon dls. carded mules upou his long hank, and was thu first in our state to operate locomotives upon woodon rails.

A Moving Mountain.—It has been known for many years that an enormous mass of rock on the Cascades of the Columbia River. in Oregon, large enough to be dignified with the name of mountain, is slowly abanging position. It consists of a ridge of brown basalt with threa summits, ten to twelve kilometers long and rising about six hundred meters above the level of the river. The idea that this mass is in movement is certainly the last that would occur to the traveler passing it, and nevertheless nothing is more certain; the whole mass is being displaced slowly, but without pause, dascending toward the river and showing an intention of damming it some day or other, and so of forming a great lake extending from the Cascades to the Dailes. In this movement of translation and descent it has already submarged part of the forests that line its base; the eagineers of the railway that skirts the mass have proved that the line is continually pushed toward the river and that in several years it has been moved two and one-half to three maters. Geologists attribute the phenomenon to the fact that the basalt that forms the nuclnes of the mass rests on soft strata through which water constantly percolates, thus sapping the monntain under its base. Thay think, also, thet these strata, even without the nid of water, would probably give way little by little, beneeth the mass with which they are loaded .- Literary Digest

a letter to the Washington Star charact on board a Chinese steamer eds mort wellm 000 mouth of the Yangtee Kiang, Frank G. Oerpanper mys; I have been riding for days upon the great l'angtee Biver, and

I write this letter in almost the conter of the Chinese Empire. I am within less than a hundred miles of the Chicare of the celestial land, the vest city of Bankon, and am passing through the country where the Chinese mobbed the foreigners a year or so upo, burning down the honor of the musicoaries, and killing some of the English afflores of the Chinese customa Last night I left Kinking, a but trading center at the mouth of the Poyeng Lake, and during the past two weeks I have passed a half dozen gation of the size of Cleveland or Washington, and bare traveled through about the same number of great States, having an appregrate population of something like one bundred and fifty millions of people. All the towns l have visited I have found packed with a throng busier than you find on lowor Broadway at noonday, and I am amazed at the immensity of this great Chinese Empire and its enormous population. I entered the Yangton at ite mouth, where it flows through the Olineme Province or State of Kisngso. This is in the center of the east coast, and it has an area alient as hig as that of Pencurivania. It contains more than half as many people as the whole United States, and its population is equal to that of the British Isles. The State of Canbui, which I next entered. te no bigger than Kansas, but it supparts twenty-seven million people, and the State of Rupek, in which I am now traveling, has over twenty mill-100. This great river itself has milltons who are hora. live and die upon its waters, and at every landing I acc a thicket of poles, each of which aprings from the home of one of the millions of families which make up China's boat population. I am amazed at the wonderful resources of the

My eyes bulged out at the muscles and tadnetry of its people, and my head horses in trying to nedersiand the carrons sights which are crowded

Chron's great rivers are among the wonders of the world, and the Yangtee Riang is the king of its kind. It has a greater volume of water than the Nile or the Ameson, and it has built up a greater concery than Egypt along the low lands of China. In approachlng it from the ocean I found the waters discolared by its muddy fluid many miles out at sea, and it turus the satty brine vallow for sixty miles from its mouth. Here it is about as thick as pea soup Ton draw up a bucket and in a moment its bottom will have a thick achievent of foud. had been warned not to use the spigot which was from the hostom of the bout rate my bath, test this moraing the tuy had made it too hot and I trad to oool the barrel of illtered mater in the tob with about a gallon fr the Vangtee I thought the am t was as little that it could not a the cost The result was that I water became the color of m a my bard fort toft an tau pres-

Noxt you is so wide that it is hours ofter you see a brighty dressed girl, wearing red | see the muddy color of its waters bepantaloons and a bino sack, carrying fore you can distinguish the banks, a parasol of paper and looking very and for the first fifty miles of our gay as she hobbles up and down the journey we passed through what seemed bank. You note mandaring riding in blue chairs carried between two hare legged ocolies, who trot along in front first hills were passed about fifty miles and behind, and among the nobles,

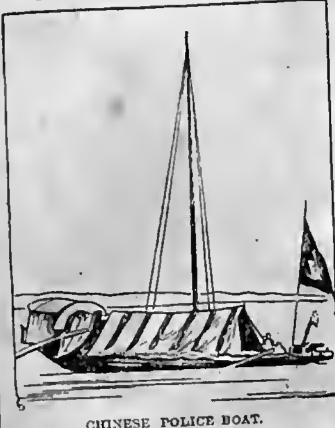

the common people on foot. Here and there you may see a sheep or a hog, but the horses are comparatively few, and the only cattle are the half hog half cow known as the water buffalo. You see these working in the fields pulling rude plows or turning the wooden water wheels, which are used tu some parts of China for irrigation. They are for all the world like the Sakievhs of Egypt, and there are many things about you which romind you of the land of the Pharacha. You see no oattle or horses dragging burders over the embankments, and the canals and rivers, in fact, take the place of roads. In all this part of Chima, it is said, you can go to every man's house in a boat. There are nnmerous creeks that empty into the Tangete. The mouths of these are esasts, which cut up the land like a net, you see the mastand sails of bosts walk-Olten there will be asseral sort of a river police. lines of these toute rouning parallel with the river, their white salls grow. the smaller to the distance, until they and beering up this series of embankthe als as every crimes were immitted.

In coming into the Yangtseits month to he a great island sea, ranging from twenty to fifty miles in width. Our inland. Seven hundred miles from the coast I found its width to be more than a mile, and it holds that width nearly all the way from Shanghai to Ichaug, a distance of about one thousand miles. It contains many long, narrow islands, and it now and then branches out lute different streams or out offs from the main bed of the river, which at high water materially shorten the course. It is as full of modern steamers as the Mississippi, and has in addition the thousands of odd heats and junks of the Chiusse. I could fill this paper with the mention of the dlfferent kinds of oraft and their loads, and among the ships there are meny which would be a surprise to American readers. There are Chinese life boats, for instance, everywhere. They are low junks with cars and sails, and they watch the river during the storms and filled with junks, and on them and the pick up such sampans and fishing boats as are overturned. They are under the control of the districts ing. as it were, rapidly over the green through which they go and form a

Now and then they capture a smuggles or a pirate, and here and there untalde of some of the rillages I saw form white meaks when the dim line boats which had been cut in half and of the horizon. Such boats are one-

corry down from the highlands of brave fight with nature and getting the grass is as green as in Egypt in wina That garden. everywhere grown. In looking over landscape you see no fences or harns. The people live in villages made of thatched huts, with walls of plaited reeds, which they plaster inside and ont with mnd. Sometimes the huts stand alone in the town, and at other times they are joined together in blocks. The best of them are not more than twenty feet squipre, and the average farm house has only one story. The earth forms the floor. You could, I venture, build a good one for \$5. The houses stand finsh with the slimy mnd sidewalk, and the filthier and dirtier this is, the hetter it seems to please the people. Each village has e clump of trees about it, and in looking over the valley you see hundreds of these clumps, and realize the force of the statement that the wbole Empire is one vast village. Many of the villages, I am told, consist of only one family or olan, and the Chinese are said to take better care of their relatives and to work together better than

any people of the world, The best of the towns here are close to the river, and we have passed many walled cities, with pagodas and temples rising shove the other ridge-shaped

CHINESE POLICE BOAT.

roofs. At some of the bigger centres this ship stops to take on and discharge cargo, and I have gons through a number of citius since I came to China the names of which I had never beard. Tuke the city of Ngankingnot Nanking, the old capital of China, you have all read of that-but Nganking. How many of you have ever roalized that it existed? Well, we have just left it. It is n city of about a half million people and is bigger than St. Louis. It is the capitol of the State of Gauhui, which has a population of more than one-third of the whole United States, though it is not as big as the State of New York. It lies right on the banks of the Yangtse, about 150 miles above Nanking, and it has miles of walls about it. These walls are twenty-five feet high and so wide that you could drive a buggy around the city on the top of them. Nganking is well built and rich now, though it was nearly ruined during the Tuiping rebellion, back in the fifties. At that time the rebels held it under siege, and food hecame so scarce that human flosh was used, and, It is said, was sold in market places for its weight in silver. The city has now a great native trade, though it is not one of the treaty ports, and foreign steamers cannot stop at it. It has one of the thest pagedas on the Yangtse, as shown on the initial illustration. It is a seven-storied tower of rose pink, rising, as it were, right from the banks of the river, to a height, I judge, about half that of the Washington monument. It is manysided and its top is decorated with a beautiful cap of brouze, which is built in rings, like those of some of the temples in Siam, to a point. This tower was being repaired whon visited it and a franework of pole scaffolding extended from its base upward to a height of more than oue hundred feet. Upon this hundreds of Chinese masons and painters were working, and away up on the sixth story I could note little fly-like celeatish olluging to the wall and patching np the ravages of the weather. I was glad to see it, for it showed me that there is at least one place in China where the monuments of the past are respected, and where both the religion and the temples have not gone to seed.

It is too bad to have one's polished tables and stands covered with little rings where a vase has stood and the water has overflowed. There is no need of this, either. Everyhody should have on hand an abundant supply of these mate. These need not be obtrusive in design. In fact, no one wants any more the elaborate confection that wore once wont to call attention to their crocheted splendors ln our drawingrooms. Make the latterday vass mats of small rounds of olive green felt, preferably not ornamented at all except for a "pinked" border. No one will notice them, but they will keep your rosewood and mahogany from harm. - Detroit Free Press.

PAINTERS' PICKLE.

Painters' pickle is used for removing old paint. It is useless to waste time and money applying good cusmel paint over old paint, for it quickly oracks and grows shabby. Mix ons pound and a half of stone potash, one pound and a half to two pounds of soft soap, and half a pound of washing soda together, and stir into about a gallon of water. The pickle should then be boiled till the potash is melted. Apply this with a brush, then let it stand for several bonra. The work must afterwards he washed thoroughly with strong, hot sodawater, using no soap. This pickle may be applied equally well bot or cold Great care must be taken in using the pickle, as it discolors the finger nails and takes the color out of anything it touches. - New York World

SPOTENO A NAD EGO.

The most reliable method, as well as the easiest for determining the degree of freshuess of an egg, is to held it to the ear and shake it. The egg shell is perforated by small pores, which can only be seen by the aid of a microscope. Through those pores, day by day, the albumon inside the egg evaporates, and its place is taken hy air. When the egg is full a fluid passes constantly toward the porce, and is the principal agent of corrupllon, the corruption being manifested more rapidly in warm than in cold weather. An egg absolutely fresh is entirely full, but stale aggs have all an empty space in proportion to their age, caused by the loss of albumen by evaporation. Thus, if any sound osn be heard when the egg is shaken, it is safe to throw it aslde as unfit for use. -New York Snn.

RECIPES.

Lemon Custard-Three well beaten eggs, three cups of milk, three-fourths of a cup of sugar and a tablespoonful. of lemon extract. Bake in oustard bowl or tin milk pau.

Pudding Sance-Beat a teaspoonful of cornstarch with a half cup of milk until thoroughly mixed. Stir into a pint of bolling milk, sweeten and flavor with vanilla or any extract you chance to have.

Cream Pie-One-half pound of butter, four ogga, angar, salt and untmeg to your taste and two teblespoonfuls of arrow-root. Wet with cold water or milk and pour on it a quart of boiling milk. Stir all togethor. Bake your ples in a deep dish.

Broiled Mutton with Tomato Sauce -Cold hoiled leg of mutton, if not too much boiled, is very good out in rather thick alices, sprinkled with pepper and salt and broiled; to be served very bot with a thick sauce, flavored strongly with fresh tomatoes

or tomato sance. Tomato Soup-Boll a small piece of meat with oabbage, paraley, celery, popper and salt, onious and allspice. When they are well boiled add a good quantity of tomatoes and a dessertspoonful of butter rolled in flour. Strain all through a colander and serve while hot with tosaied bread. An excellent tomato soup.

Fruit Salad-Six oranges, three bananas, one pineapple, two enps desicoated covoanut, one oup powdered sugar. Slica tha oranges and bananas and cut the pineapple into bits an inch squara. Put into a glass dish alternate layers of the fruits and sprinkle sugar and cocosunt hetween the layers and no the top of the whole. A handsome and delicious dessert,

Egg and Cheese Omelette-Out the cheeso into small pieces, using about a demertapoouful to two eggs. and for the rest proceed in the ordinary way. Parmesau cheese should be grated and beaten up with the seasoned eggs, oil being used for frying lt. Gruyere cheese should be cut into dice and strewn upon the eggs directly after they are poured into the pan; a little fresh butter, chopped up and added to the eggs while they are being

beaten, is a great improvement.

Show Fudding-One-half onace, er one-third box of gelatine, disolved in oue pint boiling water, with the purce of two lemons. Add one cup sugar, Let it cool. Take the whites of two eggs, and best to a stiff froth with a very little sugar, beat this with the guinties until all is white, and put into a mould. Exald one pist calk. add the yolks of three eggs our cop sugar, ne temp in suctard. Flavor with roughle. When es i, jut the ANCIENT HISTORY.

The Chicago Breaking Moore Tothe of the Miles of \$1, Louis.

5% Louis now claims a population of sec. coo, which, if supported by agures, makes the Missouri metropolts the fith to size of the large citim of the United States.

By Louis was founded in the year 300) R C by a protoplasm who was of his food and didn't care what he did. Having started the place, howaver, he didn't feel like leaving and did not leave until be discovered that it was no place for a live, go-shead proto-and he left. As nothing was ever beard of him afterward, it is betieved by eminent anthorities that be went up into the Ozark bills and kicked himself to death for having boomed such a town.

About the twentieth century, R. C. the late Mr. Chedorlsomer mede an expedition to St Louis and up to the day of his death he regretted it. In his memoirs he says: "Of all the dead, past-due burge that I ever bonored with my presence St. Louis takes the cheese." Mr. Chedorlaomer was a close observer and knew what he was talking about. The next person of note to visit the town was Shalmanesar to the year 701 B. C. He mistook it for a national cometery and did not stop nil, but procorded on to Kenkuk, lows.

The town wabbled on with indifferent success antil William the Conqueror's time, when some live hustness man built a morgue and then is began to grow. Abe Slupsky's discovery of the Mississippi in 1421 gave the town a boom and the census of 1425 gives it a population of 105. When it is recalled that only 4,600 years before all that there was of St. Louis was a protoplasm this rapid growth is fraught with interest. Durhas been a triffe slow but steady.

Mr. Chedorlaomer would scarcely recognize the St. Louis of to-day. It has several husiness blocks, a postoffice and a railroad lands freight and passengers within walking distance of the town pump. Travelers betwees the north and south stop off for lunch. In business it is retrospective

Gets His Own Price.

Though Mr. F. Marico Crawford probably carns more money by his pea than any other living writer he is perhaps not so well paid in preportion to the amount of work that ho dose as is Mr. T. B. Aldrich. As a matter of fact, Mr. Aldrich always pute his own price on his work, and be is always sure of getting it. Ono magazine of New York City takes everything that he sends it. He simply writes the price in a corner of the MSS, and it is paid. What a delightful aspect of literary success this presents A few weeks ago an editor wrote to Mr. Aldrich: "Won't you please drop a poem into our slot and draw out as much money as you want for tte" Mr. Aldrich dropped a dozen lines, as directed, and drew out \$30." -New York Recorder.

THE YOUNG DOCTOR-Just think, six of my patients recovered this week." The Old Doctor -"li's your own fault, my boy. You speed too much time at the club."-Life.

THE LONG-LIVED TORTOISE.

LIVES FOR CENTURIES. A Giant Specimen That Carried Children on Its Broad Back, and Lived

AN ANIMAL THAT PREQUENTLY

200 Years. I you want to be old, observe and imitate the tortoice. That reptile apparently knows how to live as long as it likes. It is rather hard on man, who is constantly being told that he is the highest of the soimals, that he should be so inferior to the testudinal family in this important re-

It is impossible to say bow long a tortolse, under favorable conditions, may live. There are tortoises in the Galapagos Islands, off Sonth America, where the species with the handsome shell is mostly found, that were probably alive before the discovery of this continent by Christopher Colombus. In the Zoological Garden at Philadelphia there is a anapping turtle from the Mississippi whose age is calculated at 300 years. He is moss-growe, but hale and hearty, and his jaws are as vigorous as an alligator's. A small tortoise that had lived at the time of Charles L's Archbishop Land was billed by a cart in the grounds of Lambeth Palace a few years ago. He was doing his best to get out of the way, but a tortoise, though sure, is no match for

There are now many famous old tortoises and turtles in the world. One of them has just died at Colombo the espital of Ceylon, one of the stopping places on the route from Australia to England. The tortoite was of the species testudo elephantopis. passed the greater part of his life at "Uplands," a resort on the coast near Colombio, where he was visited by thousands of passengers annually. His age was estimated at 200 years, and be meanired six feet from shout to tail, the shell alone being four feet mix inches in longth. The species to which be belonged originates in the Seychelles and Maurition Islands. But from early times they were found convenient to earry on ships as a reserve supply of live fresh mest. Now they are almost extinct. They were preserved from total extinction by Sir Arthor Gordon, who as Governor of Mauritius, ordered that two specimens should be sent to him annually by the

natives as tribute. The Colombo tortaise was sent from Java to the Governor of Ceylon, which was then a Dutch colony. When the British annexed the island in 1796 the tortoise was transferred to their care. Like most tortuises he was of a placid and peaceable disposition, but seeme to have been by no means averse to linman society. From time to time he carried obildren on his broad back, a task which he performed with apparent obserfulness. On one occasion, however, he successfully resisted the efforts of seven men to remove him from the garden where he resided to

the grounds of an exhibition. Recently the local government sequired "Uplands," where the tortoise lived, as a graving dock. He was removed to Viotoria Park, about a mile inland, where he siekened and died in a short time. Had he heen left in his accustomed place be might have lived to a far greater age, as he had shown ac signs of ill health prior to his remoral .- Now York World.

TAKING CARE OF THE TIMBER.

European Nations Paying Strict Attention to the Subject of Ferestry.

Nearly all the nations of Europe are eagaged at the present time in se controlling the ferest supply that every hit of public and private property in trees is placed under restrictions agalast destructive enting. The lorests are all highly protected, says the Hoston Herald, and even where ac State control exists the freedom In outting trees, which exists the free, dem la cuttlag trees which exists in this country is unknown. In Germany darlag the last twenty-five years tome 300,000 acres have been reforested, and the government has granted \$30 100 la this way to private owners of waste land. In Austria, slace 1852, a forest law which exercises a strict supervision ever the forests, both public and private, has been in existence, and no one is allowed to devastate n forest to the detriment of adjoining holders of land, and every cleared or cut forest must be replanted within ave years. In Italy the effort is constant to increase the amount of wooded lands, and the tieverament contributes thee fifths of the cost of reforestation, upon condition that the work is done according to its plan and instructions. In Switzerined the National Government contributes from 30 to 70 per cent of the establishment of new forcets, and from 20 to 50 per ceat for the planting of protected forests, and the law is very strict in regard to cutting. France is also deeply interested in public forest property. The forests belong largely to communities and public lastitutions, as well as to the State, and they are controlled in a maaner similar to the regulation of forests in Germany. Here, as woll. as there, au clearlng is allowed except by the consent of the ferest administration.

la all these countries the strictest attention is paid to the aubject of forestry, and schools are everywhere maintained for the purpose of instructing mea in this work. Russin has been the naly nation where ferests have been notil lately under no restriction, but slace 1888 even this country has had its ferest law, and offers loans on favorable terms for the protection and increase of the ferests Hardly any European nationality is without its State control of the ferests or without the tralalug schools la which men are instructed how to take care of them. They are trying to Europe in every way possible to save the forests, and la the United States efforts are new being made to nearly every commonwealth to regulate and control the wooded lands, but our people are not yet ready to accept the atringent measures which have been employed la Europe, as a necessity, for their preservation.

A New Game.

Here is an account of a new Japancse game. It is played with faus, and pretty paper balls of different colors, which are lattated through s tiny hole which closes with a valve from the laslde, and se prevents the elightest escape of air. The balls are tossed as high as possible, nod the game coasists in preventing their falling by fanning them. It is quite as active as tenois, and the effect is exceedlastly plcturesquo to those looklug on. The one who succeeds in keeping her ball the longest frear touching the ground is the victor, and whos a prize-a dainty fau of Japaoese fashlou or otherwise.

POCAHONTAS POITOR ANDREW PRICE,

Mari mton, Friday, Jan. 4, 1895 Official Paper of Phoahontan County.

vance If not paid within the year thight. by see will be observed

Photograd at the post office of Marlinten, W Va, as second class matter.

MR CHAINCY DEPEN Dinkes a st. g appeal to the American people to stop "treating." He claims that more harm is done by this custom than any other, and says that the convivial soul which goes on roaring drunks because he is in company is in more danger than the meauer nature that sneaks into whiskey shops to spend his money welfishly. If you wish to please the gentlemen you will make a New Year's resolve that you will cease "treating."

A LATE decision is that a newspaper which has published a idanderous report must retract and apologize. It must do this whether the injured party demands it or not, and it always lessens domages. A case in paint was where the party alandered kept the publishers they were married, and to go and from printing a retraction by force. It was decided in this case that the newspaper must publish such a re- fiethfully and told bis sister to bri traction in any event and look to the law for protection for retract-

POSTMASTER GENERAL BISSELI asservates that there will have to be two heads to his department if the present rule of "to the victor nothing but the truth he would belongs the spoils' continues. One is to do the work and the other to settle the political disputes. This temptation and of course told the is what comes of flying in the face truth. And now the boy slowly of all precedent. The Republicans expected to be expunged, and h would have found it easier to "expange the whole" rather than aution and enme out conqueror in his rule of only "lopping off the excrescent parts." The inngwumps well to call for other heads, for the ence they possess at present hardly serve to show which end is up.

A Congress that is nipped in the led by an early frost preserves a s kly existence in its short term. The role heretofor has been to do little or not ing, and the present Corga is no exception victorious party will come in with a lot f pal the lies, and what they Tummany to slarve in sight of d will be the most of the next plenty." I went to visit a friend a few days ago and as I entered the portion, I heard a conversation from which I glenned the following:

Said the horney-handed farmer to his patient little wife,

'Was the TIMES in the mail to day, my

"Oh yes! my darling husband you can surely bet your life, For it comes weekly all the year!"

Being of a somewhat supersiltions disposition, and having the faith of a grain of musturd seed in nonentities; I am of the opinion that our late snow fell in order to accommodate Stoney Creek's newly omerical couple; which was joloed togther the 24th, alt., at the restdence of the officiating minister. They did not even don wedding costumes but went as plainly elad as possible in order to not ottract the attention of their neighbors; and if possible keep their wedding a secret nutil the seruending boys would get somewhat tranquilized, and thus they would stimil a chance of not being screunded. The groom even gave his little brother in law (a bay 9 years ald) a half pound of tobacco to not tell mny one that tell lils little sister who was away from home to not let the secret out. The buy preformed part of bis task dle ber tongne, but alns! ns he was on his return trip home he met up with a temptation he could not over eooie, he met one of our prosperons young fartoers who was desirons of knowing whether they had been married or not, so he told the boy that if he would tell the truth, and give him a fifteen cent plug of to bucco. The boy being a great lov er of the ween, could not resist the turns his quid and bousts of his joke greatly to the mortification of the groom. Though love sonred above the towering heights of oppothe end, secrets could not be systed with tehacco. The boys rullied, and gave them an old time serenade of the present administration do fast Wennesday night, after they bad followed them from the bride's home to A. C's, on top of the monu toin, where they had find to try and escape that barror of horrors, being W. Vn. ROYEB. smonaded,

Tosts recently made of the hauling powers of American and English lookmotives on the Tokaido Railway la Japan resulted decidedly in favor of American engines, and preference will be given to them in future.

A noted health officer claims that a large number of cases of broughlis, porumosis and laftemmation of the lungs during the winter are directly recesble to the expoents of the patient at football games in the fall.

The New York Sun observes: It is a curious fact, in view of the complaints that Ireland and Scotland are downtrodden, that three Irishmen and a Scotchman constitute the supreme tribunal of appeal for all English subjecta, which is the court known as the "Lords of Appeal in Ordinary." The names and nationality of its four members are as follows: Lord MacNanghten, Irish; Lord Morris, Irish; Lord Watson, Scotch, and Lord Russell, Iriah.

The domesticated herd of buffalo in Otoe County, Nabraska, recently referred to hy Secretary Morton, nnmbers eight. They were bred from three calves rounded up with cattle in Colorado. The buffalo have been kept in a six-sore lot and fed like native cattle. Two of the bulls, seven and eight years, fought out the question of landership a year ago, and the elder was probed by the younger through a heavy plank fence. They are now kept apart. Along with the huffalo is a herd of elk, also numbering eight. They are masters of the situation. A cross between the elk and hlack cattle was obtained, but the only calf proved barren. The elk are fed lightly and are ordinarily peaceful, but when they are in search of water their rush is irresistible.

Mr. Mnlock, a Liberal member of the Canadian House of Commons, made a sensation the other day by introducing a hill to ent down the salary of the Governor-General. He oxplained that when the salary of that official was first arranged it was fixed at \$50,000. That was at the confederation. Since that time the expenses of the office have been coutinnally increasing, nntll now they were ont of all proportion to any services that it could possibly do to the conntry. He said that since the confederation in 1887 the office has cost the country \$2,851,917, or about \$114,078 a year, which was soma \$65,000 more than its maintenance had been rated at. Ha thought that the luxury of having a Governor-Goneral came altogether too high. He said that he did not propose any change to go into effect before the expiration of the term of the present lnoumbent of the office, Lord Aderdeen.

The Atlanta Constitution speculates in a cold-blooded way npon what would be likely to ansue if a prediction made by Professor Palb, the Vienuese earthquake prophet, came to Says the Constitution: "Aocording to the New York Herald the now prophet is a scientist of high standing. His snoom in forstelling two earthquakes in Greece will cause pe ple to take a good deal of interest la has product on of a tidal weve that will overwhelm Now I rk to Joy or August. ADVENTURE IN ITALY

WENT to Sions, and during an antomn of sublime color I made countless exenreione through the woods and wondland hamlets, some lasting several days. It was on the afternuon of one of these golden days that I

met with the adventure which I am about to narrete. I had been trudging along since sunrise when shortly after noon I heard the mnttering of distant thunder. I hurrled along for a quarter of an hour, when I felt the first heavy drop of the impending storm. No hut was in sight. I turned saids from the name track into the wood, thinking to find shelter among the thick autnmnal leaves.

Before long the rain came down ln solid masses through the dennded bonghs, while before my eyes the lighting blazed and the woods rosounded with the thunder's cannonade. I knew that it would be folly to remain in one place, so I harried blindly on through the roaring forest -between the lightning flashes it was as black as night. In less than half to stammer. "I owe you thanks for a an hour the storm had abated. I raised my head-it had been bowed in foreing my way against the wind and the rain-and then I found myself facing an old eastle, built among the rocks of a gloemy defile at the horders of the forest.

I ran across this intervening space, and quickly found myself in the court yard of the eastle, searching for the entrance. I had not much trouble in finding it. The double, walnut doors | ter of the fire-the everlasting firewere wide apart. Beside tham there do younnderstand?"

had pulled the had be a second time.

I glanced through the open doors and saw at the further end of the hall a fire of logs smouldering on the hearth. The night was too tempting to be resisted by a bedraggled fellow entered the hall and walked to the fire. After the lapse of a few minutes I even ventured to stir the smouldering logs into flame. While doing so I was swkward enough to dislodgs one of the fire lrons, and it fell with a crash npon the tiled hearth.

I waited breathless for the sound of feet npon the passage from the apartments on each side of the hall; but after a time I suppose oue comes to though the noise muet. I know, have regard the arch-fished himself as a poor been heard all over the eastle, no sort of thing-"you should not be human boing appeared. Looking believed. But even if you are what around I noticed several articles of your appearance and your wordssplendid furniture seattered shout the shove all your smile-suggest you to mosaic ou the pavement. On one of be, your power is limited. You have the seats lay e violin and its bow, and no power over me. I am a Christian not far off theze was a gulter.

In spite of the weird features of the place, I had sufficient courage to seat myself in front of the now blazing fire and my wet garments were soon sending off clouds of steam. I enppose it was the general souse of comfort that caused me to drop gently to sleep. How long I slept I cauuot tell, but I know that I had a consciousness of being surrounded by a number of tanghing people.

and started from my seet, there was only a solltary figure in the hall.

"It is growing lets, sir," I remarked nnessily—he stood between me and the doors. "May I take the liberty of inquiring to whom I am Indebted for the timely shelter from the inclement storm?"

Some moments elapsed before he

"I am the Power," said he, also in Puscan Italian. 'I am the power after which all men strive—the power to stir the souls of all men in the world. I do with men what I please -I am master of the world."

I began to fear that the man was mad. Still, he dld not speak like a lunatic. There was in his tone nothlng of the confidential whisper in tonished even myself by the brilliancy which a madman expresses his wildest of my execution. I never played so hallnoinatians to any one who takes him serionsly.

'I fail, sir, to understand fully what is the exact title olalmed by your Excellency," said I.

"I have had many titles given mo aince I first appeared in the world," hereplied. "But I prefer being known as the Sonl-mover. Mon who were believed to he without sonle have gone forth from my presence hearing undonbted testimony to my power as a Soni-mover."

I stared at him. Hle eyes shone red as the vent holes of a fnrnace. Then he smiled in a way that made me shndder. I had eeased to think of him as madman. His appearance as verted." well as his words sent my thoughts' in quite another direction.

"Whatever you may be, or whatover titles you may bear," I managed added promptly. timely shelter-for-for-the fire."

"The fire-the fire!" he eried and then he burst into the most awful langh I had sver heard. "The fire-" "I was wet to the skin when I entered," I eaid.

"And you thank me for the fire polite than many people who have made the acquaintance of the fire of which I am gnardian. I am the mas-

All et once a nightingale burst doing my best," said I, beginning to into song among the branches of the tree. I listened rapt, drinking in the wonderful song that seemed to me the embodiment of trenquility-of p yearning satisfied. And as I listened there I breathed the delicate, dewy odors which seemed to come from the glossy leaves that hid the nightingule

I do not know how long I listened -how I tasted of the delight of that sensation of repose. I know that I was on my feet, straining to catch the last exquisite notes that seemed to and began to play my noctorne. The dwindle into the moonlight, and to instrument was by far the best that | become absorbed in the silver rays, when I heard a voice that sald;

"You have not laughed at my playing. You are very good. I dld not think that you would laugh. I told you that I meant to play with your soul as a child plays with a hall. I kept my promise.

I looked in the direction whence the voice came, but the hall was almost in complete darkness. I could but dimly see a part of the outline of that tall agure, so fleshless that it seemed nothing more than a akeleton holding a violin-one of the grim figures of the epcotres with the fiddle in the Dance of Death.

I went slowly backward until I reached the door. Then I turned and ran. I was among the trees in the wood before I heard the mocking laughter that rang through the soft air of the early night.

I fled through the wood, and in half an honr I got upon the track leading np the valley.

It was nearly midnight before I reached the inn where I was expected. In the spacious kitchen I sank down on a chair ntterly exhausted. "What, air, are you ill?" cried a

voice that I knew, the voice of an olive grower of Siena with whom I had hecome sequainted some months before.

"No," said I. "I am not Ill, only tired, and-well, I shall never laugh again when I see a peasant cross himself passing certain woods which he believes to be hannted."

"In the name of heaven where have you been, sir?" whispered the man. "I come upon a castle standing

among the rooks some distance to the right of the valley," I roplied. 'Do you know of such a castle, my friend?" "Certainly; it is most surely the castle of the Contessa," he replied.

"It is now in charge of the Fiend himself," said I. "He came npon mo, and with his playing npon a fiddle that lay in the hall he took possession of my soul. My God! I scarcely feel free even now."

The olive merchant looked at me in a puzzling way for a few moments, then he burst into a laugh.

"I have heard that playing myself," he orled, "and It has taken hold npon my sonl also; it does noon overy sonl that hears it. Sir, the Contess has had a guest at her castle for the past year; hie name is Signor Paganini."

The man lay back and reared with langhter, but it was some time before I could laugh, before I could realize worth more as an interpretation of that the greatest artist who had ever the Impassionate ery for rest-tho lived in the world had been playing rest brought by uight-which I meant for my benefit a part which he loved to assume. —To-Day.

Monraed Like a Human Being.

There is something pathetic about the account of the death of the female chimpanzoe which Professor Garner hrought from Southwest Africa. The names given by the professor to his friends were Aaron and Elishaba, and, much to his regret, Ellahaha has fallen a viotim to the severe English weather. Sho really died to the arms of poor Aarou, the male, who had been most assiduous in his attentions to his consort during the whole of her illness.

Professor Garner was present during the last moments of the chimpsuzee, and when he put his hands to her heart to see if it had ceased to heat Aarou put his hand there too, looking up in unps of glass. Suddenly, se all were the professor's eyes as if inquiring if lu the act of drinking, the gobiete fell that was all they could do for her. with a crash upon the percenent, and Aaron would not suffer his departed the red wine flowed like blood over the love to to he taken from him, and mosiac. When the crash of the glasses | clung to her body with such tenacity had sounded through the hall there that the professor was compelled to was a moment of deathly ellence, and lay it down on its bed of straw, when then, far away, I could hear once more | the distressed husband released his the distant walling of a great multi- hold. The Invention of a United States Naval Officer-Method of Working the Deadly Machine.

WARRELP AQUIDABAN,

LHE LOSINSTIC METON SONY

ECENTLY from Brazil has come, in the sinking of the well-known battleehip Aquidaban, an event that promises to shed more light upon the powers of the torpedo than all the experiments of the lest two decades. The first news concerning the downfall of the Aquidaban was to the effect that the vessel was sunk by an anto-mobile torpedo, but the navel department has recently been led to the anapleion that it was not an anto-mobile, but a dirigible torpedo that did the effective work. That is to say, a torpede that is operated and controlled from a base, instead of one which when lannehed relies upon lts own mechanism for its eubsequent

The affair accumulates special interest, not only to Americans but to Bostonians, for the only dirigible torpede in the possession of the Government forces of Brazil was the invention of an officer now resident in Boston. The officer in question is Lioutenant N. J. L. T. Halpin, U. S. N.

A few words regarding this remarkable weapon. Not the least interestiug thing concerning it is the fact that It is a torpedo but little known. It is the result of many years of etndy and experiment by its inventor, and is better known onteide of this country than it is here. It has been used by at least three Sooth American nations, although the Brazilians, as far as known, are the only ones who have subjected it to the couditions of netual war.

Unlike other torpedoes, the Halpine weapon is not destroyed after it is exploded and its mission is accomplished. Its explosive charge is separate, and ofter it is emitted by automatic means, the torpedo itself, which is operated by electricity, withdraws and returns to the operator. Hereia is a morit that at once appeals to the economist. The explosive charge, which is in the form of a cartridge, costs but \$9, and the torpedo itself boing used over and over again, this is the only expense at-1000 to \$20,000 a shot, as they are themselves destroyed thereby.

The following is a brief description, not too technical, of the Halpine torpedo, which is in reality a hybrid, hetween m torpedo proper and m torpedo boat. In fact, it may be regarded in the latter light, as it is but the vessel carrying and discharging the deadly

It is oigar-shaped, seventeen feet ln length and two feet in diameter. contains n storago battery of thirtythree cells, weighing 300 pounds, and from these is obtained the power which hy means of a two horse-power motor, drives the serew propeller, which is brass, one foot in diameter, and is protected by a circular metallic guard. A balance rudder is also attached by

which the torpedo is steered. In the forward end, pointed obliquely downward, is the chumber for the charge, which is 125 pounds of any high explosive, gelatine, dynamite or gun cottou. The charges furnished the weapon carried by the Metheroy were wet gnu cotton.

The cartridge is also elgar-shaped, four feet long and ten inches lu diameter, and is inserted by the more removal of a hand-holo plate on the top

of the torpede.

At the etation occupied by the operator there is a battery of 160 dry cells, and communication is had with the torpedo after it is lanuched by means of an extremely fine and carefully insulated wire, which is rolled on a reel inside the tornedo as the latter advances. All the operator has to do is to watch the torpedo travel through the water, its progress being observed by means of two tiny maste npon it, and by means of a switchhoard he can couse it to advance or ratreat, or pursue any path be wiebes. He can also discharge the cartridge, but there is likewise au antomatic method of doing this upon impact with the vessel attacked.

The operation of the torpedo precents some very interesting features. Projecting from the front of the torpedo is a spar, with an arrow-head, and automatically released arms. When this comes in coutset with any rasisting object, the cartridge le reas the ages we meet the net while the arte age w . I dire two beneath it on the a direct to the vecsell's bearing

The American officers of the Nictheroy, who returned to this country about a week ago, speak in high terms of this torpedo, and they incline to the bellef that its many advantages offact its lack of simplicity. However complex it may be, experiments held with it indicate that it is quite as reliable as any other kind of dirigible torpedo. The one on the Nictherey. indeed, had already been need, and its cartridges discharged with success over fifty times. - Boston Herald.

lot of land and notes and honds, like all storekeepers do who don't make assignments. Eight years had gone by, and Lucy would only tet him come to see her once in a long while, and Jim was about thirty and Lucy was pretty near twenty-five. Lucy wanted to get married but didn't know to fix the time, and all that time she had been putting the wedding off from time to time until Jim was clear worn out.

"Finally he hit on a plan. When he went to Baltimore to buy goods in 1877, he fixed up a telegram to Hickory Hollow: Major Johnson, of your town, died from the effects of sunstroke to-day,' and signed it with the name of a wholesale firm. He wanted to see his obituary notice when he got back in the County Citizen. The editor was a great friend of his and he guessed he would lay it on strong. Then he went and got biling drunk for the first time in his life, and told Tom Foster, a merchant of the county-seat, what he had done. Foster wired to the editor of the him to do Jim up. This telegram came the same time a long obituary notice was received from Jim's pastor.

"The editor decided to hang the and write one himself, and so gained the love and esteem of that

"This is the obituary notice, said Colonel Saunders, giving us a cutting which is as follows:

Lucy Selby, he got budly struck. the death of Major James John He was a very brash young fellow son, of Hickory Hollow, from sunof about twenty-one, and just lit in stroke, in Baltimore, on the 26th held her head up and give it to that awaits them. HICKS, the weather prophet, says that the same general weather of this month will continue until the end of February. He predicted the colder wave that struck ne on the 4th. He predicts a bad storm this week, 9th, 10th, and 11th. Plenty of snow or rain. The next storm will be on the 18th and 14th. Then a long storm from the 17th to the 26th, within which comes an accentuated lot of weather called a Vulcan period from the 18th to the 21st. About the 28th, it will be warmer, and then we will have a bitter cold time about the 29th. The 30th will be warmer. According to Mr. Hicks the Earth does not live on friendly terms with the other planets, and whenever they come about her she either tries to freeze them out, or kieks up a storm of wind, rain, of hail. These he calls disturbances! We are the sufferers. Even the County Cilizan about it and told moon who has to follow th earth is able to make it very uf pleasant for her. Jupiter is a big. overbearing fellow, and when he comes idling along there is a disapastor's contribution on the hook, greeable time. Mars is a man of no refinement and being a man of blood, he jars on the feelings of Mother Earth. Mercury is a sharp sort of a peddler and not a desirable visitor. You all know that Ve-"It is our sad duty to chronicle nus would not be a very nice call-Mother Earth, won't associate with her. Saturn is a cold, reto court Lucy for all he was worth. inst. Alas, too often are men call. served sort of a fellow, and he does But the very first jump. Lucy ed hither without having made the earth no good. If it were not brought him up sudden, and she due preparation for the change for this meddling tribe we would have a glorlous time, except, maybe; we would have nothing to stir up a rain, and that would be awkward. These planets cause what we call the weather. This is an things to her again, till she called which upheld him in every thing elementary fact. So we may wish after this when we are caught out in a storm that either we or the

Before this paper is published the measles and went home before him a disposition unworthy of the again, the State Legislature will have met and the Democratic members will have commenced to put in their time as faithful representatives of their constituents. Woe betide them if any of them be unable to put away from their hearts the good of the country, as they see it. It had been better they had never been elected. They will be a lonesome, lonely set. The personnel of the body is not such as the Republican party would have made it had they known their success was to be so sure. The class elected is referred to as a rule as "our State Solons," a term that has grown trite as applied to legislative bodies. A more suggestive name is that applied to them by the great Republican leaders of the State who call them "boodlams." A prominent the let de la there for want to make Major Johnson feel feature of the next few months in Charleston will be the leading Republicans of the State whipping An Emberrassing Flx .- A into line the Republican Legisla. sters is told of a young own in ture. BALLOONS IN WAR

TARY OF URATIONS.

What Europeans Have Accompilated -A Balloon as Phy as a Four-Diery House United St. tes War Ballooms.

YO have an effect ve balloon mype fully equipped and rea y to take the A is in case of war at a moment's notice may copur led by all the great Bu pean powers as a mait r of vital fmtames. I ven in the United States s the question being discussed with a great deal of interest Everything cads to show that If there is one runch I modern warfare, or rather, perha atrategy, which is likely to w watched with been interest during he next was it will be that of military mlicentag It is generally conceded hat France has made the present stendes t ward perfection in this line, shough the world at jurge has oot been permitted to know the exact results of is totort experiments. There is a great load of secreey about the establish-Let of Mendon, where the Governme I Paro d'Aerontation la sitoated. France has been and is spending a great deal of money in perfecting an desolutely faultless dirigible balloon, one that can be moved in any direcuou at the will of the acronaut irrespective of the direction of the wind. the French experts declare that their ear bailoon, the "General Mausnier," attained a speed of twenty-eight miles an hour and could be guided with utmost case to any given point. How. ever, eines no ontsiders were allowed to witness the wonderful performance, I might be a triffs exaggerated.

The Germae Emperor does not propose to let his warlake neighbor monspoluse this feature of ermy equipment He has just presented to the Bermae Society for Promotion of Aerial Navigation for the advancement of thus science the sam of 50,000 marks. This is to be applied for the construction and equipment of a giant alloon. This balloon will be as high so a four-story house. It will be fifrest feet to diemeter and will contale not less than 2530 cubic meters of and It will be made of Egyption sotton sinff and will be coated with entenized gum, a sahetance which is considered superior to varnish.

A very interesting feature of this monster halloon will be the provision of a special valve of a new construction which will keep the gas jure for a tenger true and thus austain the halloon for a longer period. It is proposed to make not less than fifty jonrdeys within a year and to secend as high as possible. An altitude of 33,-NOU feet is thought to be obtainable by the use of artificial respiration. Morn than \$2500 will be expeeded in purchasing scientific apparatus for this balloon, which is intended more for taking observations than for the

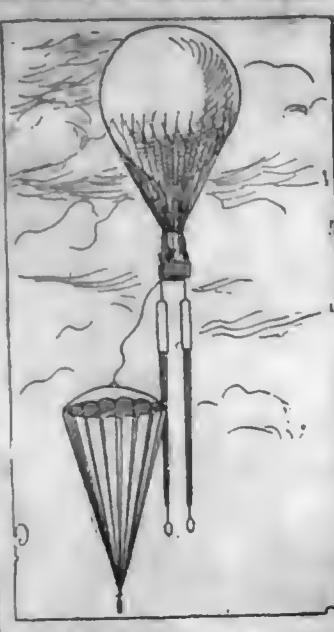

purpose of war.

Anda from this the German army was this spring put in the fold as off. meet a belloon corps as that of France, th agh, perhaps, not so strong numerically. At Metz, during the late maneuv TA, several successful accensions were made which practically proved the vast advantage an army may derive from having these serial beervatories. A very interesting exparament was also made to show that the ballions can, is an emergency, in pay the went of bridges. A goodsized balloon was supplied with a large number of ropes dangling from the sine. One of these was seized by o so dier, who was carried across the civer to the twinkling of an eye. As woo as he had landed be fastaned the and of a line securely, after which the balloon was healed forward and sek and in less than no time trensferred a battalien from our side to Ind ...

expected. No public experiments have as yet been made with this flying torpedo, which, If it is all that the inventor claims, will prove a most dangerous power of destruction. Howover, till a practical test has been made no one can judge of its merita.

In building the war balloon "Gen-

above the smoke of battle to let fell time as the air ander pressure within AIR SETTS VALUABLE IN MILLS its missiles of destruction when least leaked through! The model thus fully Inflated was suspended by ropes attacked to the neck and to the top or apposite hale. This enspension permitted the believn model to be turned as upon an axis, and thus brought every part of its surface in rotation within easy reach of the operator. A scaffold 4ramework, having a height nearly equal to the semidiameter of tho model, was placed around one side, or semleircomference, thus prosenting to the workmen a nearly vertical anriace on which to lay the membranes. The nice task of placing the membranes forming the fabric of the envelope was done by women. Each membrane was taken from the water, stretched out upon the surface of the model, emoothed down by hand, and aldes or ende, where Irregular, were ent off by a pair nf blant-pointed shears, which the women used most de'tly. Being wet and charged with the solution of fish glne, the membranes stretched tant over the enrisee and ndhered while damp to the model. The membranes in this way were placed side by side, the edges overlapping, natil the entire surface of the balloon model was covered with one coherent layer of the gold beater's ekln. Over this first layer a second and third were put, in like manner, except that the memhranes in each alternate were placed at right angles to the longitudinal direction of the preceding cories. Over the third layer were placed, from the top to the neck, long ribbons about an inch wide, of the same material, laid in lattice. These rihbons were made hy etretching a layer of gold-henter's akin npon a long and eral Myer" for the signal corps of the smooth oiled heard, and superimpos-

THE FIRST UNITED STATES SIGNAL CORPS WAR BALLOON, THE GENERAL MYER

United States army the first real step was taken by the military officials of this country to advance with the great war powers of Enrope in this line of military work. It is modeled after both the French and English military balloons and in mechanical details ombodies the best features of each. It resembles the English in the similarity of material from which the envelope is made. The system of inflation is also like that of the English, the hydrogen being stured nader pressure within steel cylinders. In the plan of

French models. The envelope of the "General Myer" is spherical in shope, with a capacity of 18,000 ochio fest, corresponding with the ordinary balloon used abroad for captive ascensions, and having a infung power sufficient to carry two men with the necessary eignal instruments The envelope is formed of gold-besters' skin, which is especially adapted to this purpose, as It is impervious to the hydrogen gas and is very light The maintrance from which this fabric, gold-beaters' skin, is formed are taken from the sutrails of the least, each animal furnishing one. When at stabed they are from eightees to twenty four inches long and ten to exteen - se wide After taxing the membranes from the als ter but k they are first - apod free f - fat and soft parts and mited the ment for use After tak -g - fr the sall they are tel bestee her many and souked in tions we want to taken out The a by two taking they THE RESERVE THE PERSON NAMED IN money from given, which makes he there

in dismond-shaped figures, appeared homegeneous throughout, not the line of e joint or lep of the thousands of pieces of which it was formed showing.

In the top of the bellonn envelope was now ent a circular opening shout eighteen inches in diameter, into which the valve ring or thimble was Inserted and soized, and into the thim. ble was secured the valve. The envelope of the balloon being complete, It was placed within the netting, the top of which was secured shout the

BURTINO A BALLOON.

valve ring, and upon ropes being attached to the ring the balloon and notting were hoisted, air was again blown into the balloon and the netting adinsted. After this the balloon was hoisted higher and the enspension gear, with basket, was attached, after which came the captive gear-that is, the cable which holds the halloon when it snoonds. All was perfect and the "General Myer" was ready for use.

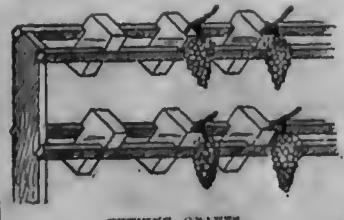

The cable serving to hold the halloon captive is made of several strands of steel wire, having in its center an insulated wire for telephonic work, the ontside atrands setting as return wires. The balloon, with complete equipment, is now at the Fort Riley (Knn.) School of Instructions, where it is being used in Instructing the signal corpe at that post. It has been prononneed by experts as a masterpiece in balloou building.

This is not the first time the United States army has made use of balloons. During the Civil War the Federal Government recognized their value for making observation. In the month of September, 1861, one of the most daring aeronants, La Monntaine, furnished important information to General McOlellan. His halloon rose from the Northern camp of the Potomso passed nbove Washington. then wore ropes and La Monntaino rose to the height of a mile and a half and found himsolf directly over the lines of tha Confederates. There he was able to perfectly observe their position and movements. When he had made his observations he throw out bullast and rose to a height of three miles, when no air current carried him in the direction of Maryland, whore he deseended in safety. General McClellan was so well satisfied with the observations taken taken that through his infinence the War Department received orders causing more balloons to be provided.

The use of balloons, however, was discontinued for many years, but now it is helloved they will be given a permanent place in the equipment of all armies. The science of aeronauties has so advanced, new features being constantly added, that it is hard to dishclieve anything claimed by the enthusiasts in this line. The chances are that we will dispense entirely with ordinary fleets and do our fighting in the air. The only thing needed just now to show what cau be done with these much-talked-of war balloons is to start a first-class continental war.

A Device to Keep Grapes Fresh.

Glasses such as are shown in our il-Instrution are one of the latest echemes of grape-growers in Eugland to keep

the fruit from drying during the winter. The jar is made of clear glass, and, having a wide mouth, water can easily be added from a small watering can as required without the trouble of taking it down or removing the gropes. The weight of the bunch will press the immersed end of the stem against the upper slds of the bottie, and so prevent its slipping out it is always best to leave shout night cen tuches of stem beyond the bunca when the grapes are cut, as otherwise the berries are spl to crack through absorbing too much of the weter when first stored. It is well also to cut off the immersed old about ole in three weeks to maintain a free Bassage for absorpt

A BOT'S MOTURE.

My mother she's so good to me, Ef I was good as good could be, I couldn't be as good-no, sir-Can't any boy be good as her!

She loves me when I'm giad or sad; She loves me when I'm good or bad;

An', what's a funntest thing, she cays She loves me when she punishes. I doe't like her to punish me-That don't hurt-but it hurts to see

Her cryin-then f cry | an' then

We both cry an' be good again.

She loves me when she cuts and sews My little clock an' Budd'y clothen; An' when my pa comes home to toa She loves him most as much as me.

She laughs and tells him all I said, An' grabe me np an' pats my head, An' I hug her ac' hug my pa An' love him purt' night much as ma.

FINDING A TREASURY.

It lay for a long time on the edge of the little brook, deep in the forest, sparkling like a tiny flame in the sunlight, and growing still in the duck like the bright eye of some fairy hidden in the grass.

One day, when a very bright sunbeam danced to and fro across it, the tortoise stopped to look onriously at it. He was a slow fellow at his best, and lingered so long that Bunny stopped, too, to see what it could be; and the squirrel from the fence-rall gave up scolding at the crows to ask them what was to be seen. The crows themselves are famous for chattering, so in less time than I can tell it, thay had spread the news to all the forest creatures.

"It's not good to sat," said the tortoise, "for I tasted it, and it's hard and cold."

"You cannot hito it, anyway," said Bunny. "I would much rather have a carrot."

"If it were a not it would have . sholl," said the squirrel; "but I eee li is not that."

"It might he a new kind of corn," said the crows and one of them flew down to peck at it. "Pehaw !" said he, "it is harder than

a stone, and nothing like n keruel of corn; we can do nothing with It!" "It is cortainly very pretty," said

the robin; "hat I could not make 1 neet of it, and I for one would much rather bave a cherry." "Perhaps the owl can tell us what it

is," meekly suggested the mole; ") found it under the soil when I was digging my harrow."

So the squirrel was sent to waken the owl, who sat dozing in his home in the hollow tree.

Down he came, etumbling, blinking sleeplly, and yawning.

"Here is something-" said Bunny. "Yellow?" put in the crowe all to gether. "Hard," said the tortoise. "Very bright and shiny," said the equirrel. 'And no use to any one of ue," said the mole. "What is it?"

"Dou't all talk at once," yawned the owl. "What a stupid set you are! I know what it is; gold !"

Just then a footstop rustled the dry leaves, and all the forest-folk scampered away to hide. Peoping out they saw a man walking slowly along the brook. Just then his eye fell on the glitteriug little hall; and crying out for joy he seized it eagerly, turned it over and over in the sunlight, and after hiding it carefully in his breast, harrled eway.

"Well, I never!" chattered the squirrel, running from his hiding place in the oak-tree, "He seemed to know what to do with it!"

All the crows finttered away to tall of the strange tressure found - by the brook.

"The owl is a wonderful fallew!" eald the mole. "He seems to see everything. I suppose it is because his eyes are so big. But I wish I had theoght to ask blus what is good for!" -St Nicholas

Fives in the United States s the quest in bothg ducased with a great deal of taterast. Everything e de t ab a that il there is one eranch of modern warfare, or rather, erbase atrategy, which is likely to so watched with been interest during the nest war it will be that of military pall plag it is generally concoded that France has maile the greatest wirdes toward perfection in this line, th agh the world at large has not been permitted to know the exact results of te latest experiments. There is a great teal of secrecy about the establishneut of Menton, where the Government Pare d'Acrostation is althated. France has been and is spending a great deal of money in perfecting an discintely faultless dirigible balloon, one that can be moved in any directien at the will of the neronant Irrequestive of the direction of the wind. the Franch experts declare that their war balloon, the "General Meusaler," attained a speed of twenty-night miles an hour and could ise guided with utnost case to any given point. However, since no ontsidera were allowed to witares the wonderfal performance, t might be a trifle exaggerated.

The German Emperor does not propoen to let his warlike neighbor monspolize this feature of army equipmeat. He has just presented to the German Society for Promotion of Aerial Navigation for the advancement of this science the snm of 50,000 marks. This is to be applied for the construction and equipment of a giant baileon. This baileou will he as high as a four-story house. It will be flf-:y-six feet in niameter and will contais not less than 2500 enbie moters of gas. It will be made of Egyptian cotton stuff and will be conted with vulcanized gum, a anbstance which is considered superior to varnish.

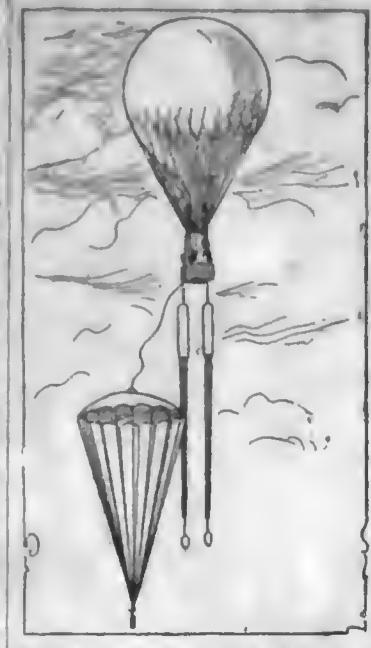

A very interesting feature of this moaster balloon will be the provision of a special vaive of a new construction which will keep the gas jure for a longer time and thas austnin the baltoon for a longer period. It is proposed to make not less than fifty jourceys within a year and to ascend as high as possible. An altitude of 33,-000 feet is thought to be obtainable by the use of artificial respiration. More than \$2500 will be expended in purchasing scientific apparatus for this halloos, which is intended more for taking observations than for the purpose of war.

Ande from this the German army has this spring put in the floid as efficient a bailoon corps as that of France, though, perhaps, not so strong unmarically. At Metz, during the late mancurers, several successful ascensions were made which practically proved the vest advantage au army may derive from having these serial observatories. A very interesting oxperiment was also made to show that the balloous can, io an omergency, supply the want of bridges. A goodmized batioon was supplied with n largs number of ropes daugling from its side. One of those was seized by a soldier, who was carried across the river is the twinkling of an oye. As soon as he had landed he fastened the oud of a line securely, after which the balloon was hauled forward and lisck, and in less than no time transferred a battalion from one side to another,

THAN PORTON GAN ALONG THE COAST.

A new air torpedo, to be used in warfara, to the invantion of a Frenchman, who has disposed of his patent to the Russian Covernment. The investor harms to be able to dired this with as me h accuracy as that of a submarine terpedo. It has a carry bg coj ty of mearly 1000

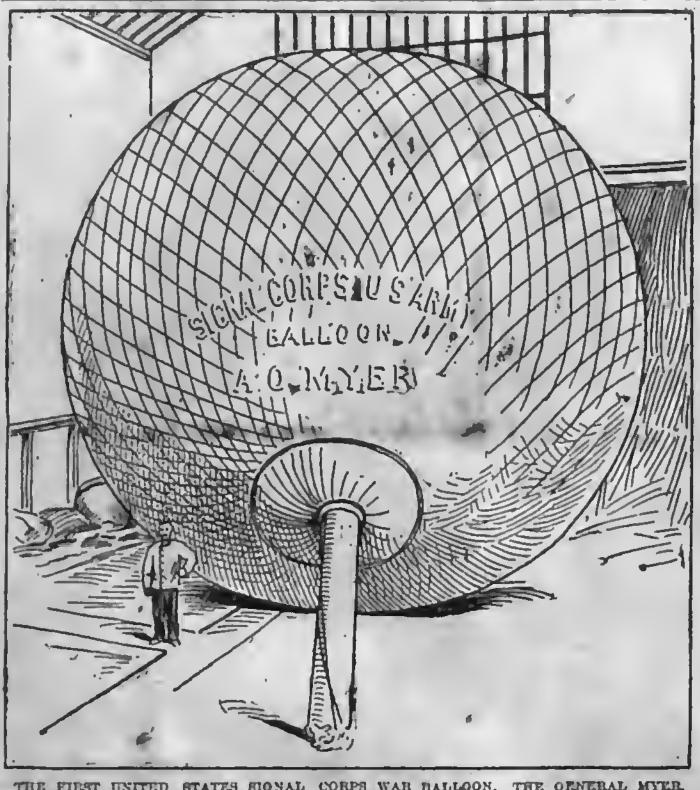

BALLOON ATTACHMENT FOR GOVERNING ASCENT AND DESCRIPT.

expected. No public experiments have as yet been made with this flying torpedo, which, if it is all that the inventor claims, will prove a most dangeroas power of destruction. Howover, till a practical test has been made so one can jadge of its merita.

In building the war balloon "Generai Myer" for the signal corps of the | smooth oiled board, and superimpos-

inflated was examented by ropes attached to the anet and to the top or apposite hole. This enspension permuted the balloon model to be turned as upon an arte, and thus brought every part of its enrience in rotation within casy reach of the operator. scaff il sramework, having a helgit nearly equal to the semidiameter of the model, was placed around one eide, or semicirenmference, thus praachting to the workmen a nearly vortical anriage on which to lay the membranes. The nice task of placing the membranes forming the fabric of the envelope was done by women. Each membrane was taken from the water, stretched ont npon the surface of the model, smoothed down by hand, and sides or ands, where irregular, were cut off by a pair of blant-pointed shears, which the women used most de'tly. Being wet and charged with the solution of fish gine, the membranes atretched tant over the surface and adhered while damp to the model. The membranes in this way were placed side by side, the edges overlapping, until the entire surface of the halloon model was covered with pac coherent inyer of the gold beater's skla. Over this first layer a second and third were put, in like manner, except that the membranes in each alternate were placed at right angles to the longitudinal direction of the precoding series. Over the third layer were piaced, from the top to the neck, long ribbons about an iach wide, of the samo material, laid in inttlee. These rlbbons were made by stretching a layer of gold-heater's skin npon n iong and

THE FIRST UNITED STATES SIGNAL CORPS WAS BALLOON, THE OFFICEAL MYER.

United States army the first real step was taken by the military officials of | this country to advance with the great war powers of Enrope in this line of military work. It is modeled after both the French and English military balloons and in mechanical details emhodies the best features of each. It resembles the Euglish in the similarity of material from which the envelope is made. The system of inflation is also like that of the English, the hydrogen being stored under presento within steel oylinders. In the plan of its suspension gear it is after the

French models.

The envelope of the "General Myer" is spherical in shape, with a capacity of 13,000 enbio feet, corresponding with the ordinary balloon need shroad for captive ascensions, and having a lifting power sufficient to carry two mon with the necessary signal lnstrnments. The envelope is formed of gold-beaters' skiu, which is especially adapted to this purpose, as it is impervious to the hydrogen gas and is very light. The membranes from which this fabric, gold-besters' skin, is formed are taken from the entralla of the buliock, each animal furnishing one. When strotched they are from eighteen to twenty-four Inches long and tou to sixteen Inches wide. After taking the membranes from the slaughtored bullook they are first scraped free from fat and soft parts and salted till ueeded for use. After taking them from the salt they are first enlied, washed and soaked in fresh water till the salt is taken out. Then a day or two before using they ore placed in a vessel containing soft water, in which has been dissolved. some fish glue, which adds to their adhering qualities when making the

fabric of the envelope. In making the envelope, says a correspondent in the Accounties, a

ing thereon five additional layers snocessively, and after drying, the fahric, which resembled parchment, was ont into narrow strips. These interlacing ribbons, or cords, appear sa diamond-shaped figures, increasing in size from each pole to the equator, and etrengthen the balloon fabric and limit its tenring to reuts no greater than about sixteen inches at the equator, in ease the balloon should come in contact with any sharppointed object. Over these strengthening cords three additional layers of gold beater's skin were piaced simllar to the first three. Around the top and about the neck an ndditional layer was placed to further atrengthed these parts, where the strain is great. After the fabric was thus completed the air was pumped out of the model, the neck of the cotton bug was separated from that of the ontside fahrie and air was blown into the true hailoon envelope between the skins and the cotton material, gently

UNINO DALLOOMS FOR CROSSING MIVERS.

In the top of the bail a envel pa was now out a streslar opening about aighteen inches in diameter, into which the valve ring or thimble was Innerted and coised, and into the thimhis was secured the valve. The envalope of the balloop being emplate, it was placed within the netting, the top of which was secured about the

MURTINO A BALLOON,

valve ring, and upon ropes being attached to the ring the halloon and notting were holsted, air was ngain blown into the balloon and the netting adinsted. After this the halicon was holsted higher and the anspension gear, with basket, was attached, after which came the captive goar -that is, the enhio which holds the balloon when It ascends. All was perfoot and the "General Myer" was ready for use.

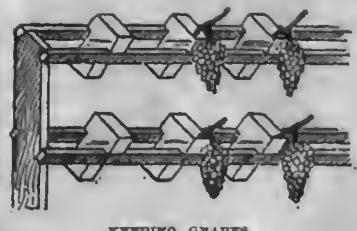

The cable serving to hold the balloon captive is made of several strands of steel wire, having in its center an Insulated wire for telephonic work, the ontside strands soting as return wires. The balloon, with complete equipment, is now at the Fort Riley (Kan.) School of Instructions, where it is being used in instructing the signal corps at that post. It has been prononneed by experts as a masterpiece in balloon hailding.

This is not the first time the United States army has made use of balloons. During the Civil War tho Federal Government recognized their value for making observation. In the month of September, 1861, one of the most daring noronauts, La Mountaine, furnished important information to General McClollan. His balloon rose from the Northern camp of the Potomac passed shove Washington. and The ropes WOLO then and La Monataine rose to the height of a mile and a haif and found himself directly over the lines of the Confederates. There he was able to perfectly chaerve their position and movements. When he had made his observations ho throw out bailast and rose to a height of three miles, when an air current carried him in the direction of Maryland, where he descended in safety. General McCiellan was so well satisfied with the observations taken taken that through his infinence the War Department received orders causing more halloons to he provided.

The nso of balloons, however, was discontinuod for many years, hat now it is helieved they will he given a permanent place in the equipment of mli armies. The science of peronantics has so advanced, new features being constantly added, that it is hard to dishelieve anything claimed by the enthasiasts in this line. The chances are that we will dispense entirely with ordinary fleets and do our fighting in the mir. The only thing needed just now to show what can be done with these much-talked-of war balloons is to start a first-class continental war.

A Device to Keep Grapes Fresh,

Glasses such as are shown in our il-Instration are one of the latest schemes of grape-growers in England to keep

KEEPINO GRAPES.

the fruit from drying during the winter. The jar is made of clear glass, and, having a wide month, water can easily be added from n small watering can as required without the trouble of taking it down or removing the grapes. The weight of the bunch will press the immersed end of the stom against the apper side of the hottle, and so prevent its slipping ont. It is always best to leave about eighteoa inches of stem beyond the banch when the grapes are cut, as otherwise the herries are apt to crack throughabsorbing too much of the water when first stored. It is well aim to cut off the immersed end about once in three, weeks to maintain a free passage for absorption.

PINDING A THEASUNE.

It lay for a long time on the edge of the little brook, deep in the forcet, sparkling ilke a tiny flame in the sunlight, and growing atili in the dusk like the bright ero of some fair) hidden in the grass.

One day, when a very bright aunbeam danced to and fro across it, the tortoise stopped to look curiously at it. He was a slow fellow at his best, and lingered so long that Bunny stopped, too, to see what it could be, and the squirrel from the fence-rail gave up scolding at the erows to ask them what was to be seen. The crows themselves are famous for chattering, so in less time than I can tell it, thay had spread the news to all the forest oreatures.

"It's not good to est," said the tortoise, "for I tasted it, and it's hard and cold."

"You cannot bite it, anyway," said Bunny. "I would much rather have a carrot."

"If It wore a nnt it would have a sholl," said the squirrei; "but I see it is not that."

"It might be a new kind of corn," said the crown and one of them flew down to peck at lt.

"Pahawi" said he, "It is harder than a stone, and nothing like a kernel of corn; we can do nothing with it!"

"It is certainly very protty," said the robin; "but I could not make s nest of it, and I for one would much rather have a cherry." "Porhaps the owi can tell us what it

found it under the soil when I was digging my barrow." So the aquirrel was sent to waken

Fifty Thomspail Founds Curchessed at a Time flow the Butter is fa ked and imperiod.

AMKED Payment-Convers Storart of the Colon States Navy, will to the C - beary General for that run haf the public sarview, where he gate the letter that is old w the fleers and men on Unde

thin's ships shore. "Wa advert so every curing in the nevers of r butter, just us we do t may the kind famps on," he and then we send out speci-Bent the il forent manufacturare the gh I the c try for the lo-I met dillera These specificat set lete that we shall be furslabed with extra creamery butter, made to June or O tober, put up in tine and pecked directly into the tine at the place of manufacture. The line must be made of the best charcoal lin, redipped before soldering, each tin to contain three pounds, the weight of the time not included. The time must be packed in sawdnet, in substancial wooden boxes, two dozen in esch, with two hoop-iron straps around each box, one at each and. Each tin must be earefully wrapped in paper, the tops of the boxes festened with screws, and the tine and boxes marked with the contents, the name of the contractor and the date of the packing. Directions for opening must also be placed on each package, and an instrument for opening the tins must be furnished with each 500 ponuda of butter. Contractors must guarantas that the hutter shall keep in good coodition for two years from the date of dalivery."

"How much do you usually buy, and where does it come from?"

"We usually call for about 50,000 pounds and give the contract to the lowest responsible hidder, but we are always very earoful to ascerlain if the bidder is responsible and whether he we do not want to send our boys to sea with bad butter and no prospect of getting better. A Boston firm has record is unequalled in the years, but last year a new company, the Ohlo and through West Virgioia. whose dairies are in Western New York, put in a lower bld and got the business. Before we gave them their contract I sent out an inspector to examine their dairles and their process of manufacture, which turned out to he satisfactory. After they had been doing the work for a few months I happened to meet the Boston man, and he asked me how the butter contruot was going on. I replied that it was all right and then learned that he had sent a man out to watch his competitor for several weeks to see whather the work was being properly done."

dalries?"

"They are nituated somewhere in Inwa, and all the proking is done out there. They furnished the butter to so satisfactory, that we permitted them to do it without inspection."

"Does the butter keep well for two

Years?"

"After a can of butter has gone around the world and up and down the tropics from one temperature to another, and melted and herdoned three or four times. you cannot expect it to be as good as it was when it came ont of the dairy, but it seldom gets so bad that one cannot eat it. In fact, under the oircumstances it is usually very satisfactory."

"Have you over used the foreign hutter-that which is packed in Holland and Denmark for the tropical There be lay bemoauling his fato

"l'es, we have used a good deal of it, but nuder the law we are compelled nen hastened to his rescue. to purchase all our supplies in the United States, except in emergeneral The Danish butter is very flue. I think I would rather take my chances with it for a long voyage than the American product. They put it up beautifully in glass jars, and their method of packing is probably superson to that used in the Uolted States, but at the same time it is much more exponsive. The Danish butter packed in glass jars costs from sixty to seventy cents a pound, while unrepacked in the costs from twonty-two cents to twenty-five cents by the and ty. Wa are now paying onler the present contract 24 4-10 cents s poond. I have never used the Holland butter, and know very little about it."

"Do the Dease and the Dutchmen use a g od 1 d of our eleomargarius and it use I out to a initerate their b=1= : ?"

Day Walk Against the Wind, I . o (O ver Won all Holmes's to the man the to

the feet with a suspending that weall

roung man, was working mear a big rook in the pribwestern corner of Margan County, Chio says the To two thate. He accidentally knocked to our polesta fue it to secon some threa letters chiseled in the surface. He began to dig at one and removing the remaining moss found a mesmes from Lew's Whetale, or Wetrel, as he is kn wn to ploneer history to the face of the rock is the legend "In y the peace which I have prepared for you," and to the right of this is the inscription out into the sandstone: "Engraved by me, Lewis Whetele, born in Virgioia, Febru-177 29th, 1752 "

The liscovery of this rock, long buried beneath the wood's moss and leaves, brings to miod once more the wonderful deeds ofdering of Whetzle. Ulose to this rock ran the old Federal urnil, which led from Grave Creek to the Sciote towns. It crossed the Muskingum River at the present town of Gaysport. The towo of the Delaware Indians was Dancan's Falls, five miles up the river. The trail ran close to this lettered rock no the high ridge just above it, and it is very likely that Whetzle did the work while on one of his scouting expeditions along this trail. It was oo one of those that Whetzle, armed only with his knife and tomahawk, attacked a camp of four Iodians. Three of them he killed, the fourth rao for his life and escaped.

Whetzle was a wonderful man in many respects. Not very tall, only avo feet nine inches, he was a man of enormous strength. His shoulders were those of a ginnt and his chest gave notice to all that he could run a race with any eavage and win. He was as dark and swarthy as an Indian, and his face was deeply pitted with the small-pox. His hair, and this was his special pride, reached, when combed to its full length, to the calves of he legs, and every Muskingum Indian had sworn to have his icaln. His eyes were black and shone knows how to do the business, because with a nerce arc. His feared nothing and was wild or tame as he was sither enemy or friend.

lils name will be forever connected That Talls the Story. Its furnished our supplies for several with the blstory of the border along

Vuluable Clerks.

Some one praised one of the girl clerks in a large shop to the head of the department, saying that she was to jundest and so pleasant, while so obliging, that she seemed so ideal person for the place "From your stundpoint, yes," was the reply, "but bardly from our own. She has all the good points that you mention, and which I agree the perfect saleswoman should not be withnut. But she does not sell goods enough to suit us. I mean she does not belp people to make up their minds and get them "Where are the Boston firm's out of the way and some one else in their places. The ideal clerk does that without pushing or forwardness. You would scarcely believe how dependent most customers are upon the navy so long, and the result was others' judgment, and how much quiet assistance they require in order to faciliate business. The most valnable clerk is that one who can reuder this help without appearing to do anything more than offer the stuff for others' chuice."-New York Jour-

A Moment of Doubt.

A good many soldiers, North and South, must remember moments which will enable them to sympathize with the apirit of a question recorded in a Southero magazine.

Smuggling a Corpsc.

"Of all the queer articles smnggled across the kio Grande, the queerest I ever heard of was a corpse," said James Murray, an old railroad conductor, to a St. Louis Globe-Deniocrat man. "In Mexico, when a foreigner dies and his frieods desire to send his body to his native inud, the government exacts a tax of \$250 for the privilege of shipping it over the railroad. lo 1844 Larry Fluberty, a prakeman, died at Silua, on the Moxican Central. He was a poor fellow. His muther, who lived in Colorado, but who had come on to nurso him, wanted the body shipped home. She couldn't raise the mouey and the boys took up a collection, but could only raise \$72. Then Tom Williams, a jovini conductor, put up a scheme to get the body to the States. The funeral was conducted in the usual olanner and pour Larry's body was placed in the ground. Two peros they neglected to fil in the grave snuggior o the R'o Graude."

notil after dark. In the interim Larry's loody was taken from the codin and placed in an old sack, and carried to an obscure hut, where it was placed in a truck and taken to the deput. The boys had secured a pass to El Paso for Mrs. Flaherty and Tom Williams went along to carry out the scheme. At Paso del Norte tho trunk was taken to a casa de huespedes, or boarding house, and the corpse was again traosferred to the sack. Mrs. Flaherty went to El Pasn and secured an nodertaker, who, with a plain box to his wagon, drove up to the river to a point designated. About 10 o'clock Tum, with his peco cargedore, managed to get across the river without attracting attention. Larry's Body was tenderly placed to the box and takeo uptown to the updertakor's, whore it was properly prepared, placed in a casket, and shipped to his old home. Tom Williams returned to Siloa safely and was ever fixed it with the graveliggers and afterward known as the 'cadaver

What a Funnt Name!

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains neither Oplum, Morphiso nor other Narcotle substance. It is a harmless substitute for Paregorle, Drops, Soothing Syrups, and Castor Oll. It is Picasant. Its guarantee is thirty years' use by Millions of Mothers. Castorla destroys Worms and allays feverishness. Cantorla prevents vomiting Sour Curd, cures Diarrhea and Wind Colle. Castoria relieves teething troubles, cures constipution and flatulency. Castoria assimilates the food, regulates the stomach and howels, giving healthy and natural sleep. Castoria is the Children's Panacou-the Mother's Friend.

Castoria.

"Castoria is an excellent medicine for children. Mothers have repeatedly told me of its good effect upon their children."

Dz. G. C. Oramo, Lawell, Mass.

"Castoria is the best remedy for children of which I am acquainted. I hope the day is not far distant when mothers will consider the real interest of their children, and usa Castoria lustead of the various quark notirims which are destroying their loved ouns, by forcing opium. morphine, soothing symp and other hurtful agents down their throats, thereby sending them to presuature graves."

DE. J. F. KINGHELOR,

Castoria.

"Cartoria is so well adapted to children than I recommend it are uperfor to any prescription Luown to me."

H. A. ARCHER, M. D., III So. Oxford St., Brooklyn, N. Y.

"Our physicians to the children's department have spoken highly of their experieuch in their outside practice with Castoria, and although we only have among our medical supplies what is known as regular products, yet we are free to confess that the merica of Castorin has won us to look with favor upon lt."

IF LOVE COULD RULE If leve sould rule the universe, How changed would all things be,

He would remove to language turse All burn to bis decree. He rank could ever intervens To stay affection's course, Twoold bow its head with towly mien

Before his gentle force. The earth would be so bright, The radiust see Would shad its warmth and light For every one.

A king might then a peasant wed, As empress love her page, A seamstress with a princers bred Might throw her winsome gage. Sweet sentiment would rule the carib, With hanner high unfarled, And happtores-no more a dearth, Coold Love but rule the world, How happy all would be, As Eden valo Again the earth would see, Could Love prevail.

A LOST LETTER.

-Bose Gaetler, in Hemeand Country.

H! Jeanne, you quite forgot to put a rose in my hair !" exclaimed Lillys Forsythe, as she stood in all her queenly heanty hefore the leng mirror in her bondoir.

"I should conalder my toilet incomplete without ft," she edded, as the little French

maid brought forth a crimson rose to pin in her mistress's halr.

Lillys made a beautiful pieture in the full glare of the light, which caused her raven hair to seem the hlacker ngainst the delicate yellow of her evening gown.

"Mademoiselle looks beantlinilike a bride," remarked Jenane.

"Do you think so?" said Lillys, gluneing dreamily at her own reflection, then brightening enddenly.

"Jeanne, you are a flatterer-I do only my third hall to-night, and to look like a bride! You may rest assured I nm going to enjoy life now and shall not marry for many a year."

"Ah! Mile. Lillys, you will be in love hefore you are aware," replied Jeanne, with a wise nod of her head, Lillys langhed gaily, took n few last

glances at herself in the mirror and was satisfied. The clock on the mantel etruck

nine, and Lillys was hattening the last button of her long gloves, when the servent announced Mr. Crayton. "Very well; I shall he down direct-

ly. Jeanne, throw my opera cloak over me; don't muss the lace—there, hand mo the fan-I'm ready."

The next moment Lillys had reached the drawing-room and greeted Mr. Crayton, her escort for the evening.

Arrived at the magnificently lighted denoing hall of Mrs. Upton's handsome musica, Lillye Forsythe was at once the centre of attraction.

Kenneth Crayton was madly in love with the young woman, nud that he was the favorite one of her admirers. for her she had quite neglected Ken-I say "favorite," inasmnoh ns she secepted his luvitations more frequently than others, but just this evening she became convinced that she not the least hit in love with him.

"Of course, I am to have my usual number of dances on your programme. Miss Forsythe?" said Kenneth Crny-

"I think not, Mr. Crayton, as Mr. Barlow has already secured several, tones: and-"

"Thea I am to understand that I may take what is left?" questioned Orayton, not without sareasm, for if there was one thing he could not endure it was to see himself colipsed by another, so ambitious was he and so tuble, saying: "A letter for Lillys." securtomed to success.

"No, not exactly," roplied Lillya with a sweet smile, the instrument which had never failed in conquering and, his mother having left the room,

"Confound Barlow, anyhow!" he

to-night, end so-"

"No," with a little pont, "not exactly; he has been vory kind to me all along."

With that the girl arose, and there was nothing for Barlow to do hat escort her and to wonder why she treated him with such exasporating

indifference. Lillys Forsythe was an orphan, end the belress of her father's enermons wealth. For a year or more she had made her home with a mnrried equaln several years her senior. Dorothy Kirk and Llllys Forsythe, heside heing consins, were the best of friends, and Gordon, Dorothy's husband, greatly appreciated the presence o his wife's relative at his home.

As for Lillys, she was perfectly heppy when learothy gave her permission to have the spartments adjoining the nursery, for she was exceeding fond of her cousin's children, and in turn was their idel. Of the three, rollloking, romping, fonr-yearold Teddy was the especial favorite of "Aunt Lillya." In her rooms he was monach of all he snrveyed, and not a morning went hy that he would not elip quietly into Annt Lillye's room to see if she were np.

The morning fellowing Mrs. Upton's dance Lillys was the first to reach the dining-room. When Dorothy came down and saw Lillys she said anxionaly:

"Why, my dear, how tired you look An evening's dissipation does not usually tell so plainly on your face."

"Tired? Yes-I did not sleep after I came home; now don't begin to worry shont that. I can make up for lost sleep all day, if I wish. By-thebye," changing the subject to avoid other questions, "did you ever meet Mrs. Upton's nleoo?"

"Miss Deane-Mildred Denne? Ch, yes, she visite this city every winter. They say Mr. Barlow is quite taken with her," said Dorothy, carefully scenning her cousin's face.

"Young Barlow is a man of splenced not helieve yon—besides, hrldes never make-np," put in Mr. Kirk, who had wear red roses. The ideal Jesune, just ceated himself at the table.

"You denced with him last night, of course?" asked Dorothy. "Why 'of course,' Dorothy?" ques-

tioned Lillys with a faint smile. "Well, my dear, I have seen him

pay you marked attention and hear he is Kenneth Crayton's rival-"

Nr. Kirk langhed. "Rival!" interrupted her consin That is a misnomer, I am afreld. What would Miss Deane say to that?" At this point Teddy came up to Lillys, declaring that "Doggy Jack

want to tomo in, auntie; he's a'ying for 'oo," and gave her no peace until in the whining nnimal.

versation at the hrenkfast table, but Dorothy's words rang in Miss Forsyth's cars for some time.

She know vory well that Horbert Barlow was in love with her -- how could she help it. There are certain things in life which need not he told; they It was a well-established fact that are felt. But it was her wish that no one should talk to her mhont it.

> Since Herbert showed his affection noth. But she was a proud young woman, and was hound not to show her love for a man who was spoken of hy all society people in connection with Mildred Donno.

That evening, while Lillye was out at a dinner party, Mr. Barlow called to see her. When Dorothy informed her of the fact the next morning she flushed slightly, but said in firm

"I am sorry to have missed him?" She slept longer than nanal that morning, and, noticing this, Teddy made It his task to find out the reason. In passing through the library he saw his mother put a letter on the

surface of the table and his eyes peered | soll?" at the white missive for n moment, he said to himself as he stood on tiptoo and reached his chubby little arms ncross the table: "Dess I'll take it to

'Won't tell 'oo." And when his at. When the appointed evening a

retreat, after having tucked away the letter in an old box in the closet.

Then he called down the stalrs trinmphantly: "Now I do tell enntie on 'oo," meaning the lunecent Jeanne.

The night efter the dence at Upton's Herbert Barlow had made a resolve to find ont as seen as possible whether or no Lillye Forsytheloved him. He was e man of great determination and decision, and consequently he set ont for the Kirk mansion to call upon the young lady. What was his dismay to find her ont! He enrely could never screw up the necessary courage again to face Miss Forsythe with the Intention of proposing to her-to her who had never given him the slightest enconregement.

But he was in love, and men in love are often desperate. Never before had a woman made so deep an impression upon him, for he was not tho young man to have the pieture of n different girl ennmelled on the luside of his watch every three months.

Lillys Forsythe's face was enameled on his heart, and nothing could offace it. Now that fate had not been propitlons, he decided to write a letter pleading his canso - how ctiff tho phrase counded. How cold his thoughts stood out in black and white. He could walt no longer. He felt that he must ask her that very night or never. He hed not loved before (the talk about him and Mildred Deane heing e fahrication of her own), and he would never again have faith in womankind if Lillys did not accept him.

Miss Forsythe arose at abent noon the next day, and npon reaching the sitting room was informed that a hox had arrived for her. As she opened lt the sweet, heavy perfume of n superb hongnet of American beanties greeted her, and she searched in vnin for n card of the sender.

"No name," she sald to herself. "It caunot he Kenneth Crnyton's peaco offering! He is too stahhorn for that. Parhaps"—and the color erept into her cheeke at the thought-'perhaps Mr. Barlow sent them. Pshawl Lillys Forsythe, you silly girl!" and she jamped up suddenly as if to shako off the fond Illusion. She did not know how acar the trnth she had come in her enspicions.

Six weeks later Lillys Forsythe hade her friends farewell, as she started on her trip to London, where she intended to visit an old nucle who was ocenpying e fine house on the ontskirts of the great metropolis. There she hoped to find some diversion, for her heart was heavy and she was greetly pershe went to the door with him to let plexed. Derethy wea dissatisfied with her refnsing "thet splendid Mr. Crey-This practically broke up the con- ton," besides two other men of good standing.

Since Herhert Barlow and trented her so coldly and finelly left the city altogether Lillys felt as if life in her native town would be unendarable.

In London sho was received with open arms by her uncle and his family, who were quite proud of their American connection. She became so enchanted with her new life and surroundings that she almost forgot her former home, all but the one person whose Image often came hefore her.

One day early in September she and her ougalu were taking a harried trip downtown on the underground

At one of the stations, as the condnotor suddenly slammed the door of their coupe, Lillys looked around, and, as she caught sight of a familiar face opposite her, exclaimed:

"Why, Mr. Barlow, how stragne to

see you here!" The goutleman nddressed smiled, and, extending his hand in greeting

"Yes, etrange, indeed. Whoever would have thought that we should Teddy's little noce just tonched the meet here, actually under English

> Then followed an introduction to Lillys's consin.

"When did you leave home?" quorrled Barlow.

"Oh, I have been here over since last opring," answered Lillys, "and In the noper corridor la front of how lung here you been travoling

TO GURANGE SILE PARRICE.

For every quart of water needed, parc, wash and grate one large potato. Put the potatoes into cold water and let them stand two days without stirring, then carefully pour off the clear "Te It possible," as a faint gleam of liquor into a vessel of a convenient size in which to wash the silk.

The washing is done by dipping the wilk np and down in the water; is there are spots draw the silk smoothly through the fingers, but do not rub it or allow It to wrinkle. Hang the silk over a line and let it drip nearly dry; then lay it flat on the table, and with a cloth wipe it first on one elde and then on the other. If it must be pressed place it between flannel and use a moderately hot iron. Ribbon can he nleely smoothed by winding it around a large round roller of smooth wood covered with several thicknesses of cloth. If you have new dress silk that is

not to be made up for months, by all means get a large smooth piece of round wood to roll lt on. Straight breadths of old silk are kept best if rolled in this way. - New York Dispatch.

MARKINO CLOTHES.

A number of people shirk the very simple task of marking their clothes legibly and permanently, and this, too, at a time when almost everybody's things are sent to a professional wash, to be mixed up with heaps owned hy strangers. Yet writing one's name on a collar or handkerchief is almost as simple as ecribbling it on paper. A vory little patience is required, and a fire should be close at hand to fix the ink indelihly. Printed tapes and letters to he sewn on are well enough in their way, hat not much protection against an article boing etolen, as they can he picked off hy anyhody. A namo conspicuously inked on the material is a better safeguard.

With new brands of marking iak it is necessary to pay some slight attention to the directions issued with each bottle, so as not to write with a steel pen when a quill is demanded, nor to wre heat when none is required, nor to mix liquids wrongly when two happen to be given. If n woman shrieks ont that two dozen fine new handkerchiefa and n whole butch of table napkins have dropped into holes where she printed her name she has evidently trented her chemicals by the opposite plan to that advised. However successful you may be yourself, never recommend your own favorite make of marking ink to anyhody, for fear the process should he conducted the wrong way and you receive the blame. Even among our nearest and dearest friends there are some who insist on blandering over very sumple work, and it is hest for them to learn wisdom from their own exploits.-New York Advertiser.

RECIPES.

Escalloped Tomntoes-Pnt n layer of tomatoes in an earthen dish; then one of bread crumbs, with a little engar, butter, pepper and sult; nnother of tomatoes, another of bread, nntil the dish is full. Bake throsquarters of an hour.

Asparagus Omelet—A nice breakfast dish is asparagus with eggs. Boil two pounds of the vegetable, ont off the tonder tops and lay them on a huttered pio dish, seasoning with papper and salt, and two tablespoonfuls of melted hutter. Beat four eggs just enough to break the yolks and pour over the asparagns. Bako eight miuntes in a good uven. Serve with shees of tender

broiled ham. Oorn Mnfilns -- Two oups of corn meal, sifted with a teaspoonful of salt, one and a half onpa of rice, one tempoonful (not heaping) of lard, onough boiling water to scald it all and leaves it thick, two eggs well beaton, one-half teaspoosinl saleratus, enough sour milk to make a rather thin butter. Grease your gem pans slightly with lard (we not the Sontheru muslin rings and like them better) and bake as you bake corn dodgors. And you will have some royal muflins.

Duchess Soup-This soup is ore of Mrs. Rorer's and is a very gool one. Put a quart ut milk over the fire in a donble boller, with a blade of maca and allee ouch of carrot and onnon; rub togother two tablespooninis each uf butter and flour sal wh a the milk boils remove the vegetables and stir In this roux; add three heaping table. spooufuls of chee a take from the tire Nashna, N. LOVE AND BYPNOTISM.

WE GEODOR ETHERLDERY WALCH.

HAT visit to Docter Secor reamed fatal to my hapes. Seims had always been somewhat erratic and chimerical to ker mental teudencies. There was a wayward independence in her nature that marked

ber either for a dejuded crauk or a er ag grates. I trembled sometimes we to which.

I did not love her for these abnormal qualities, but more for the beauty of her form and face, and a quiet, sympathetic personality that slnmthe red somewhere in her nature. She did not look kindly upon my efforts to reclaim her from her mental fada. I feit at times that she believed in occall things just to shock my sense of propriety. When I was fully satisfied of this, I swuog around to the other extreme and indulgently listened to ali of her wild vagaries concerning mysticism, spirits, mind-readers and astral bodies.

This was how we came to visit Dr. Secor, the celebrated hypnotist, I decided to disarm her of all susplcion. I would not cross her in anything. But I soon had cause to regret my approval of this extreme command her to love me. course. How well I remember the words of the doctor when he examined her as a subject for exhibiting his almost supernatural power!

"I do not wish to use you. You have in you the making of a powerful hypnotist. Tield to no one, but make others vonr subjects."

With that he dismissed her, but no one saw the look of crultation in ber eyes as I did. She was now conwinds of her power. Her eyes were feverushly bright as we left the meeting. I know that the mischief was done, and I quietly waited the re-ADITA.

Selms never did things by halves. When I saw the books piled upon her dainty table two nights after this visit, I knew that she was making a study of hypnotism. At first she was shy about her new fad, but she soon launched holdly forth into her subject. She was reading everything about the question, from the first principles up to the latest discoveries. I tried to disconrage her, and to draw her mind toward other interesting subjects. But that was not Salma to yield until she had exhausted her passion, and the

thing itself began to cloy. One evening I called later than neual. I was not lu an enviable frame of mind. Things had irritated me that day, and I found myself in the desperate mood of wishing to bring matters to a climax between Scima and myself. If she would not accept my lava I woold give up the chase. would use avery legitimate means and argument to force her to love and socept me. She could not be won hy quiet, modest wooing. Hhe required the determined opposition of a mind that would conquer her own in the straggla for supremacy.

Blrange that I did not think of the words of Dr. Secor, as I revolved those thoughts in my braid! I never see thought of Selma's mind being stronger than my own. I had always treated her as a half-spoiled, petted that needed a master and, advasar, I had necomes outly assumed

the function for myself. Double my self-presention and seifa expt to one great subject as I extered her room, I soon became aware of a peculiar se sation. The art to the r m had all least wage, and fie a berself looked size g y a bland fascinating Her eyou were at my !- ta-t and attractive. "You have seen Dr. Secor?" She nodded her head simply, and shrugged her protty shoulders.

"Selma, this is going too far," I burst out wrathfully, 'You should not do mach-"

Sha waved her hand imperionaly, and said decidedly:

"Stop. You have said enough."

This was so unlike Selma that I obeyed. I thought her eyes grew more feverisb, and she was making graceful motions with her hands that fascinated me. I watched her mutely.

Then I grew dizzy. I elotched the arms of my chair and caught for my breath. It dawned upon me that she was trying to hypnotize me. Dr. Secor had initiated her into the mysteries of his power. The thought at first was revolting and made me an-But before I could speak a heavy sigh came from Selma. She was breathlog hard and fast. Did she think to trlumph over me, to bring my mind under her control? Sho might have a strong personality, but I was willing to test my own powers against bera. I braced myself for the ordeal, and returned her steady gaze.

The sudden wave of strength which swept over me seemed to confuse and mystify her. She eighed again, and elatched her hands nervously. Then she gradually grew quiet and passive: Her hands seemed to lose their power, and her whole form dropped back into her chair listlessly. A wild feeling of exultation possessed me. I felt that I had triumphed. She was in my power. I could do with her se I piessed.

Then came the strong desire to make her love me. I could force her to that against her will. She could not escape. I had come to declare my love. I would first tell her of it, and if she refused my pleadings I would

"Selma," I spoke slowly, and my voice souoded strange and unnatural. You are in my power."

She raised her head elightly as if to

"Not entirely," she faltered. have failed, but you have not wbolly trinmphed."

"But I can," I suswored. "No, no, I shall not yield. You can

go no further."

It was a far-away voice, and it floated to me softly. It seemed unlike that of Selma. The room itself looked peoniiar. There was something in the atmosphero that was enervating. My own limbs were dragging me down heavily into the chair. The sensation etarticd me.

"Selma, you must do my bidding," I said again, determined to try the effect of my power. "What I com-

mand, you must do." She laughed a low, silvery inugh. Then mockingly, she added:

"You are over-estimating your power as I over-estimated mine. am not your subject yot."

It was not necessary to tell me this. I could see that our two minds were struggling for the mastery, and each was baffled by the other. My feelings were strange beyond comprehension. I felt almost as if I was in a trance. I realized that if I should yield one inch Selma would triumph and obtain complete ascendancy over me. A weakening sensation crept upon my limbs and nearly paralyzed them. The thought that I was yielding inch by inch roused me, and I recovered my strougth again with a great effort. As I regained possession of my powers, Seima seemed to waver and grow more ouryous.

"I shall conquer," I muttered, more to my myself. "You must yield. shall read your life, and make you tell

me of the foture !" Her hands fluttered nervously and her syelids drooped. Her whole form threatened to collapse before ms. For the moment I had gained the subtle

power over her. "Tell mc, Selms, what I ask ol 700," I said, raising my hand. ''It is impossible to resist longer. You are my subject. You must answer me trathfully."

She nodded assent, and whispered

lowiy:

"Yes, I must auswer you; but you cannot sek me the questions you wish. I know what they are. You cannot and them, but I will answer what you

"Not partly, hat wholly." I an swered, quickly, Sim amiled as abe answered:

"You are mistaken. You are partly under my power. You cannot rise from your chair without permission from me, and you cannot ask me the question you desire."

To show how absurd her words were ! attempted to get up, hat my limbs were paralyzed. I could not move. Neither could I tell her of my love and ask her to accept me. The realization of my condition made the perspiration stand out in great beads on my forehead.

"How can I free myself from this position!" I asked in desperation.

"Only by obtaining my coosent." "And yon? How can you return to

your normal condition?" 'You have it within your power to

relieve me." "Then I will do it as soon as I have

shown my power over you. I must tell you that I-" 'I could not get any further. The

words choked in my mouth. My pride forsook me at the thought of my utter helplessness. I bowed my head. "It is useless. There is some mysterious power holding me back. I

cannot tell you."

"If I willed it so you could, and I would have to answer you truthfully." I did not raise my head. I was sick

of the whole husiness. It was ruinous to the mind and nerves. I almost dreaded the result of such a strain upon Selms with ber sensitive, emotionsi nature.

"Release me, Salma, and I will withdraw my influence," I said, suddenly raising my head.

But as my eyes met her bright ones a delicious sensation stole over me. heavy oppression was withdrawn. I only realized that Selma was before me-bright, heantiful, entrancing. most eloqueut language I poured ont the story of my passion. I even rose from my chair and advanced to her side. She was still aitting motionless, with her hands hanging listlessly by her side. She answered my questions as a child—as a mere automaton. There was no animetion or emotion lu her words or voice. She was en-

tranced, hypnotized. I recoiled from her. The truth flashed across my mind in an instant. At my bidding she had reliquished her subtle power over my mind, but in my enthusiasm I had forgotten to release her. From a partial state of hypnotiem she had then rapidly fallen into a totally quiescent, passive condition. I had nuconscionaly taken undneadvantage of her and obtained her mechaniesl confessions of love. The thought

filled me remorse and disquietude. I turned from her and bowed my head on my hands. The whole night's experience had been disagreeable and even horrible to me. I rowed that it would be the last time I should ever tamper with hypnotism or other unsecu mental forces. I dreaded to look around and see what effect the whole occurrence had upon Selma. She was quiet and immovable, but ber hard breathing fell monotonously upon my

'Seima," I said, finally, turning to her, 'let us never try this experiment again."

She looked up at me and shuddered. She was now in her normal condition. The feverish brilliancy of her eyes bad disappeared.

"No, never," she murmured. "It seems as if I was waking out of a dream. But it was a delicious dream, or at least part of it. I thought that--"

A flush tinged her cheeks, and she dropped her eyes.

"What, Selma?" I asked. "Nothing, except that we were together, and that I was happy."

She remembered nothing. Her confessions of love were a secret with me. With them still ringing in my cars, I then repeated my tale of devotion, knowing full well beforehaud that she loved me, though ontwardly she might reem indifferent. —Home and Country.

A Wonderlul Modale,

A picture, measuring searcely more than 6x8 inches in lie frame, and yet composed of 40,000 minute pieces of natural-colored woods, has just been hnng npou the wall of Memorial Hall. This strange confisenon confused This wonderful trinmph of mosaic work was put together by an Italian

Hats With Strings a Summer Fashion.

One of the really new ideas in the world of fashion has come in the shape of strings on hats. Not strings in the shape a giri ties them on to the sailor hat when abe takes a steamer ride to Long Branch, but ribbon strings on the low-crowned English style of hat, with broad hrim that rolls on both sides. These bits of ribbon can be any bright color. Then the how, nest-My spirite rose with a jump. The ling under the chin, has to be very carefully selected, for if it is pink when it ought to be blue, or blue when it ought to be dark red or dark My tongue was now free, and in the green, the effect is not likely to in-

creass the attractiveness of any girl. These strings are about an inch and a half wide, and are fastened at the back inside the hat. At first sight they seem very droll, but to many faces they are a great attraction, although they may prove a trifle warm shout the throat later on. They can be worn by sweet sixteen or her mother equally as well, although the girl with a pretty curve at the throat is advised not to destroy it, unless she can the the most coquettish and Freuchy of how knots. - New York Journal.

Finger Natis Like Birds' Claws.

To what extremes physical deformation for the sake of complying with certain fashlons or as the fulfilment of ascetic vows can be carried is explained by Dr. I. Rauke, of Germany, in his recently published anatomical treatise entitled, "Dor Mensch." He demonstrates that in all lands ecrtain forms of malpraetice have been indulged in. In old Pern, for instance, little children were placed under a head press and their scalps were shaped ohlong. This was especially the case with the daughtere of the nobles and with the members of the royal families.

Jose House, who does not perform any manual labor and permits his finger nails, with the exception of those on his index fingers, to grow several luches long. Finally they become entangled and resemble somewhat the claws of an old bird.

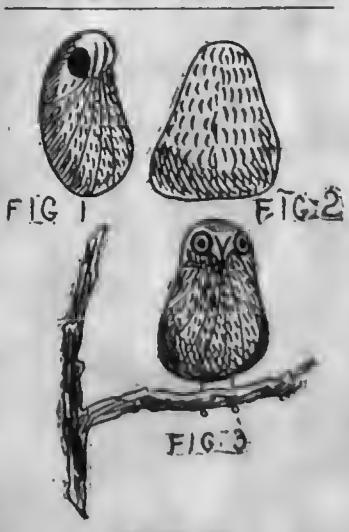

Thousands of Homeless Scots,

It was very interesting to read in the Spectator that, owing to the extension of deer forests in Scotland, goiden cagles and wildests are on the increase and are now safe from extirpation there. But there is also a suggestive per contra, which likewise is not unconnected with the extension of deer forests, the removal of the cottager from the land, the divorce of Scots from Scotland. About ten years ago there were 90,000 vagrants in Scotland. There are now shout 150,-000 to a population under 5,000,000. Germany has about the same number to a population of 50,000,000. It would be matter for regret if golden eagles became extinct in Scotland. But it is a matter for sadness that they are flying over the comparatively recent homes of now homeless sons of the land. —London Spectator.

A Peanut Owl.

Got a peannt with as large a top as possible. Mark with a pen a round spot as represented in the ilinstration, and make little marks on the shell to indicate feathers. For wings cut a small piece of tissue paper in the shape shown in Figure 2, and paper with ink. Paste this on the back and

over the sides of the peanut. The cyes are made with a little

A PEANUT OWL.

round plece of white paper and a black head, through which a small pin runs, and is then stuck into the peannt at the black spot. Fasten the peanut to a twig by running two pins through the hranch, and you will have a very fair owl. Amusing designs may be made by grouping several of these owls together. - New York Becorder.

Has a Donbio Beart,

When the Mercer County (N. J.) Medical Association was in session a few years ago a colored man named William King came before them for examination. He claimed to have two bearts, but a careful examination rerealed the fact that his heart was double instead of being two senarate blood pumping organs. Besides having two dutioct pulsations, which could easily be felt, he had wonderful

Indian History.

feature that makes them remarkacounty who was on the best of terms with the Indians. It was John Sharp, who lived where his son Jacob Sharp now lives, on one of the fine estates of the Edrny district. Mr. Sharp died at the age of near a hundred years. The Indians always came to his house when in Pocahonias, and he always fed them. They made their sattlers had no idea that any In-

His grandson remembers his telling of an adventure with an Indian. He hod just killed a deer whon an Indian auddenly appeared and said "Sharp give me that deer!" He offered him holf, but the Indian would only allow him to take home enough for one meal, and the hide. As they were skinning the deer, the Indian cut off smoking meat. He shouldered the meat and pluged into the forest. He can easily be imogined as claiming the oredit of having killed it when he reoched the camp; this suggests that the hunter who bought some game on William's River, last fall, may not have been os original as he supposed he was.

throughout the various tribes.

Snrvey," the eastern boundary of which is thirty miles long, extending into Randolph County. The inmates of this cabin, Drennin and his wife, were attacked one ovening by the Indians. Drennin hid in some bushes near the honse ond the Indians came right upon him, and he was about to give himself up, thinking he was discovered. Ho was mistaken, however, as they passed on and took his wife prisoner. He raised the olarm and a party followed the Indians so close, that they killed the woman on the Crooked Fork of Elk, about fifteen miles to the North. Some of the settlers beyond recognized her scalp, as she had wonderfully long black hair.

There is a legend, not fully substanticoted, that Simon Girty, the disbolical white Indian leader, who perverted thu great chief Cornstalk, whom the whites trusted, met his death in the Little Levels of Pocahontas County. The story goes that he came hy alone seeking to hide himself, and that ed him en a log-heap, au ond thot was far too good for him. If we only knew this for certain and the place a monument would be erected thero.

A Bad Break.

Aldursou's successor from the Third district, is a frequent visitor to cent visit been be put up at the Na Wost Virginians and Southern peoplo generally. One morning bu mawing the stubble from the dis tluguished West Virginian's mobile constounace untitally started a only man whose defint be felt us n 18081. reofing. Crossots Preserv personal loss, was Mt. Alderson;

This remark immediately interstthat aborton or lengthen ed Mr. Hullng and aronsent blin able farm. On the forty-acre tract is a trom the dese toto which be had heavy body of yew pine and other timtallen under the combined Minenee box. of the barber's mentpolation and Andrew Price, Attorney two-pitched voice. "So you knew Mr. Aldersov, did yauf" inquired

"Yes, indeed, sub," coutloued the burber, encouraged to find ble customer taking an interest to his talk. Whooling, w. ve. "He was one of my regular custom.

ers, sah. He had a mng and brosh here-they are up in the ease aow, It would be interesting if we sall, and he was a mighty fine could know just what atrocities man. A hig, handsome man, wid Wrote the Indians have committed in the an easy face to shave, and a powbounds of what is now Pocahontas erful good speaker. And I am County. "When we possed Fort Wadsworth they seemed to he taking a rest and "Why, the fight! the light!" ex- swimming side by side. As we got grees. claimed the sick man, raising his nearer the city it flashed across me that the hundreds of vessels anohored in the upper Bay would be in great danger if these moddened beasts, who didn't seem to know where they were their struggle.

"I made up my mind then to do what was perhaps a toolish thing, but the mate was an old whaler himself, gle reef and tacking up the bay," he ond he agreed end urged me to go went on. "There was a pretty heavy abood. My idea was to stand hy, ees on and it was blowing hard. I lower the yawl and go efter the whales was at the wheel, and had called for with a couple of harpoons that we had my mate to come and take a tarn while banging in the oahin. The cook I went below. I happened to look and a sailor were willing to go along, and had the boot ready in a jiffy."

Captain Strange's voice suddenly sank to a whisper. He stopped talk-Bedford whaler, and I ought to know ing and looked at the walls and then something about whales. Well, what | lu the doctor's face. It was clear he I saw as the mate took the wheel was did not realize exactly where he was. two tremendous hig bull wholes about | Up to this time he had been perfectly a hundred yards astern of na. Their coherent, but when he resumed he arched backs were glistening in the appeared to have lost the thread of mooulight. I knaw they were bulls his story. This, however, was but for is six feet in diameter and coats \$4250 a momout.

"There was a streak of blood in our wake," he continued, "and the foam was obnrued red. The whales were tired, and, as we thought, dying. They kept swimming side by side, and stayed near the top su long that I feit sure one or both of them was deed. Then there was so much blood, so mnch blood."

Another pense of aminule and then the outwobs were brushed away again. "Oh, yes, the boat. We lowered ber and I went forward with the barpoous. The cook and the sailor took the cars and we starled back. We hadn't been off the deck of the bark loure than ton minutes whon the big bulls were at it ngelu. They were coming in our direction, and frum our low bual they looked like a couple of moving islands. 'fhere's pleuty of life in 'em.' said the mate. but one is stronger than the olber.' As hospolio they were rushing at each other, dlving, lurning and shooting up head tirst, all the time gulting nearer and nearer. If they kept straight in their course they would passour portrail by fifty yards, but when they sounded you couldn't tell where or whee they were coming op. But they passed us safely enough and bearled op the bay, and we after

DOUSEHOLD-AFFAIRS.

WATERPROOF CELLARA

A cellar can be so ennetruoted as tn be waterproof, if the bottom of the floor is first covered with cement, the walls built thereon laid in coment and the exterior of the walls covered with coment

This mokes practically a water-tight basn. The cement used must be the best Portland cemeni, one part; clean sharp sand, one part. After a cellor is built it is not so easy to make it waterproof. Still it can be done. Cover the exterior of the wall with the above cement, ditto the bottom, and work the coment in under the bottom of the wall, says the National Builder.

If these directions are followed you will succeed. But if chesp meterials are need and the wark hadly done you will be sure to fail. A drain put around the autside of the wall, or even inside, below the cellar floor, may be efficient in carrying off the water if yan can giva it a gaod delivery.

THE OVEN.

Far spange cake and pound cake have heat that will in five minutes turn a piece of white poper yellow.

For all other kinds of cut cake use au oven that will in five minutes turn a piece of white paper dark yel-

For bread and pastry have an oven that will in five minutes turn a piece of white paper dark brown.

When the oven is too hot at first a crust farms on the bread or cake, which prevents it rising. It is better whon baking bread and cake to have the oven a little slow at first and increase the heat gradually.

When baking puff paste the heat should be greatest first and decrease later. This is to keep the paste in

When the oven is too hot the tompersture may be reduced by putting in it a pan of cald water.

When baking in an oven that is ton hat at the top, fill with cold water a dripping pan which is about an inch deep and place it on the tap grate of the oven. Should the aven be too hot on the hottom, put a grate on the bottom, put a grate under the articla that is to be baked.

HAME OUT OF A HAUSEHALD.

The living room is the one raam in the house which, shove all others, should be bright and obcerful. If any room must be neglected let it not be the living raom. Have here refined pictures. plenty of backs and current literature. This is the place for the piano, the most comfortable chairs and cosey corners. Within the precinats of such a room one may shot out the world and farget that there are any troubles to bear.

The character of a racm depends npon its wall decorations, its carpets, its pintures and its curtains. We should be careful to have these of the right kind, for all others are more accessories. "Wa could not afford expensive things," said a newly married couple, "so we chose the camfortable ones;" and this idea, "comfort," is the secret of all roam furnishing.

It is not elegant surroundings that make people happy and contented. "What can a queen have more than we?" asks an exchange. "If she is cold she can obsorb no more heat than we. If she has millions to satisfy her appetite she can eat na more than we. If she has millions of boautiful dresses she cau wear but one at a time, the same as ourselves. Her jewels are so costly that they are looked up in a vouit for safe keeping; when she wears them upon State occasions she is constantly shadawed by a goard. We admire ours through the window of the silver smith's and are not burdened with the responsibility of their being stoleu, nor annoyed by a detective. Air, water, and sunlight, the essentials of life, are as free to us as to the queeu; and even her throne is not so comfortable as the old rocker in your sitting room. Wa should, therefore, not despair if we cannot afford costly things in our homes. We oau muke our living rooms bright and comfortable, and that goes a long way toward happiness. - Buston Budgot.

Germao Rice Podding-Mix boiled rice with a well-beaten egg and a little milk. Four the mixture into a pan until it is about one incb thick, and baka till a delicate brown. Powder with sugar and serve with aream of veuille sauco.

Obeese Potatoes-Boil patatoes in salt water, rub them till soft, add three tablespooduls of grated cheese, a little milk and a little batter. Put them into a pudding dish, scatter bread crumbe over the top, and bake half an hour or more.

Scall good Fish - Plake the cold fish. Market Girls of Paris.

Some levely types of animal heanty may be found among the dairy, fruit, and salad hooths of the great Central Murket of Paris. Here is where artists, scuiptors, glass painters, and lliustrators go for national types and native beauty. The young wamen are always bare-headed and brawa as auts, but they have a coquetry of their awn that is aften irresistible. with the glass thay get an their halr. Lika Carmen, thay have an eye far calars. Thay went the raughest of dresses, but undar the average is a custom-mada carset. And such figpres! Most of the collars are turned la, and the V-shaped corsage, finished with a poise ar knat af green, must be sean to be appreciated. Every matian is grace, every article -even the tiefall lazenge of cheese, tha twin artichakes of red huttons in their heads, the peach in a green icaf a la Venus in har sheli-is artistic.—New Yark World.

Society women often feel the effect of too much gayetyballs, theatres, and teas in rapid anecession find them worn out, or "run-down" by the end of the season. They suffer from nervousness, alceplessness and irregularities. The smile and good

spirits take flight. It is time to accept the help offered in Doctor Pierce's Favorite Prescription. It's a medicine which was discovered and used by a prominent physician for many years in all cases of female complaint " and the nervous disorders which arise from it. The "Prescription" is a powerful uterine tonic and nervine, especially adapted to woman's delicate wants for it regulates and promotes all the natural functions, builds up, invigorates and curcs.

Many women suffer from nervous prostration, or extinuation, owing to congestion or to disorder of the special functions. The waste products should be quickly got rid of, the local source of irritation refleved and the system lavigorated with the "Pre-scription." Do not take the so-called celery compounds, and nervines which only put the nerves to sleep, but get a lasting cure with Dr. Pierce's Favorite Prescription.

"FEMALE WEAKNESS."

Mrs. WILLIAM HOOVER, of Bellville, Richland Co., Ohio, writes: "I had been a great sufferer from 'female weakness;'

I tried three doc-tors; they did me no good; I thought I was an invalid forever. But I heard of Dr. Pierce's Favorite Prescription, and then I wrote to him and he told me just how to take it. took eight bottles. I now feel entirely will

River News

It is with a feeling of thankfulness that the people of Pocahontas learn that the lumber companies whose operations are carried on within her bounds have escaped serious loss in the recent floods. It is all owing to the magnificent county, Virginia, if that county ten. is clear of ice. About 500,000 feet If it refuses to do this it will give ten miles below Ronceverte. No as yet. The Greenbrier has bein West Virginia, for the losses on all other rivers have been heavy.

Died, at Mingo, January 8, 1896, Miss Ato Marshall, effect daughter of H. B. Marshall, Beq., aged, 21 years. Thus endeth a short but very neeful life. The following beautiful lines are incribed to her departed friend by Miea Fnnnie McLanghlin, of this place:

They made her a bed on the snow-bound hill, When the clouds wepl many a tear; They laid her to rest with loving hands,

When the snuset hour was near. Through the valley of death we saw

Where the shadaws hung deep and But it led to the gates of a beantiful land-

To the land of light and tong. The stern business of life proceeds as o

And all that is 'neath the sun,

But our sister's part is done. Oh! a blissful release from a sad, and

And the long, slow weeks of pain, Ohl a blissful exchange of a sin-sick For a kingdom where Christ deth reignl

Then weep not for her who hath gone Whom we miss from her place to-day;

If beaven had tears, she might weep Should we in exile delay.

Then plant a sweet rose on the silent hill,

And bid it to bloom and wave, It is better far than the marble cold, Of that peaceful and new-made grave

WITHIN the last few weeks the B. & O. R. R. has acquired additional railroad in West Virginia to the extent of one hundred and cighty miles, comprised of what is known as the Camden system. This knocks out our chances for the road from Camden on the Ganit will connect with the C. & O. R. tion. At Flatwoods, in Braxton County, the line forks; one branch going on in the same general direction, which is the branch that will be completed to Charleston, shortly. The other branch runs up to Camdan-on-the-Gauley, and that is the road we fully expected here long ago. It has traversed one-half of the distance from Flatwoods to Marlinton. Flatwoods is about eighty miles away, and the way liss through a rough, andeveloped country all the way,

A good many remoniber when Col Mcchan, of New York, went through Pocahontas last aummer on the line of his proposed railroad votes \$300,000 to ils construction. the county the go-by.. The Condon-Lane Road and the Elkins Road up Cheal have quit their raoing to see who will tap the Green. brier Valley first. We have never railroad thriller since we have been in the newspaper business.

with my Jarry,"

She heard the tramp of a herse, and looking out saw Joe riding away on his beautiful hay, on which he always appeared so well.

est mind to put away the tea-cakes for

to-morrow's supper, and not let her

Kitty went np to her room and

placed her wild flowers in water, and

then, standing near the window,

brushing hack her carls, she soid to

"I dare my I do tesse Joe too

much, but I can't help it. I suppose

it's my nature, and just -- just as Tahby

berself, a little romorsefully:

have a taste of 'um to-day.'

"Oh, eo he's gone to the Harveya!" said Kitty, with a toss of her head as she watched him turn into the orehard road. 'That's to pay me off, I suppose, and excite my jealousy. Well, he'll see. As if I cared!"

Consin Jemima might as well have carried out her threat of not producing the ten-cakes, for though Kitty made a point of deveuring two or three of them with a great show of relish, they had lost their charm for her, and more than once she folt as though they were cheking her.

of not going down until Joo had finished his breakfast, and she explied as over the stair hanisters she saw how he lingered about the porch and hallway, pretending to he looking for missing articles, before he finally followed his father to the cornfield. It gloemily: was o husy time, and they did not come home to dinner.

Kitty thought it the longest day she had ever spent, end she hardly knew what to do with nerself.

But in the evening she put on a white lawn dress, with a rose in her hair, and went down stairs to where Joe was sitting on the porch stops, pretending to read a paper.

He looked up wistfully, hat Kitty passed him and wont ont to the little tront gate, where presently she was on the porch, shaded by the trellie engaged in an animated chat with young Dr. Bewers, who happoned to be passing.

> Joe knew that the doctor admired Kitty, and while they stood chatting together, ho sat on the steps, scowling like a thunder oloud.

. Whou the doolor had taken leave and passed on, he strede down the "it's moreu I would do. How often he's got to ask that gal before che con-

walk and stood by her side. "Kitty, did I hear you promise that -that fellow to go with him to the

pionic next 'Incsday?" "What fellew?" said Kitty, ioily. "You know who I mean!" Joe was pale with lealousy out wrath. "And you know that there was an under-

standing that I was to escort you." "I presume that I can go with whom I choose," enewered Kitly, hanghuly.

"So you can, and I want you now to make your choice; hut I tell you, once for all, that if you throw me over for that Bowere, you'll he done with me forever!"

Kitty was almost frightened at his vehouseuse. She drow back a little as

"My goodness, Joe, what e temper

you have!" "You've driven me to it; you've made me desperate," he retorted. 'This thing must come to an end hetween us one way or the either, for I

will hear it no loager." She leaked at him, and her cheeks

flushed scarlet. "What right have you to speak to me in that tone? I am not your slave and I shall go with Dr. Bowers to the

plenie." Joe looked steadily into her eyes for an instant.

"Very well," he said, abortly. And, turning on his heel, walked off in the direction of the baro.

"Joe," called his mollier from the kitchen window, "come ic, Joe! Snpper's ready. Come, Kitty, child, he fore the rolls get cold."

"I don't want any supper, mother. and mother"-Joe pansed a momeot, and his voice seemed to lower and falter- "dou't expect me home tonight. I'm going over to Unele Thomas's.

And he walked on very fast, as if not wishing to be questioned.

As Kitty entered the cool dining. room, where the family tok their meals, Mrss Jemins was clanling at the wealow with her aims whimi-, 'How to you be so cruel, Jemph?' | gazing after Joe.

"Lunt buy" shy and shandy 'that boy am't he if I shouldn't 't be Kitty, I robed a ough be a rirused if be a driven to do

a narrow hat rather deep stream between mossy banks.

This was'b favorite hannt of hers. There had been a little rustio bridge "Oh, she'll come round some time?" leading to the hillside heyond, but said Annt Betsy, cheerfully. 'It's the this had been tately washed away after way with same gals, though I'm bound to confess that I never carried on so a heavy rain.

She could see as she approached the spot one of the posts still standing; and-wasn't that Jooleaning against it like a statue, his arms folded and his eyes hent upon the deep little pool which the rocks had just here bent in?

A sudden fear seized Kitty. Surely, surely Joe could not be thinking of drowning himself?

She stood still and breathless, watching him. Presently he started as if from a reverie, and with lips compressed into a look of firm resolve, picked up a coil of rope which lay at his feet.

Then he walked round and round a tall and straight thlip tree growing close to the edge of the stream, looking up Into its thick foliage, as if for a convenient branch to which to attach it.

Kitty'e heart froze with herror. For a moment she felt paralyzed; hot, as ehe saw Joe carefully make a noose on one end of the rope and prepare to elimh the tree, the spell was broken. She rushed forward with a wild

shrick, and threw her arms shont him. "Oh, Joe-dear Joe-don't do such a dreadful thing! Don't hang yoorself, Joe-for my sake, don'll Ob, The next marning sho mede a point | forgive me-forgive me, dear Joo, and I'll uever, never tease or grieve you again !"

> A strango expression came over Joe'e face. Ho looked down into the white face of the sobbing girl, and his stern eyes softened. But then he said,

"How cen I believe you, Kitty? You have as good as told me that you did not love me. And without you I den't care to live."

"Don't talk so dreadfully, Joe! I--I do leve you l"

"Answer me truly, Kitty! Do you really fove me?"

"Yes," sobben the girl. "Indeed I ile, Jee! Please, please throw away that dreadful rope !"

"Not yot, Kitty. Do you leve me above everybody else in the world?"

"Yes-oh, yes!" "And will you marry me, Kitty?"

'Yes, I will, Joe-indeed I will!" "When?" "Any time-to-morrow-new," said

Kitty, in desperation—"if you will only throw away that dreadful thing and come homo with me. "There, then!"

And Joe flung the coil of repe into a thicket of laurel on the other side of the stream, and drawing Kitty to bim,

kissed her solomuly. "Remember, you have promised to he my wife, Kitty."

"Yes," she answered, meekly. And so, hand in hand, they returned

through the orcherd and the gardon to the hense. "Of all the enacconntable criticrs on the face of the yearth," said Miss

Jemima, surveying them from the pantry window, "rleommend me to a young courtin' couple I don't believe they know their own minds five minutes at a time, augwayel"

Uncle Jerry was sitting on the top step of the porch.

"Well, Joe," said he, cheerfully. "her you fixed that gum-tree with the rope all ready to pull it down in the right direction?"

"No, sir," answered Jue, quietly. "I'll altend to it to morrow."

"Well, don't forget it, for the sooner that bridge is anished the better, if we want to get the hay over in good time."

Kitty stopped and looked straight up into Joe's face.

. "You've deceived mo!" sho said, indignantly.

"No, Kitty, I haven't. You deceived yourself, dear, and I'm very glad of it, l assure you.

"Olad?" said Kitty, representally. and with her face all crimmo with

"Because but for that I might never have gotten you to my 'Yes,' and we might both have been forever in a reable. Unt oow how happy we are going to be for the rest of our lives "

"dill it was a dreadfully monac trick!" hitty murmurel, as also allowed doe to kess her again behind Uncle Jerry's back. "And if you ever may a word shout it to any one, I'll never forgive you - never 1"-Beturday Night.
